Summary of PHARMAC decisions

EFFECTIVE 1 NOVEMBER 2010

New listings (pages 20-21)

- Insulin pen needles (B-D Micro-Fine) 32 g x 4 mm – maximum of 100 dev per prescription
- Captopril (m-Captopril) tab 12.5 mg, 25 mg and 50 mg
- Etravirine (Intelence) tab 100 mg – Special Authority – Retail pharmacy
- Darunavir (Prezista) tab 300 mg and 400 mg – Special Authority – Retail pharmacy
- Etanercept (Enbrel) inj 50 mg autoinjector – Special Authority – Retail pharmacy
- Levetiracetam (Levetiracetam-Rex) tab 250 mg, 500 mg and 750 mg
- Selegiline hydrochloride (Apo-Selegiline) tab 5 mg – Section 29
- Donepezil hydrochloride (Donepezil-Rex) tab 5 mg and 10 mg
- Varenicline tartrate (Champix) tab 0.5 mg x 11 and 1 mg x 14, 1 OP; tab 1 mg, 28 tab and 56 tab packs – Special Authority – Retail pharmacy
- Sunitinib (Sutent) cap 12.5 mg, 25 mg and 50 mg – Special Authority – Retail pharmacy
- Bacillus calmette-guerin (BCG) vaccine inj 2-8 x 100 million CFU – PCT only – Specialist – Subsidised only for bladder cancer
- Pharmacy Services (BSF Arrow-Enalapril) brand switch fee – no patient co-payment payable
- Acetylcysteine (Acetadote) inj 200 mg per ml, 30 ml – Retail pharmacy-Specialist

Changes to restrictions (pages 28-39)

- Sodium chloride (Pharmac and Multichem) inj 0.9%, 20 ml – removal of Up to 5 inj available on a PSO
- Enalapril (Arrow-Enalapril) tab 5 mg, 10 mg and 20 mg – a brand switch fee may be dispensed from 1 November 2010 until 31 January 2011
- Adalimumab (HumiraPen and Humira) inj 40 mg per 0.8 ml prefilled pen and syringe – amended Special Authority criteria
- Etanercept (Enbrel) inj 25 mg and 50 mg autoinjector – removal of Retail pharmacy-Specialist prescription – amended Special Authority criteria
- Venlafaxine (Efexor XR) cap 37.5 mg, 75 mg and 150 mg – amended Special Authority criteria
- Levetiracetam tab 250 mg, 500 mg and 750 mg – removal of Special Authority
- Pilocarpine (Isopto Carpine) eye drops 1%, 2% and 4% - removal of Section 29

Decreased subsidy (pages 56-57)

- Mucilaginous laxatives dry 325 g OP (Konsyl-D), 380 g OP (Mucilax), 450 g OP (Isogel), 500 g OP (Normacol)

Summary of PHARMAC decisions – effective 1 November 2010 (continued)

- Mucilaginous laxatives (Metamucil) dry-original flavour, regular texture only, 336 g OP
- Mucilaginous laxatives (Mucilax) sugar free, 275 g OP
- Mucilaginous laxatives with stimulants (Normacol Plus) dry, 200 g OP and 500 g OP
- Vitamin b complex (Apo-B-Complex) tab, strong, BPC
- Vitamins (MultiADE) tab (BPC cap strength)
- Clopidogrel (Arrow-Clopidogrel and Plavix) tab 75 mg
- Furosemide (Mayne) inj 10 mg per ml, 2 ml
- Ceftriaxone sodium (AFT) inj 500 mg
- Sodium cromoglycate (Cromolux) eye drops 2%, 10 ml OP

Increased subsidy (pages 56-57)

- Daunorubicin inj 2 mg per ml, 10 ml (Pfizer), and inj 20 mg for ECP (Baxter)
- Terbutaline sulphate (Bricanyl Turbuhaler) powder for inhalation, 250 µg per dose, breath activated

Pharmacy Brand Switch Payments begin 1 November

Brand switch payments for pharmacy will occur on certain pharmaceuticals from 1 November 2010. Detailed information on claiming these payments will be sent to community pharmacies with the November 2010 Update. Information is also available on the PHARMAC website. The first medicine to be eligible for a brand switch payment is enalapril. Pharmacy software vendors will also be supplying detailed information on how

to claim these payments. Brand switch payments can only be dispensed during the first three months of the Sole Supply period.

Donepezil – fully subsidised

As previously notified, the PHARMAC Board approved the funding of the Donepezil-Rex brand of donepezil for the treatment of Alzheimer's disease and other types of dementia as soon as possible following Medsafe registration. Donepezil-Rex 5 mg and 10 mg tablets are now registered and funding will start on 1 November 2010.

Prescriptions for donepezil hydrochloride 5 mg and 10 mg tablets must be dispensed 'stat' (all-at-once) unless prescribed under Close Control restrictions.

Levetiracetam – fully subsidised

The Levetiracetam-Rex brand of levetiracetam 250 mg, 500 mg and 750 mg tablets will be fully subsidised without the requirement for Special Authority approval from 1 November 2010. Funding for the Keppra brand of levetiracetam was previously available via Levetiracetam Special Access (LSA); this has now changed as follows:

- No new approvals (initial or renewal) for Keppra will be granted under LSA from 1 November 2010;
- All existing LSA approvals (both initials and renewals) for Keppra with expiry dates beyond 1 November 2010 will remain valid until expiry or until 30 April 2011, whichever is sooner;
- All LSA approvals (initial or renewal) for Keppra granted between 1 August 2010 and 1 November 2010 will have a 6-month expiry date;
- From 1 November 2010, patients with expired LSA approvals will need to be dispensed the Levetiracetam-Rex brand in order to receive a subsidised brand; and
- The Keppra brand will be delisted from the Pharmaceutical Schedule from 1 November 2010. Any subsequent claims will be processed via the Exceptional Circumstances claiming system.

Varenicline (Champix) – fully subsidised with Special Authority

Champix tablets will be subsidised, subject to Special Authority criteria, as a smoking cessation treatment from 1 November 2010. The criteria allow subsidy for patients who have previously had two trials of nicotine replacement therapy or a trial of bupropion or nortriptyline. Please refer to page 20 for further details.

Sunitinib (Sutent) – fully subsidised with Special Authority

Sutent 12.5 mg, 25 mg and 50 mg capsules will be subsidised from 1 November 2010, subject to Special Authority criteria, for patients with advanced renal cell carcinoma. Please refer to page 21 for further details.

Etanercept (Enbrel) – fully subsidised with Special Authority

Funded access to etanercept will be widened from 1 November 2010. Funding will include, in addition to juvenile idiopathic arthritis, last-line use in psoriatic arthritis, rheumatoid arthritis, ankylosing spondylitis and psoriasis. Funded access will be subject to Special Authority criteria

substantially the same as those that apply to adalimumab (Humira and HumiraPen) for these indications. Eligible patients will be able to access adalimumab or etanercept (in any order). Please refer to page 33 for further details.

Adalimumab (Humira and HumiraPen) – Special Authority criteria amendment

The Special Authority criteria for adalimumab for ankylosing spondylitis will be amended to remove the criteria relating to ESR and CRP from 1 November 2010.

Etravirine (Intelence) – fully subsidised with Special Authority

Etravirine (Intelence) 100 mg tablets will be fully subsidised, subject to Special Authority criteria, from 1 November 2010. Etravirine will be subject to the same Special Authority criteria that currently apply to all oral antiretrovirals for HIV treatment.

