Interactive schedule

An XML/ interactive version of the HML accessed from our website is now available.

This means you can now search the most up-to-date HML information all in one place, in a similar way to the community Schedule. This includes being able to:

• search on individual pharmaceutical names

• view the Pharmacode reference when PHARMAC has a contract for the listed product

• export list information into excel and other formats for use in your local technology systems.

In future releases of the interactive version, users will also be able to search and print out restriction criteria for each pharmaceutical, where they apply.

As we produce the monthly Updates from now on, that information will also be added to the interactive database.

PDF versions of the printed Updates and Section H will continue to be published to our website and hard copies are also continuing to be sent free of charge to DHB hospitals for now.

www.pharmac.govt.nz/HMLOnline.php

HML Reprint

The second edition of the HML is being printed for delivery in November and will incorporate changes up to and including 1 October 2013. These changes include additions, corrections and adjustments made in response to DHB feedback since the first edition, which was printed prior to the HML launch in July.
HML 0800 queries line – hours we can help you

Please continue to contact PHARMAC for HML related queries using HML@pharmac.govt.nz or 0800 66 00 50 (option 2) contacts as your first point of call. Our queries coordinators are available during our normal information line hours which are Monday to Friday, 9am to 5pm. Outside those hours, you can leave a message via the 0800 line or email us your query. This will be dealt with as soon as possible. For an urgent situation, the clinically appropriate action should always be taken. However, we would still like to hear about the treatment and the clinical circumstances afterwards – a phone call or email is appreciated.

Managing medicines with restrictions

There is a lot of great work going on in DHBs to achieve compliance with the restrictions on pharmaceuticals in the HML and that is much appreciated. We acknowledge compliance may not be perfect during the transition period; however, we want to remind prescribers that the onus is on them to consider and ensure relevant HML restriction criteria are met and that this is documented in each patient’s clinical record.

Out-of-stock information

PHARMAC manages out-of-stock situations for contracted pharmaceuticals and leads the process to find alternatives when a contracted product is unavailable. Suppliers have contractual obligations to inform us of potential out of stock situations and to supply an alternative pharmaceuticals if the contracted brand is unavailable. However, we are not automatically notified if there are supply issues with non-contracted HML pharmaceuticals. In order to support DHBs we may need to list an alternative formulation or strength of a product (even if only temporarily) to ensure compliance with the rules of the HML. Please note that, for non-contracted pharmaceuticals, while PHARMAC won’t necessarily lead the process for finding alternatives we would like to hear from DHBs when out of stock or short supply situations may be occurring.
Have a problem with a medicine or medical device we fund?

PHARMAC welcomes feedback, including complaints about any medicine we fund. We want to know when we get things right and when we could do better. We particularly want to know about problems with access or compliance, such as when a product is in short supply or you have difficulty interpreting our rules. Some issues should also be reported to other organisations. These include:

**Quality complaints** should be reported to the importer or supplier in the first instance. A quality complaint could include such issues as: a label that is easily smudged or doesn’t stay on the container, a tablet that won’t break evenly along a score line, inconsistent viscosity of a liquid medicine. Quality complaints may also be reported to Medsafe especially if the issue is serious.

**Medicine adverse reactions** should be reported to the Centre for Adverse Reactions Monitoring (CARM). This includes side effects and/or lack of efficacy of a medicine as a result of a brand change.

**Medical device adverse reactions** should be reported to Medsafe. A form is available on the Medsafe website. http://www.medsafe.govt.nz/regulatory/devicesnew/safety.asp
Section H changes to Part II
Effective 1 November 2013

ALIMENTARY TRACT AND METABOLISM

13 GLYCOPPYRONIUM BROMIDE (amendment to presentation description)
   Inj 0.2 mg 200 mcg per ml, 1 ml ampoule
   – 1% DV Oct-13 to 2016 .................................................. 28.56 10 Max Health

17 LACTULOSE
   Oral liq 10 g per 15 ml – 1% DV May-14 to 2016 .................. 3.84 500 ml Laevolac
   Note – Laevolac oral liq 10 g per 15 ml, 1,000 ml pack size will be delisted from 1 May 2014.

20 ZINC CHLORIDE (amendment to presentation description)
   Inj 5.3 mg per ml (5.1 mg per ml elemental), 2 ml ampoule

BLOOD AND BLOOD FORMING ORGANS

28 EPTIFIBATIDE (amendment to restriction)
   ➔ Inj 750 mcg per ml, 100 ml vial ................................. 324.00 1 Integrilin
   ➔ Inj 2 mg per ml, 10 ml vial ........................................... 111.00 1 Integrilin

   Restricted
   Either:
   1. For use in patients with acute coronary syndromes undergoing percutaneous coronary intervention; or
   2. For use in patients with definite or strongly suspected intra-coronary thrombus on coronary angiography.

CARDIOVASCULAR SYSTEM

33 ENALAPRIL MALEATE
   Tab 5 mg ........................................................................ 1.07 90 m-Enalapril
   Tab 10 mg ....................................................................... 1.32 90 m-Enalapril
   Tab 20 mg ....................................................................... 1.72 90 m-Enalapril

   Note – m-Enalapril tab 5 mg, 10 mg and 20 mg will be delisted from 1 January 2014. The Ethics Enalapril brand remains listed.

42 HYDRALAZINE HYDROCHLORIDE (remove S29)
   Inj 20 mg ampoule ......................................................... 25.90 5 Apresoline s29

42 MINOXIDIL (correction to listing)
   ➔ Tab 10 mg .................................................................. 70.00 100 Loniten

   Restricted
   For patients with severe refractory hypertension which has failed to respond to extensive multiple therapies.

DERMATOLOGICALS

49 HYDROCORTISONE WITH MICONAZOLE (correction to listing)
   Crm 1% with miconazole nitrate 2% ..................................... 2.20 15 g Micreme H

(Brand) indicates a brand example only. It is not a contracted product.
Changes to Section H - effective 1 November 2013 (continued)

**INFECTIONS**

80  **OSELTAMIVIR**
    ➔ Powder for oral suspension 6 mg per ml

Restricted
Either:
1 Only for hospitalised patient with known or suspected influenza; or
2 For prophylaxis of influenza in hospitalised patients as part of a DHB hospital approved infections control plan.

Note – Oseltamivir powder for oral suspension 12 mg per ml will be delisted from 1 November 2013.

**MUSCULOSKELETAL SYSTEM**

88  **BENZBROMARONE** (amendment to brand name)
    ➔ Tab 100 mg ..................................................... 45.00 100 Benzbromaron AL 100

**NERVOUS SYSTEM**

93  **LEVODOPA WITH BENSERAZIDE** (amendment to brand name)
    Tab dispersible 50 mg with benserazide 12.5 mg .................. 10.00 100 Madopar Dispersible Rapid

100  **IMIPRAMINE HYDROCHLORIDE** (remove S29)
     Tab 10 mg .......................................................... 6.58 60 Tofranil S29

102  **PAROXETINE HYDROCHLORIDE**
     Tab 20 mg .......................................................... 4.32 90 Loxamine

Note – Loxamine tab 20 mg (30 packsize) will be delisted from 1 January 2014.

