Introducing PHARMAC
The Pharmaceutical Management Agency (PHARMAC) makes decisions that help control Government spending on pharmaceuticals. This includes community pharmaceuticals, hospital pharmaceuticals, vaccines and increasingly, hospital medical devices. PHARMAC negotiates prices, sets subsidy levels and conditions, and makes decisions on changes to the subsidised list. The funding for pharmaceuticals comes from District Health Boards.

PHARMAC’s role:

“Secure for eligible people in need of pharmaceuticals, the best health outcomes that can reasonably be achieved, and from within the amount of funding provided.”

New Zealand Public Health and Disability Act 2000

To ensure our decisions are as fair and robust as possible we use a decision-making process that incorporates clinical, economic and commercial issues. We also seek the views of users and the wider community through consultation. The processes we generally use are outlined in our Operating Policies and Procedures.

Further information about PHARMAC and the way we make funding decisions can be found on the PHARMAC website at http://www.pharmac.govt.nz/about.

Purpose of the Pharmaceutical Schedule
The purpose of the Schedule is to list:

- the Community Pharmaceuticals that are subsidised by the Government and to show the amount of the subsidy paid to contractors, as well as the manufacturer’s price and any access conditions that may apply;
- the Hospital Pharmaceuticals that may be used in DHB Hospitals, as well as any access conditions that may apply; and
- the Pharmaceuticals, including Medical Devices, used in DHB Hospitals for which national prices have been negotiated by PHARMAC.

The Schedule does not show the final cost to Government of subsidising each Community Pharmaceutical or to DHB Hospitals in purchasing each Pharmaceutical, since that will depend on any rebate and other arrangements PHARMAC has with the supplier and, for Pharmaceuticals used in DHB Hospitals, on any logistics arrangements put in place.

This book contains sections A to D and Section I of the Pharmaceutical Schedule and lists the Pharmaceuticals funded for use in the community, including vaccines, as well as haemophilia and cancer treatments given in DHB hospitals. Section H lists the Pharmaceuticals that that can be used in DHB hospitals and is a separate publication.

The Pharmaceuticals in this book are listed by therapeutic group, which is based on the WHO Anatomical Therapeutic Chemical (ATC) system. The listings are displayed alphabetically under each heading.

The index lists both chemical entities and product brand names.
Explaining pharmaceutical entries

The Pharmaceutical Schedule lists pharmaceuticals subsidised by the Government, the subsidy, the supplier's price and the access conditions that may apply.

Three months supply may be dispensed at one time if endorsed “certified exemption” by the prescriber or pharmacist.

Practitioner's Supply Order

Three months or six months, as applicable, dispensed all-at-once

Conditions of and restrictions on prescribing (including Special Authority where it applies)

Sole Supply

Fully Subsidised

Fully Subsidised

Sole subsidised supply product

Fully subsidised product

Original Pack - Subsidy is rounded up to a multiple of whole packs

Quantity the Subsidy applies to

Subsidy paid on a product before mark-ups and GST

Manufacturer's Price if different from Subsidy

**SA1155 Special Authority for Subsidy**

**Initial application — (Crohn’s disease)** from any relevant practitioner. Approvals valid for 6 months for applications meeting the following criteria:

Both:

1. Mild to moderate ileal, ileocaecal or proximal Crohn’s disease; and
2. Any of the following:
   2.1 Diabetes; or
   2.2 Cushingoid habitus; or
   2.3 Osteoporosis where there is significant risk of fracture; or

continued…
continued...

2.4 Severe acne following treatment with conventional corticosteroid therapy; or
2.5 History of severe psychiatric problems associated with corticosteroid treatment; or
2.6 History of major mental illness (such as bipolar affective disorder) where the risk of conventional corticosteroid treatment causing relapse is considered to be high; or
2.7 Relapse during pregnancy (where conventional corticosteroids are considered to be contraindicated).

Initial application — (collagenous and lymphocytic colitis (microscopic colitis)) from any relevant practitioner. Approvals valid for 6 months where patient has a diagnosis of microscopic colitis (collagenous or lymphocytic colitis) by colonoscopy with biopsies.

Initial application — (gut Graft versus Host disease) from any relevant practitioner. Approvals valid for 6 months where patient has a gut Graft versus Host disease following allogenic bone marrow transplantation*.

Note: Indication marked with * is an unapproved indication.

Renewal from any relevant practitioner. Approvals valid for 6 months where the treatment remains appropriate and the patient is benefiting from treatment.

Note: Clinical trials for Entocort CIR use beyond three months demonstrated no improvement in relapse rate.

SUCRALFATE

- Tab 1 g ................................................................. 35.50 120 (48.28) Carafate

Bile and Liver Therapy

RIFAXIMIN – Special Authority see SA1461 below – Retail pharmacy

- Tab 550 mg .......................................................... 625.00 56 ✓ Xifaxan

➽ SA1461 Special Authority for Subsidy

Initial application only from a gastroenterologist, hepatologist or Practitioner on the recommendation of a gastroenterologist or hepatologist. Approvals valid for 6 months where the patient has hepatic encephalopathy despite an adequate trial of maximum tolerated doses of lactulose.

Renewal only from a gastroenterologist, hepatologist or Practitioner on the recommendation of a gastroenterologist or hepatologist. Approvals valid without further renewal unless notified where the treatment remains appropriate and the patient is benefiting from treatment.

Diabetes

Hyperglycaemic Agents

DIAZOXIDE – Special Authority see SA1320 below – Retail pharmacy

- Cap 25 mg .............................................................. 110.00 100 ✓ Proglicem S29
- Cap 100 mg ............................................................ 280.00 100 ✓ Proglicem S29
- Oral liq 50 mg per ml .................................................. 620.00 30 ml OP ✓ Proglycem S29

➽ SA1320 Special Authority for Subsidy

Initial application from any relevant practitioner. Approvals valid for 12 months where used for the treatment of confirmed hypoglycaemia caused by hyperinsulinism.

Renewal from any relevant practitioner. Approvals valid without further renewal unless notified where the treatment remains appropriate and the patient is benefiting from treatment.

GLUCAGON HYDROCHLORIDE

- Inj 1 mg syringe kit – Up to 5 kit available on a PSO .............. 32.00 1 ✓ Glucagen Hypokit

▲Three months supply may be dispensed at one time if endorsed “certified exemption” by the prescriber or pharmacist.

*Three months or six months, as applicable, dispensed all-at-once
Diabetes Management

Ketone Testing

BLOOD KETONE DIAGNOSTIC TEST STRIP – Subsidy by endorsement
a) Not on a BSO
b) Maximum of 20 strip per prescription
c) Up to 10 strip available on a PSO
d) Patient has any of the following:
   1) type 1 diabetes; or
   2) permanent neonatal diabetes; or
   3) undergone a pancreatectomy; or
   4) cystic fibrosis-related diabetes; or
   5) metabolic disease or epilepsy under the care of a paediatrician, neurologist or metabolic specialist.

The prescription must be endorsed accordingly.

Test strips.................................................................15.50 10 strip OP ✔ KetoSens

Dual Blood Glucose and Blood Ketone Testing

DUAL BLOOD GLUCOSE AND BLOOD KETONE DIAGNOSTIC TEST METER – Subsidy by endorsement
a) Maximum of 1 pack per prescription
b) Up to 1 pack available on a PSO
c) A dual blood glucose and blood ketone diagnostic test meter is subsidised for a patient who has:
   1) type 1 diabetes; or
   2) permanent neonatal diabetes; or
   3) undergone a pancreatectomy; or
   4) cystic fibrosis-related diabetes; or
   5) metabolic disease or epilepsy under the care of a paediatrician, neurologist or metabolic specialist.

The prescription must be endorsed accordingly. Only 1 meter per patient will be subsidised (no repeat prescriptions). For the avoidance of doubt patients who have previously received a funded meter, other than CareSens, are eligible for a funded CareSens meter.

Meter with 50 lancets, a lancing device and 10 blood glucose diagnostic test strips.................................................20.00 1 OP ✔ CareSens Dual
Blood Glucose Testing

BLOOD GLUCOSE DIAGNOSTIC TEST METER – Subsidy by endorsement

a) Maximum of 1 pack per prescription
b) Up to 1 pack available on a PSO
c) A diagnostic blood glucose test meter is subsidised for a patient who:
   1) is receiving insulin or sulphonylurea therapy; or
   2) is pregnant with diabetes; or
   3) is on home TPN at risk of hypoglycaemia or hyperglycaemia; or
   4) has a genetic or an acquired disorder of glucose homeostasis, excluding type 1 or type 2 diabetes and metabolic syndrome.

The prescription must be endorsed accordingly. Only one CareSens meter per patient will be subsidised (no repeat prescriptions). Patients already using the CareSens N POP meter and CareSens N meter are not eligible for a new meter, unless they have:

1) type 1 diabetes; or
2) permanent neonatal diabetes; or
3) undergone a pancreatectomy; or
4) cystic fibrosis-related diabetes.

For the avoidance of doubt patients who have previously received a funded meter, other than CareSens, are eligible for a funded CareSens meter.

Meter with 50 lancets, a lancing device and 10 diagnostic test strips...........................................................................................10.00 1 OP ✔ CareSens N ✔ CareSens N POP ✔ CareSens N Premier

Note: Only 1 meter available per PSO

BLOOD GLUCOSE DIAGNOSTIC TEST STRIP – Up to 50 test available on a PSO

The number of test strips available on a prescription is restricted to 50 unless:

1) Prescribed for a patient on insulin or a sulphonylurea and endorsed accordingly. Pharmacists may annotate the prescription as endorsed where there exists a record of prior dispensing of insulin or sulphonylurea; or
2) Prescribed on the same prescription as insulin or a sulphonylurea in which case the prescription is deemed to be endorsed; or
3) Prescribed for a pregnant woman with diabetes and endorsed accordingly; or
4) Prescribed for a patient on home TPN at risk of hypoglycaemia or hyperglycaemia and endorsed accordingly; or
5) Prescribed for a patient with a genetic or an acquired disorder of glucose homeostasis excluding type 1 or type 2 diabetes and metabolic syndrome and endorsed accordingly.

Min basal rate 0.025 U/h ................................................................. $8,800.00 1 ✔ MiniMed 640G

SA1603 Special Authority for Subsidy

Initial application — (permanent neonatal diabetes) only from a relevant specialist or nurse practitioner. Approvals valid for 3 months for applications meeting the following criteria:

All of the following:

1. Patient has permanent neonatal diabetes; and
2. A MDI regimen trial is inappropriate; and
3. Has been evaluated by the multidisciplinary team for their suitability for insulin pump therapy; and
4. Patient/Parent/Guardian has undertaken carbohydrate counting education (either a carbohydrate counting course or direct education from an appropriate health professional); and

continued…
continued...

5 Applicant is part of a multidisciplinary team experienced in the management of type 1 diabetes care; and

6 Either:
   6.1 Applicant is a relevant specialist; or
   6.2 Applicant is a nurse practitioner working within their vocational scope.

Renewal — (permanent neonatal diabetes) only from a relevant specialist or nurse practitioner. Approvals valid for 3 months for applications meeting the following criteria:

All of the following:

1 Patient is continuing to derive benefit according to the treatment plan agreed at induction; and

2 Patient remains fully compliant and transition to MDI is considered inappropriate by the treating physician; and

3 It has been at least 4 years since the last insulin pump received by the patient or, in the case of patients qualifying under previous pump therapy for the initial application; the pump is due for replacement; and

4 Either:
   4.1 Applicant is a relevant specialist; or
   4.2 Applicant is a nurse practitioner working within their vocational scope.

Initial application — (severe unexplained hypoglycaemia) only from a relevant specialist or nurse practitioner. Approvals valid for 3 months for applications meeting the following criteria:

All of the following:

1 Patient has type 1 diabetes or has undergone a pancreatectomy or has cystic fibrosis-related diabetes; and

2 Has undertaken carbohydrate counting education (either a carbohydrate counting course or direct education from an appropriate health professional); and

3 Applicant is part of a multidisciplinary team experienced in the management of type 1 diabetes care; and

4 Has adhered to an intensive MDI regimen using analogue insulins for at least six months; and

5 Has had four severe unexplained hypoglycaemic episodes over a six month period (severe as defined as requiring the assistance of another person); and

6 Has an average HbA1c between the following range: equal to or greater than 53 mmol/mol and equal to or less than 90 mmol/mol; and

7 Has been evaluated by the multidisciplinary team for their suitability for insulin pump therapy; and

8 Either:
   8.1 Applicant is a relevant specialist; or
   8.2 Applicant is a nurse practitioner working within their vocational scope.

Renewal — (severe unexplained hypoglycaemia) only from a relevant specialist or nurse practitioner. Approvals valid for 3 months for applications meeting the following criteria:

All of the following:

1 Patient is continuing to derive benefit according to the treatment plan agreed at induction of at least a 50% reduction from baseline in hypoglycaemic events; and

2 HbA1c has not increased by more than 5 mmol/mol from baseline; and

3 Either:
   3.1 It has been at least 4 years since the last insulin pump was received by the patient; or
   3.2 The pump is due for replacement; and

4 Either:
   4.1 Applicant is a relevant specialist; or
   4.2 Applicant is a nurse practitioner working within their vocational scope.

Initial application — (HbA1c) only from a relevant specialist or nurse practitioner. Approvals valid for 3 months for applications meeting the following criteria:

All of the following:

1 Patient has type 1 diabetes or has undergone a pancreatectomy or has cystic fibrosis-related diabetes; and

continued…
continued…

2 Has undertaken carbohydrate counting education (either a carbohydrate counting course or direct education from an
appropriate health professional); and
3 Applicant is part of a multidisciplinary team experienced in the management of type 1 diabetes care; and
4 Has adhered to an intensive MDI regimen using analogue insulins for at least six months; and
5 Has unpredictable and significant variability in blood glucose including significant hypoglycaemia affecting the ability to
reduce HbA1c; and
6 In the opinion of the treating clinician, HbA1c could be reduced by at least 10 mmol/mol using insulin pump treatment; and
7 Has typical HbA1c results between the following range: equal to or greater than 65 mmol/mol and equal to or less than
90 mmol/mol; and
8 Has been evaluated by the multidisciplinary team for their suitability for insulin pump therapy; and
9 Either:
   9.1 Applicant is a relevant specialist; or
   9.2 Applicant is a nurse practitioner working within their vocational scope.

Renewal — (HbA1c) only from a relevant specialist or nurse practitioner. Approvals valid for 3 months for applications meeting
the following criteria:
All of the following:

1 Patient is continuing to derive benefit according to the treatment plan agreed at induction of achieving and maintaining a
reduction in HbA1c from baseline of 10 mmol/mol; and
2 The number of severe unexplained recurrent hypoglycaemic episodes has not increased from baseline; and
3 Either:
   3.1 It has been at least 4 years since the last insulin pump was received by the patient; or
   3.2 The pump is due for replacement; and
4 Either:
   4.1 Applicant is a relevant specialist; or
   4.2 Applicant is a nurse practitioner working within their vocational scope.

Initial application — (Previous use before 1 September 2012) only from a relevant specialist or nurse practitioner. Approvals
valid for 3 months for applications meeting the following criteria:
All of the following:

1 Patient has type 1 diabetes or has undergone a pancreatectomy or has cystic fibrosis-related diabetes; and
2 Was already on pump treatment prior to 1 September 2012 and had been evaluated by the multidisciplinary team for their
suitability for insulin pump therapy at the time of initiating that pump treatment and continues to benefit from pump
treatment; and
3 The patient has adhered to an intensive MDI regimen using analogue insulins for at least six months prior to initiating
pump therapy; and
4 The patient is continuing to derive benefit from pump therapy; and
5 The patient has achieved and is maintaining a HbA1c of equal to or less than 80 mmol/mol on pump therapy; and
6 The patient has had no increase in severe unexplained hypoglycaemic episodes from baseline; and
7 The patient’s HbA1c has not deteriorated more than 5 mmol/mol from baseline; and
8 Either:
   8.1 It has been at least 4 years since the last insulin pump was received by the patient; or
   8.2 The pump is due for replacement; and
9 Either:
   9.1 Applicant is a relevant specialist; or
   9.2 Applicant is a nurse practitioner working within their vocational scope.

Renewal — (Previous use before 1 September 2012) only from a relevant specialist or nurse practitioner. Approvals valid for 3
months for applications meeting the following criteria:
All of the following:

continued…
continued...