Darunavir (Prezista) – fully subsidised with Special Authority

Darunavir (Prezista) 300 mg and 400 mg tablets will be fully subsidised, subject to Special Authority criteria, from 1 November 2010. Darunavir will be subject to the same Special Authority criteria that currently apply to all oral antiretrovirals for HIV treatment.

Insulin pen needles – new presentation fully subsidised

A new presentation (32 g x 4 mm) of insulin pen needles, B-D Micro-Fine brand, will be listed in the Pharmaceutical Schedule from 1 November 2010. The restrictions that currently apply to insulin pen needles and disposable insulin syringes will remain and will be applied to the new listing.

Temporary Apo-Selegiline listing

A new selegiline hydrochloride (Apo-Selegiline) 5 mg tablet pack will be subsidised from 1 November 2010. This pack is unregistered and will be supplied by Apotex in accordance with Section 29 of the Medicines Act 1981. This is a temporary listing to cover a potential out-of-stock.

Isopto Carpine eye drops now registered

Pilocarpine (Isopto Carpine) eye drops 1%, 2% and 4% have been approved by Medsafe for distribution within New Zealand. Isopto Carpine has been supplied by Alcon in accordance with Section 29 of the Medicine Act 1981 since August 2009; however, this restriction no longer applies.

Tender News

Sole Subsidised Supply changes – effective 1 December 2010

Chemical Name	Presentation; Pack size	Sole Subsidised Supply brand (and supplier)
Captopril	Oral liq 5 mg per ml; 95 ml OP	Capoten (Sigma)
Coal tar	Soln BP; 200 ml	Midwest (Midwest)
Fluoxetine hydrochloride	Cap 20 mg; 84 cap	Fluox (Mylan)
Flutamide	Tab 250 mg; 100 tab	Flutamin (Mylan)
Glycerol	Liquid; 2,000 ml	healthE (Jaychem)
Haloperidol	Inj 5 mg per ml, 1 ml; 10 inj	Serenace (Sigma)
Haloperidol	Oral liq 2 mg per ml; 100 ml	Serenace (Sigma)
Haloperidol	Tab 500 µg; 100 tab	Serenace (Sigma)
Haloperidol	Tab 1.5 mg; 100 tab	Serenace (Sigma)
Haloperidol	Tab 5 mg; 100 tab	Serenace (Sigma)
Hydrocortisone	Inj 50 mg per ml, 2 ml; 1 inj	Solu-Cortef (Pfizer)
Lignocaine hydrochloride	Inj 1%, 5 ml; 50 inj	Xylocaine (AstraZeneca)
Lignocaine hydrochloride	Inj 1%, 20 ml; 5 inj	Xylocaine (AstraZeneca)
Lignocaine with prilocaine	Crn 2.5% with prilocaine 2.5%; 30 g OP	EMLA (AstraZeneca)
Lignocaine with prilocaine	Crn 2.5% with prilocaine 2.5% (5 g tubes); 5 tubes	EMLA (AstraZeneca)
Methotrexate	Inj 25 mg per ml, 2 ml; 5 inj	Hospira (Hospira)
Methotrexate	Inj 25 mg per ml, 20 ml; 1 inj	Hospira (Hospira)
Morphine sulphate	Cap long-acting 10 mg; 10 cap	m-Elson (Multichem)
Morphine sulphate	Cap long-acting 30 mg; 10 cap	m-Elson (Multichem)
Morphine sulphate	Cap long-acting 60 mg; 10 cap	m-Elson (Multichem)
Morphine sulphate	Cap long-acting 100 mg; 10 cap	m-Elson (Multichem)
Morphine tartrate	Inj 80 mg per ml, 1.5 ml; 5 inj	Hospira (Hospira)
Morphine tartrate	Inj 80 mg per ml, 5 ml; 5 inj	Hospira (Hospira)
Nystatin	Cap 500,000 u; 50 cap	Nilstat (Sigma)
Nystatin	Tab 500,000 u; 50 tab	Nilstat (Sigma)
Phenoxymethylpenicillin (Penicillin V)	Cap potassium salt 250 mg; 50 cap	Cilicaine VK (Sigma)
Phenoxymethylpenicillin (Penicillin V)	Cap potassium salt 500 mg; 50 cap	Cilicaine VK (Sigma)
Sodium chloride	Inj 23.4%, 20 ml; 5 inj	Biomed (Biomed)
Sodium citro-tartrate	Grans effervescent 4 g sachets, 28 sachets	Ural (Arrow)

Looking Forward

This section is designed to alert both pharmacists and prescribers to possible future changes to the Pharmaceutical Schedule. It may also assist pharmacists, distributors and wholesalers to manage stock levels.

Possible decisions for implementation 1 December 2010

- Calcium folinate (Calcium Folate Ebewe) inj 1 g – price and subsidy decrease
 - Carboplatin (Carboplatin Ebewe) inj 10 mg per ml, 45 ml and 100 ml – price and subsidy decrease
 - Epirubicin (Epirubicin Ebewe) inj 2 mg per ml, 50 ml and 100 ml, and (Baxter) inj 1 mg for ECP – price and subsidy decrease
 - Escitalopram (Loxalate) tab 10 mg and 20 mg – new listing
 - Gemfibrozil (Lipazil) tab 600 mg – new listing
 - Glycerin with sodium saccharin (Ora-Sweet SF) suspension, 473 ml OP – new listing – Only in extemporaneously compounded oral formulations – Only in combination – Only in combination with Ora-Plus
 - Glycerin with sucrose (Ora-Sweet) suspension, 473 ml OP – new listing – Only in extemporaneously compounded oral formulations – Only in combination – Only in combination with Ora-Plus
 - Interferon beta-1-beta (Betaferon) inj 8 million iu per 1 ml – price and subsidy decrease
 - Isosorbide mononitrate (Duride) tab long-acting 60 mg – price and subsidy decrease
 - Labetalol (Hybloc) tab 50 mg, 100 mg and 200 mg – price and subsidy decrease
 - Menthol (Midwest) crystals, 25 g – new listing – Only in combination – Only in combination with aqueous cream, 10% urea cream, wool fat with mineral oil lotion, 1% hydrocortisone with wool fat and mineral oil lotion, and glycerol, paraffin and cetyl alcohol lotion
 - Menthol crystals – added to the list of dermatological galenicals
 - Methotrexate (Methotrexate Ebewe) inj 100 mg per ml, 10 ml and 50 ml and (Baxter) inj 1 mg for ECP – price and subsidy decrease
 - Methylcellulose (Ora-Plus) suspension, 473 ml OP – new listing – Only in extemporaneously compounded oral formulations – Only in combination
 - Methylcellulose with glycerin and sodium saccharin (Ora-Blend SF) suspension, 473 ml OP – new listing – Only in extemporaneously compounded oral formulations – Only in combination
 - Methylcellulose with glycerin and sucrose (Ora-Blend) suspension, 473 ml OP – new listing – Only in extemporaneously compounded oral formulations – Only in combination

► SA1054 Special Authority for Subsidy

Initial application from any relevant practitioner. Approvals valid for 3 months for applications meeting the following criteria:

All of the following:

- 1 Short-term therapy as an aid to achieving abstinence in a patient who has indicated that they are ready to cease smoking; and
- 2 The patient is part of, or is about to enrol in, a comprehensive support and counselling smoking cessation programme, which includes prescriber or nurse monitoring; and
- 3 Either:
 - 3.1 The patient has tried but failed to quit smoking after at least two separate trials of nicotine replacement therapy, at least one of which included the patient receiving comprehensive advice on the optimal use of nicotine replacement therapy; or
 - 3.2 The patient has tried but failed to quit smoking using bupropion or nortriptyline; and
- 4 The patient has not used varenicline in the last 12 months; and
- 5 Varenicline is not to be used in combination with other pharmacological smoking cessation treatments and the patient has agreed to this; and

▶ SA1055 Special Authority for Subsidy

Initial application only from a relevant specialist or medical practitioner on the recommendation of a relevant specialist. Approvals valid for 3 months for applications meeting the following criteria:

All of the following:

- 1 The patient has metastatic renal cell carcinoma; and
- 2 Either
 - 2.1 The patient is sunitinib treatment naive; or
 - 2.2 The patient received sunitinib prior to 1 November 2010 and disease has not progressed; and
- 3 The patient has good performance status (WHO/ECOG grade 0-1); and
- 4 The disease is of predominant clear cell histology; and
- 5 The patient has intermediate or poor prognosis based on the NCCN clinical practice guidelines for kidney cancer; and
- 6 Sunitinib to be used for a maximum of 2 cycles.