107  **ONDANSETRON**
     Tab 4 mg – 1% DV Jan-14 to 2016................................. 5.51 50 Onrex
     Tab 8 mg – 1% DV Jan-14 to 2016................................. 6.19 50 Onrex

Note – Dr Reddy’s Ondansetron tab 4 mg and 8 mg will be delisted from 1 January 2014.

**ONCOLOGY AGENTS AND IMMUNOSUPPRESSANTS**

119  **METHOTREXATE**
     Inj 7.5 mg prefilled syringe - 1% DV Jan-14 to 2016......... 17.19 1 Methotrexate Sandoz
     Inj 10 mg prefilled syringe - 1% DV Jan-14 to 2016......... 17.25 1 Methotrexate Sandoz
     Inj 15 mg prefilled syringe - 1% DV Jan-14 to 2016......... 17.38 1 Methotrexate Sandoz
     Inj 20 mg prefilled syringe - 1% DV Jan-14 to 2016......... 17.50 1 Methotrexate Sandoz
     Inj 25 mg prefilled syringe - 1% DV Jan-14 to 2016......... 17.63 1 Methotrexate Sandoz
     Inj 30 mg prefilled syringe - 1% DV Jan-14 to 2016......... 17.75 1 Methotrexate Sandoz

148  **AZATHIOPRINE**
     Tab 50 mg .......................................................... 18.45 100 Imuran

Note – Imuran tab 50 mg will be delisted from 1 November 2013. The Imuprine brand remains listed.
Changes to Section H - effective 1 November 2013 (continued)

**RESPIRATORY SYSTEM AND ALLERGIES**

152  **SALBUTAMOL**  
Oral liq 400 mcg per ml - 1% DV Jan-14 to 2016 ..........................2.06  150 ml  **Ventolin**  
Note – Salapin oral liq 400 mcg per ml to be delisted 1 January 2014.

**SPECIAL FOODS**

185  **ORAL FEED (change of packsize)**  
Powder 16 g protein, 59.9 g carbohydrate  
and 14 g fat per 100 g, can ..............................................13.00  850 g  **Ensure (Vanilla)**  
Note – Ensure (Vanilla) 900 g packsize to be delisted 1 February 2014.

Effective 1 October 2013

**ALIMENTARY TRACT AND METABOLISM**

14  **ALUMINIUM HYDROXIDE WITH Magnesium HYDROXIDE AND SIMETHICONE**  
Oral liq 400 mg with magnesium hydroxide 400 mg and  
simethicone 30 mg per 5 ml  
  
  
  
  e.g. Mylanta Double  
  
  
  
  Strength

21  **MACROGOL 3350 WITH POTASSIUM CHLORIDE, SODIUM BICARBONATE AND SODIUM CHLORIDE**  
Powder for oral soln 13.125 g with potassium chloride  
46.6 mg, sodium bicarbonate 178.5 mg and sodium  
chloride 350.7 mg – 1% DV Nov-13 to 2014 ..................10.00  30  **Lax-Sachets**  
18.14  30  **Movicol**  
Note – Movicol will be delisted from 1 November 2013.

**BLOOD AND BLOOD FORMING**

31  **STREPTOKINASE (delisting)**  
Inj 250,000 iu vial ..........................................................117.70  1  **Streptase**  
Inj 1,500,000 iu vial ..................................................188.10  1  **Streptase**  
Note – Streptase inj 250,000 iu vial and inj 1,500,00 iu vial will be delisted from 1 December 2013.

31  **CLOPIDOGREL**  
Tab 75 mg – 1% DV Dec-13 to 2016 ...............................5.48  84  **Arrow - Clopid**  
Note – Apo-Clopidogrel tab 75 mg will be delisted from 1 December 2013.

34  **POTASSIUM CHLORIDE WITH SODIUM CHLORIDE (amendment to presentation description)**  
Inj 10 mmol mmol potassium chloride with  
0.29% sodium chloride, 100 ml bag

**CARDIOVASCULAR SYSTEM**

36  **ENALAPRIL MALEATE**  
Tab 5 mg .................................................................1.19  100  **Ethics Enalapril**  
Tab 10 mg .........................................................1.47  100  **Ethics Enalapril**  
Tab 20 mg .........................................................1.91  100  **Ethics Enalapril**  

46  **HYDRAZINE HYDROCHLORIDE**  
Inj 20 mg ampoule ..................................................25.90  5  **Apresoline s29**
Changes to Section H - effective 1 October 2013 (continued)

GENITO-URINARY SYSTEM

55 CLOTRIMAZOLE (addition of HSS)
   Vaginal crm 1% with applicator
   († price) – 1% DV Dec-13 to 2016 ............................... 1.45 35 g  Clomazol
   Vaginal crm 2% with applicator
   (‡ price) – 1% DV Dec-13 to 2016 ............................... 2.20 20 g  Clomazol

57 TAMSULOSIN (new packsize and addition of HSS)
    Cap 400 mcg – 1% DV Dec-13 to 2016 ............................. 13.51 100  Tamsulosin-Rex
   Restricted
   Both:
   1  Patient has symptomatic benign prostatic hyperplasia; and
   2  The patient is intolerant of non-selective alpha blockers or these are contraindicated.
   Note – the Tamsulosin-Rex cap 400 mcg (30 cap packsize) to be delisted from 1 December 2013.

HORMONE PREPARATIONS

62 SECRETIN PENTAHYDROCHLORIDE (remove listing)
   Inj 100 u ampoule
   Note – Secretin pentahydrochloride inj 100 u ampoule is listed in Various.

INFECTIONS

66 CEFACLOR (addition of HSS)
   Cap 250 mg († price) – 1% DV Dec-13 to 2016 ................. 26.00 100  Ranbaxy-Cefaclor
   Grans for oral liq 25 mg per ml – 1% DV Dec-13 to 2016 ..... 3.53 100 ml  Ranbaxy-Cefaclor

66 CEFTAZADIME (suspend HSS)
    Inj 1 g vial – 1% DV Oct-11 to 2014 1/10/2013 ............... 3.25 1  DBL Ceftazidime
    Inj 2 g vial – 1% DV Oct-11 to 2014 1/10/2013 ............... 6.49 1  DBL Ceftazidime
   Restricted
   Infectious disease physician, clinical microbiologist or respiratory physician

NERVOUS SYSTEM

97 RILUZOLE
    Tab 50 mg ............................................................... 400.00 56  Rilutek
   Restricted
   Initiation
   Neurologist or respiratory specialist.
   Re-assessment required after 6 months
   All of the following:
   1  The patient has amyotrophic lateral sclerosis with disease duration of 5 years or less; and
   2  The patient has at least 60 percent of predicted forced vital capacity within 2 months prior to the initial
      application; and
   3  The patient has not undergone a tracheostomy; and
   4  The patient has not experienced respiratory failure; and
   5  Any of the following:
      5.1 The patient is ambulatory; or
      5.2 The patient is able to use upper limbs; or
      5.3 The patient is able to swallow.
   continued...
## Changes to Section H - effective 1 October 2013 (continued)

**Continuation**

Re-assessment required after 18 months.