1. The patient is continuing to derive benefit according to the treatment plan and has maintained a HbA1c of equal to or less than 80 mmol/mol; and
2. The patient's HbA1c has not deteriorated more than 5 mmol/mol from the time of commencing pump treatment; and
3. The patient has not had an increase in severe unexplained hypoglycaemic episodes from baseline; and
4. Either:
   4.1. It has been at least 4 years since the last insulin pump was received by the patient; or
   4.2. The pump is due for replacement; and
5. Either:
   5.1. Applicant is a relevant specialist; or
   5.2. Applicant is a nurse practitioner working within their vocational scope.

### Insulin Pump Consumables

**SA1604 Special Authority for Subsidy**

**Initial application — (permanent neonatal diabetes)** only from a relevant specialist or nurse practitioner. Approvals valid for 9 months for applications meeting the following criteria:

All of the following:

1. Patient has permanent neonatal diabetes; and
2. A MDI regimen trial is inappropriate; and
3. Has been evaluated by the multidisciplinary team for their suitability for insulin pump therapy; and
4. Patient/Parent/Guardian has undertaken carbohydrate counting education (either a carbohydrate counting course or direct education from an appropriate health professional); and
5. Applicant is part of a multidisciplinary team experienced in the management of type 1 diabetes care; and
6. Either:
   6.1. Applicant is a relevant specialist; or
   6.2. Applicant is a nurse practitioner working within their vocational scope.

**Renewal — (permanent neonatal diabetes)** only from a relevant specialist or nurse practitioner. Approvals valid for 2 years for applications meeting the following criteria:

All of the following:

1. Patient is continuing to derive benefit according to the treatment plan agreed at induction; and
2. Patient remains fully compliant and transition to MDI is considered inappropriate by the treating physician; and
3. Either:
   3.1. Applicant is a relevant specialist; or
   3.2. Applicant is a nurse practitioner working within their vocational scope.

**Initial application — (severe unexplained hypoglycaemia)** only from a relevant specialist or nurse practitioner. Approvals valid for 9 months for applications meeting the following criteria:

All of the following:

1. Patient has type 1 diabetes or has undergone a pancreatectomy or has cystic fibrosis-related diabetes; and
2. Has undertaken carbohydrate counting education (either a carbohydrate counting course or direct education from an appropriate health professional); and
3. Applicant is part of a multidisciplinary team experienced in the management of type 1 diabetes care; and
4. Has adhered to an intensive MDI regimen using analogue insulins for at least six months; and
5. Has had four severe unexplained hypoglycaemic episodes over a six month period (severe as defined as requiring the assistance of another person); and

**SA1739** Special Authority for Subsidy

Initial application — (Alagille syndrome or progressive familial intrahepatic cholestasis) from any relevant practitioner. Approvals valid without further renewal unless notified for applications meeting the following criteria:

Either:
1. Patient has been diagnosed with Alagille syndrome; or
2. Patient has progressive familial intrahepatic cholestasis.

Initial application — (Chronic severe drug induced cholestatic liver injury) from any relevant practitioner. Approvals valid for 3 months for applications meeting the following criteria:

All of the following:
1. Patient has chronic severe drug induced cholestatic liver injury; and
2. Cholestatic liver injury not due to Total Parenteral Nutrition (TPN) use in adults; and
3. Treatment with Ursodeoxycholic acid may prevent hospital admission or reduce duration of stay.

Initial application — (Primary biliary cholangitis) from any relevant practitioner. Approvals valid for 6 months for applications meeting the following criteria:

Both:
1. Primary biliary cholangitis confirmed by antimitochondrial antibody titre (AMA) > 1:80, and raised cholestatic liver enzymes with or without raised serum IgM or, if AMA is negative, by liver biopsy; and
2. Patient not requiring a liver transplant (bilirubin > 100 umol/l; decompensated cirrhosis).

Initial application — (Pregnancy) from any relevant practitioner. Approvals valid for 6 months where the patient diagnosed with cholestasis of pregnancy.

Initial application — (Haematological Transplant) from any relevant practitioner. Approvals valid for 6 months for applications meeting the following criteria:

Both:

continued...
1 Patient at risk of veno-occlusive disease or has hepatic impairment and is undergoing conditioning treatment prior to allogenic stem cell or bone marrow transplantation; and
2 Treatment for up to 13 weeks.

Initial application — *(Total parenteral nutrition induced cholestasis)* from any relevant practitioner. Approvals valid for 6 months for applications meeting the following criteria:

Both:
1 Paediatric patient has developed abnormal liver function as indicated on testing which is likely to be induced by Total Parenteral Nutrition (TPN); and
2 Liver function has not improved with modifying the TPN composition.

Renewal — *(Chronic severe drug induced cholestatic liver injury)* from any relevant practitioner. Approvals valid for 6 months where the patient continues to benefit from treatment.

Renewal — *(Pregnancy/Primary biliary cholangitis)* from any relevant practitioner. Approvals valid for 2 years where the treatment remains appropriate and the patient is benefiting from treatment.

Renewal — *(Total parenteral nutrition induced cholestasis)* from any relevant practitioner. Approvals valid for 6 months where the paediatric patient continues to require TPN and who is benefiting from treatment, defined as a sustained improvement in bilirubin levels.

Note: Ursodeoxycholic acid is not an appropriate therapy for patients requiring a liver transplant (bilirubin > 100 micromol/l; decompensated cirrhosis). These patients should be referred to an appropriate transplant centre. Treatment failure -- doubling of serum bilirubin levels, absence of a significant decrease in ALP or ALT and AST, development of varices, ascites or encephalopathy, marked worsening of pruritus or fatigue, histological progression by two stages, or to cirrhosis, need for transplantation.

Metabolic Disorder Agents

ALGLUCOSIDASE ALFA – Special Authority see SA1622 below – Retail pharmacy

Inj 50 mg vial ................................................................................ 1,142.60 1 ✔ Myozyme

Special Authority for Subsidy

Initial application only from a metabolic physician. Approvals valid for 12 months for applications meeting the following criteria:

All of the following:
1. The patient is aged up to 24 months at the time of initial application and has been diagnosed with infantile Pompe disease; and
2. Any of the following:
   2.1 Diagnosis confirmed by documented deficiency of acid alpha-glucosidase by prenatal diagnosis using chorionic

continued…

▲ Three months supply may be dispensed at one time if endorsed “certified exemption” by the prescriber or pharmacist.

❋ Three months or six months, as applicable, dispensed all-at-once
villus biopsies and/or cultured amniotic cells; or
2.2 Documented deficiency of acid alpha-glucosidase, and urinary tetrasaccharide testing indicating a diagnostic
elevation of glucose tetrasaccharides; or
2.3 Documented deficiency of acid alpha-glucosidase, and documented molecular genetic testing indicating a
disease-causing mutation in the acid alpha-glucosidase gene (GAA gene); or
2.4 Documented urinary tetrasaccharide testing indicating a diagnostic elevation of glucose tetrasaccharides, and
molecular genetic testing indicating a disease-causing mutation in the GAA gene; and
3 Patient has not required long-term invasive ventilation for respiratory failure prior to starting enzyme replacement therapy
(ERT); and
4 Patient does not have another life-threatening or severe disease where the prognosis is unlikely to be influenced by ERT
or might be reasonably expected to compromise a response to ERT; and
5 Alglucosidase alfa to be administered at doses no greater than 20 mg/kg every 2 weeks.

Renewal only from a metabolic physician. Approvals valid for 12 months for applications meeting the following criteria:
All of the following:
1 The treatment remains appropriate for the patient and the patient is benefiting from treatment; and
2 Alglucosidase alfa to be administered at doses no greater than 20 mg/kg every 2 weeks; and
3 Patient has not had severe infusion-related adverse reactions which were not preventable by appropriate pre-medication
and/or adjustment of infusion rates; and
4 Patient has not developed another life threatening or severe disease where the long term prognosis is unlikely to be
influenced by ERT; and
5 Patient has not developed another medical condition that might reasonably be expected to compromise a response to
ERT; and
6 There is no evidence of life threatening progression of respiratory disease as evidenced by the needed for > 14 days of
invasive ventilation; and
7 There is no evidence of new or progressive cardiomyopathy.

BETaine – Special Authority see SA1727 below – Retail pharmacy
Powder for oral soln.................................................................575.00 180 g OP  ✔ Cystadane

**SA1727** Special Authority for Subsidy
Initial application only from a metabolic physician. Approvals valid for 12 months for applications meeting the following criteria:
All of the following:
1 The patient has a confirmed diagnosis of homocystinuria; and
2 Any of the following:
   2.1 A cystathionine beta-synthase (CBS) deficiency; or
   2.2 A 5,10-methylene-tetrahydrofolate reductase (MTHFR) deficiency; or
   2.3 A disorder of intracellular cobalamin metabolism; and
3 An appropriate homocysteine level has not been achieved despite a sufficient trial of appropriate vitamin supplementation.

Renewal only from a metabolic physician. Approvals valid for 12 months where the treatment remains appropriate and the
patient is benefiting from treatment.

GALSulfase – Special Authority see SA1593 below – Retail pharmacy
Inj 1 mg per ml, 5 ml vial..........................................................2,234.00 1  ✔ Naglazyme

**SA1593** Special Authority for Subsidy
Initial application only from a metabolic physician. Approvals valid for 12 months for applications meeting the following criteria:
Both:
1 The patient has been diagnosed with mucopolysaccharidosis VI; and
2 Either:
   2.1 Diagnosis confirmed by demonstration of N-acetyl-galactosamine-4-sulfatase (arylsulfatase B) deficiency by either

continued…
enzyme activity assay in leukocytes or skin fibroblasts; or

2.2 Detection of two disease causing mutations and patient has a sibling who is known to have mucopolysaccharidosis VI.

Renewal only from a metabolic physician. Approvals valid for 12 months for applications meeting the following criteria:
All of the following:
1. The treatment remains appropriate for the patient and the patient is benefiting from treatment; and
2. Patient has not had severe infusion-related adverse reactions which were not preventable by appropriate pre-medication and/or adjustment of infusion rates; and
3. Patient has not developed another life threatening or severe disease where the long term prognosis is unlikely to be influenced by Enzyme Replacement Therapy (ERT); and
4. Patient has not developed another medical condition that might reasonably be expected to compromise a response to ERT.

IDURSULFASE – Special Authority see SA1623 below – Retail pharmacy

Inj 2 mg per ml, 3 ml vial..........................4,608.30 1 ✔ Elaprase

➽ SA1623 Special Authority for Subsidy

Initial application only from a metabolic physician. Approvals valid for 24 weeks for applications meeting the following criteria:
All of the following:
1. The patient has been diagnosed with Hunter Syndrome (mucopolysaccharidosis II); and
2. Either:
   2.1 Diagnosis confirmed by demonstration of iduronate 2-sulfatase deficiency in white blood cells by either enzyme assay in cultured skin fibroblasts; or
   2.2 Detection of a disease causing mutation in the iduronate 2-sulfatase gene; and
3. Patient is going to proceed with a haematopoietic stem cell transplant (HSCT) within the next 3 months and treatment with idursulfase would be bridging treatment to transplant; and
4. Patient has not required long-term invasive ventilation for respiratory failure prior to starting Enzyme Replacement Therapy (ERT); and
5. Idursulfase to be administered for a total of 24 weeks (equivalent to 12 weeks pre- and 12 weeks post-HSCT) at doses no greater than 0.5 mg/kg every week.

LARONIDASE – Special Authority see SA1695 below – Retail pharmacy

Inj 100 U per ml, 5 ml vial..........................1,335.16 1 ✔ Aidurazyme

➽ SA1695 Special Authority for Subsidy

Initial application only from a metabolic physician. Approvals valid for 24 weeks for applications meeting the following criteria:
All of the following:
1. The patient has been diagnosed with Hurler Syndrome (mucopolysaccharidosis I-H); and
2. Either:
   2.1 Diagnosis confirmed by demonstration of alpha-L-iduronidase deficiency in white blood cells by either enzyme assay in cultured skin fibroblasts; or
   2.2 Detection of two disease causing mutations in the alpha-L-iduronidase gene and patient has a sibling who is known to have Hurler syndrome; and
3. Patient is going to proceed with a haematopoietic stem cell transplant (HSCT) within the next 3 months and treatment with laronidase would be bridging treatment to transplant; and
4. Patient has not required long-term invasive ventilation for respiratory failure prior to starting Enzyme Replacement Therapy (ERT); and
5. Laronidase to be administered for a total of 24 weeks (equivalent to 12 weeks pre- and 12 post-HSCT) at doses no greater than 100 units/kg every week.

SAPROPTERIN DIHYDROCHLORIDE – Special Authority see SA1757 on the next page – Retail pharmacy

Tab soluble 100 mg..........................................................1,452.70 30 OP ✔ Kuvan

▲ Three months supply may be dispensed at one time if endorsed "certified exemption" by the prescriber or pharmacist.

❋ Three months or six months, as applicable, dispensed all-at-once
SA1757 Special Authority for Subsidy

Initial application only from a metabolic physician. Approvals valid for 1 month for applications meeting the following criteria:

All of the following:
1. Patient has phenylketonuria (PKU) and is pregnant or actively planning to become pregnant; and
2. Treatment with sapropterin is required to support management of PKU during pregnancy; and
3. Sapropterin to be administered at doses no greater than a total daily dose of 20 mg/kg; and
4. Sapropterin to be used alone or in combination with PKU dietary management; and
5. Total treatment duration with sapropterin will not exceed 22 months for each pregnancy (includes time for planning and becoming pregnant) and treatment will be stopped after delivery.

Renewal only from a metabolic physician or any relevant practitioner on the recommendation of a metabolic physician. Approvals valid for 12 months for applications meeting the following criteria:

All of the following:
1. Either:
   1.1 Following the initial one-month approval, the patient has demonstrated an adequate response to a 2 to 4 week trial of sapropterin with a clinically appropriate reduction in phenylalanine levels to support management of PKU during pregnancy; or
   1.2 On subsequent renewal applications, the patient has previously demonstrated response to treatment with sapropterin and maintained adequate phenylalanine levels to support management of PKU during pregnancy; and
2. Any of the following:
   2.1 Patient continues to be pregnant and treatment with sapropterin will not continue after delivery; or
   2.2 Patient is actively planning a pregnancy and this is the first renewal for treatment with sapropterin; or
   2.3 Treatment with sapropterin is required for a second or subsequent pregnancy to support management of their PKU during pregnancy; and
3. Sapropterin to be administered at doses no greater than a total daily dose of 20 mg/kg; and
4. Sapropterin to be used alone or in combination with PKU dietary management; and
5. Total treatment duration with sapropterin will not exceed 22 months for each pregnancy (includes time for planning and becoming pregnant) and treatment will be stopped after delivery.

SODIUM BENZOATE – Special Authority see SA1599 below – Retail pharmacy
Soln 100 mg per ml ................................................................. CBS 100 ml  ✔ Amzoate 529

SA1599 Special Authority for Subsidy

Initial application only from a metabolic physician. Approvals valid for 12 months where the patient has a diagnosis of a urea cycle disorder.

Renewal only from a metabolic physician. Approvals valid for 12 months where the treatment remains appropriate and the patient is benefiting from treatment.

SODIUM PHENYLBUTYRATE – Special Authority see SA1598 below – Retail pharmacy
Grans 483 mg per g.................................................................1,920.00 174 g OP  ✔ Pheburane

SA1598 Special Authority for Subsidy

Initial application only from a metabolic physician. Approvals valid for 12 months where the patient has a diagnosis of a urea cycle disorder involving a deficiency of carbamylphosphate synthetase, ornithine transcarbamylase or argininosuccinate synthetase.

Renewal only from a metabolic physician. Approvals valid for 12 months where the treatment remains appropriate and the patient is benefiting from treatment.

Completed application forms must be sent to the coordinator for the Gaucher Treatment Panel and will be considered by the Gaucher Treatment Panel at the next practicable opportunity.
Notification of the Gaucher Treatment Panel’s decision will be sent to the patient, the applying clinician and the patient’s GP (if specified).