Renewal only from a relevant specialist or medical practitioner on the recommendation of a relevant specialist. Approvals valid for 3 months for applications meeting the following criteria:

Both:

- 1 No evidence of disease progression; and
- 2 The treatment remains appropriate and the patient is benefiting from treatment.

Notes:

Sunitinib treatment should be stopped if disease progresses.

NCCN clinical practice guidelines for kidney cancer are available at http://www.nccn.org/professionals/physician_gls/f_guidelines.asp

- 2 The patient will not be prescribed more than one infusion in the 12-month approval period.
The patient may not have had a prior approval for Paget's disease within the last 12 months.

Renewal – (Underlying cause was, and remains, glucocorticosteroid therapy) from any relevant practitioner.

Approvals valid for 1 year for applications meeting the following criteria:

Both:

- 1 The patient is continuing systemic glucocorticosteroid therapy (≥ 5 mg per day prednisone equivalents); and
2 The patient will not be prescribed more than one infusion in the 12-month approval period.

The patient may not have had a prior approval for 'Underlying cause glucocorticosteroid therapy' within the last 12 months.

Renewal – (Underlying cause was glucocorticosteroid therapy but patient now meets the 'Underlying cause – osteoporosis' criteria) from any relevant practitioner. Approvals valid without further renewal unless notified for applications meeting the following criteria:

Both:

- 1 Any of the following:

- 1.1 History of one significant osteoporotic fracture demonstrated radiologically and documented BMD ≥ 2.5 standard deviations below the mean normal value in young adults (i.e. T-Score ≤ -2.5) (see Note); or
1.2 History of one significant osteoporotic fracture demonstrated radiologically, and either the patient is elderly, or densitometry scanning cannot be performed because of major logistical, technical or pathophysiological reasons. It is unlikely that this provision would apply to many patients under 75 years of age; or
1.3 History of two significant osteoporotic fractures demonstrated radiologically; or
1.4 Documented T-Score ≤ -3.0 (see Note); or
1.5 A 10-year risk of hip fracture $\geq 3\%$, calculated using a published risk assessment algorithm (e.g. FRAX or Garvan) which incorporates BMD measurements (see Note); or
1.6 Patient has had a Special Authority approval for alendronate (Underlying cause was glucocorticosteroid therapy but patient now meets the 'Underlying cause – Osteoporosis' criteria); and

- 2 The patient will not be prescribed more than one infusion in a 12-month period.

Notes:

- a) BMD (including BMD used to derive T-Score) must be measured using dual-energy x-ray absorptiometry (DXA). Quantitative ultrasound and quantitative computed tomography (QCT) are not acceptable.
b) Evidence used by National Institute for Health and Clinical Excellence (NICE) guidance indicates that patients aged 75 years and over who have a history of significant osteoporotic fracture demonstrated radiologically are very likely to have a T-Score ≤ -2.5 , and therefore do not require BMD measurement for treatment with bisphosphonates.
c) Osteoporotic fractures are the incident events for severe (established) osteoporosis, and can be defined using the WHO definitions of osteoporosis and fragility fracture. The WHO defines severe (established) osteoporosis as a T-score below -2.5 with one or more associated fragility fractures. Fragility fractures are fractures that has quantified this as forces equivalent to a fall from a standing height or less.
d) A vertebral fracture is defined as a 20% or greater reduction in height of the anterior or mid portion of a vertebral body relative to the posterior height of that body, or a 20% or greater reduction in any of these heights compared to the vertebral body above or below the affected vertebral body.

	Initial application — (rheumatoid arthritis) only from a rheumatologist. Approvals valid for 6 months for applications meeting the following criteria:			
	Either:			
	1 Both:			
	1.1 The patient has had an initial Special Authority approval for etanercept for rheumatoid arthritis; and			
	1.2 Either:			
	1.2.1 The patient has experienced intolerable side effects from etanercept; or			
	1.2.2 The patient has received insufficient benefit from etanercept to meet the renewal criteria for etanercept for rheumatoid arthritis; or			
	2 All of the following:			
	2.1 Patient has had severe and active erosive rheumatoid arthritis for six months duration or longer; and			
	2.2 Treatment is to be used as an adjunct to methotrexate therapy or monotherapy where use of methotrexate is limited by toxicity or intolerance; and			
	2.3 Patient has tried and not responded to at least three months of oral or parenteral methotrexate at a dose of at least 20 mg weekly or a maximum tolerated dose; and			
	2.4 Patient has tried and not responded to at least three months of oral or parenteral methotrexate in combination with at least two of the following (triple therapy): sulphasalazine, prednisone at a dose of at least 7.5 mg per day, azathioprine, intramuscular gold, or hydroxychloroquine sulphate (at maximum tolerated doses); and			
	2.5 Either:			
	2.5.1 Patient has tried and not responded to at least three months therapy at the maximum tolerated dose of cyclosporine alone or in combination with another agent; or			
	2.5.2 Patient has tried and not responded to at least three months therapy at the maximum tolerated dose of leflunomide alone or in combination with another agent; and			
	2.6 Either:			
	2.6.1 Patient has persistent symptoms of poorly controlled and active disease in at least 20 active, swollen, tender joints; or			
	2.6.2 Patient has persistent symptoms of poorly controlled and active disease in at least four active joints from the following: wrist, elbow, knee, ankle, and either shoulder or hip; and			
	2.7 Either:

Changes to Restrictions - effective 1 November 2010 (continued)

continued...

- 2.7.1 Patient has a C-reactive protein level greater than 15 mg/L measured no more than one month prior to the date of this application; or
- 2.7.2 C-reactive protein levels not measured as patient is currently receiving prednisone therapy at a dose of greater than 5 mg per day and has done so for more than three months.

Initial application — (Crohn's disease) only from a gastroenterologist. Approvals valid for 3 months for applications meeting the following criteria:

All of the following:

- 1 Patient has severe active Crohn's disease; and
- 2 Any of the following:
 - 2.1 Patient has a Crohn's Disease Activity Index (CDAI) score of greater than or equal to 300; or
 - 2.2 Patient has extensive small intestine disease affecting more than 50 cm of the small intestine; or
 - 2.3 Patient has evidence of short gut syndrome or would be at risk of short gut syndrome with further bowel resection; or
 - 2.4 Patient has an ileostomy or colostomy, and has intestinal inflammation; and
- 3 Patient has tried but had an inadequate response to, or has experienced intolerable side effects from, prior systemic therapy with immunomodulators at maximum tolerated doses (unless contraindicated) and corticosteroids; and
- 4 Surgery (or further surgery) is considered to be clinically inappropriate.