All of the following:

1. The patient has not undergone a tracheostomy, and
2. The patient has not experienced respiratory failure; and
3. Any of the following:
   3.1 The patient is ambulatory; or
   3.2 The patient is able to use upper limbs; or
   3.3 The patient is able to swallow.

### 102 PARACETAMOL

- **Inj 10 mg per ml, 50 ml vial** – 1% DV-Dec 13 to 2014...........22.50 10 Paracetamol-AFT

### 104 OXYCODONE HYDROCHLORIDE (amendment to presentation description)

- **Cap immediate-release 5 mg** ..................2.83 20 OxyNorm
- **Cap immediate-release 10 mg** ..................5.58 20 OxyNorm
- **Cap immediate-release 20 mg** ..................9.77 20 OxyNorm

### 112 HYOSCINE HYDROBROMIDE (addition of HSS)

- **Patch 1.5 mg** – 1% DV Dec-13 to 2016 .................11.95 2 Scopoderm TTS

**Restricted**

Any of the following:

1. Control of intractable nausea, vomiting, or inability to swallow saliva in the treatment of malignancy or chronic disease where the patient cannot tolerate or does not adequately respond to oral anti-nausea agents; or
2. Control of clozapine-induced hypersalivation where trials of at least two other alternative treatments have proven ineffective; or
3. For treatment of post-operative nausea and vomiting where cyclizine, droperidol and a 5HT3 antagonist have proven ineffective, are not tolerated or are contraindicated.

### 112 ONDANSETRON (delisting)

- **Tab dispersible 4 mg** ......................................0.68 4 Dr Reddy’s Ondansetron

**Note** – Dr Reddy’s Ondansetron tab dispersible 4 mg (4 tablet packsize) to be delisted from 1 December 2013. The 10 tablet packsize will remain listed.

### ONCOLOGY AGENTS AND IMMUNOSUPPRESSANTS

#### 123 CYCLOPHOSPHAMIDE

- **Tab 50 mg** ..................................................158.00 100 Procytox

**Note** - Cycloblastin tab 50 mg will be delisted from 1 December 2013.

#### 133 TAMOXIFEN CITRATE (addition of new pack sizes)

- **Tab 10 mg** ...........................................2.63 60 Genox
- **Tab 20 mg – 1% DV Jun-11 to 2014** ..................2.63 30 Genox

### RESPIRATORY SYSTEM AND ALLERGIES

#### 156 LORATADINE

- **Tab 10 mg – 1% DV Dec-13 to 2016** ..................1.30 100 Lorafix

**Note** - Loraclear Hayfever Relief tab 10 mg will be delisted from 1 December 2013.

Expiry date of HSS period is 30 June of the year indicated unless otherwise stated.
Changes to Section H - effective 1 September 2013 (continued)

84  **BOCEPREVIR**

- Cap 200 mg ................................................................. 5,015.00  336  Victrelis

**Restricted**

Chronic hepatitis C – genotype 1, first-line from gastroenterologist, infectious disease physician or general physician:

- All of the following:
  1. Patient has chronic hepatitis C, genotype 1; and
  2. Patient has not received prior pegylated interferon treatment; and
  3. Patient has IL-28B genotype CT or TT; and
  4. Patient is to be treated in combination with pegylated interferon and ribavirin; and
  5. Patient is hepatitis C protease inhibitor treatment-naive; and
  6. Maximum of 44 weeks therapy.

Chronic hepatitis C – genotype 1, second-line from gastroenterologist, infectious disease physician or general physician:

- All of the following:
  1. Patient has chronic hepatitis C, genotype 1; and
  2. Patient has received pegylated interferon treatment; and
  3. Any one of:
     3.1. Patient was a responder relapser; or
     3.2. Patient was a partial responder; or
     3.3. Patient received pegylated interferon prior to 2004; and
  4. Patient is to be treated in combination with pegylated interferon and ribavirin; and
  5. Maximum of 44 weeks therapy.

Note: Due to risk of severe sepsis boceprevir should not be initiated if either Platelet count <100 x10⁶ /l or Albumin <35 g/l.

85  **INTERFERON ALFA-2A** (amendment to chemical name)

- Inj 3 m iu prefilled syringe
- Inj 6 m iu prefilled syringe
- Inj 9 m iu prefilled syringe

85  **INTERFERON ALFA-2B** (amendment to chemical name)

- Inj 18 m iu, 1.2 ml multidose pen
- Inj 30 m iu, 1.2 ml multidose pen
- Inj 60 m iu, 1.2 ml multidose pen

86  **PEGYLATED INTERFERON ALFA-2A** (amendment to chemical name and restriction)

- Inj 135 mcg prefilled syringe
- Inj 180 mcg prefilled syringe .................................................. 900.00  4  Pegasys
- Inj 135 mcg prefilled syringe (4) with ribavirin tab 200 mg (112)

- Inj 135 mcg prefilled syringe (4) with ribavirin tab 200 mg (168)
- Inj 180 mcg prefilled syringe (4) with ribavirin tab 200 mg (168) .................................................. 1,290.00  1  Pegasys RBV Combination Pack

**Restricted**

Initiation - Chronic hepatitis C - genotype 1, 4, 5 or 6 infection or co-infection with HIV or genotype 2 or 3 post liver transplant

Both:  

*continued*
Changes to Section H - effective 1 September 2013 (continued)

continued...

1. Any of the following:
   1.1 Patient has chronic hepatitis C, genotype 1, 4, 5 or 6 infection; or
   1.2 Patient has chronic hepatitis C and is co-infected with HIV; or
   1.3 Patient has chronic hepatitis C genotype 2 or 3 and has received a liver transplant; and
2. Maximum of 48 weeks therapy.

Notes:
Consider stopping treatment if there is absence of a virological response (defined as at least a 2-log reduction in viral load) following 12 weeks of treatment since this is predictive of treatment failure.
Consider reducing treatment to 24 weeks if serum HCV RNA level at Week 4 is undetectable by sensitive PCR assay (less than 50IU/ml) AND Baseline serum HCV RNA is less than 400,000IU/ml.

Continuation — (Chronic hepatitis C – genotype 1 infection) from gastroenterologist, infectious disease physician or general physician.

All of the following:
1 Patient has chronic hepatitis C, genotype 1; and
2 Patient has had previous treatment with pegylated interferon and ribavirin; and
3 Either:
   3.1 Patient has responder relapsed; or
   3.2 Patient was a partial responder; and
4 Patient is to be treated in combination with boceprevir; and
5 Maximum of 48 weeks therapy.

Initiation - Chronic Hepatitis C – genotype 1 infection treatment more than 4 years prior - Gastroenterologist, infectious disease physician or general physician.

All of the following
1. Patient has chronic hepatitis C, genotype 1; and
2. Patient has had previous treatment with pegylated interferon and ribavirin; and
3. Any of the following
   3.1 Patient has responder relapsed; or
   3.2 Patient was a partial responder; or
   3.3 Patient received interferon treatment prior to 2004; and
4. Patient is to be treated in combination with boceprevir; and
5. Maximum of 48 weeks therapy.

Initiation — chronic hepatitis C - genotype 2 or 3 infection without co-infection with HIV

Both:
1. Patient has chronic hepatitis C, genotype 2 or 3 infection; and
2. Maximum of 6 months therapy.