Access Criteria
Initial application from any relevant practitioner. Approvals valid for 12 months for applications meeting the following criteria:
All of the following:

1) The patient has a diagnosis of symptomatic type 1 or type 3* Gaucher disease confirmed by the demonstration of specific deficiency of glucocerebrosidase in leukocytes or cultured skin fibroblasts, and genotypic analysis; and
2) Patient does not have another life-threatening or severe disease where the prognosis is unlikely to be influenced by taliglucerase alfa or might be reasonably expected to compromise a response to therapy with taliglucerase alfa; and
3) Taliglucerase alfa is to be administered at a dose no greater than 30 unit/kg every other week rounded to the nearest whole vial (200 units), unless otherwise agreed by PHARMAC; and
4) Supporting clinical information including test reports, MRI whole body STIR, serum glucosylsphingosine, haematological data, and other relevant investigations, are submitted to the Gaucher Panel for assessment; and
5) Any of the following:
6) 1) Patient has haematological complications such as haemoglobin less than 95 g/l, symptomatic anaemia, thrombocytopenia; at least two episodes of severely symptomatic splenic infarcts confirmed with imagery; or massive symptomatic splenomegaly; or
2) Patient has skeletal complications such as acute bone crisis requiring hospitalisation or major pain management strategies; radiological MRI Evidence of incipient destruction of any major joint (e.g. hips or shoulder); spontaneous fractures or vertebral collapse; chronic bone pain not controlled by other pharmaceuticals; or
3) Patient has significant liver dysfunction or hepatomegaly attributable to Gaucher disease; or
4) Patient has reduced vital capacity from clinically significant or progressive pulmonary disease due to Gaucher disease; or
5) Patient is a child and has experienced growth failure with significant decrease in percentile linear growth over a 6-12 month period.

*Unapproved indication
Renewal from any relevant practitioner. Approvals valid for 12 months for applications meeting the following criteria:

continued…
continued…

All of the following:

1) Patient has demonstrated a symptomatic improvement or no deterioration in the main symptom for which therapy was initiated; and
2) Patient has demonstrated a clinically objective improvement or no deterioration in haemoglobin levels, platelet counts and liver and spleen size; and
3) Radiological (MRI) signs of bone activity performed at one year and two years since initiation of treatment begins, and two to three yearly thereafter, demonstrate no deterioration shown by the MRI, compared with MRI taken immediately prior to commencement of therapy or adjusted dose; and
4) Serum glucosylsphingosine levels taken at least 6 to 12 monthly show a decrease compared with baseline; and
5) Patient has not had severe infusion-related adverse reactions which were not preventable by appropriate pre-medication and/or adjustment of infusion rates; and
6) Patient has not developed another medical condition that might reasonably be expected to compromise a response to ERT; and
7) Patient is compliant with regular treatment and taliglucerase alfa is to be administered at a dose no greater than 30 unit/kg every other week rounded to the nearest whole vial (200 units), unless otherwise agreed by PHARMAC; and
8) Supporting clinical information including test reports, MRI whole body STIR, serum glucosylsphingosine, haematological data, and other relevant investigations are submitted to the Gaucher Panel for assessment as required.

   Soln 0.15% – Higher subsidy of $20.31 per 500 ml with Endorsement ......................................................... 9.00 500 ml (20.31) Difflam
   Additional subsidy by endorsement for a patient who has oral mucositis as a result of treatment for cancer, and the prescription is endorsed accordingly.

CARMELLOSE SODIUM WITH GELATIN AND PECTIN
   Paste ........................................................................................................ 17.20 56 g OP ✔️ Stomahesive
   (7.90) Orabase
   Powder ................................................................................................... 8.48 28 g OP ✔️ Stomahesive
   (10.95) Stomahesive

CHLORHEXIDINE GLUCONATE
   Mouthwash 0.2% ............................................................................... 2.57 200 ml OP ✔️ healthE

CHOLINE SALICYLATE WITH CETALKONIUM CHLORIDE
   ❋ Adhesive gel 8.7% with cetalkonium chloride 0.01% ....................... 2.06 15 g OP (6.00) Bonjela

TRIAMCINOLONE ACETONIDE
   Paste 0.1% ...................................................................................... 5.33 5 g OP ✔️ Kenalog in Orabase

Oropharyngeal Anti-infectives

AMPHOTERICIN B
   Lozenges 10 mg .......................................................................... 5.86 20 ✔️ Fungilin

MICONAZOLE
   Oral gel 20 mg per g ...................................................................... 4.74 40 g OP ✔️ Decozol
### NYSTATIN

- **Oral liq 100,000 u per ml**
  - Manufacturer’s Price: $1.95
  - Subsidy: 24 ml OP
  - Brand or Generic Manufacturer: Nilstat

### Other Oral Agents

For folinic mouthwash, pilocarpine oral liquid or saliva substitute formula refer Standard Formulae, page 227.

**HYDROGEN PEROXIDE**
- **Soln 3% (10 vol)** – Maximum of 200 ml per prescription
  - Manufacturer’s Price: $1.40
  - Subsidy: 100 ml
  - Brand or Generic Manufacturer: Pharmacy Health

**THYMOL GLYCERIN**
- **Compound, BPC**
  - Manufacturer’s Price: $9.15
  - Subsidy: 500 ml
  - Brand or Generic Manufacturer: PSM

### Vitamins

#### Vitamin A

**VITAMIN A WITH VITAMINS D AND C**
- **Soln 1000 u with Vitamin D 400 u and ascorbic acid 30 mg per 10 drops**
  - Manufacturer’s Price: $4.50
  - Subsidy: 10 ml OP
  - Brand or Generic Manufacturer: Vitadol C

*(Vitadol C Soln 1000 u with Vitamin D 400 u and ascorbic acid 30 mg per 10 drops to be delisted 1 August 2019)*

#### Vitamin B

**HYDROXOCOBALAMIN**
- **Inj 1 mg per ml, 1 ml ampoule** – Up to 6 inj available on a PSO
  - Manufacturer’s Price: $1.89
  - Subsidy: 3
  - Brand or Generic Manufacturer: Neo-B12

**PYRIDOXINE HYDROCHLORIDE**
- a) No more than 100 mg per dose
- b) Only on a prescription
- **Tab 25 mg** – No patient co-payment payable
  - Manufacturer’s Price: $2.70
  - Subsidy: 90
  - Brand or Generic Manufacturer: Vitamin B6 25
- **Tab 50 mg**
  - Manufacturer’s Price: $13.63
  - Subsidy: 500
  - Brand or Generic Manufacturer: Apo-Pyridoxine

**THIAMINE HYDROCHLORIDE** – Only on a prescription
- **Tab 50 mg**
  - Manufacturer’s Price: $4.89
  - Subsidy: 100
  - Brand or Generic Manufacturer: Max Health

**VITAMIN B COMPLEX**
- **Tab, strong, BPC**
  - Manufacturer’s Price: $7.15
  - Subsidy: 500
  - Brand or Generic Manufacturer: Bplex

#### Vitamin C

**ASCORBIC ACID**
- a) No more than 100 mg per dose
- b) Only on a prescription
- **Tab 100 mg**
  - Manufacturer’s Price: $8.10
  - Subsidy: 500
  - Brand or Generic Manufacturer: Cvite

#### Vitamin D

**ALFACALCIDOL**
- **Cap 0.25 mcg**
  - Manufacturer’s Price: $26.32
  - Subsidy: 100
  - Brand or Generic Manufacturer: One-Alpha
- **Cap 1 mcg**
  - Manufacturer’s Price: $87.98
  - Subsidy: 100
  - Brand or Generic Manufacturer: One-Alpha
- **Oral drops 2 mcg per ml**
  - Manufacturer’s Price: $60.68
  - Subsidy: 20 ml OP
  - Brand or Generic Manufacturer: One-Alpha

**CALCITRIOL**
- **Cap 0.25 mcg**
  - Manufacturer’s Price: $9.95
  - Subsidy: 100
  - Brand or Generic Manufacturer: Calcitriol-AFT
- **Cap 0.5 mcg**
  - Manufacturer’s Price: $18.39
  - Subsidy: 100
  - Brand or Generic Manufacturer: Calcitriol-AFT

▲ Three months supply may be dispensed at one time if endorsed “certified exemption” by the prescriber or pharmacist.

❋ Three months or six months, as applicable, dispensed all-at-once

**SA1675** Specia Authority for Subsidy

Initial application — (serum ferritin less than or equal to 20 mcg/L) from any medical practitioner. Approvals valid for 3 months for applications meeting the following criteria:

Both:
1. Patient has been diagnosed with iron-deficiency anaemia with a serum ferritin level of less than or equal to 20 mcg/L; and
2. Any of the following:
   2.1 Patient has been compliant with oral iron treatment and treatment has proven ineffective; or
   2.2 Treatment with oral iron has resulted in dose-limiting intolerance; or
   2.3 Rapid correction of anaemia is required.

Renewal — (serum ferritin less than or equal to 20 mcg/L) from any medical practitioner. Approvals valid for 3 months for applications meeting the following criteria:

Both:
1. Patient continues to have iron-deficiency anaemia with a serum ferritin level of less than or equal to 20 mcg/L; and
2. A re-trial with oral iron is clinically inappropriate.

**Iron**

**Iron deficiency anaemia** only from an internal medicine physician, obstetrician, gynaecologist, anaesthetist or medical practitioner on the recommendation of a internal medicine physician, obstetrician, gynaecologist or anaesthetist. Approvals valid for 3 months for applications meeting the following criteria:

Both:
1. Patient has been diagnosed with iron-deficiency anaemia; and
2. Any of the following:
   2.1 Patient has been compliant with oral iron treatment and treatment has proven ineffective; or
   2.2 Treatment with oral iron has resulted in dose-limiting intolerance; or
   2.3 Patient has symptomatic heart failure, chronic kidney disease stage 3 or more or active inflammatory bowel disease and a trial of oral iron is unlikely to be effective; or
   2.4 Rapid correction of anaemia is required.

**Iron deficiency anaemia** only from an internal medicine physician, obstetrician, gynaecologist, anaesthetist or medical practitioner on the recommendation of a internal medicine physician, obstetrician, gynaecologist or anaesthetist. Approvals valid for 3 months for applications meeting the following criteria:

Both:
1. Patient continues to have iron-deficiency anaemia; and
2. A re-trial with oral iron is clinically inappropriate.

**Antinaemics**

**Hypoplastic and Haemolytic**

**SA1775 Special Authority for Subsidy**

**Initial application — (chronic renal failure)** from any specialist. Approvals valid for 2 years for applications meeting the following criteria:

All of the following:

1. Patient in chronic renal failure; and
2. Haemoglobin is less than or equal to 100g/L; and
3. Any of the following:

   3.1 Both:
      3.1.1 Patient does not have diabetes mellitus; and
      3.1.2 Glomerular filtration rate is less than or equal to 30ml/min; or

   3.2 Both:
      3.2.1 Patient has diabetes mellitus; and
      3.2.2 Glomerular filtration rate is less than or equal to 45ml/min; or

   3.3 Patient is on haemodialysis or peritoneal dialysis.

Note: Epoetin alfa is indicated in the treatment of anaemia associated with chronic renal failure (CRF) where no cause for anaemia other than CRF is detected and there is adequate monitoring of iron stores and iron replacement therapy.

**Initial application — (myelodysplasia)** from any specialist. Approvals valid for 2 months for applications meeting the following criteria:

All of the following:

1. Patient has a confirmed diagnosis of myelodysplasia (MDS)*; and
2. Has had symptomatic anaemia with haemoglobin < 100g/L and is red cell transfusion-dependent; and
3. Patient has very low, low or intermediate risk MDS based on the WHO classification based prognostic scoring system for myelodysplastic syndrome (WPSS); and
4. Other causes of anaemia such as B12 and folate deficiency have been excluded; and
5. Patient has a serum epoetin level of < 500 IU/L; and
6. The minimum necessary dose of epoetin would be used and will not exceed 80,000 iu per week.

Note: Indication marked with * is an unapproved indication

**Renewal — (chronic renal failure)** from any specialist. Approvals valid for 2 years where the treatment remains appropriate and the patient is benefiting from treatment.

Note: Epoetin alfa is indicated in the treatment of anaemia associated with chronic renal failure (CRF) where no cause for anaemia other than CRF is detected and there is adequate monitoring of iron stores and iron replacement therapy.

**Renewal — (myelodysplasia)** from any specialist. Approvals valid for 12 months for applications meeting the following criteria:

All of the following:

1. The patient’s transfusion requirement continues to be reduced with erythropoietin treatment; and
2. Transformation to acute myeloid leukaemia has not occurred; and
3. The minimum necessary dose of epoetin would be used and will not exceed 80,000 iu per week.

Note: Indication marked with * is an unapproved indication

▲Three months supply may be dispensed at one time if endorsed “certified exemption” by the prescriber or pharmacist.

★Three months or six months, as applicable, dispensed all-at-once

SA1743 Special Authority for Subsidy

Initial application — (idiopathic thrombocytopenic purpura - post-splenectomy) only from a haematologist. Approvals valid for 6 weeks for applications meeting the following criteria:
All of the following:
1. Patient has had a splenectomy; and
2. Two immunosuppressive therapies have been trialled and failed after therapy of 3 months each (or 1 month for rituximab); and
3. Any of the following:
   3.1 Patient has a platelet count of 20,000 to 30,000 platelets per microlitre and has evidence of significant mucocutaneous bleeding; or
   3.2 Patient has a platelet count of less than or equal to 20,000 platelets per microlitre and has evidence of active bleeding; or
   3.3 Patient has a platelet count of less than or equal to 10,000 platelets per microlitre.

Initial application — (idiopathic thrombocytopenic purpura - preparation for splenectomy) only from a haematologist. Approvals valid for 6 weeks where the patient requires eltrombopag treatment as preparation for splenectomy.

Initial application — (idiopathic thrombocytopenic purpura contraindicated to splenectomy) only from a haematologist. Approvals valid for 3 months for applications meeting the following criteria:
All of the following:
1. Patient has a significant and well-documented contraindication to splenectomy for clinical reasons; and
2. Two immunosuppressive therapies have been trialled and failed after therapy of 3 months each (or 1 month for rituximab); and
3. Either:
   3.1 Patient has immune thrombocytopenic purpura* with a platelet count of less than or equal to 20,000 platelets per microliter; or

continued…
continued...

3.2 Patient has immune thrombocytopenic purpura* with a platelet count of 20,000 to 30,000 platelets per microlitre and significant mucocutaneous bleeding.

**Initial application — (severe aplastic anaemia)** only from a haematologist. Approvals valid for 3 months for applications meeting the following criteria:

Both:

1. Two immunosuppressive therapies have been trialled and failed after therapy of at least 3 months duration; and
2. Either:
   2.1 Patient has severe aplastic anaemia with a platelet count of less than or equal to 20,000 platelets per microliter; or
   2.2 Patient has severe aplastic anaemia with a platelet count of 20,000 to 30,000 platelets per microlitre and significant mucocutaneous bleeding.

**Renewal — (idiopathic thrombocytopenic purpura - post-splenectomy)** only from a haematologist. Approvals valid for 12 months where the patient has obtained a response (see Note) from treatment during the initial approval or subsequent renewal periods and further treatment is required.

Note: Response to treatment is defined as a platelet count of > 30,000 platelets per microlitre.

**Renewal — (idiopathic thrombocytopenic purpura contraindicated to splenectomy)** only from a haematologist. Approvals valid for 12 months for applications meeting the following criteria:

All of the following:

1. The patient’s significant contraindication to splenectomy remains; and
2. The patient has obtained a response from treatment during the initial approval period; and
3. Patient has maintained a platelet count of at least 50,000 platelets per microlitre on treatment; and
4. Further treatment with eltrombopag is required to maintain response.

**Renewal — (severe aplastic anaemia)** only from a haematologist. Approvals valid for 12 months for applications meeting the following criteria:

Both:

1. The patient has obtained a response from treatment of at least 20,000 platelets per microlitre above baseline during the initial approval period; and
2. Platelet transfusion independence for a minimum of 8 weeks during the initial approval period.

**SA1201** Special Authority for Subsidy

**Initial application** — (coronary angioplasty and bare metal stent) from any relevant practitioner. Approvals valid for 6 months where the patient has undergone coronary angioplasty in the previous 4 weeks and is clopidogrel-allergic*.

**Initial application** — (drug eluting stent) from any relevant practitioner. Approvals valid for 12 months where the patient has had a drug-eluting cardiac stent inserted in the previous 4 weeks and is clopidogrel-allergic*.

**Initial application** — (stent thrombosis) from any relevant practitioner. Approvals valid without further renewal unless notified where patient has experienced cardiac stent thrombosis whilst on clopidogrel.

**Renewal** — (coronary angioplasty and bare metal stent) from any relevant practitioner. Approvals valid for 6 months where the patient has undergone coronary angioplasty or had a bare metal cardiac stent inserted in the previous 4 weeks and is clopidogrel-allergic*.

**Renewal** — (drug eluting stent) from any relevant practitioner. Approvals valid for 12 months where had a drug-eluting cardiac stent inserted in the previous 4 weeks and is clopidogrel-allergic*.

* Clopidogrel allergy is defined as a history of anaphylaxis, urticaria, generalised rash or asthma (in non-asthmatic patients) developing soon after clopidogrel is started and is considered unlikely to be caused by any other treatment.