Initial application — (severe chronic plaque psoriasis) only from a dermatologist. Approvals valid for 4 months for applications meeting the following criteria:

Either:

1 Both:

1.1 The patient has had an initial Special Authority approval for etanercept for severe chronic plaque psoriasis; and

1.2 Either:

- 1.2.1 The patient has experienced intolerable side effects from etanercept; or**
- 1.2.2 The patient has received insufficient benefit from etanercept to meet the renewal criteria for etanercept for severe chronic plaque psoriasis; or**

2 All of the following:

2.1 Either:

- 2.1.1 Patient has "whole body" severe chronic plaque psoriasis with a Psoriasis Area and Severity Index (PASI) score of greater than 15, where lesions have been present for at least 6 months from the time of initial diagnosis; or
- 2.1.2 Patient has severe chronic plaque psoriasis of the face, or palm of a hand or sole of a foot, where the plaque or plaques have been present for at least 6 months from the time of initial diagnosis; and

2.2 Patient has tried, but had an inadequate response (see Note) to, or has experienced intolerable side effects from, at least three of the following (at maximum tolerated doses unless contraindicated): phototherapy, methotrexate, cyclosporin, or acitretin; and

2.3 A PASI assessment has been completed for at least the most recent prior treatment course (but preferably all prior treatment courses), preferably while still on treatment but no longer than 1 month following cessation of each prior treatment course; and

2.4 The most recent PASI assessment is no more than 1 month old at the time of application.

Note: "Inadequate response" is defined as: for whole body severe chronic plaque psoriasis, a PASI score of greater than 15, as assessed preferably while still on treatment but no longer than 1 month following cessation of the most recent prior treatment; for severe chronic plaque psoriasis of the face, hand or foot, at least 2 of the 3 PASI symptom subscores for erythema, thickness and scaling are rated as severe or very severe, and the skin area affected is 30% or more of the face, palm of a hand or sole of a foot, as assessed preferably while still on treatment but no longer than 1 month following cessation of the most recent prior treatment.

Initial application — (ankylosing spondylitis) only from a rheumatologist. Approvals valid for 6 months for applications meeting the following criteria:

Either:

1 Both:

1.1 The patient has had an initial Special Authority approval for etanercept for ankylosing spondylitis; and

1.2 Either:

1.2.1 The patient has experienced intolerable side effects from etanercept; or

1.2.2 The patient has received insufficient benefit from etanercept to meet the renewal criteria for etanercept for ankylosing spondylitis; or

2 All of the following:

2.1 Patient has a confirmed diagnosis of ankylosing spondylitis for more than six months; and

2.2 Patient has low back pain and stiffness that is relieved by exercise but not by rest; and

2.3 Patient has bilateral sacroiliitis demonstrated by plain radiographs, CT or MRI scan; and

2.4 Patient's ankylosing spondylitis has not responded adequately to treatment with two or more non-steroidal anti-inflammatory drugs (NSAIDs), in combination with anti-ulcer therapy if indicated, while patient was undergoing at least 3 months of an exercise regime supervised by a physiotherapist; and

2.5 Either:

2.5.1 Patient has limitation of motion of the lumbar spine in the sagittal and the frontal planes as determined by a score of at least 1 on each of the lumbar flexion and lumbar side flexion measurements of the Bath Ankylosing Spondylitis Metrology Index (BASMI); or

2.5.2 Patient has limitation of chest expansion by at least 2.5 cm below the following average normal values corrected for age and gender (see Notes); and

2.6 A Bath Ankylosing Spondylitis Disease Activity Index (BASDAI) of at least 6 on a 0-10 scale; and

7— Either:

7.1 An elevated erythrocyte sedimentation rate (ESR) greater than 25 mm per hour; or

7.2 A C-reactive protein (CRP) level greater than 15 mg per litre.

Notes: The BASDAI must have been determined at the completion of the 3 month exercise trial, but prior to ceasing NSAID treatment. The BASDAI, ESR and CRP measures must be no more than 1 month old at the time of initial application.

Average normal chest expansion corrected for age and gender:

18-24 years - Male: 7.0 cm; Female: 5.5 cm

25-34 years - Male: 7.5 cm; Female: 5.5 cm

35-44 years - Male: 6.5 cm; Female: 4.5 cm

45-54 years - Male: 6.0 cm; Female: 5.0 cm

55-64 years - Male: 5.5 cm; Female: 4.0 cm

65-74 years - Male: 4.0 cm; Female: 4.0 cm

75+ years - Male: 3.0 cm; Female: 2.5 cm

Initial application — (psoriatic arthritis) only from a rheumatologist. Approvals valid for 6 months for applications meeting the following criteria:

Either:

1 Both:

1.1 The patient has had an initial Special Authority approval for etanercept for psoriatic arthritis; and

1.2 Either:

1.2.1 The patient has experienced intolerable side effects from etanercept; or

1.2.2 The patient has received insufficient benefit from etanercept to meet the renewal criteria for etanercept for psoriatic arthritis; or

2 All of the following:

2.1 Patient has had severe active psoriatic arthritis for six months duration or longer; and

2.2 Patient has tried and not responded to at least three months of oral or parenteral methotrexate at a dose of at least 20 mg weekly or a maximum tolerated dose; and

continued...

Changes to Restrictions - effective 1 November 2010 (continued)

continued...

- 2.3 Patient has tried and not responded to at least three months of sulphasalazine at a dose of at least 2 g per day or leflunomide at a dose of up to 20 mg daily (or maximum tolerated doses); and
- 2.4 Either:
- 2.4.1 Patient has persistent symptoms of poorly controlled and active disease in at least 20 active, swollen, tender joints; or
- 2.4.2 Patient has persistent symptoms of poorly controlled and active disease in at least four active joints from the following: wrist, elbow, knee, ankle, and either shoulder or hip; and
- 2.5 Any of the following:
- 2.5.1 Patient has a C-reactive protein level greater than 15 mg/L measured no more than one month prior to the date of this application; or
- 2.5.2 Patient has an elevated erythrocyte sedimentation rate (ESR) greater than 25 mm per hour; or
- 2.5.3 ESR and CRP not measured as patient is currently receiving prednisone therapy at a dose of greater than 5 mg per day and has done so for more than three months.

Renewal — (rheumatoid arthritis) only from a rheumatologist or Practitioner on the recommendation of a rheumatologist. Approvals valid for 6 months for applications meeting the following criteria:

All of the following:

- 1 Either:
- 1.1 Applicant is a rheumatologist; or
- 1.2 Applicant is a Practitioner and confirms that a rheumatologist has provided a letter, email or fax recommending that the patient continues with adalimumab treatment; and
- 2 Treatment is to be used as an adjunct to methotrexate therapy or monotherapy where use of methotrexate is limited by toxicity or intolerance; and
- 3 Either:
- 3.1 Following 4 months initial treatment, the patient has at least a 50% decrease in active joint count from baseline and a clinically significant response to treatment in the opinion of the physician; or
- 3.2 On subsequent reapplications, the patient demonstrates at least a continuing 30% improvement in active joint count from baseline and a clinically significant response to treatment in the opinion of the physician; and
- 4 Either:
- 4.1 Adalimumab to be administered at doses no greater than 40 mg every 14 days; or
- 4.2 Patient cannot take concomitant methotrexate and requires doses of adalimumab higher than 40 mg every 14 days to maintain an adequate response.