Initiation — Hepatitis B – gastroenterologist, infectious disease specialist or general physician

All of the following:
1 Patient has confirmed Hepatitis B infection (HBsAg positive for more than 6 months); and
2 Patient is Hepatitis B treatment-naive; and
3 ALT > 2 times Upper Limit of Normal; and
4 HBV DNA < 10 log10 IU/ml; and
5 Either:
   5.1 HBeAg positive; or
   5.2 serum HBV DNA ≥ 2,000 units/ml and significant fibrosis (≥ Metavir Stage F2 or moderate fibrosis); and
6 Compensated liver disease; and
7 No continuing alcohol abuse or intravenous drug use; and
8 Not co-infected with HCV, HIV or HDV; and
9 Neither ALT nor AST > 10 times upper limit of normal; and
10 No history of hypersensitivity or contraindications to pegylated interferon; and
11 Maximum of 48 weeks therapy.

Notes:
Changes to Section H - effective 1 September 2013 (continued)

Approved dose is 180 mcg once weekly.

The recommended dose of pegylated interferon alfa-2a is 180 mcg once weekly.
In patients with renal insufficiency (calculated creatinine clearance less than 50ml/min), Pegylated Interferon alfa-2a dose should be reduced to 135 mcg once weekly.
In patients with neutropaenia and thrombocytopenia, dose should be reduced in accordance with the datasheet guidelines.
Pegylated Interferon alfa-2a is not approved for use in children.

tolerate it or failed to respond to an adequate dose over an adequate period of time.

107 PARALDEHYDE (correcting presentation description)
Inj 5 mg ml ampoule

113 HALOPERIDOL (1 price and addition of HSS)
Tab 500 mcg – 1% DV Oct-13 to 2016 ................................. 6.23 100 Serenade
Tab 1.5 mg – 1% DV Oct-13 to 2016 ................................. 9.43 100 Serenade
Tab 5 mg – 1% DV Oct-13 to 2016 ................................. 29.72 100 Serenade
Oral liq 2 mg per ml – 1% DV Oct-13 to 2016 ....................... 23.84 100 ml Serenade
Inj 5 mg per ml, 1 ml ampoule – 1% DV Oct-13 to 2016 ...... 21.55 10 Serenade

114 QUETIAPINE (new packsize)
Tab 100 mg ........................................................................ 21.00 90 Dr Reddy’s Quetiapine

Note – the Dr Reddy’s Quetiapine tab 100 mg 60 tab pack size to be delisted from 1 October 2013.

114 LEVOMEPROMAZINE MALEATE (amended chemical name)
Tab 25 mg
Tab 100 mg
Inj 25 mg per ml, 1 ml ampoule

117 BUSPIRONE HYDROCHLORIDE (removal of restriction)
Tab 5 mg .......................... 28.00 100 Pacific Buspirone
Tab 10 mg .......................... 17.00 100 Pacific Buspirone

Restricted
Both:
1 For use only as an anxiolytic; and
2 Other agents are contraindicated or have failed.

121 BUPROPION HYDROCHLORIDE (1 price and addition of HSS)
Tab modified-release 150 mg – 1% DV Oct-13 to 2016 ............. 4.97 30 Zyban
Note – There is a new Pharmacode for Zyban supplied at this price. The old Pharmacode is delisted
from 1 August 2013.

121 NALTREXONE HYDROCHLORIDE (1 price)
Tab 50 mg – 1% DV Sep-13 to 2016 ..................................... 76.00 30 Naltraccord

ONCOLOGY AGENTS AND IMMUNOSUPPRESSANTS

124 MITOMYCIN C (1 price and addition of HSS)
Inj 5 mg vial – 1% DV Oct-13 to 2016 ............................... 79.75 1 Arrow

Products with Hospital Supply Status (HSS) are in bold.
Expiry date of HSS period is 30 June of the year indicated unless otherwise stated.
Changes to Section H - effective 1 August 2013 (continued)

Changes to Section H - effective 12 July 2013

INFECTIONS

72  AMPHOTERICIN B (amendment to restriction)

- Inj 50 mg vial

Restricted
Infectious disease physician, clinical microbiologist, haematologist, oncologist, transplant specialist or respiratory physician

Any of the following:
1. Proven or probable invasive fungal infection, to be prescribed under an established protocol; or
2. Both:
   2.1 Possible invasive fungal infection; and
   2.2 A multidisciplinary team (including an Infectious Disease physician or a Clinical Microbiologist) considers the treatment to be appropriate.

- Inj (liposomal) 50 mg vial – 1% DV Oct-12 to 2015 $3,450.00 10 AmBisome

Restricted
Infectious disease physician, clinical microbiologist, haematologist, oncologist, transplant specialist or respiratory physician

Either:
1. Proven or probable invasive fungal infection, to be prescribed under an established protocol; or
2. Both:
   2.1 Possible invasive fungal infection; and
   2.2 A multidisciplinary team (including an Infectious Disease physician or a Clinical Microbiologist) considers the treatment to be appropriate.

NERVOUS SYSTEM

99  BUPIVACAINE HYDROCHLORIDE (additional presentations and amended presentations)

- Inj 2.5 mg per ml, 20 ml ampoule
  - 1% DV Oct-12 to 2015 $35.00 5 Marcain

- Inj 2.5 mg per ml, 20 ml ampoule, sterile pack
  - 1% DV Oct-12 to 2015 $28.00 5 Marcain

Note: DV limit applies to theatre packs only.

100 LIDOCAINE [LIGNOCAINE] HYDROCHLORIDE (additional presentations)

- Inj 1%, 20 ml ampoule, sterile pack
- Inj 2%, 20 ml ampoule, sterile pack

RESPIRATORY SYSTEM AND ALLERGIES

159  SODIUM CROMOGLYCATE (amendment to presentation)

Powder for inhalation 20 mcg per dose
Changes to Section H - effective 12 August 2013 (continued)

SPECIAL FOODS

178 PROTEIN FREE SUPPLEMENT
   Powder nil added protein and
   67 g carbohydrate per 100 g, 400 g can
   (Energivit)

   Restricted
   Either:
   1 For the dietary management of homocystinuria, maple syrup urine disease, phenylketonuria (PKU), glutaric
      aciduria isovaleric acidemia, propionic acidemia, methylmalonic acidemia, tyrosinaemia or urea cycle
      disorders; or
   2 Patient has adrenoleukodystrophy; or
   3 For use as a supplement to the Ketogenic diet in patients diagnosed with epilepsy.

VACCINES

181 BACILLUS CALMETTE-GUERIN VACCINE (amendment to presentation)
   Inj 2-8 million CFU per ml vial with diluent
   Inj 1.5 mg vial with diluent

   Restricted
   For infants at increased risk of tuberculosis.
   Note: Increased risk is defined as:
   1 living in a house or family with a person with current or past history of TB; or
   2 have one or more household members or carers who within the last 5 years lived in a country with a rate of
      TB > or equal to 40 per 100,000 for 6 months or longer; or
   3 during their first 5 years will be living 3 months or longer in a country with a rate of TB > or equal to 40 per
      100,000.
   Note: A list of countries with high rates of TB are available at www.moh.govt.nz/immunisation or www.bcgatlas.
   org/index.php.