**SA1270** Special Authority for Subsidy

**Initial application — (Pregnancy or Malignancy)** from any relevant practitioner. Approvals valid for 1 year for applications meeting the following criteria:

Either:
1. Low molecular weight heparin treatment is required during a patient's pregnancy; or
2. For the treatment of venous thromboembolism where the patient has a malignancy.

**Initial application — (Venous thromboembolism other than in pregnancy or malignancy)** from any relevant practitioner. Approvals valid for 1 month for applications meeting the following criteria:

Any of the following:
1. For the short-term treatment of venous thromboembolism prior to establishing a therapeutic level of oral anti-coagulant treatment; or
2. For the prophylaxis and treatment of venous thromboembolism in high risk surgery; or
3. To enable cessation/re-estimation of existing oral anticoagulant treatment pre/post surgery; or
4. For the prophylaxis and treatment of venous thromboembolism in Acute Coronary Syndrome surgical intervention; or
5. To be used in association with cardioversion of atrial fibrillation.

**Renewal — (Pregnancy or Malignancy)** from any relevant practitioner. Approvals valid for 1 year for applications meeting the following criteria:

Either:
1. Low molecular weight heparin treatment is required during a patient's pregnancy; or
2. For the treatment of venous thromboembolism where the patient has a malignancy.

**Renewal — (Venous thromboembolism other than in pregnancy or malignancy)** from any relevant practitioner. Approvals valid for 1 month where low molecular weight heparin treatment or prophylaxis is required for a second or subsequent event (surgery, Acute Coronary Syndrome, cardioversion, or prior to oral anti-coagulation).

#### [SA1751] Special Authority for Subsidy

**Initial application** from any relevant practitioner. Approvals valid for 12 months for applications meeting the following criteria:

- All of the following:
  - 1. Patient has heart failure; and
  - 2. Any of the following:
    - 2.1 Patient is in NYHA/WHO functional class II; or
    - 2.2 Patient is in NYHA/WHO functional class III; or
    - 2.3 Patient is in NYHA/WHO functional class IV; and
  - 3. Patient has a documented left ventricular ejection fraction (LVEF) of less than or equal to 35%; and
  - 4. Patient is receiving concomitant optimal standard chronic heart failure treatments.

**Renewal** from any relevant practitioner. Approvals valid for 12 months where the treatment remains appropriate and the patient is benefiting from treatment.

▲Three months supply may be dispensed at one time if endorsed “certified exemption” by the prescriber or pharmacist.

✿Three months or six months, as applicable, dispensed all-at-once

- Tab 10 mg..................................................2.00 30 ✔ Ezetimibe Sandoz

[SA1045] Special Authority for Subsidy

Initial application from any relevant practitioner. Approvals valid for 2 years for applications meeting the following criteria:

▲ Three months supply may be dispensed at one time if endorsed “certified exemption” by the prescriber or pharmacist.

* Three months or six months, as applicable, dispensed all-at-once
continued...

All of the following:
1. Patient has a calculated absolute risk of cardiovascular disease of at least 15% over 5 years; and
2. Patient's LDL cholesterol is 2.0 mmol/litre or greater; and
3. Any of the following:
   3.1 The patient has rhabdomyolysis (defined as muscle aches and creatine kinase more than 10 x normal) when treated with one statin; or
   3.2 The patient is intolerant to both simvastatin and atorvastatin; or
   3.3 The patient has not reduced their LDL cholesterol to less than 2.0 mmol/litre with the use of the maximal tolerated dose of atorvastatin.

Notes: A patient who has failed to reduce their LDL cholesterol to < 2.0 mmol/litre with the use of a less potent statin should use a more potent statin prior to consideration being given to the use of non-statin therapies. Other treatment options including fibrates, resins and nicotinic acid should be considered after failure of statin therapy. If a patient's LDL cholesterol cannot be calculated because the triglyceride level is too high then a repeat test should be performed and if the LDL cholesterol again cannot be calculated then it can be considered that the LDL cholesterol is greater than 2.0 mmol/litre.

Renewal from any relevant practitioner. Approvals valid for 2 years where the treatment remains appropriate and the patient is benefiting from treatment.

**EZETIMIBE WITH SIMVASTATIN** – Special Authority see **SA1046 below** – Retail pharmacy

| Tab 10 mg with simvastatin 10 mg | $5.15 | 30 | ✔ Zimybe |
| Tab 10 mg with simvastatin 20 mg | $6.15 | 30 | ✔ Zimybe |
| Tab 10 mg with simvastatin 40 mg | $7.15 | 30 | ✔ Zimybe |
| Tab 10 mg with simvastatin 80 mg | $8.15 | 30 | ✔ Zimybe |

**SA1046** Special Authority for Subsidy

**Initial application** from any relevant practitioner. Approvals valid for 2 years for applications meeting the following criteria:

All of the following:
1. Patient has a calculated absolute risk of cardiovascular disease of at least 15% over 5 years; and
2. Patient's LDL cholesterol is 2.0 mmol/litre or greater; and
3. The patient has not reduced their LDL cholesterol to less than 2.0 mmol/litre with the use of the maximal tolerated dose of atorvastatin.

Notes: A patient who has failed to reduce their LDL cholesterol to less than or equal to 2.0 mmol/litre with the use of a less potent statin should use a more potent statin prior to consideration being given to the use of non-statin therapies. Other treatment options including fibrates, resins and nicotinic acid should be considered after failure of statin therapy. If a patient's LDL cholesterol cannot be calculated because the triglyceride level is too high then a repeat test should be performed and if the LDL cholesterol again cannot be calculated then it can be considered that the LDL cholesterol is greater than 2.0 mmol/litre.

Renewal from any relevant practitioner. Approvals valid for 2 years where the treatment remains appropriate and the patient is benefiting from treatment.

Special Authority for Subsidy

Initial application only from a respiratory specialist, cardiologist or medical practitioner on the recommendation of a respiratory physician or cardiologist. Approvals valid for 6 months for applications meeting the following criteria:

All of the following:
1. Patient has pulmonary arterial hypertension (PAH)*; and
2. PAH is in Group 1, 4 or 5 of the WHO (Venice) clinical classifications; and
3. PAH is at NYHA/WHO functional class II, III, or IV; and
4. Any of the following:
   4.1 Both:
      4.1.1 Bosentan is to be used as PAH monotherapy; and
      4.1.2 Either:
         4.1.2.1 Patient is intolerant or contraindicated to sildenafil; or
         4.1.2.2 Patient is a child with idiopathic PAH or PAH secondary to congenital heart disease; or
   4.2 Both:
   4.2.1 Bosentan is to be used as PAH dual therapy; and
   4.2.2 Either:
      4.2.2.1 Patient has tried a PAH monotherapy for at least three months and failed to respond; or
      4.2.2.2 Patient deteriorated while on a PAH monotherapy; or
   4.3 Both:
   4.3.1 Bosentan is to be used as PAH triple therapy; and
   4.3.2 Any of the following:
      4.3.2.1 Patient is on the lung transplant list; or
      4.3.2.2 Patient is presenting acutely with idiopathic pulmonary arterial hypertension (IPAH) in New York Heart Association/World Health Organization (NYHA/WHO) Functional Class IV; or
      4.3.2.3 Patient is deteriorating rapidly to NYHA/WHO Functional Class IV who may be lung transplant recipients in the future, if their disease is stabilised; or
      4.3.2.4 Patient has PAH associated with the scleroderma spectrum of diseases (APAHSDD) who have no major morbidities and are deteriorating despite combination therapy.

Renewal only from a respiratory specialist, cardiologist or medical practitioner on the recommendation of a respiratory physician or cardiologist. Approvals valid for 2 years for applications meeting the following criteria:

Any of the following:
1. Both:
   1.1 Bosentan is to be used as PAH monotherapy; and
   1.2 Patient is stable or has improved while on bosentan; or
2. Both:

continued…
continued...

2.1 Bosentan is to be used as PAH dual therapy; and
2.2 Patient has tried a PAH monotherapy for at least three months and either failed to respond or later deteriorated; or

3 Both:
3.1 Bosentan is to be used as PAH triple therapy; and
3.2 Any of the following:
   3.2.1 Patient is on the lung transplant list; or
   3.2.2 Patient is presenting acutely with idiopathic pulmonary arterial hypertension (IPAH) in New York Heart Association/World Health Organization (NYHA/WHO) Functional Class IV; or
   3.2.3 Patient is deteriorating rapidly to NYHA/WHO Functional Class IV who may be lung transplant recipients in the future, if their disease is stabilised; or
   3.2.4 Patient has PAH associated with the scleroderma spectrum of diseases (APAHS/SD) who have no major morbidities and are deteriorating despite combination therapy.

 Accidentel Authority for Subsidy

Initial application — (Raynau’s Phenomenon*) from any relevant practitioner. Approvals valid without further renewal unless notified for applications meeting the following criteria:

All of the following:
1 Patient has Raynau’s Phenomenon*; and
2 Patient has severe digital ischaemia (defined as severe pain requiring hospital admission or with a high likelihood of digital ulceration; digital ulcers; or gangrene); and
3 Patient is following lifestyle management (avoidance of cold exposure, sufficient protection, smoking cessation support, avoidance of sympathomimetic drugs); and
4 Patient is being treated with calcium channel blockers and nitrates (or these are contraindicated/not tolerated).

Initial application — (Pulmonary arterial hypertension*) only from a respiratory specialist, cardiologist or medical practitioner on the recommendation of a respiratory specialist or cardiologist. Approvals valid without further renewal unless notified for applications meeting the following criteria:

All of the following:
1 Patient has pulmonary arterial hypertension (PAH)*; and
2 Any of the following:
   2.1 PAH is in Group 1 of the WHO (Venice) clinical classifications; or
   2.2 PAH is in Group 4 of the WHO (Venice) clinical classifications; or
   2.3 PAH is in Group 5 of the WHO (Venice) clinical classifications; and
3 Any of the following:
   3.1 PAH is in NYHA/WHO functional class II; or
   3.2 PAH is in NYHA/WHO functional class III; or
   3.3 PAH is in NYHA/WHO functional class IV; and
4 Either:
   4.1 All of the following:
      4.1.1 Patient has a pulmonary capillary wedge pressure (PCWP) less than or equal to 15 mmHg; and
      4.1.2 Either:
         4.1.2.1 Patient has a mean pulmonary artery pressure (PAPm) > 25 mmHg; or

continued…
4.1.2.2 Patient is peri Fontan repair; and
4.1.3 Patient has a pulmonary vascular resistance (PVR) of at least 3 Wood Units or at least 240 International Units (dyn s cm⁻⁵); or
4.2 Testing for PCWP, PAPm, or PVR cannot be performed due to the patient’s young age.

Note: Indications marked with * are unapproved indications.

**SA1475 Special Authority for Subsidy**

**Initial application** from any relevant practitioner. Approvals valid for 1 year for applications meeting the following criteria:

1. Applicant is a vocationally registered dermatologist, vocationally registered general practitioner, or nurse practitioner working in a relevant scope of practice; and  
2. Applicant has an up to date knowledge of the safety issues around isotretinoin and is competent to prescribe isotretinoin; and  
3. Either:  
   3.1 Patient is female and has been counselled and understands the risk of teratogenicity if isotretinoin is used during pregnancy and the applicant has ensured that the possibility of pregnancy has been excluded prior to the commencement of the treatment and that the patient is informed that she must not become pregnant during treatment and for a period of one month after the completion of the treatment; or  
   3.2 Patient is male.  

Note: Applicants are recommended to either have used or be familiar with using a decision support tool accredited by their professional body.  

**Renewal** from any relevant practitioner. Approvals valid for 1 year for applications meeting the following criteria:  
Either:  
1. Patient is female and has been counselled and understands the risk of teratogenicity if isotretinoin is used during pregnancy and the applicant has ensured that the possibility of pregnancy has been excluded prior to the commencement of the treatment and that the patient is informed that she must not become pregnant during treatment and for a period of one month after the completion of the treatment; or  
2. Patient is male.  

Note: Applicants are recommended to either have used or be familiar with using a decision support tool accredited by their professional body.

**SA1225** Special Authority for Subsidy

**Initial application — (Scabies)** from any relevant practitioner. Approvals valid for 1 month for applications meeting the following criteria:

Both:

1. Applying clinician has discussed the diagnosis of scabies with a dermatologist, infectious disease physician or clinical microbiologist; and

2. Either:

   2.1 Both:

      2.1.1 The patient is in the community; and

      2.1.2 Any of the following:

         2.1.2.1 Patient has a severe scabies hyperinfestation (Crusted/ Norwegian scabies); or

         2.1.2.2 The community patient is physically or mentally unable to comply with the application instructions of topical therapy; or

continued...
2.1.2.3 The patient has previously tried and failed to clear infestation using topical therapy; or

2.2 All of the following:

2.2.1 The Patient is a resident in an institution; and

2.2.2 All residents of the institution with scabies or at risk of carriage are to be treated for scabies concurrently; and

2.2.3 Any of the following:

2.2.3.1 Patient has a severe scabies hyperinfestation (Crusted/ Norwegian scabies); or

2.2.3.2 The patient is physically or mentally unable to comply with the application instructions of topical therapy; or

2.2.3.3 Previous topical therapy has been tried and failed to clear the infestation.

Note: Ivermectin is no more effective than topical therapy for treatment of standard scabies infestation.

**Initial application — (Other parasitic infections)** only from an infectious disease specialist, clinical microbiologist or dermatologist. Approvals valid for 1 month for applications meeting the following criteria:

Any of the following:

1. Filaricides; or
2. Cutaneous larva migrans (creeping eruption); or
3. Strongyloidiasis.

**Renewal — (Scabies)** from any relevant practitioner. Approvals valid for 1 month for applications meeting the following criteria:

Both:

1. Applying clinician has discussed the diagnosis of scabies with a dermatologist, infectious disease physician or clinical microbiologist; and
2. Either:

   2.1 Both:

      2.1.1 The patient is in the community; and

** kne SA0500 kn** Special Authority for Alternate Subsidy

**Initial application** from any medical practitioner. Approvals valid for 2 years for applications meeting the following criteria:

- Both:
  1. Either:
     1.1 Patient is on a Social Welfare benefit; or
     1.2 Patient has an income no greater than the benefit; and
  2. Has tried at least one of the fully funded options and has been unable to tolerate it.

**Renewal** from any medical practitioner. Approvals valid for 2 years for applications meeting the following criteria:

- Either:
  1. Patient is on a Social Welfare benefit; or
  2. Patient has an income no greater than the benefit.

Notes: The approval numbers of Special Authorities approved after 1 November 1999 are interchangeable between Mercilon and Marvelon.

---

Sole Subsidised Supply

Unapproved medicine supplied under Section 29

continued...

The additional subsidy will fund Mercilon and Marvelon up to the manufacturer’s price for each of these products as identified on the Schedule at 1 November 1999.

Special Authorities approved before 1 November 1999 remain valid until the expiry date and can be renewed providing that women are still either:

- on a Social Welfare benefit; or
- have an income no greater than the benefit.

The approval numbers of Special Authorities approved before 1 November 1999 are interchangeable for products within the combined oral contraceptives and progestogen-only contraceptives groups, except Loette and Microgynon 20 ED.