Renewal — (Crohn's disease) only from a gastroenterologist or Practitioner on the recommendation of a gastroenterologist. Approvals valid for 6 months for applications meeting the following criteria:

All of the following:

- 1 Either:
- 1.1 Applicant is a gastroenterologist; or
- 1.2 Applicant is a Practitioner and confirms that a gastroenterologist has provided a letter, email or fax recommending that the patient continues with adalimumab treatment; and
- 2 Either:
- 2.1 Either:
- 2.1.1 CDAI score has reduced by 100 points from the CDAI score when the patient was initiated on adalimumab; or
- 2.1.2 CDAI score is 150 or less; or
- 2.2 Both:
- 2.2.1 The patient has demonstrated an adequate response to treatment but CDAI score cannot be assessed; and
- 2.2.2 Applicant to indicate the reason that CDAI score cannot be assessed; and
- 3 Adalimumab to be administered at doses no greater than 40 mg every 14 days.

Renewal — (severe chronic plaque psoriasis) only from a dermatologist or Practitioner on the recommendation of a dermatologist. Approvals valid for 6 months for applications meeting the following criteria:

continued...

▲ Three months supply may be dispensed at one time if endorsed "certified exemption" by the prescriber.

All of the following:

1 Either:

1.1 Applicant is a dermatologist; or

1.2 Applicant is a Practitioner and confirms that a dermatologist has provided a letter, email or fax recommending that the patient continues with adalimumab treatment; and

2 Either:

2.1 Both:

2.1.1 Patient has "whole body" severe chronic plaque psoriasis; and

2.1.2 Following each prior adalimumab treatment course the patient has a PASI score which is reduced by 75% or more, or is sustained at this level, when compared with the pre-adalimumab treatment baseline value; or

2.2 Both:

2.2.1 Patient has severe chronic plaque psoriasis of the face, or palm of a hand or sole of a foot; and

2.2.2 Either:

2.2.2.1 Following each prior adalimumab treatment course the patient has a reduction in the PASI symptom subscores for all 3 of erythema, thickness and scaling, to slight or better, or sustained at this level, as compared to the treatment course baseline values; or

2.2.2.2 Following each prior adalimumab treatment course the patient has a reduction of 75% or more in the skin area affected, or sustained at this level, as compared to the pre adalimumab treatment baseline value; and

3 Adalimumab to be administered at doses no greater than 40 mg every 14 days.

Note: A treatment course is defined as a minimum of 12 weeks adalimumab treatment

Renewal — (ankylosing spondylitis) only from a rheumatologist or Practitioner on the recommendation of a rheumatologist. Approvals valid for 6 months for applications meeting the following criteria:

All of the following:

1 Either:

1.1 Applicant is a rheumatologist; or

1.2 Applicant is a Practitioner and confirms that a rheumatologist has provided a letter, email or fax recommending that the patient continues with adalimumab treatment; and

2 Following 12 weeks of adalimumab treatment, BASDAI has improved by 4 or more points from pre-adalimumab baseline on a 10 point scale, or by 50%, whichever is less; and

~~3 ESR or CRP is within the normal range; and~~

~~4 Physician considers that the patient has benefited from treatment and that continued treatment is appropriate; and~~

~~5 Adalimumab to be administered at doses no greater than 40 mg every 14 days.~~

Renewal — (psoriatic arthritis) only from a rheumatologist or Practitioner on the recommendation of a rheumatologist. Approvals valid for 6 months for applications meeting the following criteria:

All of the following:

1 Either:

1.1 Applicant is a rheumatologist; or

1.2 Applicant is a Practitioner and confirms that a rheumatologist has provided a letter, email or fax recommending that the patient continues with adalimumab treatment; and

2 Either:

2.1 Following 4 months initial treatment, the patient has at least a 50% decrease in active joint count from baseline and a clinically significant response to treatment in the opinion of the physician; or

2.2 The patient demonstrates at least a continuing 50% improvement in active joint count from baseline and a clinically significant response to prior adalimumab treatment in the opinion of the treating physician; and

3 Adalimumab to be administered at doses no greater than 40 mg every 14 days.

Initial application – (juvenile idiopathic arthritis) only from a named specialist or rheumatologist. Approvals valid for 4 months for applications meeting the following criteria:

All of the following:

- 1 To be used as an adjunct to methotrexate therapy or monotherapy where use of methotrexate is limited by toxicity or intolerance; and
- 2 Patient diagnosed with juvenile idiopathic arthritis (JIA); and
- 3 Patient has had severe active polyarticular course JIA for 6 months duration or longer; and
- 4 Patient has tried and not responded to at least three months of oral or parenteral methotrexate (at a dose of 10-20 mg/m² weekly or at the maximum tolerated dose) in combination with oral corticosteroids (prednisone 0.25 mg/kg or at maximum tolerated dose); and
- 5 Patient has tried and not responded to at least three months of oral or parenteral methotrexate (at a dose of 10-15 mg/m² weekly or at the maximum tolerated dose) in combination with one other disease-modifying agent; and
- 6 Both:
 - 6.1 Either:
 - 6.1.1 Patient has persistent symptoms of poorly-controlled and active disease in at least 20 active, swollen, tender joints; or
 - 6.1.2 Patient has persistent symptoms of poorly-controlled and active disease in at least four active joints from the following: wrist, elbow, knee, ankle, shoulder, cervical spine, hip; and
 - 6.2 Physician's global assessment indicating severe disease.

Initial application - (rheumatoid arthritis) only from a rheumatologist. Approvals valid for 6 months for applications meeting the following criteria:

Either:

- 1 Both:
 - 1.1 The patient has had an initial Special Authority approval for adalimumab for rheumatoid arthritis; and
 - 1.2 Either:
 - 1.2.1 The patient has experienced intolerable side effects from adalimumab; or
 - 1.2.2 The patient has received insufficient benefit from adalimumab to meet the renewal criteria for adalimumab for rheumatoid arthritis; or
- 2 All of the following:
 - 2.1 Patient has had severe and active erosive rheumatoid arthritis for six months duration or longer; and
 - 2.2 Treatment is to be used as an adjunct to methotrexate therapy or monotherapy where use of methotrexate is limited by toxicity or intolerance; and
 - 2.3 Patient has tried and not responded to at least three months of oral or parenteral methotrexate at a dose of at least 20 mg weekly or a maximum tolerated dose; and
 - 2.4 Patient has tried and not responded to at least three months of oral or parenteral methotrexate in combination with at least two of the following (triple therapy): sulphasalazine, prednisone at a dose of at least 7.5 mg per day, azathioprine, intramuscular gold, or hydroxychloroquine sulphate (at maximum tolerated doses); and
 - 2.5 Either:
 - 2.5.1 Patient has tried and not responded to at least three months therapy at the maximum tolerated dose of cyclosporin alone or in combination with another agent; or
 - 2.5.2 Patient has tried and not responded to at least three months therapy at the maximum tolerated dose of leflunomide alone or in combination with another agent; and
 - 2.6 Either:
 - 2.6.1 Patient has persistent symptoms of poorly controlled and active disease in at least 20 active, swollen, tender joints; or

▲ Three months supply may be dispensed at one time if endorsed "certified exemption" by the prescriber.

* Three months or six months, as applicable, dispensed all-at-once

Changes to Restrictions - effective 1 November 2010 (continued)

continued...