182 MENINGOCOCCAL (A, C, Y AND W-135) POLYSACCHARIDE VACCINE (amendment to restriction)
   Inj 200 mcg vial with diluent

   Restricted
   Any of the following:
   1 For patients pre- and post-splenectomy; or
   2 For children aged 0-18 years with functional asplenia; or
   3 For organisation and community based outbreaks.

182 PNEUMOCOCCAL (PPV23) POLYSACCHARIDE VACCINE (amendment to restriction)
   Inj 575 mcg in 0.5 ml vial

   Restricted
   Any of the following:
   1 For patients pre- and post-splenectomy or
   2 children aged 0-18 years with functional asplenia
   3 For revaccination of children following immunosuppression.
Changes to Section H - effective 12 July 2013 (continued)

185 VARICELLA ZOSTER VACCINE (CHICKEN POX VACCINE) (amendment to restriction)

- Inj 1350 PFU vial with diluent
- Inj 2000 PFU vial with diluent

Restricted
Any of the following:
1. For use in transplant patients; or
2. For use following immunosuppression; or
3. For household contacts of children undergoing immunosuppression with no previous history or disease (clinical history of disease or negative serology) or vaccination.

1 For non-immune patients
1.1 with chronic liver disease who may in future be candidates for transplantation; or
1.2 with deteriorating renal function before transplantation; or
1.3 prior to solid organ transplant; or
1.4 prior to any elective immunosuppression; or
1.5 for post exposure prophylaxis who are immune competent inpatients.

2 For patients at least 2 years after bone marrow transplantation, on advice of their specialist;
3 For patients at least 6 months after completion of chemotherapy, on advice of their specialist;
4 For HIV positive non immune to varicella with mild or moderate immunosuppression on advice of HIV specialist;
5 For household contacts of paediatric patients who are immunocompromised, or undergoing a procedure leading to immune compromise where the household contact has:
   a) adult household contact – a negative serology result for varicella; or
   b) child household contact – no clinical history of varicella or negative varicella serology.

EXTEMPORANEOUSLY COMPOUNDED PREPARATIONS

194 CHLORHEXIDINE GLUCONATE

Soln 20%

Effective 5 July 2013

BLOOD AND BLOOD FORMING ORGANS

29 DEFIBROTIDE (amendment to restriction)

- Inj 80 mg per ml, 2.5 ml ampoule

Restricted – Haematologist
Patient has moderate or severe sinusoidal obstruction syndrome as a result of chemotherapy or regimen-related toxicities after allogeneic stem cell transplantation.

HORMONE PREPARATIONS

60 OESTRADIOL, OESTRIOL (correction of chemical name)
Tab 2 mg

61 CABERGOLINE (amendment to restriction)

- Tab 0.5 mg – 1% DV Sep-12 to 2015

Restricted
Any of the following:
1 Inhibition of lactation; or
2 Patient has pathological hyperprolactinemia; or
3 Patient has acromegaly.
Changes to Section H - effective 5 July 2013 (continued)

INFECTIONS

76  ATOVAQUONE WITH PROGUANIL HYDROCHLORIDE (addition of new presentation)

\[\text{Tab } 62.5 \text{ mg with proguanil hydrochloride } 25 \text{ mg}\]

Restricted

Infectious disease physician or clinical microbiologist

MUSCULOSKELETAL

87  EDROPHONIUM CHLORIDE (addition of new presentation)

\[\text{Inj } 10 \text{ mg per ml, } 15 \text{ ml vial}\]

Restricted

For the diagnosis of myasthenia gravis.

NERVOUS SYSTEM

99  BUPIVACAINE HYDROCHLORIDE (addition of new presentation)

\[\text{Inj } 1.25 \text{ mg per ml, } 500 \text{ ml bag}\]

RESPIRATORY SYSTEM AND ALLERGIES

157 SODIUM CHLORIDE (amendment to presentation)

Aqueous nasal spray 6.5 \text{ mg per ml}

VACCINES

181  DIPHTHERIA AND TETANUS VACCINE (amendment to restriction)

\[\text{Inj } 2 \text{ IU diphtheria toxoid with } 20 \text{ IU tetanus toxoid in } 0.5 \text{ ml syringe}\]

Restricted

Any of the following:
1. For vaccination of patients aged 45 and 65 years old; or
2. For vaccination of previously unimmunised patients; or
3. For revaccination of children following immunosuppression; or
4. For revaccination for patients with tetanus-prone wounds.

181  HAEMOPHILUS INFLUENZAE TYPE B VACCINE (amendment to restriction)

\[\text{Inj } 10 \text{ mcg vial with diluent syringe}\]

Restricted

Any of the following:
1. For primary vaccination in children; or
2. For revaccination of children following immunosuppression; or
3. For children aged 0-18 years with functional asplenia; or
4. For patients pre- and post-splenectomy.

182  PNEUMOCOCCAL CONJUGATE (PCV13) VACCINE (amendment to restriction)

\[\text{Inj } 30.8 \text{ mcg in } 0.5 \text{ ml syringe}\]

Restricted

Any of the following:
1. For high risk children under the age of 5; or
2. For patients aged less than 18 years pre- or post-splenectomy or with functional asplenia; or
3. For revaccination of children following immunosuppression.
Changes to Section H - effective 5 July 2013 (continued)

182 PNEUMOCOCCAL (PPV23) POLYSACCHARIDE VACCINE (amendment to restriction)

\(\Rightarrow\) Inj 575 mcg in 0.5 ml vial

Restricted

Any of the following:

1. For patients pre- and post-splenectomy or
2. Children aged 0-18 years with functional asplenia
3. For revaccination of children following immunosuppression.

183 DIPHTHERIA, TETANUS, PERTUSSIS, POLIO, HEPATITIS B AND HAEMOPHILUS INFLUENZAE TYPE B VACCINE (amendment to restriction)

\(\Rightarrow\) Inj 30 IU diphtheria toxoid with 40 IU tetanus toxoid,
25 mcg pertussis toxoid, 25 mcg pertussis filamentous haemagluttinin,
8 mcg pertactin,
80 D antigen units poliomyelitis virus, 10 mcg hepatitis B surface antigen in 0.5 ml syringe (1)
and inj 10 mcg haemophilus influenzae type B vaccine vial

Restricted

Either:

1. For primary vaccination in children;
2. For revaccination of children following immunosuppression.

Effective 1 July 2013

11 14 Clinical Trials and Free Stock

14.1 DHB Hospitals may give any Pharmaceutical that is funded by a third party and is being used:

14.1.1 as part of a clinical trial which has Ethics Committee approval; or
14.1.2 for on-going treatment of patients following the end of such a clinical trial.

14.2 DHB Hospitals may give any Pharmaceutical that is provided free of charge by a supplier, provided that the Pharmaceutical is provided as part of a programme of which the DHB, or supplier, has notified PHARMAC.