**ETHINYL Estradiol with Desogestrel**

* Tab 20 mcg with desogestrel 150 mcg and 7 inert tablets..................6.62 84  
  (19.80) Mercilon 28
  a) Higher subsidy of $13.80 per 84 tab with Special Authority see SA0500 on the previous page
  b) Up to 84 tab available on a PSO

* Tab 30 mcg with desogestrel 150 mcg and 7 inert tablets..................6.62 84  
  (19.80) Marvelon 28
  a) Higher subsidy of $13.80 per 84 tab with Special Authority see SA0500 on the previous page
  b) Up to 84 tab available on a PSO

**ETHINYL Estradiol with Levonorgestrel**

* Tab 20 mcg with levonorgestrel 100 mcg and 7 inert tablets –
  Up to 84 tab available on a PSO ..................................................2.18 84  ✔ Microgynon 20 ED

* Tab 50 mcg with levonorgestrel 125 mcg and 7 inert tab – Up
  to 84 tab available on a PSO ..................................................9.45 84  ✔ Microgynon 50 ED

* Tab 30 mcg with levonorgestrel 150 mcg.................................6.62 63
  (16.50) Microgynon 30
  a) Higher subsidy of $15.00 per 63 tab with Special Authority see SA0500 on the previous page
  b) Up to 63 tab available on a PSO

* Tab 30 mcg with levonorgestrel 150 mcg and 7 inert tablets –
  Up to 84 tab available on a PSO ..................................................1.77 84  ✔ Levlen ED

**ETHINYL Estradiol with Norethisterone**

* Tab 35 mcg with norethisterone 1 mg – Up to 63 tab available
  on a PSO ......................................................................................6.62 63  ✔ Brevinor 1/21

* Tab 35 mcg with norethisterone 1 mg and 7 inert tab – Up to
  84 tab available on a PSO ..................................................6.62 84  ✔ Brevinor 1/28

* Tab 35 mcg with norethisterone 500 mcg – Up to 63 tab
  available on a PSO ........................................................................6.62 63  ✔ Brevinor 21

* Tab 35 mcg with norethisterone 500 mcg and 7 inert tab – Up
  to 84 tab available on a PSO ..................................................6.62 84  ✔ Norimin

(Brevinor 1/21 Tab 35 mcg with norethisterone 1 mg to be delisted 1 January 2020)
(Brevinor 21 Tab 35 mcg with norethisterone 500 mcg to be delisted 1 July 2019)

---

**Progestogen-only Contraceptives**

[SA0500] Special Authority for Alternate Subsidy

*Initial application* from any medical practitioner. Approvals valid for 2 years for applications meeting the following criteria:

Both:

- Three months supply may be dispensed at one time if endorsed “certified exemption” by the prescriber or pharmacist.
- Three months or six months, as applicable, dispensed all-at-once
continued...

1. Either:
   1.1 Patient is on a Social Welfare benefit; or
   1.2 Patient has an income no greater than the benefit; and

2. Has tried at least one of the fully funded options and has been unable to tolerate it.

Renewal from any medical practitioner. Approvals valid for 2 years for applications meeting the following criteria:

Either:

1. Patient is on a Social Welfare benefit; or
2. Patient has an income no greater than the benefit.

Notes: The approval numbers of Special Authorities approved after 1 November 1999 are interchangeable between Mercilon and Marvelon.

The additional subsidy will fund Mercilon and Marvelon up to the manufacturer's price for each of these products as identified on the Schedule at 1 November 1999.

Special Authorities approved before 1 November 1999 remain valid until the expiry date and can be renewed providing that women are still either:

- on a Social Welfare benefit; or
- have an income no greater than the benefit.

The approval numbers of Special Authorities approved before 1 November 1999 are interchangeable for products within the combined oral contraceptives and progestogen-only contraceptives groups, except Loette and Microgynon 20 ED

LEVONORGESTREL

✱ Tab 30 mcg..........................................................................................6.62 84

(16.50) Microlut

a) Higher subsidy of $13.80 per 84 tab with Special Authority see SA0500 on the previous page
b) Up to 84 tab available on a PSO

✱ Subdermal implant (2 x 75 mg rods) – Up to 3 pack available

on a PSO..................................................................................106.92 1 ✔ Jadelle

MEDROXYPROGESTERONE ACETATE

Inj 150 mg per ml, 1 ml syringe – Up to 5 inj available on a PSO ......7.25 1 ✔ Depo-Provera

NORETHISTERONE

✱ Tab 350 mcg – Up to 84 tab available on a PSO ...............................6.25 84 ✔ Noriday 28

Emergency Contraceptives

LEVONORGESTREL

✱ Tab 1.5 mg ..........................................................................................4.95 1 ✔ Postinor-1

a) Maximum of 2 tab per prescription
b) Up to 5 tab available on a PSO
c) Note: Direct Provision by a pharmacist permitted under the provisions in Part I of Section A.

Antiandrogen Oral Contraceptives

Prescribers may code prescriptions “contraceptive” (code “O”) when used as indicated for contraception. The period of supply and prescription charge will be as per other contraceptives, as follows:

- $5.00 prescription charge (patient co-payment) will apply.
- prescription may be written for up to six months supply.

Prescriptions coded in any other way are subject to the non contraceptive prescription charges, and the non-contraceptive period of supply. ie. Prescriptions may be written for up to three months supply.

CYPROTERONE ACETATE WITH ETHINYL OESTRADIOL

✱ Tab 2 mg with ethinyloestriadiol 35 mcg and 7 inert tabs – Up
to 168 tab available on a PSO......................................................4.67 168 ✔ Ginet
Gynaecological Anti-infectives

ACETIC ACID WITH HYDROXYQUINOLINE AND RICINOLEIC ACID
Jelly with glacial acetic acid 0.94%, hydroxyquinoline sulphate
0.025%, glycerol 5% and ricinoleic acid 0.75% with applicator...8.43 100 g OP  
(24.00) Aci-Jel

CLOTRIMAZOLE
* Vaginal crm 1% with applicators.............................................1.60 35 g OP ✔ Clomazol
* Vaginal crm 2% with applicators.............................................2.10 20 g OP ✔ Clomazol

MICONAZOLE NITRATE
* Vaginal crm 2% with applicator ..................................................3.88 40 g OP ✔ Micreme

NYSTATIN
Vaginal crm 100,000 u per 5 g with applicator(s).........................4.45 75 g OP ✔ Nilstat

Myometrial and Vaginal Hormone Preparations

ERGOMETRINE MALEATE
Inj 250 mcg per ml, 1 ml ampoule – Up to 5 inj available on a PSO..........................................................................................454.00 5 ✔ Ergonovine
Inj 500 mcg per ml, 1 ml ampoule – Up to 5 inj available on a PSO..........................................................................................105.00 5 ✔ DBL Ergometrine
(Ergonovine Inj 250 mcg per ml, 1 ml ampoule to be delisted 1 July 2019)

OESTRIOL
* Crm 1 mg per g with applicator......................................................6.62 15 g OP ✔ Ovestin
* Pessaries 500 mcg..........................................................................6.86 15 ✔ Ovestin

OXYTOCIN – Up to 5 inj available on a PSO
Inj 5 iu per ml, 1 ml ampoule .........................................................3.98 5 ✔ Oxytocin BNM
Inj 10 iu per ml, 1 ml ampoule .........................................................4.98 5 ✔ Oxytocin BNM

OXYTOCIN WITH ERGOMETRINE MALEATE – Up to 5 inj available on a PSO
Inj 5 iu with ergometrine maleate 500 mcg per ml, 1 ml..............15.00 5 ✔ Syntometrine

Pregnancy Tests - hCG Urine

PREGNANCY TESTS - HCG URINE
a) Up to 200 test available on a PSO
b) Only on a PSO
Cassette .............................................................................................12.00 40 test OP ✔ Smith BioMed Rapid Pregnancy Test

Urinary Agents

For urinary tract Infections refer to INFECTIONS, Antibacterials, page 106

5-Alpha Reductase Inhibitors

FINASTERIDE – Special Authority see SA0928 on the next page – Retail pharmacy
* Tab 5 mg ......................................................................................4.81 100 ✔ Ricit

▲Three months supply may be dispensed at one time if endorsed “certified exemption” by the prescriber or pharmacist.
* Three months or six months, as applicable, dispensed all-at-once
GENITO-URINARY SYSTEM

Subsidy (Manufacturer’s Price) $ Per Fully Subsidised ✔ Brand or Generic Manufacturer

[SA0928] Special Authority for Subsidy

Initial application from any relevant practitioner. Approvals valid without further renewal unless notified for applications meeting the following criteria:

Both:
1. Patient has symptomatic benign prostatic hyperplasia; and
2. Either:
   2.1 The patient is intolerant of non-selective alpha blockers or these are contraindicated; or
   2.2 Symptoms are not adequately controlled with non-selective alpha blockers.

Note: Patients with enlarged prostates are the appropriate candidates for therapy with finasteride.

Alpha-1A Adrenoceptor Blockers

TAMSULOSIN HYDROCHLORIDE – Special Authority see SA1032 below – Retail pharmacy

✔ Cap 400 mcg ........................................................................ 11.25 100 ✔ Tamsulosin-Rex

[SA1032] Special Authority for Subsidy

Initial application from any relevant practitioner. Approvals valid without further renewal unless notified for applications meeting the following criteria:

Both:
1. Patient has symptomatic benign prostatic hyperplasia; and
2. The patient is intolerant of non-selective alpha blockers or these are contraindicated.

Other Urinary Agents

OXYBUTYNIN

✔ Tab 5 mg .................................................................................. 8.85 500 ✔ Apo-Oxybutynin
✔ Oral liq 5 mg per 5 ml ................................................................. 60.40 473 ml ✔ Apo-Oxybutynin

POTASSIUM CITRATE

Oral liq 3 mmol per ml – Special Authority see SA1083 below – Retail pharmacy

✔ ................................................................. 31.80 200 ml OP ✔ Biomed

[SA1083] Special Authority for Subsidy

Initial application from any relevant practitioner. Approvals valid for 12 months for applications meeting the following criteria:

Both:
1. The patient has recurrent calcium oxalate urolithiasis; and
2. The patient has had more than two renal calculi in the two years prior to the application.

Renewal from any relevant practitioner. Approvals valid for 2 years where the treatment remains appropriate and the patient is benefitting from the treatment.

SODIUM CITRO-TARTRATE

✔ Grans eff 4 g sachets ................................................................. 2.34 28 ✔ Ural

SOLIFENACIN SUCCINATE

Tab 5 mg .................................................................................. 3.00 30 ✔ Solifenacin Mylan
Tab 10 mg .................................................................................. 5.50 30 ✔ Solifenacin Mylan

TOLTERODINE – Special Authority see SA1272 below – Retail pharmacy

Tab 1 mg .................................................................................. 14.56 56 ✔ Arrow-Tolterodine
Tab 2 mg .................................................................................. 14.56 56 ✔ Arrow-Tolterodine

[SA1272] Special Authority for Subsidy

Initial application from any relevant practitioner. Approvals valid without further renewal unless notified where patient has overactive bladder and a documented intolerance of, or is non-responsive to oxybutynin.

▲ Three months supply may be dispensed at one time if endorsed “certified exemption” by the prescriber or pharmacist.

※ Three months or six months, as applicable, dispensed all-at-once.
**Calcium Homeostasis**

**CALCITONIN**

* Inj 100 iu per ml, 1 ml ampoule ............................................................ 121.00 5 ✔ Miacalcic

**CINACALCET – Special Authority see SA1618 below – Retail pharmacy**

Tab 30 mg – Wastage claimable ............................................................... 210.30 28 ✔ Sensipar

**SA1618 Special Authority for Subsidy**

*Initial application* only from a nephrologist or endocrinologist. Approvals valid for 6 months for applications meeting the following criteria:

Either:

1. All of the following:
   1.1 The patient has been diagnosed with a parathyroid carcinoma (see Note); and
   1.2 The patient has persistent hypercalcaemia (serum calcium greater than or equal to 3 mmol/L) despite previous first-line treatments including sodium thiosulfate (where appropriate) and bisphosphonates; and
   1.3 The patient is symptomatic; or

2. All of the following:
   2.1 The patient has been diagnosed with calciphylaxis (calcific uraemic arteriolopathy); and
   2.2 The patient has symptomatic (e.g. painful skin ulcers) hypercalcaemia (serum calcium greater than or equal to 3 mmol/L); and
   2.3 The patient's condition has not responded to previous first-line treatments including bisphosphonates and sodium thiosulfate.

**Renewal** only from a nephrologist or endocrinologist. Approvals valid without further renewal unless notified for applications meeting the following criteria:

Both:

1. The patient's serum calcium level has fallen to < 3mmol/L; and
2. The patient has experienced clinically significant symptom improvement.

**ZOLEDRONIC ACID**

Inj 4 mg per 5 ml, vial – Special Authority see SA1687 below – Retail pharmacy................................................................. 38.03 1 ✔ Zoledronic acid

Mylan 550.00 ✔ Zometa

**SA1687 Special Authority for Subsidy**

*Initial application — (bone metastases)* only from an oncologist, haematologist or palliative care specialist. Approvals valid without further renewal unless notified for applications meeting the following criteria:

Any of the following:

1. Patient has hypercalcaemia of malignancy; or
2. Both:
   2.1 Patient has bone metastases or involvement; and
   2.2 Patient has severe bone pain resistant to standard first-line treatments; or

3. Both:
   3.1 Patient has bone metastases or involvement; and
   3.2 Patient is at risk of skeletal-related events pathological fracture, spinal cord compression, radiation to bone or surgery to bone.

*Initial application — (early breast cancer)* only from an oncologist or medical practitioner on the recommendation of an oncologist. Approvals valid for 2 years for applications meeting the following criteria:

continued…
continued...

All of the following:
1. Treatment to be used as adjuvant therapy for early breast cancer; and
2. Patient has been amenorrhoeic for 12 months or greater, either naturally or induced, with endocrine levels consistent with a postmenopausal state; and
3. Treatment to be administered at a minimum interval of 6-monthly for a maximum of 2 years.

Corticosteroids and Related Agents for Systemic Use

BETAMETHASONE SODIUM PHOSPHATE WITH BETAMETHASONE ACETATE

LEVONORGESTREL

- Intra-uterine system 20 mcg per day – Special Authority see SA1608 below – Retail pharmacy .............................................269.50 1 ✔ Mirena

SA1608 Special Authority for Subsidy

Initial application — (No previous use) only from a relevant specialist or general practitioner. Approvals valid for 6 months for applications meeting the following criteria:
All of the following:
1. The patient has a clinical diagnosis of heavy menstrual bleeding; and
2. The patient has failed to respond to or is unable to tolerate other appropriate pharmaceutical therapies as per the Heavy Menstrual Bleeding Guidelines; and
3. Either:
   3.1 serum ferritin level < 16 mcg/l (within the last 12 months); or
   3.2 haemoglobin level < 120 g/l.

Note: Applications are not to be made for use in patients as contraception except where they meet the above criteria.

Renewal only from a relevant specialist or general practitioner. Approvals valid for 6 months for applications meeting the following criteria:
Both:
1. Either:
   1.1 Patient demonstrated clinical improvement of heavy menstrual bleeding; or
   1.2 Previous insertion was removed or expelled within 3 months of insertion; and
2. Applicant to state date of the previous insertion.

MEDROXYPROGESTERONE ACETATE

- Tab 100 mg – Retail pharmacy-Specialist.............................................101.00 100 ✔ Provera HD

NORETHISTERONE

- Tab 5 mg – Up to 30 tab available on a PSO..................................18.29 100 ✔ Primolut N

PROGESTERONE

- Cap 100 mg – Special Authority see SA1609 below – Retail pharmacy..........................................................16.50 30 ✔ Utrogestan

SA1609 Special Authority for Subsidy

Initial application only from an obstetrician or gynaecologist. Approvals valid for 12 months for applications meeting the following criteria:
Both:
1. For the prevention of pre-term labour*; and
2. Either:
   2.1 The patient has a short cervix on ultrasound (defined as < 25 mm at 16 to 28 weeks); or
   2.2 The patient has a history of pre-term birth at less than 28 weeks.

Renewal only from an obstetrician or gynaecologist. Approvals valid for 12 months for applications meeting the following criteria:
All of the following:
1. For the prevention of pre-term labour*; and
2. Treatment is required for second or subsequent pregnancy; and
3. Either:
   3.1 The patient has a short cervix on ultrasound (defined as < 25 mm at 16 to 28 weeks); or
   3.2 The patient has a history of pre-term birth at less than 28 weeks.

Note: Indications marked with * are unapproved indications.
**Thyroid and Antithyroid Agents**

**CARBIMAZOLE**

* Tab 5 mg ............................................................... $10.80 100 ✔ AFT

Carbamazol ✔ Neo-Mercazol

66.78 1,000 ✔ Eftroxin

**PROPYLTHIOURACIL** – Special Authority see SA1199 below – Retail pharmacy

Propylthiouracil is not recommended for patients under the age of 18 years unless the patient is pregnant and other treatments are contraindicated.

Tab 50 mg ............................................................... $35.00 100 ✔ PTU

**Trophi Hormones**

**Growth Hormones**

**SOMATROPIN (OMNITROPE)** – Special Authority see SA1629 below – Retail pharmacy

* Inj 5 mg cartridge ............................................................... $34.88 1 ✔ Omnitrope

* Inj 10 mg cartridge ............................................................... $69.75 1 ✔ Omnitrope

* Inj 15 mg cartridge ............................................................... $104.63 1 ✔ Omnitrope

**SA1199** Special Authority for Subsidy

**Initial application** from any relevant practitioner. Approvals valid for 2 years for applications meeting the following criteria:

Both:

1. The patient has hyperthyroidism; and
2. The patient is intolerant of carbimazole or carbimazole is contraindicated.

**Renewal** from any relevant practitioner. Approvals valid for 2 years where the treatment remains appropriate and the patient is benefitting from the treatment.

