Haemophilia treatments – brand changes for recombinant factor VIII

PHARMAC is changing the way brands of recombinant factor VIII (rFVIII) are funded. The six-month changeover period starts 1 September 2015.

What are the changes?

- Xyntha (Pfizer) will have Preferred Brand Status. It will be the first treatment choice for people needing rFVIII. This means most people that need rFVIII will use Xyntha.
- Kogenate FS (Bayer) will have Second Brand Status. This means if Xyntha is unsuitable for a patient, specialists can apply for funded access to Kogenate FS.
- Advate (Baxalta) will have Rare Clinical Circumstances Brand Status. This means if Xyntha or Kogenate FS are unsuitable for a patient, specialists can apply for funded access to Advate.
- Applications for Kogenate FS and Advate can be made to the Haemophilia Treatments Panel that has been established to assess applications for funded access to those brands.

More information can be found on the PHARMAC website at: <http://www.pharmac.health.nz/medicines/my-medicine-has-changed/haemophilia-treatments/>.

Note that haemophilia treatments are XPharm – meaning that they cannot be dispensed and claimed by a community pharmacy.

Sertraline – potential supply issue

Stat dispensing will be removed from sertraline 50 mg and 100 mg tablets from 1 September 2015 until further notice to address a potential supply issue. We are working with Actavis to ensure that supply is resumed as soon as possible, expected to be late September 2015.