ALIMENTARY TRACT AND METABOLISM

15 MESALAZINE (correcting formulation)

Tab EC 400 mg ................................................................. 49.50 100 Asacol

18 INSULIN LISPRO WITH INSULIN LISPRO PROTAMINE (price)

Inj insulin lispro 25% with insulin lispro protamine 75%,
100 u per ml, 3 ml cartridge ........................................ 42.66 5 Humalog Mix 25

Inj insulin lispro 50% with insulin lispro protamine 50%,
100 u per ml, 3 ml cartridge ........................................ 42.66 5 Humalog Mix 50

19 URSODEOXYCHOLIC ACID (amendment to restriction)

\(\Rightarrow\) Cap 250 mg – 1% DV May-12 to 2014 ........................................ 71.50 100 Ursosan

Restricted

Alagille syndrome or progressive familial intrahepatic cholestasis
Either:

1. Patient has been diagnosed with Alagille syndrome; or
2. Patient has progressive familial intrahepatic cholestasis

continued...
Changes to Section H - effective 1 July 2013 (continued)

Chronic severe drug induced cholestatic liver injury
All of the following:
1. Patient has chronic severe drug induced cholestatic liver injury; and
2. Cholestatic liver injury not due to Total Parenteral Nutrition (TPN) use in adults; and
3. Treatment with ursodeoxycholic acid may prevent hospital admission or reduce duration of stay

Cirrhosis
Both:
1. Primary biliary cirrhosis confirmed by antimitochondrial antibody titre (AMA) > 1:80, and raised cholestatic liver enzymes with or without raised serum IgM or, if AMA is negative by liver biopsy; and
2. Patient not requiring a liver transplant (bilirubin > 100umol/l; decompensated cirrhosis

Pregnancy/Cirrhosis
Either:
1. Patient diagnosed with cholestasis of pregnancy
2. Both:
   2.1. Primary biliary cirrhosis confirmed by antimitochondrial antibody titre (AMA) > 1:80, and raised cholestatic liver enzymes with or without raised serum IgM or, if AMA is negative by liver biopsy; and
   2.2. Patient not requiring a liver transplant (bilirubin > 170umol/l; decompensated cirrhosis)

Note: Liver biopsy is not usually required for diagnosis but is helpful to stage the disease.

Haematological transplant
Both:
1. Patient at risk of veno-occlusive disease or has hepatic impairment and is undergoing conditioning treatment prior to allogenic stem cell or bone marrow transplantation; and
2. Treatment for up to 13 weeks.

Total parenteral nutrition induced cholestasis
Both:
1. Paediatric patient has developed abnormal liver function as indicated on testing which is likely to be induced by TPN; and
2. Liver function has not improved with modifying the TPN composition

20 ISPAGHULA (PSYLLIUM) HUSK (price and addition of HSS)
  Powder for oral soln – 1% DV Sep-13 to 2016 ...................... 5.51 500 g Konsyl-D

24 ASCORBIC ACID
  Tab 100 mg .................................................. 13.80 500 Cvite
  (Vitala-C tab 100 mg to be delisted 1 September 2013)

25 MULTIVITAMINS
  Tab (BPC cap strength) ........................................... (Mvite)
  (MultiADE tab (BPC cap strength) to be delisted 1 September 2013)

BLOOD AND BLOOD FORMING ORGANS

31 TICAGRELOR
  ➔ Tab 90 mg .................................................... 90.00 56 Brilinta

Restricted
Restricted to treatment of acute coronary syndromes specifically for patients who have recently been diagnosed with an ST-elevation or a non-ST-elevation acute coronary syndrome, and in whom fibrinolytic therapy has not been given in the last 24 hours and is not planned.
Changes to Section H - effective 1 July 2013 (continued)

CARDIOVASCULAR SYSTEM

42 METOLAZONE (amendment to restriction)
   \(\rightarrow\) Tab 5 mg
   Restricted
   Either:
   1. For the treatment of Patients with refractory heart failure who are intolerant or have not responded to loop diuretics and/or loop-thiazide combination therapy; or
   2. Patient has severe refractory nephrotic oedema unresponsive to high dose loop diuretics and concentrated albumin infusions

DERMATOLOGICALS

48 FUSIDATE SODIUM [FUSIDIC ACID] (price and addition of HSS)
   Oint 2% – 1% \(\rightarrow\) DV Sep-13 to 2016 ............................................. 3.45 15 g Foban

INFECTIONS

69 MOXIFLOXACIN (additional restriction)
   \(\rightarrow\) Tab 400 mg................................................................. 52.00 5 Avelox
   \(\rightarrow\) Inj 2 mg per ml, 250 ml bag........................................ 70.00 1 Avelox IV 400
   Restricted
   Mycoplasma genitalium
   All of the following:
   1. Has nucleic acid amplification test (NAAT) confirmed Mycoplasma genitalium; and
   2. Has tried and failed to clear infection using azithromycin; and
   3. Treatment is only for 7 days.

70 FOSFOMYCIN
   \(\rightarrow\) Powder for oral sol, 3 g sachet
   Restricted
   Infectious disease physician or clinical microbiologist

71 PIVMECILLINAM
   \(\rightarrow\) Tab 200 mg
   Restricted
   Infectious disease physician or clinical microbiologist

77 NON-NUCLEOSIDE REVERSE TRANSCRIPTASE INHIBITORS

78 NUCLEOSIDE REVERSE TRANSCRIPTASE INHIBITORS

79 PROTEASE INHIBITORS

80 STRAND TRANSFER INHIBITORS
   Restricted
   Confirmed HIV/AIDS
   Both:
   1. Confirmed HIV infection; and
   2. Any of the following:
      2.1 Symptomatic patient; or
      2.2 Patient aged 12 months and under; or
      2.3 Both:
         2.3.1 Patient aged 1 to 5 years; and
         2.3.2 Any of the following:
            2.3.2.1 CD4 counts < 1000 cells/mm3; or

continued...
Changes to Section H - effective 1 July 2013 (continued)

2.3.2.2 CD4 counts < 0.25 × total lymphocyte count; or
2.3.2.3 Viral load counts > 100000 copies per ml; or
2.4 Both:
   2.4.1 Patient aged 6 years and over; and
   2.4.2 CD4 counts < 350 cells/mm³

Prevention of maternal transmission
Either:
1 Prevention of maternal foetal transmission; or
2 Treatment of the newborn for up to eight weeks.

Post-exposure prophylaxis following non-occupational exposure to HIV
Both:
1 Treatment course to be initiated within 72 hours post exposure; and
2 Either Any of the following:
   2.1 Patient has had unprotected receptive anal intercourse with a known HIV positive person; or
   2.2 Patient has shared intravenous injecting equipment with a known HIV positive person.