**SA1629** Special Authority for Subsidy

**Initial application** — (growth hormone deficiency in children) only from a paediatric endocrinologist or endocrinologist.

Approvals valid for 9 months for applications meeting the following criteria:

Either:

1. Growth hormone deficiency causing symptomatic hypoglycaemia, or with other significant growth hormone deficient sequelae (e.g. cardiomyopathy, hepatic dysfunction) and diagnosed with GH < 5 mcg/l on at least two random blood samples in the first 2 weeks of life, or from samples during established hypoglycaemia (whole blood glucose < 2 mmol/l using a laboratory device); or
2. All of the following:

2.1 Height velocity < 25th percentile for age adjusted for bone age/pubertal status if appropriate over 6 or 12 months using the standards of Tanner and Davies (1985); and

2.2 A current bone age is < 14 years (female patients) or < 16 years (male patients); and

2.3 Peak growth hormone value of < 5.0 mcg per litre in response to two different growth hormone stimulation tests. In continued...
continued…

children who are 5 years or older, GH testing with sex steroid priming is required; and

2.4 If the patient has been treated for a malignancy, they should be disease free for at least one year based upon follow-up laboratory and radiological imaging appropriate for the malignancy, unless there are strong medical reasons why this is either not necessary or appropriate; and

2.5 Appropriate imaging of the pituitary gland has been obtained.

Renewal — (growth hormone deficiency in children) only from a paediatric endocrinologist or endocrinologist. Approvals valid for 12 months for applications meeting the following criteria:

All of the following:

1 A current bone age is 14 years or under (female patients) or 16 years or under (male patients); and
2 Height velocity is greater than or equal to 25th percentile for age (adjusted for bone age/pubertal status if appropriate) while on growth hormone treatment, as calculated over six months using the standards of Tanner and Davis (1985); and
3 Height velocity is greater than or equal to 2.0 cm per year, as calculated over 6 months; and
4 No serious adverse effect that the patients specialist considers is likely to be attributable to growth hormone treatment has occurred; and
5 No malignancy has developed since starting growth hormone.

Initial application — (Turner syndrome) only from a paediatric endocrinologist or endocrinologist. Approvals valid for 9 months for applications meeting the following criteria:

All of the following:

1 The patient has a post-natal genotype confirming Turner Syndrome; and
2 Height velocity is < 25th percentile over 6-12 months using the standards of Tanner and Davies (1985); and
3 A current bone age is < 14 years.

Renewal — (Turner syndrome) only from a paediatric endocrinologist or endocrinologist. Approvals valid for 12 months for applications meeting the following criteria:

All of the following:

1 Height velocity is greater than or equal to 50th percentile for age (while on growth hormone calculated over 6 to 12 months using the Ranke’s Turner Syndrome growth velocity charts); and
2 Height velocity is greater than or equal to 2 cm per year, calculated over six months; and
3 A current bone age is 14 years or under; and
4 No serious adverse effect that the specialist considers is likely to be attributable to growth hormone treatment has occurred; and
5 No malignancy has developed since starting growth hormone.

Initial application — (short stature without growth hormone deficiency) only from a paediatric endocrinologist or endocrinologist. Approvals valid for 9 months for applications meeting the following criteria:

All of the following:

1 The patient’s height is more than 3 standard deviations below the mean for age or for bone age if there is marked growth acceleration or delay; and
2 Height velocity is < 25th percentile for age (adjusted for bone age/pubertal status if appropriate), as calculated over 6 to 12 months using the standards of Tanner and Davies (1985); and
3 A current bone age is < 14 years or under (female patients) or < 16 years (male patients); and
4 The patient does not have severe chronic disease (including malignancy or recognized severe skeletal dysplasia) and is not receiving medications known to impair height velocity.

Renewal — (short stature without growth hormone deficiency) only from a paediatric endocrinologist or endocrinologist. Approvals valid for 12 months for applications meeting the following criteria:

All of the following:

1 Height velocity is greater than or equal to 50th percentile (adjusted for bone age/pubertal status if appropriate) as calculated over 6 to 12 months using the standards of Tanner and Davies (1985); and
2 Height velocity is greater than or equal to 2 cm per year as calculated over six months; and
Initial application — (short stature due to chronic renal insufficiency) only from a paediatric endocrinologist, endocrinologist or renal physician on the recommendation of a paediatric endocrinologist or endocrinologist. Approvals valid for 9 months for applications meeting the following criteria:

All of the following:

1. The patient's height is more than 2 standard deviations below the mean; and
2. Height velocity is < 25th percentile (adjusted for bone age/pubertal status if appropriate) as calculated over 6 to 12 months using the standards of Tanner and Davies (1985); and
3. A current bone age is 14 years or under (female patients) or 16 years or under (male patients); and
4. The patient is metabolically stable, has no evidence of metabolic bone disease and absence of any other severe chronic disease; and
5. The patient is under the supervision of a specialist with expertise in renal medicine; and
6. Either:
   6.1 The patient has a GFR less than or equal to 30 ml/min/1.73m$^2$ as measured by the Schwartz method: 
   \[
   \text{Corrected GFR (ml/min/1.73m}^2\text{)} = \frac{\text{Height(cm)}}{\text{plasma creatinine (umol/l)}} \times 40
   \]
   or
   6.2 The patient has received a renal transplant and has received < 5mg/ m$^2$/day of prednisone or equivalent for at least 6 months.

Renewal — (short stature due to chronic renal insufficiency) only from a paediatric endocrinologist, endocrinologist or renal physician on the recommendation of a paediatric endocrinologist or endocrinologist. Approvals valid for 12 months for applications meeting the following criteria:

All of the following:

1. Height velocity is greater than or equal to 50th percentile (adjusted for bone age/pubertal status if appropriate) as calculated over 6 to 12 months using the standards of Tanner and Davies (1985); and
2. Height velocity is greater than or equal to 2 cm per year as calculated over six months; and
3. A current bone age is 14 years or under (female patients) or 16 years or under (male patients); and
4. No serious adverse effect that the patient's specialist considers is likely to be attributable to growth hormone has occurred; and
5. No malignancy has developed after growth hormone therapy was commenced; and
6. The patient has not experienced significant biochemical or metabolic deterioration confirmed by diagnostic results; and
7. The patient has not received renal transplantation since starting growth hormone treatment; and
8. If the patient requires transplantation, growth hormone prescription should cease before transplantation and a new application should be made after transplantation based on the above criteria.

Initial application — (Prader-Willi syndrome) only from a paediatric endocrinologist or endocrinologist. Approvals valid for 9 months for applications meeting the following criteria:

All of the following:

1. The patient has a diagnosis of Prader-Willi syndrome that has been confirmed by genetic testing or clinical scoring criteria; and
2. The patient is aged six months or older; and
3. A current bone age is < 14 years (female patients) or < 16 years (male patients); and
4. Sleep studies or overnight oximetry have been performed and there is no obstructive sleep disorder requiring treatment, or if an obstructive sleep disorder is found, it has been adequately treated under the care of a paediatric respiratory physician and/or ENT surgeon; and
5. Either:
   5.1 Both:
5.1.1 The patient is aged two years or older; and
5.1.2 There is no evidence of type II diabetes or uncontrolled obesity defined by BMI that has increased by greater than or equal to 0.5 standard deviations in the preceding 12 months; or
5.2 The patient is aged between six months and two years and a thorough upper airway assessment is planned to be undertaken prior to treatment commencement and at six to 12 weeks following treatment initiation.

Renewal — (Prader-Willi syndrome) only from a paediatric endocrinologist or endocrinologist. Approvals valid for 12 months for applications meeting the following criteria:

All of the following:

1. Height velocity is greater than or equal to 50th percentile (adjusted for bone age/pubertal status if appropriate) as calculated over 6 to 12 months using the standards of Tanner and Davies (1985); and
2. Height velocity is greater than or equal to 2 cm per year as calculated over six months; and
3. A current bone age is 14 years or under (female patients) or 16 years or under (male patients); and
4. No serious adverse effect that the patient's specialist considers is likely to be attributable to growth hormone treatment has occurred; and
5. No malignancy has developed after growth hormone therapy was commenced; and
6. The patient has not developed type II diabetes or uncontrolled obesity as defined by BMI that has increased by greater than or equal to 0.5 standard deviations in the preceding 12 months.

Initial application — (adults and adolescents) only from a paediatric endocrinologist or endocrinologist. Approvals valid for 9 months for applications meeting the following criteria:

All of the following:

1. The patient has a medical condition that is known to cause growth hormone deficiency (e.g. surgical removal of the pituitary for treatment of a pituitary tumour); and
2. The patient has undergone appropriate treatment of other hormonal deficiencies and psychological illnesses; and
3. The patient has severe growth hormone deficiency (see notes); and
4. The patient's serum IGF-I is more than 1 standard deviation below the mean for age and sex; and
5. The patient has poor quality of life, as defined by a score of 16 or more using the disease-specific quality of life questionnaire for adult growth hormone deficiency (QoL-AGHDA®).

Notes: For the purposes of adults and adolescents, severe growth hormone deficiency is defined as a peak serum growth hormone level of less than or equal to 3 mcg per litre during an adequately performed insulin tolerance test (ITT) or glucagon stimulation test.

Patients with one or more additional anterior pituitary hormone deficiencies and a known structural pituitary lesion only require one test. Patients with isolated growth hormone deficiency require two growth hormone stimulation tests, of which, one should be ITT unless otherwise contraindicated. Where an additional test is required, an arginine provocation test can be used with a peak serum growth hormone level of less than or equal to 0.4 mcg per litre.

The dose of somatropin should be started at 0.2 mg daily and be titrated by 0.1 mg monthly until the serum IGF-I is within 1 standard deviation of the mean normal value for age and sex; and Dose of somatropin not to exceed 0.7 mg per day for male patients, or 1 mg per day for female patients.

At the commencement of treatment for hypopituitarism, patients must be monitored for any required adjustment in replacement doses of corticosteroid and levothyroxine.

Renewal — (adults and adolescents) only from a paediatric endocrinologist or endocrinologist. Approvals valid for 12 months for applications meeting the following criteria:

Either:

1. All of the following:
   1.1 The patient has been treated with somatropin for < 12 months; and
   1.2 There has been an improvement in Quality of Life defined as a reduction of at least 8 points on the Quality of Life Assessment of Growth Hormone Deficiency in Adults (QoL-AGHDA®) score from baseline; and
   1.3 Serum IGF-I levels have been increased within ±1SD of the mean of the normal range for age and sex; and

continued…
continued...

1.4 The dose of somatropin has not exceeded 0.7 mg per day for male patients, or 1 mg per day for female patients; or

2 All of the following:

2.1 The patient has been treated with somatropin for more than 12 months; and
2.2 The patient has not had a deterioration in Quality of Life defined as a 6 point or greater increase from their lowest QoL-AGHDA® score on treatment (other than due to obvious external factors such as external stressors); and
2.3 Serum IGF-I levels have continued to be maintained within ±1SD of the mean of the normal range for age and sex (other than for obvious external factors); and
2.4 The dose of somatropin has not exceeded 0.7 mg per day for male patients or 1 mg per day for female patients.

Initial application — (Desmopressin tablets for Nocturnal enuresis) from any relevant practitioner. Approvals valid for 12 months for applications meeting the following criteria:

All of the following:

1. The patient has primary nocturnal enuresis; and
2. The nasal forms of desmopressin are contraindicated; and
3. An enuresis alarm is contraindicated.

Initial application — (Desmopressin tablets for Diabetes insipidus) from any relevant practitioner. Approvals valid for 12 months for applications meeting the following criteria:

Both:

▲ Three months supply may be dispensed at one time if endorsed “certified exemption” by the prescriber or pharmacist.
* Three months or six months, as applicable, dispensed all-at-once.

➽ SA1683 Special Authority for Waiver of Rule

Initial application — (bronchiolitis obliterans syndrome, cystic fibrosis and atypical Mycobacterium infections) only from a relevant specialist. Approvals valid without further renewal unless notified for applications meeting the following criteria:

Any of the following:

1. Patient has received a lung transplant, stem cell transplant, or bone marrow transplant and requires treatment for bronchiolitis obliterans syndrome*; or
2. Patient has received a lung transplant and requires prophylaxis for bronchiolitis obliterans syndrome*; or
3. Patient has cystic fibrosis and has chronic infection with Pseudomonas aeruginosa or Pseudomonas-related gram negative organisms*; or
4. Patient has an atypical Mycobacterium infection.

Note: Indications marked with * are unapproved indications.

Initial application — (non-cystic fibrosis bronchiectasis*) only from a respiratory specialist or paediatrician. Approvals valid for 12 months for applications meeting the following criteria:

All of the following:

1. For prophylaxis of exacerbations of non-cystic fibrosis bronchiectasis*; and
2. Patient is aged 18 and under; and
3. Either:
   3.1 Patient has had 3 or more exacerbations of their bronchiectasis, within a 12 month period; or
   3.2 Patient has had 3 acute admissions to hospital for treatment of infective respiratory exacerbations within a 12 month period.

Note: Indications marked with * are unapproved indications.

Renewal — (non-cystic fibrosis bronchiectasis*) only from a respiratory specialist or paediatrician. Approvals valid for 12 months for applications meeting the following criteria:

All of the following:

1. The patient has completed 12 months of azithromycin treatment for non-cystic fibrosis bronchiectasis; and
2. Following initial 12 months of treatment, the patient has not received any further azithromycin treatment for non-cystic fibrosis bronchiectasis for a further 12 months, unless considered clinically inappropriate to stop treatment; and
3. The patient will not receive more than a total of 24 months’ azithromycin cumulative treatment (see note).

The patient must not have had more than 1 prior approval.

Note: No further renewals will be subsidised. A maximum of 24 months of azithromycin treatment for non-cystic fibrosis bronchiectasis will be subsidised. Indications marked with * are unapproved indications

CLARITHROMYCIN – Maximum of 500 mg per prescription; can be waived by Special Authority see SA1131 below

Tab 250 mg ............................................. 3.98 14 ✔ Apo-Clarithromycin

Grans for oral liq 250 mg per 5 ml – Wastage claimable .......... 23.12 50 ml ✔ Klacid

➽ SA1131 Special Authority for Waiver of Rule

Initial application — (Mycobacterial infections) only from a respiratory specialist, infectious disease specialist or paediatrician.

continued…
continued...

Approvals valid for 2 years for applications meeting the following criteria:

Either:

1. Atypical mycobacterial infection; or
2. Mycobacterium tuberculosis infection where there is drug-resistance or intolerance to standard pharmaceutical agents.

**Renewal — (Mycobacterial infections)** only from a respiratory specialist, infectious disease specialist or paediatrician. Approvals valid for 2 years where the treatment remains appropriate and the patient is benefiting from treatment.

**ERYTHROMYCIN ETHYL SUCCINATE**

Tab 400 mg ................................................................. 16.95 100 ✔ E-Mycin

Hepatitis B Treatment

ADEFOVIR DIPIVOXIL – Special Authority see SA0829 below – Retail pharmacy

Tab 10 mg .............................................................................. 670.00 30 ✔ Hepsera

SA0829 Special Authority for Subsidy

Initial application only from a gastroenterologist or infectious disease specialist. Approvals valid for 1 year for applications meeting the following criteria:

All of the following:
1. Patient has confirmed Hepatitis B infection (HBsAg+); and
2. Patient has raised serum ALT (> 1 × ULN); and
3. Patient has HBV DNA greater than 100,000 copies per mL, or viral load 10 fold or higher over nadir; and
4. Detection of M204I or M204V mutation; and
5. Either:
   5.1 Both:
      5.1.1 Patient is cirrhotic; and
      5.1.2 adefovir dipivoxil to be used in combination with lamivudine; or
   5.2 Both:
      5.2.1 Patient is not cirrhotic; and
      5.2.2 adefovir dipivoxil to be used as monotherapy.

Renewal only from a gastroenterologist or infectious disease specialist. Approvals valid for 2 years where in the opinion of the treating physician, treatment remains appropriate and patient is benefiting from treatment.

Notes: Lamivudine should be added to adefovir dipivoxil if a patient develops documented resistance to adefovir dipivoxil, defined as:
   i) raised serum ALT (> 1 × ULN); and
   ii) HBV DNA greater than 100,000 copies per mL, or viral load 10 fold or higher over nadir; and
   iii) Detection of N236T or A181T/V mutation.

Adefovir dipivoxil should be stopped 6 months following HBeAg seroconversion for patients who were HBeAg+ prior to commencing adefovir dipivoxil.

The recommended dose of adefovir dipivoxil is no more than 10mg daily.