2.6.2 Patient has persistent symptoms of poorly controlled and active disease in at least four active joints from the following: wrist, elbow, knee, ankle, and either shoulder or hip; and

2.7 Either:

2.7.1 Patient has a C-reactive protein level greater than 15 mg/L measured no more than one month prior to the date of this application; or

2.7.2 C-reactive protein levels not measured as patient is currently receiving prednisone therapy at a dose of greater than 5 mg per day and has done so for more than three months.

Initial application - (severe chronic plaque psoriasis) only from a dermatologist. Approvals valid for 4 months for applications meeting the following criteria:

Either:

1 Both:

1.1 The patient has had an initial Special Authority approval for adalimumab for severe chronic plaque psoriasis; and

1.2 Either:

1.2.1 The patient has experienced intolerable side effects from adalimumab; or

1.2.2 The patient has received insufficient benefit from adalimumab to meet the renewal criteria for adalimumab for severe chronic plaque psoriasis; or

2 All of the following:

2.1 Either:

2.1.1 Patient has "whole body" severe chronic plaque psoriasis with a Psoriasis Area and Severity Index (PASI) score of greater than 15, where lesions have been present for at least 6 months from the time of initial diagnosis; or

2.1.2 Patient has severe chronic plaque psoriasis of the face, or palm of a hand or sole of a foot, where the plaque or plaques have been present for at least 6 months from the time of initial diagnosis; and

2.2 Patient has tried, but had an inadequate response (see Note) to, or has experienced intolerable side effects from, at least three of the following (at maximum tolerated doses unless contraindicated): phototherapy, methotrexate, cyclosporin, or acitretin; and

2.3 A PASI assessment has been completed for at least the most recent prior treatment course (but preferably all prior treatment courses), preferably while still on treatment but no longer than 1 month following cessation of each prior treatment course; and

2.4 The most recent PASI assessment is no more than 1 month old at the time of application.

Note: "Inadequate response" is defined as: for whole body severe chronic plaque psoriasis, a PASI score of greater than 15, as assessed preferably while still on treatment but no longer than 1 month following cessation of the most recent prior treatment; for severe chronic plaque psoriasis of the face, hand or foot, at least 2 of the 3 PASI symptom subscores for erythema, thickness and scaling are rated as severe or very severe, and the skin area affected is 30% or more of the face, palm of a hand or sole of a foot, as assessed preferably while still on treatment but no longer than 1 month following cessation of the most recent prior treatment.

Initial application - (ankylosing spondylitis) only from a rheumatologist. Approvals valid for 6 months for applications meeting the following criteria:

Either:

1 Both:

1.1 The patient has had an initial Special Authority approval for adalimumab for ankylosing spondylitis; and

1.2 Either:

1.2.1 The patient has experienced intolerable side effects from adalimumab; or

1.2.2 The patient has received insufficient benefit from adalimumab to meet the renewal criteria for adalimumab for ankylosing spondylitis; or

2 All of the following:

2.1 Patient has a confirmed diagnosis of ankylosing spondylitis present for more than six months; and

continued...

Changes to Restrictions - effective 1 November 2010 (continued)

continued...

- 2.2 Patient has low back pain and stiffness that is relieved by exercise but not by rest; and
- 2.3 Patient has bilateral sacroiliitis demonstrated by plain radiographs, CT or MRI scan; and
- 2.4 Patient's ankylosing spondylitis has not responded adequately to treatment with two or more non steroidal anti-inflammatory drugs (NSAIDs), in combination with anti-ulcer therapy if indicated, while patient was undergoing at least 3 months of an exercise regimen supervised by a physiotherapist; and
- 2.5 Either:
 - 2.5.1 Patient has limitation of motion of the lumbar spine in the sagittal and the frontal planes as determined by a score of at least 1 on each of the lumbar flexion and lumbar side flexion measurements of the Bath Ankylosing Spondylitis Metrology Index (BASMI); or
 - 2.5.2 Patient has limitation of chest expansion by at least 2.5 cm below the average normal values corrected for age and gender (see Notes); and
- 2.6 A Bath Ankylosing Spondylitis Disease Activity Index (BASDAI) of at least 6 on a 0-10 scale.

Notes: The BASDAI must have been determined at the completion of the 3 month exercise trial, but prior to ceasing NSAID treatment. The BASDAI measures must be no more than 1 month old at the time of initial application.

Average normal chest expansion corrected for age and gender:

- 18-24 years - Male: 7.0 cm; Female: 5.5 cm
- 25-34 years - Male: 7.5 cm; Female: 5.5 cm
- 35-44 years - Male: 6.5 cm; Female: 4.5 cm
- 45-54 years - Male: 6.0 cm; Female: 5.0 cm
- 55-64 years - Male: 5.5 cm; Female: 4.0 cm
- 65-74 years - Male: 4.0 cm; Female: 4.0 cm
- 75+ years - Male: 3.0 cm; Female: 2.5 cm

Initial application - (psoriatic arthritis) only from a rheumatologist. Approvals valid for 6 months for applications meeting the following criteria:

Either:

1 Both:

- 1.1 The patient has had an initial Special Authority approval for adalimumab for psoriatic arthritis; and

1.2 Either:

- 1.2.1 The patient has experienced intolerable side effects from adalimumab; or
- 1.2.2 The patient has received insufficient benefit from adalimumab to meet the renewal criteria for adalimumab for psoriatic arthritis; or

2 All of the following:

- 2.1 Patient has had severe active psoriatic arthritis for six months duration or longer; and
- 2.2 Patient has tried and not responded to at least three months of oral or parenteral methotrexate at a dose of at least 20 mg weekly or a maximum tolerated dose; and
- 2.3 Patient has tried and not responded to at least three months of sulphasalazine at a dose of at least 2 g per day or leflunomide at a dose of up to 20 mg daily (or maximum tolerated doses); and
- 2.4 Either:
 - 2.4.1 Patient has persistent symptoms of poorly controlled and active disease in at least 20 active, swollen, tender joints; or
 - 2.4.2 Patient has persistent symptoms of poorly controlled and active disease in at least four active joints from the following: wrist, elbow, knee, ankle, and either shoulder or hip; and
- 2.5 Any of the following:
 - 2.5.1 Patient has a C-reactive protein level greater than 15 mg/L measured no more than one month prior to the date of this application; or
 - 2.5.2 Patient has an elevated erythrocyte sedimentation rate (ESR) greater than 25 mm per hour; or
 - 2.5.3 ESR and CRP not measured as patient is currently receiving prednisone therapy at a dose of greater than 5 mg per day and has done so for more than three months.