2.3 Patient has had non-consensual intercourse and the clinician considers that the risk assessment indicates prophylaxis is required

Percutaneous exposure
Patient has percutaneous exposure to blood known to be HIV positive

82 ENTECAVIR

Tab 0.5 mg ................................................................. 400.00  30  Baraclude

Restricted
Gastroenterologist or infectious disease physician
All of the following:
1 Patient has confirmed Hepatitis B infection (HBsAg positive for more than 6 months); and
2 Patient is Hepatitis B nucleoside analogue treatment-naive; and
3 Entecavir dose 0.5 mg/day; and
4 Either:
   4.1 ALT greater than upper limit of normal; or
   4.2 Bridging fibrosis or cirrhosis (Metavir stage 3 or greater or moderate fibrosis) on liver histology; and
5 Either:
   5.1 HBeAg positive; or
   5.2 Patient has ≥ 2,000 IU HBV DNA units per ml and fibrosis (Metavir stage 2 or greater) on liver histology; and
6 No continuing alcohol abuse or intravenous drug use; and
7 Not co-infected with HCV, HIV or HDV; and
8 Neither ALT nor AST greater than 10 times upper limit of normal; and
9 No history of hypersensitivity to entecavir; and
10 No previous documented lamivudine resistance (either clinical or genotypic).

82 LAMIVUDINE (amendment to restriction)

Oral liq 5 mg per ml

Tab 100 mg – 1% DV Dec-12 to 2014 ................................. 32.50  28  Zetlam

Restricted
Gastroenterologist, infectious disease specialist, paediatrician or general physician

Initiation
Re-assessment required after 12 months

1.1 All of the following:
   1.1.1 HBsAg positive for more than 6 months; and
   1.1.2 HBeAg positive or HBV DNA positive defined as ≥ 100,000 copies per ml by quantitative PCR at a reference laboratory; and

continued...
Changes to Section H - effective 1 July 2013 (continued)

1.1.3 ALT greater than twice upper limit of normal or bridging fibrosis or cirrhosis (Metavir stage 3 or 4 or equivalent) on liver histology or clinical/radiological evidence of cirrhosis; or

21 HBV DNA positive cirrhosis prior to liver transplantation; or

32 HBsAg positive and have had a liver, kidney, heart, lung or bone marrow transplant; or

43 Hepatitis B virus naïve patient who has received a liver transplant from an anti-HBc (Hepatitis B core antibody) positive donor; or

4 HBV DNA positive cirrhosis prior to liver transplantation; or

5 Hepatitis B virus naïve patient who has received anti-tumour necrosis factor treatment; or

6 Hepatitis B core antibody (anti-HBc) positive patient who is receiving rituximab plus high dose steroids (e.g. R-CHOP).

2 All of the following:

2.1 No continuing alcohol abuse or intravenous drug use; and

2.2 Not coinfected with HCV or HDV; and

2.3 Neither ALT nor AST greater than 10 times upper limit of normal; and

2.4 No history of hypersensitivity to lamivudine; and

2.5 No previous lamivudine therapy with genotypically proven lamivudine resistance.

Continuation – patients who have maintained continuous treatment and response to lamivudine

Re-assessment required after 2 years

All of the following:

1 Have maintained continuous treatment with lamivudine; and

2 Most recent test result shows continuing biochemical response (normal ALT); and

3 HBV DNA <100,000 copies per ml by quantitative PCR at a reference laboratory; or

Continuation – when given in combination with adefovir dipivoxil for patients with cirrhosis and resistance to lamivudine

Re-assessment required after 2 years

All of the following:

1 Lamivudine to be used in combination with adefovir dipivoxil; and

2 Patient is cirrhotic; and

Documented resistance to lamivudine, defined as:

3 Patient has raised serum ALT (> 1 × ULN); and

4 Patient has HBV DNA greater than 100,000 copies per mL, or viral load = 10 fold over nadir; and

5 Detection of M204I or M204V mutation; or

Continuation – when given in combination with adefovir dipivoxil for patients with resistance to adefovir dipivoxil

Re-assessment required after 2 years

All of the following:

1 Lamivudine to be used in combination with adefovir dipivoxil; and

Documented resistance to adefovir, defined as:

2 Patient has raised serum ALT (> 1 × ULN); and

3 Patient has HBV DNA greater than 100,000 copies per mL, or viral load = 10 fold over nadir; and

4 Detection of N236T or A181T/V mutation.

83 TENOFOVIR DISOPROXIL FUMARATE (amendment to restriction)

 dataSnapshot:image/png;base64,iVBORw0KGgoAAAANSUhEUgAAgAAAAkCqAAAND7cAwAAAAi2S0hXU1BQAAAIABJREFUeNrs6zgDAgEEC6A9gAAAABJRU5ErkJggg==

Restricted

Confirmed hepatitis B

Either:

1 All of the following:

1.1 Patient has confirmed Hepatitis B infection (HBsAg positive for more than 6 months); and

1.2 Patient has had previous lamivudine, adefovir or entecavir therapy; and

1.3 HBV DNA greater than 20,000 IU/mL or increased ≥ 10 fold over nadir; and

continued...
Changes to Section H - effective 1 July 2013 (continued)

1.4 Any of the following:
   1.4.1 Lamivudine resistance - detection of M204I/V mutation; or
   1.4.2 Adefovir resistance - detection of A181T/V or N236T mutation; or
   1.4.3 Entecavir resistance - detection of relevant mutations including I169T, L180M T184S/A/I/L/G/C
   M,S202C/G/I,M204V or M250I/V mutation; or

2. Patient is either listed or has undergone liver transplantation for HBV; or

3. **Patient has decompensated cirrhosis with a Mayo score >20.**

Pregnant *or* Breastfeeding, **Active hepatitis B**

*Limited to four twelve months’ treatment*

Both:

1. Patient is HBsAg positive and pregnant; and
2. Either:
   2.1 HBV DNA > 20,000 IU/mL and ALT > ULN; or
   2.2 HBV DNA > 100 million IU/mL and ALT normal

Pregnant, prevention of vertical transmission

*Limited to six months’ treatment*

Both:

1. Patient is HBsAg positive and pregnant; and
2. HBV DNA > 200 20 million IU/mL and ALT normal.

Confirmed HIV/AIDS

Both:

1. Confirmed HIV infection; and
2. Any of the following:
   2.1 Symptomatic patient; or
   2.2 Patient aged 12 months and under; or
   2.3 Both:
      2.3.1 Patient aged 1 to 5 years; and
      2.3.2 Any of the following:
         2.3.2.1 CD4 counts < 1000 cells/mm3; or
         2.3.2.2 CD4 counts < 0.25 × total lymphocyte count; or
         2.3.2.3 Viral load counts > 100000 copies per ml; or
   2.4 Both:
      2.4.1 Patient aged 6 years and over; and
      2.4.2 CD4 counts < 350 500 cells/mm3

Prevention of maternal transmission

Either:

1. Prevention of maternal foetal transmission; or
2. Treatment of the newborn for up to eight weeks.

Post-exposure prophylaxis following non-occupational exposure to HIV

Both:

1. Treatment course to be initiated within 72 hours post exposure; and
2. Either:
   2.1 Patient has had unprotected receptive anal intercourse with a known HIV positive person; or
   2.2 Patient has shared intravenous injecting equipment with a known HIV positive person.

2.3 Patient has been subjected to non-consensual intercourse and the clinician considers that the risk assessment indicates prophylaxis is required.