In patients with renal insufficiency adefovir dipivoxil dose should be reduced in accordance with the datasheet guidelines.

Adefovir dipivoxil should be avoided in pregnant women and children.

SA1404 Special Authority for Subsidy

Initial application — (transplant cytomegalovirus prophylaxis) only from a relevant specialist. Approvals valid for 3 months where the patient has undergone a solid organ transplant and requires valganciclovir for CMV prophylaxis.

Renewal — (transplant cytomegalovirus prophylaxis) only from a relevant specialist. Approvals valid for 3 months for applications meeting the following criteria:

Both:

1 Patient has undergone a solid organ transplant and received anti-thymocyte globulin and requires valganciclovir therapy for CMV prophylaxis; and
2 Patient is to receive a maximum of 90 days of valganciclovir prophylaxis following anti-thymocyte globulin.

Initial application — (cytomegalovirus prophylaxis following anti-thymocyte globulin) only from a relevant specialist. Approvals valid for 3 months for applications meeting the following criteria:

Both:

1 Patient has undergone a solid organ transplant and received valganciclovir under Special Authority more than 2 years ago (27 months); and
2 Patient has received anti-thymocyte globulin and requires valganciclovir for CMV prophylaxis.

Renewal — (cytomegalovirus prophylaxis following anti-thymocyte globulin) only from a relevant specialist. Approvals valid for 3 months where the patient has received a further course of anti-thymocyte globulin and requires valganciclovir for CMV prophylaxis.

Initial application — (Lung transplant cytomegalovirus prophylaxis) only from a relevant specialist. Approvals valid for 6 months for applications meeting the following criteria:

Both:

1 Patient has undergone a lung transplant; and
2 Either:
   2.1 The donor was cytomegalovirus positive and the patient is cytomegalovirus negative; or
   2.2 The recipient is cytomegalovirus positive.

continued…
Initial application — (Cytomegalovirus in immunocompromised patients) only from a relevant specialist. Approvals valid for 3 months for applications meeting the following criteria:

Both:
1. Patient is immunocompromised; and
2. Any of the following:
   2.1 Patient has cytomegalovirus syndrome or tissue invasive disease; or
   2.2 Patient has rapidly rising plasma CMV DNA in absence of disease; or
   2.3 Patient has cytomegalovirus retinitis.

Renewal — (Cytomegalovirus in immunocompromised patients) only from a relevant specialist. Approvals valid for 3 months for applications meeting the following criteria:

Both:
1. Patient is immunocompromised; and
2. Any of the following:
   2.1 Patient has cytomegalovirus syndrome or tissue invasive disease; or
   2.2 Patient has rapidly rising plasma CMV DNA in absence of disease; or
   2.3 Patient has cytomegalovirus retinitis.

Note: for the purpose of this Special Authority "immunocompromised" includes transplant recipients, patients with immunosuppressive diseases (e.g. HIV) or those receiving immunosuppressive treatment for other conditions.

✱ Three months or six months, as applicable, dispensed all-at-once
HIV Prophylaxis and Treatment

EMTRICITABINE WITH TENOFOVIR DISOPROXIL – Subsidy by endorsement; can be waived by Special Authority see SA1714 below

Endorsement for treatment of HIV: Prescription is deemed to be endorsed if emtricitabine with tenofovir disoproxil is co-prescribed with another antiretroviral subsidised under Special Authority SA1651 and the prescription is annotated accordingly by the Pharmacist or endorsed by the prescriber.

Note: Emtricitabine with tenofovir disoproxil prescribed under endorsement for the treatment of HIV is included in the count of up to 4 subsidised antiretrovirals, and counts as two antiretroviral medications, for the purposes of Special Authority SA1651, page 103. There is an approval process to become a named specialist to prescribe antiretroviral therapy in New Zealand. Further information is available on the PHARMAC website.

Tab 200 mg with tenofovir disoproxil 245 mg (300 mg as a fumarate) ............................................................... 190.02

Tab 200 mg with tenofovir disoproxil 245 mg (300.6 mg as a succinate) ............................................................ 61.15

➽ SA1714 Special Authority for Waiver of Rule

Initial application only from a named specialist or medical practitioner on the recommendation of a named specialist. Approvals valid for 3 months for applications meeting the following criteria:

Both:
1. Patient has tested HIV negative; and
2. Either:
   2.1 All of the following:
      2.1.1 Patient is male or transgender; and
      2.1.2 Patient has sex with men; and
      2.1.3 Patient is likely to have multiple episodes of condomless anal intercourse in the next 3 months; and
      2.1.4 Any of the following:
         2.1.4.1 Patient has had at least one episode of condomless receptive anal intercourse with one or more casual male partners in the last 3 months; or
         2.1.4.2 A diagnosis of rectal chlamydia, rectal gonorrhoea, or infectious syphilis within the last 3 months; or
         2.1.4.3 Patient has used methamphetamine in the last three months; or
   2.2 All of the following:
      2.2.1 Patient has a regular partner who has HIV infection; and
      2.2.2 Partner is either not on treatment or has a detectable viral load; and
      2.2.3 Condoms have not been consistently used.

Renewal from any relevant practitioner. Approvals valid for 3 months for applications meeting the following criteria:

All of the following:
1. Applicant has an up to date knowledge of the safety issues and is competent to prescribe pre-exposure prophylaxis; and
2. Patient has undergone testing for HIV, syphilis, and a full STI screen in the previous two weeks; and
3. Patient has had renal function testing (creatinine, phosphate and urine protein/creatinine ratio) within the last 12 months; and
4. Patient has received advice regarding the reduction of risk of HIV and sexually transmitted infections and how to reduce those risks; and
5. Patient has tested HIV negative; and
6. Either:
   6.1 All of the following:
      6.1.1 Patient is male or transgender; and
      6.1.2 Patient has sex with men; and
      6.1.3 Patient is likely to have multiple episodes of condomless anal intercourse in the next 3 months; and

continued…
6.1.4 Any of the following:
   6.1.4.1 Patient has had at least one episode of condomless receptive anal intercourse with one or more
   casual male partners in the last 3 months; or
   6.1.4.2 A diagnosis of rectal chlamydia, rectal gonorrhoea, or infectious syphilis within the last 3 months; or
   6.1.4.3 Patient has used methamphetamine in the last three months; or

6.2 All of the following:
   6.2.1 Patient has a regular partner who has HIV infection; and
   6.2.2 Partner is either not on treatment or has a detectable viral load; and
   6.2.3 Condoms have not been consistently used.

Antiretrovirals

[SA1651] Special Authority for Subsidy

Initial application — (Confirmed HIV) only from a named specialist. Approvals valid without further renewal unless notified
where the patient has confirmed HIV infection.

Notes: Tenofovir disoproxil prescribed under endorsement for HIV is included in the count of up to 4 subsidised antiretrovirals.
Subsidies apply for a combination of up to four antiretroviral medications. The combination of a protease inhibitor and low-dose
ritonavir given as a booster (either as part of a combination product or separately) will be counted as one protease inhibitor for the
purpose of accessing funding to antiretrovirals.

Renewal — (Confirmed HIV) only from a named specialist. Approvals valid without further renewal unless notified where the
treatment remains appropriate and the patient is benefiting from treatment.

Initial application — (Prevention of maternal transmission) only from a named specialist. Approvals valid for 1 year for
applications meeting the following criteria:

Either:
   1 Prevention of maternal foetal transmission; or
   2 Treatment of the newborn for up to eight weeks.

Notes: Tenofovir disoproxil prescribed under endorsement for HIV is included in the count of up to 4 subsidised antiretrovirals.
Subsidies apply for a combination of up to four antiretroviral medications. The combination of a protease inhibitor and low-dose
ritonavir given as a booster (either as part of a combination product or separately) will be counted as one protease inhibitor for the
purpose of accessing funding to antiretrovirals.

Some antiretrovirals are unapproved or contraindicated for this indication. Practitioners prescribing these medications should
exercise their own skill, judgement, expertise and discretion, and make their own prescribing decisions with respect to the use of
a Pharmaceutical for an indication for which it is not approved or contraindicated.

Initial application — (post-exposure prophylaxis following non-occupational exposure to HIV) only from a named
specialist. Approvals valid for 4 weeks for applications meeting the following criteria:

Both:
   1 Treatment course to be initiated within 72 hours post exposure; and
   2 Any of the following:
      2.1 Patient has had unprotected receptive anal intercourse with a known HIV positive person; or
      2.2 Patient has shared intravenous injecting equipment with a known HIV positive person; or
      2.3 Patient has had non-consensual intercourse and the clinician considers that the risk assessment indicates
      prophylaxis is required.

Notes: Tenofovir disoproxil prescribed under endorsement for HIV is included in the count of up to 4 subsidised antiretrovirals.
Subsidies apply for a combination of up to four antiretroviral medications. The combination of a protease inhibitor and low-dose
ritonavir given as a booster (either as part of a combination product or separately) will be counted as one protease inhibitor for the
purpose of accessing funding to antiretrovirals.

continued...
Renewal — (second or subsequent post-exposure prophylaxis) only from a named specialist. Approvals valid for 4 weeks for applications meeting the following criteria:

Both:
1. Treatment course to be initiated within 72 hours post exposure; and
2. Any of the following:
   2.1 Patient has had unprotected receptive anal intercourse with a known HIV positive person; or
   2.2 Patient has shared intravenous injecting equipment with a known HIV positive person; or
   2.3 Patient has had non-consensual intercourse and the clinician considers that the risk assessment indicates prophylaxis is required.

Initial application — (Percutaneous exposure) only from a named specialist. Approvals valid for 6 weeks where the patient has percutaneous exposure to blood known to be HIV positive.

Notes: Tenofovir disoproxil prescribed under endorsement for HIV is included in the count of up to 4 subsidised antiretrovirals. Subsidies apply for a combination of up to four antiretroviral medications. The combination of a protease inhibitor and low-dose ritonavir given as a booster (either as part of a combination product or separately) will be counted as one protease inhibitor for the purpose of accessing funding to antiretrovirals.

Renewal — (Second or subsequent percutaneous exposure) only from a named specialist. Approvals valid for 6 weeks where the patient has percutaneous exposure to blood known to be HIV positive.

▲Three months supply may be dispensed at one time if endorsed “certified exemption” by the prescriber or pharmacist.

★Three months or six months, as applicable, dispensed all-at-once
Guidelines for the use of interferon in the treatment of hepatitis C:
Physicians considering treatment of patients with hepatitis C should discuss cases with a gastroenterologist or an infectious disease physician. All subjects undergoing treatment require careful monitoring for side effects. Patients should be otherwise fit. Hepatocellular carcinoma should be excluded by ultrasound examination and alpha-fetoprotein level.

Criteria for Treatment

1) Diagnosis
- Anti-HCV positive on at least two occasions with a positive PCR for HCV-RNA and preferably confirmed by a supplementary RIBA test; or
- PCR-RNA positive for HCV on at least 2 occasions if antibody negative; or
- Anti-HCV positive on at least two occasions with a positive supplementary RIBA test with a negative PCR for HCV RNA but with a liver biopsy consistent with 2(b) following.

Exclusion Criteria
1) Autoimmune liver disease. (Interferon may exacerbate autoimmune liver disease as well as other autoimmune diseases such as thyroid disease).
2) Pregnancy.
3) Neutropenia (< 2.0 × 10^9) and/or thrombocytopenia.
4) Continuing alcohol abuse and/or continuing intravenous drug users.

Dosage
The current recommended dosage is 3 million units of interferon alfa-2a or interferon alfa-2b administered subcutaneously 3 times a week for 52 weeks (twelve months).

Exit Criteria
The patient’s response to interferon treatment should be reviewed at either three or four months. Interferon treatment should be discontinued in patients who do not show a substantial reduction (50%) in their mean pre-treatment ALT level at this stage.

PEGYLATED INTERFERON ALFA-2A – Special Authority see SA1400 on the next page – Retail pharmacy
a) See prescribing guideline above
b) Note: PHARMAC will consider funding ribavirin for the small group of patients who have a clinical need for ribavirin and meet Special Authority criteria. Please contact the Hepatitis C Coordinator at PHARMAC on 0800-023-588 option 4.

Inj 180 mcg prefilled syringe ............................................................ 500.00 4 ✔ Pegasys
Special Authority for Subsidy

Initial application — (chronic hepatitis C - genotype 1, 4, 5 or 6 infection or co-infection with HIV or genotype 2 or 3 post liver transplant) from any specialist. Approvals valid for 18 months for applications meeting the following criteria:

Both:
1. Any of the following:
   1.1 Patient has chronic hepatitis C, genotype 1, 4, 5 or 6 infection; or
   1.2 Patient has chronic hepatitis C and is co-infected with HIV; or
   1.3 Patient has chronic hepatitis C genotype 2 or 3 and has received a liver transplant; and
2. Maximum of 48 weeks therapy.

Notes:
- Consider stopping treatment if there is absence of a virological response (defined as at least a 2-log reduction in viral load) following 12 weeks of treatment since this is predictive of treatment failure.
- Consider reducing treatment to 24 weeks if serum HCV RNA level at Week 4 is undetectable by sensitive PCR assay (less than 50IU/ml) AND Baseline serum HCV RNA is less than 400,000IU/ml

Renewal — (Chronic hepatitis C - genotype 1 infection) only from a gastroenterologist, infectious disease specialist or general physician. Approvals valid for 18 months for applications meeting the following criteria:

All of the following:
1. Patient has chronic hepatitis C, genotype 1; and
2. Patient has had previous treatment with pegylated interferon and ribavirin; and
3. Either:
   3.1 Patient has responder relapsed; or
   3.2 Patient was a partial responder; and
4. Patient is to be treated in combination with boceprevir; and
5. Maximum of 48 weeks therapy.

Initial application — (Chronic Hepatitis C - genotype 1 infection treatment more than 4 years prior) only from a gastroenterologist, infectious disease specialist or general physician. Approvals valid for 18 months for applications meeting the following criteria:

All of the following:
1. Patient has chronic hepatitis C, genotype 1; and
2. Patient has had previous treatment with pegylated interferon and ribavirin; and
3. Any of the following:
   3.1 Patient has responder relapsed; or
   3.2 Patient was a partial responder; or
   3.3 Patient received interferon treatment prior to 2004; and
4. Patient is to be treated in combination with boceprevir; and
5. Maximum of 48 weeks therapy.

Initial application — (chronic hepatitis C - genotype 2 or 3 infection without co-infection with HIV) from any specialist. Approvals valid for 12 months for applications meeting the following criteria:

Both:
1. Patient has chronic hepatitis C, genotype 2 or 3 infection; and
2. Maximum of 6 months therapy.

Initial application — (Hepatitis B) only from a gastroenterologist, infectious disease specialist or general physician. Approvals valid for 18 months for applications meeting the following criteria:

All of the following:
1. Patient has confirmed Hepatitis B infection (HBsAg positive for more than 6 months); and
2. Patient is Hepatitis B treatment-naive; and
3. ALT > 2 times Upper Limit of Normal; and

continued…
continued...

4 HBV DNA < 10 log10 IU/ml; and
5 Either:
   5.1 HBeAg positive; or
   5.2 serum HBV DNA greater than or equal to 2,000 units/ml and significant fibrosis (Metavir Stage F2 or greater or moderate fibrosis); and
6 Compensated liver disease; and
7 No continuing alcohol abuse or intravenous drug use; and
8 Not co-infected with HCV, HIV or HDV; and
9 Neither ALT nor AST > 10 times upper limit of normal; and
10 No history of hypersensitivity or contraindications to pegylated interferon; and
11 Maximum of 48 weeks therapy.

Notes:
• Approved dose is 180 mcg once weekly.
• The recommended dose of Pegylated Interferon alfa-2a is 180 mcg once weekly.
• In patients with renal insufficiency (calculated creatinine clearance less than 50ml/min), Pegylated Interferon-alfa 2a dose should be reduced to 135 mcg once weekly.
• In patients with neutropaenia and thrombocytopaenia, dose should be reduced in accordance with the datasheet guidelines.
• Pegylated Interferon-alfa 2a is not approved for use in children.