Renewal - (juvenile idiopathic arthritis) only from a named specialist or rheumatologist or Practitioner on the recommendation of a named specialist or rheumatologist. Approvals valid for 6 months for applications meeting the following criteria:

All of the following:

1 Either:

- 1.1 Applicant is a named specialist or rheumatologist; or**
- 1.2 Applicant is a Practitioner and confirms that a named specialist or rheumatologist has provided a letter, email or fax recommending that the patient continues with etanercept treatment; and**

2 Subsidised as an adjunct to methotrexate therapy or monotherapy where use of methotrexate is limited by toxicity or intolerance; and

3 Either:

- 3.1 Following 4 months initial treatment, the patient has at least a 50% decrease in active joint count and an improvement in physician's global assessment from baseline; or**
- 3.2 On subsequent reapplications, the patient demonstrates at least a continuing 30% improvement in active joint count and continued improvement in physician's global assessment from baseline.**

Renewal - (rheumatoid arthritis) only from a rheumatologist or Practitioner on the recommendation of a rheumatologist. Approvals valid for 6 months for applications meeting the following criteria:

All of the following:

1 Either:

- 1.1 Applicant is a rheumatologist; or**
- 1.2 Applicant is a Practitioner and confirms that a rheumatologist has provided a letter, email or fax recommending that the patient continues with etanercept treatment; and**

2 Treatment is to be used as an adjunct to methotrexate therapy or monotherapy where use of methotrexate is limited by toxicity or intolerance; and

3 Either:

- 3.1 Following 4 months initial treatment, the patient has at least a 50% decrease in active joint count from baseline and a clinically significant response to treatment in the opinion of the physician; or**

- 3.2 On subsequent reapplications, the patient demonstrates at least a continuing 30% improvement in active joint count from baseline and a clinically significant response to treatment in the opinion of the physician; and**

4 Etanercept to be administered at doses no greater than 50 mg every 7 days.

Renewal - (severe chronic plaque psoriasis) only from a dermatologist or Practitioner on the recommendation of a dermatologist. Approvals valid for 6 months for applications meeting the following criteria:

All of the following:

1 Either:

- 1.1 Applicant is a dermatologist; or**
- 1.2 Applicant is a Practitioner and confirms that a dermatologist has provided a letter, email or fax recommending that the patient continues with etanercept treatment; and**

2 Either:

2.1 Both:

- 2.1.1 Patient has "whole body" severe chronic plaque psoriasis; and**
- 2.1.2 Following each prior etanercept treatment course the patient has a PASI score which is reduced by 75% or more, or is sustained at this level, when compared with the pre-treatment baseline value; or**

2.2 Both:

- 2.2.1 Patient has severe chronic plaque psoriasis of the face, or palm of a hand or sole of a foot; and**
- 2.2.2 Either:**

continued...

Changes to Restrictions - effective 1 November 2010 (continued)

continued...

- 2.2.2.1 Following each prior etanercept treatment course the patient has a reduction in the PASI symptom subscores for all 3 of erythema, thickness and scaling, to slight or better, or sustained at this level, as compared to the treatment course baseline values; or
- 2.2.2.2 Following each prior etanercept treatment course the patient has a reduction of 75% or more in the skin area affected, or sustained at this level, as compared to the pre-treatment baseline value; and

3 Etanercept to be administered at doses no greater than 50 mg every 7 days.

Note: An etanercept treatment course is defined as a minimum of 12 weeks of etanercept treatment.

Renewal - (ankylosing spondylitis) only from a rheumatologist or Practitioner on the recommendation of a rheumatologist. Approvals valid for 6 months for applications meeting the following criteria:

All of the following:

1 Either:

1.1 Applicant is a rheumatologist; or

1.2 Applicant is a Practitioner and confirms that a rheumatologist has provided a letter, email or fax recommending that the patient continues with etanercept treatment; and

2 Following 12 weeks of etanercept treatment, BASDAI has improved by 4 or more points from pre-treatment baseline on a 10 point scale, or by 50%, whichever is less; and

3 Physician considers that the patient has benefited from treatment and that continued treatment is appropriate; and

4 Etanercept to be administered at doses no greater than 50 mg every 7 days.

Renewal - (psoriatic arthritis) only from a rheumatologist or Practitioner on the recommendation of a rheumatologist. Approvals valid for 6 months for applications meeting the following criteria:

All of the following:

1 Either:

1.1 Applicant is a rheumatologist; or

1.2 Applicant is a Practitioner and confirms that a rheumatologist has provided a letter, email or fax recommending that the patient continues with etanercept treatment; and

2 Either:

2.1 Following 4 months initial treatment, the patient has at least a 50% decrease in active joint count from baseline and a clinically significant response to treatment in the opinion of the treating physician; or

2.2 The patient demonstrates at least a continuing 50% improvement in active joint count from baseline and a clinically significant response to prior etanercept treatment in the opinion of the treating physician; and

3 Etanercept to be administered at doses no greater than 50 mg every 7 days.

Initial application only from a named specialist or rheumatologist. Approvals valid for 4 months for applications meeting the following criteria:

All of the following:

1 To be used as an adjunct to methotrexate therapy or monotherapy where use of methotrexate is limited by toxicity or intolerance; and

2 Patient diagnosed with Juvenile Idiopathic Arthritis (JIA); and

3 Patient has had severe active polyarticular course JIA for 6 months duration or longer; and

4 Patient has tried and not responded to at least three months of oral or parenteral methotrexate (at a dose of 10-20mg/m² weekly or at the maximum tolerated dose) in combination with oral corticosteroids (prednisone 0.25 mg/kg or at the maximum tolerated dose); and

5 Patient has tried and not responded to at least three months of oral or parenteral methotrexate (at a dose of 10-15mg/m² weekly or at the maximum tolerated dose) in combination with one other disease-modifying agent; and

6 Both:

6.1 Either:

▲ Three months supply may be dispensed at one time if endorsed "certified exemption" by the prescriber.

* Three months or six months, as applicable, dispensed all-at-once

▶ **SA1045 0796** Special Authority for Subsidy

Initial application from any relevant practitioner. Approvals valid for 2 years for applications meeting the following criteria:

All of the following:

- 1 Patient has a calculated absolute risk of cardiovascular disease of at least 15% over 5 years; and
- 2 Patient's LDL cholesterol is 2.0 mmol/litre or greater; and
- 3 Any of the following:

3.1 The patient has rhabdomyolysis (defined as muscle aches and creatine kinase more than 10 x normal) when treated with one statin; or

3.2 The patient is intolerant to both simvastatin and atorvastatin; or

3.3 The patient has not reduced their LDL cholesterol to less than 2.0 mmol/litre with the use of the maximal tolerated dose of atorvastatin.

Note:

A patient who has failed to reduce their LDL cholesterol to < 2.0 mmol/litre with the use of a less potent statin should use a more potent statin prior to consideration being given to the use of non-statin therapies. Other treatment options including fibrates, resins and nicotinic acid should be considered after failure of statin therapy.

If a patient's LDL cholesterol cannot be calculated because the triglyceride level is too high then a repeat test should be performed and if the LDL cholesterol again cannot be calculated then it can be considered that the LDL cholesterol is greater than 2.0 mmol/litre.

Renewal from any relevant practitioner. Approvals valid for 2 years where the treatment remains appropriate and the patient is benefiting from treatment.

Initial application only from a relevant specialist. Approvals valid for 2 years for applications meeting the following criteria:

Both:

1—Either:

- 1.1 ezetimibe is to be used in combination with simvastatin; or
- 1.2 ezetimibe is to be used without a statin; and

2—Either:

2.1 All of the following:

- 2.1.1 Patient has a calculated absolute risk of cardiovascular disease >20% over 5 years; and
- 2.1.2 Patient cannot tolerate statin therapy at a dose of \geq 40 mg per day; and
- 2.1.3—Either:

Initial application — (aspirin allergic patients) from any relevant practitioner. Approvals valid without further renewal unless notified for applications meeting the following criteria:

Both:

1 — The patient is allergic to aspirin (see definition below); and

2 — Any of the following:

The patient has:

2.1 suffered from a stroke, or transient ischaemic attack; or

2.2 experienced an acute myocardial infarction; or

2.3 experienced an episode of pain at rest of greater than 20 minutes duration due to coronary disease that required admission to hospital for at least 24 hours; or

2.4 had a troponin T or troponin I test result greater than the upper limit of the reference range; or

2.5 had a revascularisation procedure; or

2.6 experienced symptomatic peripheral vascular disease of a severity that has required specialiste consultation.