Percutaneous exposure

Patient has percutaneous exposure to blood known to be HIV positive

*(Brand) indicates a brand example only. It is not a contracted product.*
Changes to Section H - effective 1 July 2013 (continued)

84 VALACICLOVIR (additional restriction)

- Tab 500 mg : 102.72 $ 30 Valtrex

Restricted

Immunocompromised patients

Limited to 7 days treatment

Both:

1. Patients is immunocompromised; and
2. Patient has herpes zoster.

NERVOUS SYSTEM

106 VENLAFAXINE (↓ price)

- Tab 37.5 mg : 7.84 $ 28 Arrow-Venlafaxine XR
- Tab 75 mg : 13.94 $ 28 Arrow-Venlafaxine XR
- Tab 150 mg : 17.08 $ 28 Arrow-Venlafaxine XR
- Tab 225 mg : 27.14 $ 28 Arrow-Venlafaxine XR
- Cap 37.5 mg : 8.71 $ 28 Efexor XR
- Cap 75 mg : 17.42 $ 28 Efexor XR
- Cap 150 mg : 21.35 $ 28 Efexor XR

108 GABAPENTIN (additional restriction)

- Cap 100 mg : 7.16 $ 100 Nupentin
- Cap 300 mg : 11.50 $ 100 Nupentin
- Cap 400 mg : 14.75 $ 100 Nupentin
- Tab 600 mg

Restricted

For preoperative and/or postoperative use for up to a total of 8 days' use or 
For the pain management of burns patients with monthly review.

111 SUMATRIPTAN (↓ price and addition of HSS)

- Tab 50 mg – 1% DV Sep-13 to 2016 : 29.80 $ 100 Arrow-Sumatriptan
- Tab 100 mg – 1% DV Sep-13 to 2016 : 54.80 $ 100 Arrow-Sumatriptan
- Inj 12 mg per ml, 0.5 ml cartridge – 1% DV Sep-13 to 2016 : 13.80 $ 2 Arrow-Sumatriptan

112 ONDANSETRON (↓ price and addition of HSS)

- Inj 2 mg per ml, 2 ml ampoule – 1% DV Sep-13 to 2016 : 1.82 $ 5 Ondanaccord
- Inj 2 mg per ml, 4 ml ampoule – 1% DV Sep-13 to 2016 : 2.18 $ 5 Ondanaccord

118 MELATONIN (addition of suggested brand)

- Tab modified-release 2 mg (Circadin)

ONCOLOGY AGENTS AND IMMUNOSUPPRESSANTS

123 DOXORUBICIN HYDROCHLORIDE (addition of presentation and note)

- Inj 50 mg vial
- Inj 2 mg per ml, 25 ml vial – 1% DV Mar-13 to 2015 : 17.00 $ 1 Arrow-Doxorubicin

Note: DV limit applies to all 50 mg presentations of doxorubicin hydrochloride

SENSORY ORGANS

166 CARBOMER (delay to brand listing)

- Ophthalmic gel 0.3%, single dose : 8.25 $ 30 Poly-Gel

Products with Hospital Supply Status (HSS) are in bold.

Expiry date of HSS period is 30 June of the year indicated unless otherwise stated.
Changes to Section H - effective 1 July 2013 (continued)

166 MACROGOL 400 AND PROPYLENE GLYCOL (delay to brand listing)
   Eye drops 0.4% with propylene glycol 0.3% preservative free,
   single dose ............................................................... 4.30  24  Systane Unit Dose

SPECIAL FOODS

168 FOOD/FLUID THICKENERS (amendment to note)

NOTE: While pre-thickened drinks have not been included in Section H, DHB hospitals may continue to use such
products, provided that use was established prior to 1 July 2013. PHARMAC intends to make a further decision
in relation to prethickened drinks in the future, and will notify of any change to this situation.

NOTE: While pre-thickened drinks and supplements have not been included in Section H, DHB hospitals may
continue to use such products for patients with dysphagia, provided that:
- use was established prior to 1 July 2013; and
- the product has not been specifically considered and excluded by PHARMAC; and
- use of the product conforms to any applicable indication restrictions for similar products that are listed
  in Section H (for example, use of thickened high protein products should be in line with the restriction for
  high protein oral feed in Section H).

PHARMAC intends to make a further decision in relation to pre-thickened drinks and supplements in the
future, and will notify of any change to this situation.

168 CAROB BEAN GUM WITH MAIZE STARCH AND MALTODEXTRIN (change to suggested brand name)
   Powder  .........................................................  Karicare Aptamil Feed Thickener
   .........................................................  Karicare Aptamil

173 HIGH CALORIE PRODUCTS (amendment to restriction)

Restricted

Either: Any of the following:
1 Patient is fluid volume or rate restricted; or
2 Patient requires low electrolyte; or
23 Both:
   23.1 Any of the following:
       23.1.1 Cystic fibrosis; or
       23.1.2 Any condition causing malabsorption; or
       23.1.3 Faltering growth in an infant/child; or
       23.1.4 Increased nutritional requirements; and
23.2 Patient has substantially increased metabolic requirements.

173 HIGH PROTEIN ENTERAL FEED 1.25 KCAL/ML (amendment to restriction)

   Liquid 6.3 g protein, 14.2 g carbohydrate
   and 4.9 g fat per 100 ml, 1,000 ml bag
   .........................................................  Nutrison Protein Plus

   Liquid 6.3 g protein, 14.1 g carbohydrate, 4.9 g fat
   and 1.5 g fibre per 100 ml, 1,000 ml bag
   .........................................................  Nutrison Protein Plus Multi Fibre

Restricted

Both:
1 The patient has a high protein requirement; and
2 Any of the following:
   2.1 Patient has liver disease; or
   2.2 Patient is obese (BMI > 30) and is undergoing surgery; or
   2.3 Patient is fluid restricted; or
   continued...
Changes to Section H - effective 1 July 2013 (continued)

2.4 Patient does not have increased energy requirements.
2.4 Patient’s needs cannot be more appropriately met using a high calorie product.

174 EXTENSIVELY HYDROLYSED FORMULA (change to suggested brand name)

- Powder 14 g protein, 53.4 g carbohydrate
  and 27.3 g fat per 100 g, 450 g can

(Gold Pepti Junior Karicare Aptamil)
(Karicare Aptamil Gold Pepti Junior)

175 PRETERM FORMULA

- Powder 1.9 g protein, 7.5 g carbohydrate
  and 3.9 g fat per 14 g, can

S-26 Gold Premgro
Restricted
For infants born before 33 weeks’ gestation or weighing less than 1.5 kg at birth.

176 Paediatric Products Infant Formulas

PAEDIATRIC ORAL FEED 1 KCAL/ML

- Liquid 2.6 g protein, 10.3 g carbohydrate, 5.4 g fat
  and 0.6 g fibre per 100 ml, 100 ml bottle

(Infatrini)
Restricted
Both:
1. Either of the following:
   1.1 The patient is fluid restricted; or
   1.2 The patient has increased nutritional requirements due to faltering growth;
   and
2. Patient is under 18 months old and weighs less than 8kg.

178 HIGH ARGinine ORAL FEED 1.4 KCAL/ML

- Liquid 7.6 g protein, 18.9 g carbohydrate, 3.9 g fat
  and 1.4 g fibre per 100 ml, carton

Impact Advanced Recovery (Vanilla)
(Impact Advanced Recovery (Chocolate))

Note: these listings are new Pharmacodes for existing products.
