- Prochlorperazine (Antinaus) tab 5 mg

Disipal – discontinuation

Disipal (orphenadrine hydrochloride) 50 mg tablets will be delisted from 1 November 2014 due to supplier discontinuation. The supplier has advised that stock available in the country has an expiry date of October 2014. The following funded pharmaceuticals could be considered as suitable alternatives – benzotropine mesylate 2 mg tablets (Benztrop) and procyclidine hydrochloride 5 mg tablets (Kemadrin).

Imatinib mesilate – brand change

From 1 April 2014, a new brand of imatinib mesilate 100 mg capsules, Imatinib-AFT, will be listed in the Pharmaceutical Schedule fully subsidised without restriction. Imatinib-AFT is not registered for the treatment of Gastrointestinal Stromal Tumour (GIST).

Previously, the Glivec brand was funded subject to Special Authority criteria for patients with Chronic Myeloid Leukaemia (CML) or Gastrointestinal Stromal Tumour (GIST) and their Glivec was sent directly to them by PHARMAC. After 1 April 2014, the Glivec brand will be funded, subject to Special Authority criteria, for patients with Gastrointestinal Stromal Tumour (GIST) only and their Glivec will continue to be sent directly to them by PHARMAC.

All other patients will need to change to the Imatinib-AFT brand to continue to receive fully funded imatinib and will need to pick up their imatinib (Imatinib-AFT brand) directly from a community pharmacy. All CML patients with a current Special Authority approval had 2 months' supply of Glivec delivered to them on 26 March 2014.

PHARMAC has contacted the community pharmacies that have been nominated by CML patients or that have NPPA patients with further details about the change.

Only the Imatinib-AFT brand can be dispensed and claimed from a community pharmacy. There will be no patient co-payment for imatinib dispensed from community pharmacy for at least the duration of 2014.

Pharmacies will receive a Brand Switch Fee between 1 July 2014 and 1 October 2014 for dispensing Imatinib-AFT 100 mg capsules.

Diltiazem supply issue and Schedule changes

Apotex has advised PHARMAC of supply issues with all presentations of its diltiazem hydrochloride long-acting capsules. From 1 April 2014, the following changes will be made to the Pharmaceutical Schedule to address this issue:

- Cardizem CD long-acting capsules 180 mg and 240 mg will be listed fully subsidised.
 - Stat dispensing will be removed temporarily from all presentations of diltiazem hydrochloride, tablets and long-acting capsules.
 - Sole Subsidised Supply will be suspended on the Apo-Diltiazem CD brand of diltiazem hydrochloride 180 mg and 240 mg long-acting capsules.
-

Dispensing Named Patient Pharmaceutical Assessment (NPPA) pharmaceuticals

When a pharmaceutical has been approved for funding via NPPA, a pharmacy is nominated to dispense the pharmaceutical. The pharmacy is notified that it has been nominated via a letter from the Ministry of Health (this letter also confirms the duration of the approval, the maximum dosage and the funding approved, excluding GST, for the duration). If a patient changes pharmacy, the new pharmacy should advise PHARMAC (0800 66 00 50 option 3 or email nppa@pharmac.govt.nz) of the change before dispensing the medicine.

PHARMAC will then be able to confirm the details of the approval.

Insulin pump consumables prescriptions

A reminder that the default dispensing period for all insulin pump consumable products (infusion sets, cartridges) is monthly. These products should only be dispensed stat (3 months at one time) when Access Exemption (Section F, Part II) applies.

Methotrexate tablet brand change

The Trexate brand of methotrexate 2.5 mg and 10 mg tablets will be subsidised from 1 April 2014. There will be a subsidy reduction for the Methoblastin brand from 1 June 2014. From 1 September 2014 the Trexate brand will commence Sole Supply. A Brand Switch Fee will apply and patient information leaflets to support the change will be available to download from www.pharmaonline.co.nz.

Zopiclone 30 tablet pack size delisting

The 30 tablet pack size of Apo-Zopiclone 7.5 mg tablets will be delisted and Sole Subsidised Supply will be reinstated for the 500 tablet pack size from 1 May 2014. The 30 tablet pack size was listed temporarily from 1 November 2012.

Azathioprine tablet brand change

The Azamun brand of azathioprine 50 mg tablets will be subsidised from 1 April 2014. There will be a subsidy reduction for the Imuprine and Imuran brands from 1 June 2014 and Sole Supply of the Azamun brand will commence on 1 September 2014.

Olbetam – remove s29

Olbetam s29 (acipimox 250 mg capsules) was temporarily listed from 1 January 2014 to cover a potential supply issue. This product is now approved and is no longer required to be prescribed and supplied in accordance with section 29 of the Medicines Act 1981. “s29” and the s29 symbol will be removed from the listing from 1 April 2014.

News in brief

- A 100 tab pack size Tofranil (**imipramine hydrochloride**) tab 10 mg will be listed temporarily from 1 April 2014.
- A 30 tab pack size of Ludiomil (**maprotiline hydrochloride**) tab 25 mg will be listed temporarily from 1 April 2014.
- Apo-Bromocriptine (**bromocriptine**) cap 5 mg will be delisted from 1 October 2014 due to supplier discontinuation.
- **Pergolide** (Permax) tab 0.25 mg and 1 mg will be delisted from 1 September 2014 due to supplier discontinuation.
- Ensure Plus **oral feed 1.5 kcal/ml** (strawberry) liquid, 237 ml pack size will be delisted from 1 October 2014 due to supplier discontinuation.
- An 850 g pack size for Ensure **oral feed powder** (chocolate) will be listed from 1 April 2014. The 900 g pack size will be delisted from 1 October 2014.