Note: Aspirin allergy is defined as a history of anaphylaxis, urticaria or asthma within 4 hours of ingestion of aspirin, other salicylates or NSAIDs.

Initial application — (aspirin tolerant patients and aspirin naive patients) from any relevant practitioner. Approvals valid for 3 months for applications meeting the following criteria:

Any of the following:

The patient has:

1 — experienced an acute myocardial infarction; or

2 — had an episode of pain at rest of greater than 20 minutes duration due to coronary disease that required admission to hospital for at least 24 hours; or

3 — had a troponin T or troponin I test result greater than the upper limit of the reference range; or

4 — had a revascularisation procedure.

Initial application — (patients awaiting revascularisation) from any relevant practitioner. Approvals valid for 6 months where the patient is on a waiting list or active review list for stenting, coronary artery bypass grafting, or percutaneous coronary angioplasty following acute coronary syndrome.

Initial application — (post stenting) from any relevant practitioner. Approvals valid for 6 months where the patient has had a stent inserted in the previous 4 weeks.

Initial application — (documented stent thrombosis) from any relevant practitioner. Approvals valid without further renewal unless notified where the patient has, while on treatment with aspirin or clopidogrel, experienced documented stent thrombosis.

Renewal — (aspirin tolerant patients) from any relevant practitioner. Approvals valid without further renewal unless notified where while on treatment with aspirin the patient has experienced an additional vascular event following the recent cessation of clopidogrel.

Renewal — (acute coronary syndrome – aspirin tolerant patients and aspirin naive patients) from any relevant practitioner. Approvals valid for 3 months for applications meeting the following criteria:

Any of the following:

The patient has:

1 — experienced an acute myocardial infarction; or

2 — had an episode of pain at rest of greater than 20 minutes duration due to coronary disease that required admission to hospital for at least 24 hours; or

3 — had a troponin T or troponin I test result greater than the upper limit of the reference range; or

4 — had a revascularisation procedure.

* Tab 80 mg	110.50	30	✓ Lipitor

▶ SA0788 Special Authority for Manufacturers Price

Initial application only from a relevant specialist or general practitioner. Approvals valid without further renewal unless notified for

applications meeting the following criteria:

Both:

1— Patient has a calculated absolute risk of cardiovascular disease of at least 15% over 5 years; and

2— Either:

2.1 Patient has severe documented intolerance to simvastatin (blood tests are not required); or

2.2 Both:

2.2.1 Patient has been compliant with a dose of simvastatin of 80 mg per day for at least 2 months; and

2.2.2 Either:

2.2.2.1 All of the following:

2.2.2.1.1 Patient has venous CABG; and

2.2.2.1.2 LDL cholesterol test 1 \geq 2.0 mmol/litre; and

2.2.2.1.3 LDL cholesterol test 2 \geq 2.0 mmol/litre (at least 1 week after test 1); or

2.2.2.2 All of the following:

2.2.2.2.1 Patient does not have venous CABG; and

2.2.2.2.2 LDL cholesterol test 1 \geq 2.5 mmol/litre; and

2.2.2.2.3 LDL cholesterol test 2 \geq 2.5 mmol/litre (at least 1 week after test 1).

Notes: To confirm that cholesterol levels are not still improving, two lipid tests must be carried out during treatment with simvastatin 80 mg, and have results for LDL cholesterol that have reduced by $<$ 10% in the second test. The tests must be carried out while the patient is in a fasted state (with the exception of patients with IDDM).

The following indications of intolerance to simvastatin, are known as class effects for all statins, and hence are likely to mean that the patient may also be intolerant of atorvastatin:

- Constipation, flatulence (may occur in $>$ 1% of patients)
- Asthenia, abdominal pain, headache (may occur in $>$ 1% of patients)
- Myopathy, rhabdomyolysis (may occur in $<$ 3% of patients)
- Elevated serum transaminase levels (may occur in $<$ 1% of patients)

Statins have been shown to be generally well tolerated in clinical studies, with the rate of discontinuation due to adverse reactions being less than 5%, and similar to the discontinuation rate for patients taking a placebo.

Changes to Restrictions - effective 1 September 2010 (continued)

continued...

6 Patient has had a Special Authority approval for zoledronic acid (Underlying cause – Osteoporosis).

Initial application – (Underlying cause - glucocorticosteroid therapy) from any relevant practitioner. Approvals valid for 1 year for applications meeting the following criteria:

Both:

1 The patient is receiving systemic glucocorticosteroid therapy (≥ 5 mg per day prednisone equivalents) and has already received or is expected to receive therapy for at least three months; and

2 **Either Any of the following:**

2.1 The patient has documented BMD ≥ 1.5 standard deviations below the mean normal value in young adults (i.e. T-Score ≤ -1.5) (see Note); or

2.2 The patient has a history of one significant osteoporotic fracture demonstrated radiologically; or

2.3 The patient has had a Special Authority approval for zoledronic acid (Underlying cause – glucocorticosteroid therapy).

Renewal – (Underlying cause was, and remains, glucocorticosteroid therapy) from any relevant practitioner.

Approvals valid for 1 year where the patient is continuing systemic glucocorticosteroid therapy (≥ 5 mg per day prednisone equivalents).

Renewal – (Underlying cause was glucocorticosteroid therapy but patient now meets the 'Underlying cause – osteoporosis' criteria) from any relevant practitioner. Approvals valid without further renewal unless notified for applications meeting the following criteria:

Any of the following:

1 History of one significant osteoporotic fracture demonstrated radiologically and documented BMD ≥ 2.5 standard deviations below the mean normal value in young adults (i.e. T-Score ≤ -2.5) (see Note); or

2 History of one significant osteoporotic fracture demonstrated radiologically, and either the patient is elderly, or densitometry scanning cannot be performed because of major logistical, technical or pathophysiological reasons. It is unlikely that this provision would apply to many patients under 75 years of age; or

3 History of two significant osteoporotic fractures demonstrated radiologically; or

4 Documented T-Score ≤ -3.0 (see Note); or

5 A 10-year risk of hip fracture $\geq 3\%$, calculated using a published risk assessment algorithm (e.g. FRAX or **Bubble Garvan**) which incorporates BMD measurements (see Note); or

6 Patient has had a Special Authority approval for zoledronic acid (Underlying cause was glucocorticosteroid therapy but patient now meets the 'Underlying cause – Osteoporosis' criteria).

Notes:

a) BMD (including BMD used to derive T-Score) must be measured using dual-energy x-ray absorptiometry (DXA). Quantitative ultrasound and quantitative computed tomography (QCT) are not acceptable.

b) Evidence used by National Institute for Health and Clinical Excellence (NICE) guidance indicates that patients aged 75 years and over who have a history of significant osteoporotic fracture demonstrated radiologically are very likely to have a T-Score ≤ -2.5 , and therefore do not require BMD measurement for treatment with bisphosphonates.

c) Osteoporotic fractures are the incident events for severe (established) osteoporosis, and can be defined using the WHO definitions of osteoporosis and fragility fracture. The WHO defines severe (established) osteoporosis as a T-score below -2.5 with one or more associated fragility fractures. Fragility fractures are fractures that occur as a result of mechanical forces that would not ordinarily cause fracture (minimal trauma). The WHO has quantified this as forces equivalent to a fall from a standing height or less.

d) In line with the Australian guidelines for funding alendronate, a vertebral fracture is defined as a 20% or greater reduction in height of the anterior or mid portion of a vertebral body relative to the posterior height of that body, or a 20% or greater reduction in any of these heights compared to the vertebral body above or below the affected vertebral body.