### Urinary Tract Infections

**HEXAMINE HIPPURATE**

- Tab 1 g .......................................................... 18.40 100 (40.01) Hiprex

DENOSUMAB – Special Authority see SA1777 below – Retail pharmacy

Inj 60 mg prefilled syringe.......................................................... 326.00 1 ✔ Prolia

SA1777 Special Authority for Subsidy

Initial application from any relevant practitioner. Approvals valid without further renewal unless notified for applications meeting the following criteria:

All of the following:

1 The patient has severe, established osteoporosis; and
2 Either:
   2.1 The patient is female and postmenopausal; or
   2.2 The patient is male or non-binary; and
3 Any of the following:
   3.1 History of one significant osteoporotic fracture demonstrated radiologically and documented bone mineral density (BMD) greater than or equal to 2.5 standard deviations below the mean normal value in young adults (i.e. T-Score less than or equal to -2.5) (see Note); or
   3.2 History of one significant osteoporotic fracture demonstrated radiologically, and either the patient is elderly, or densitometry scanning cannot be performed because of major logistical, technical or pathophysiological reasons; or
   3.3 History of two significant osteoporotic fractures demonstrated radiologically; or
   3.4 Documented T-Score less than or equal to -3.0 (see Note); or
   3.5 A 10-year risk of hip fracture greater than or equal to 3%, calculated using a published risk assessment algorithm (e.g. FRAX or Garvan) which incorporates BMD measurements (see Note); or
   3.6 Patient has had a Special Authority approval for alendronate (Underlying cause - Osteoporosis) prior to 1 February 2019 or has had a Special Authority approval for raloxifene; and
4 Zoledronic acid is contraindicated because the patient’s creatinine clearance is less than 35 mL/min; and
5 The patient has experienced at least one symptomatic new fracture after at least 12 months’ continuous therapy with a funded antiresorptive agent at adequate doses (see Notes); and
6 The patient must not receive concomitant treatment with any other funded antiresorptive agent for this condition or teriparatide.

Notes:

a) BMD (including BMD used to derive T-Score) must be measured using dual-energy x-ray absorptiometry (DXA). Quantitative ultrasound and quantitative computed tomography (QCT) are not acceptable
b) Evidence suggests that patients aged 75 years and over who have a history of significant osteoporotic fracture demonstrated radiologically are very likely to have a T-Score less than or equal to -2.5 and, therefore, do not require BMD measurement for treatment with denosumab
c) Osteoporotic fractures are the incident events for severe (established) osteoporosis and can be defined using the WHO definitions of osteoporosis and fragility fracture. The WHO defines severe (established) osteoporosis as a T-score below -2.5 with one or more associated fragility fractures. Fragility fractures are fractures that occur as a result of mechanical forces that would not ordinarily cause fracture (minimal trauma). The WHO has quantified this as forces equivalent to a fall from a standing height or less
d) A vertebral fracture is defined as a 20% or greater reduction in height of the anterior or mid portion of a vertebral body relative to the posterior height of that body, or a 20% or greater reduction in any of these heights compared to the vertebral body above or below the affected vertebral body
e) Antiresorptive agents and their adequate doses for the purposes of this Special Authority are defined as: risedronate sodium tab 35 mg once weekly; alendronate sodium tab 70 mg or tab 70 mg with cholecalciferol 5,600 iu once weekly; raloxifene hydrochloride tab 60 mg once daily. If an intolerance of a severity necessitating permanent treatment withdrawal develops during the use of one antiresorptive agent, an alternate antiresorptive agent must be trialled so that the patient achieves the minimum requirement of 12 months’ continuous therapy

▲ Three months supply may be dispensed at one time if endorsed “certified exemption” by the prescriber or pharmacist.

SA1779 Special Authority for Subsidy

Initial application from any relevant practitioner. Approvals valid without further renewal unless notified for applications meeting the following criteria:

Any of the following:

1. History of one significant osteoporotic fracture demonstrated radiologically and documented bone mineral density (BMD) greater than or equal to 2.5 standard deviations below the mean normal value in young adults (i.e. T-Score less than or equal to -2.5) (see Notes); or
2. History of one significant osteoporotic fracture demonstrated radiologically, and either the patient is elderly, or densitometry scanning cannot be performed because of major logistical, technical or pathophysiological reasons. It is unlikely that this provision would apply to many patients under 75 years of age; or
3. History of two significant osteoporotic fractures demonstrated radiologically; or
4. Documented T-Score less than or equal to -3.0 (see Notes); or
5. A 10-year risk of hip fracture greater than or equal to 3%, calculated using a published risk assessment algorithm (e.g. FRAX or Garvan) which incorporates BMD measurements (see Notes); or
6. Patient has had a Special Authority approval for zoledronic acid (Underlying cause – Osteoporosis) or has had a Special Authority approval for alendronate (Underlying cause - Osteoporosis) prior to 1 February 2019.

Notes:

a) BMD (including BMD used to derive T-Score) must be measured using dual-energy x-ray absorptiometry (DXA). Quantitative ultrasound and quantitative computed tomography (QCT) are not acceptable.

b) Evidence suggests that patients aged 75 years and over who have a history of significant osteoporotic fracture demonstrated radiologically are very likely to have a T-Score less than or equal to -2.5 and, therefore, do not require BMD measurement for raloxifene funding.

c) Osteoporotic fractures are the incident events for severe (established) osteoporosis, and can be defined using the WHO definitions of osteoporosis and fragility fracture. The WHO defines severe (established) osteoporosis as a T-score below -2.5 with one or more associated fragility fractures. Fragility fractures are fractures that occur as a result of mechanical forces that would not ordinarily cause fracture (minimal trauma). The WHO has quantified this as forces equivalent to a fall from a standing height or less.

d) A vertebral fracture is defined as a 20% or greater reduction in height of the anterior or mid portion of a vertebral body relative to the posterior height of that body, or a 20% or greater reduction in any of these heights compared to the vertebral body above or below the affected vertebral body.

year for applications meeting the following criteria:

All of the following:

1. The patient is receiving systemic glucocorticosteroid therapy (greater than or equal to 5 mg per day prednisone equivalents) and has already received or is expected to receive therapy for at least three months; and

2. Any of the following:
   2.1 The patient has documented BMD greater than or equal to 1.5 standard deviations below the mean normal value in young adults (i.e. T-Score less than or equal to -1.5) (see Note); or
   2.2 The patient has a history of one significant osteoporotic fracture demonstrated radiologically; or
   2.3 The patient has had a Special Authority approval for alendronate (Underlying cause - glucocorticosteroid therapy) prior to 1 February 2019 or has had a Special Authority approval for raloxifene; and

3. The patient will not be prescribed more than 5 mg of zoledronic acid in the 12-month approval period.

Renewal — (Paget’s disease) from any relevant practitioner. Approvals valid for 1 year for applications meeting the following criteria:

Both:

1. Any of the following:
   1.1 The patient has relapsed (based on increases in serum alkaline phosphatase); or
   1.2 The patient’s serum alkaline phosphatase has not normalised following previous treatment with zoledronic acid; or
   1.3 Symptomatic disease (prescriber determined); and

2. The patient will not be prescribed more than 5 mg of zoledronic acid in the 12-month approval period.

The patient must not have had more than one prior approval in the last 12 months.

Renewal — (Underlying cause was, and remains, glucocorticosteroid therapy) from any relevant practitioner. Approvals valid for 1 year for applications meeting the following criteria:

Both:

1. The patient is continuing systemic glucocorticosteroid therapy (greater than or equal to 5 mg per day prednisone equivalents); and

2. The patient will not be prescribed more than 5 mg of zoledronic acid in the 12-month approval period.

The patient must not have had more than one prior approval in the last 12 months.

Renewal — (Underlying cause was glucocorticosteroid therapy but patient now meets the ‘Underlying cause - osteoporosis’ criteria) from any relevant practitioner. Approvals valid without further renewal unless notified for applications meeting the following criteria:

Both:

1. Any of the following:
   1.1 History of one significant osteoporotic fracture demonstrated radiologically and documented bone mineral density (BMD) greater than or equal to 2.5 standard deviations below the mean normal value in young adults (i.e. T-Score less than or equal to -2.5) (see Note); or
   1.2 History of one significant osteoporotic fracture demonstrated radiologically, and either the patient is elderly, or densitometry scanning cannot be performed because of major logistical, technical or pathophysiological reasons. ✔ Benzbrarmon AL

➽ SA1537 Special Authority for Subsidy

Initial application from any relevant practitioner. Approvals valid for 6 months for applications meeting the following criteria:

All of the following:

1 Patient has been diagnosed with gout; and

2 Any of the following:

2.1 The patient has a serum urate level greater than 0.36 mmol/l despite treatment with allopurinol at doses of at least 600 mg/day and addition of probenecid at doses of up to 2 g per day or maximum tolerated dose; or

2.2 The patient has experienced intolerable side effects from allopurinol such that treatment discontinuation is required and serum urate remains greater than 0.36 mmol/l despite use of probenecid at doses of up to 2 g per day or maximum tolerated dose; or

2.3 Both:

2.3.1 The patient has renal impairment such that probenecid is contraindicated or likely to be ineffective and serum urate remains greater than 0.36 mmol/l despite optimal treatment with allopurinol (see Notes); and

2.3.2 The patient has a rate of creatinine clearance greater than or equal to 20 ml/min; or

2.4 All of the following:

2.4.1 The patient is taking azathioprine and requires urate-lowering therapy; and

2.4.2 Allopurinol is contraindicated; and

2.4.3 Appropriate doses of probenecid are ineffective or probenecid cannot be used due to reduced renal function; and

3 The patient is receiving monthly liver function tests.

Renewal from any relevant practitioner. Approvals valid for 2 years for applications meeting the following criteria:

Both:

1 The treatment remains appropriate and the patient is benefitting from the treatment; and

2 There is no evidence of liver toxicity and patient is continuing to receive regular (at least every three months) liver function tests.

continued…
MUSCULOSKELETAL SYSTEM

continued…

Notes: Benzbromarone has been associated with potentially fatal hepatotoxicity.
In chronic renal insufficiency, particularly when the glomerular filtration rate is 30 ml/minute or less, probenecid may not be effective. Optimal treatment with allopurinol in patients with renal impairment is defined as treatment to the creatinine clearance-adjusted dose of allopurinol then, if serum urate remains greater than 0.36 mmol/l, a gradual increase of the dose of allopurinol to 600 mg or the maximum tolerated dose.
The New Zealand Rheumatology Association has developed information for prescribers which can be accessed from its website at www.rheumatology.org.nz/home/resources-2/

**SA1538** Special Authority for Subsidy

Initial application from any relevant practitioner. Approvals valid for 6 months for applications meeting the following criteria:
Both:
1 Patient has been diagnosed with gout; and
2 Any of the following:
   2.1 The patient has a serum urate level greater than 0.36 mmol/l despite treatment with allopurinol at doses of at least 600 mg/day and addition of probenecid at doses of up to 2 g per day or maximum tolerated dose; or
   2.2 The patient has experienced intolerable side effects from allopurinol such that treatment discontinuation is required and serum urate remains greater than 0.36 mmol/l despite use of probenecid at doses of up to 2 g per day or maximum tolerated dose; or
   2.3 The patient has renal impairment such that probenecid is contraindicated or likely to be ineffective and serum urate remains greater than 0.36 mmol/l despite optimal treatment with allopurinol (see Note).

Renewal from any relevant practitioner. Approvals valid for 2 years where the treatment remains appropriate and the patient is benefiting from treatment.

Note: In chronic renal insufficiency, particularly when the glomerular filtration rate is 30 ml/minute or less, probenecid may not be effective. The efficacy and safety of febuxostat have not been fully evaluated in patients with severe renal impairment (creatinine clearance less than 30 ml/minute). No dosage adjustment of febuxostat is necessary in patients with mild or moderate renal impairment. Optimal treatment with allopurinol in patients with renal impairment is defined as treatment to the creatinine clearance-adjusted dose of allopurinol then, if serum urate remains greater than 0.36 mmol/l, a gradual increase of the dose of allopurinol to 600 mg or the maximum tolerated dose.

**SA1403** Special Authority for Subsidy
Initial application only from a neurologist or respiratory specialist. Approvals valid for 6 months for applications meeting the following criteria:
All of the following:
1. The patient has amyotrophic lateral sclerosis with disease duration of 5 years or less; and
2. The patient has at least 60 percent of predicted forced vital capacity within 2 months prior to the initial application; and
3. The patient has not undergone a tracheostomy; and
4. The patient has not experienced respiratory failure; and
5. Any of the following:
   5.1. The patient is ambulatory; or
   5.2. The patient is able to use upper limbs; or
   5.3. The patient is able to swallow.

Renewal from any relevant practitioner. Approvals valid for 18 months for applications meeting the following criteria:
All of the following:
1. The patient has not undergone a tracheostomy; and
2. The patient has not experienced respiratory failure; and
3. Any of the following:
   3.1. The patient is ambulatory; or
   3.2. The patient is able to use upper limbs; or
   3.3. The patient is able to swallow.

**[SA1125]** Special Authority for Subsidy

**Initial application** from any relevant practitioner. Approvals valid for 15 months for applications meeting the following criteria:

- Both:
  1. Patient has partial-onset epilepsy; and
  2. Seizures are not adequately controlled by, or patient has experienced unacceptable side effects from, optimal treatment with all of the following: sodium valproate, topiramate, levetiracetam and any two of carbamazepine, lamotrigine and phenytoin sodium (see Note).

Note: "Optimal treatment" is defined as treatment which is indicated and clinically appropriate for the patient, given in adequate doses for the patient's age, weight and other features affecting the pharmacokinetics of the drug with good evidence of compliance. Women of childbearing age are not required to have a trial of sodium valproate.

**Renewal** from any relevant practitioner. Approvals valid for 24 months where the patient has demonstrated a significant and sustained improvement in seizure rate or severity and/or quality of life compared with that prior to starting lacosamide treatment (see Note).

Note: As a guideline, clinical trials have referred to a notional 50% reduction in seizure frequency as an indicator of success with anticonvulsant therapy and have assessed quality of life from the patient's perspective.

SA1330 Special Authority for Subsidy

**Initial application** only from a paediatric neurologist or Practitioner on the recommendation of a paediatric neurologist. Approvals valid for 6 months for applications meeting the following criteria:

Both:
1. Patient has confirmed diagnosis of Dravet syndrome; and
2. Seizures have been inadequately controlled by appropriate courses of sodium valproate, clobazam and at least two of the following: topiramate, levetiracetam, ketogenic diet.

**Renewal** from any relevant practitioner. Approvals valid without further renewal unless notified where the patient continues to benefit from treatment as measured by reduced seizure frequency from baseline.

TOPIRAMATE

▲ Tab 25 mg ................................................................. 11.07 60 ✔ Arrow-Topiramate
& Topiramate Actavis
& Topamax

SA1072 Special Authority for Subsidy

**Initial application** from any relevant practitioner. Approvals valid for 15 months for applications meeting the following criteria:

Both:
1. Either:
   1.1 Patient has infantile spasms; or
   1.2 Both:
      1.2.1 Patient has epilepsy; and
      1.2.2 Either:
         1.2.2.1 Seizures are not adequately controlled with optimal treatment with other antiepilepsy agents; or
         1.2.2.2 Seizures are controlled adequately but the patient has experienced unacceptable side effects from optimal treatment with other antiepilepsy agents; and
   2 Either:
      2.1 Patient is, or will be, receiving regular automated visual field testing (ideally before starting therapy and on a 6-monthly basis thereafter); or
      2.2 It is impractical or impossible (due to comorbid conditions) to monitor the patient's visual fields.

Notes: "Optimal treatment with other antiepilepsy agents" is defined as treatment with other antiepilepsy agents which are indicated and clinically appropriate for the patient, given in adequate doses for the patient's age, weight, and other features affecting the pharmacokinetics of the drug with good evidence of compliance. Vigabatrin is associated with a risk of irreversible visual field defects, which may be asymptomatic in the early stages.

**Renewal** from any relevant practitioner. Approvals valid without further renewal unless notified for applications meeting the following criteria:

continued…
continued...

Both:

1. The patient has demonstrated a significant and sustained improvement in seizure rate or severity and/or quality of life; and
2. Either:
   2.1 Patient is receiving regular automated visual field testing (ideally every 6 months) on an ongoing basis for duration of treatment with vigabatrin; or
   2.2 It is impractical or impossible (due to comorbid conditions) to monitor the patient's visual fields.

Notes: As a guideline, clinical trials have referred to a notional 50% reduction in seizure frequency as an indicator of success with anticonvulsant therapy and have assessed quality of life from the patient's perspective. Vigabatrin is associated with a risk of irreversible visual field defects, which may be asymptomatic in the early stages.

### Antimigraine Preparations

**SA1428** Special Authority for Subsidy

**Initial application** from any relevant practitioner. Approvals valid for 12 months for applications meeting the following criteria:

Either:

1. The patient has had an initial Special Authority approval for paliperidone depot injection or risperidone depot injection; or
2. All of the following:
   2.1 The patient has schizophrenia; and

continued…

---

**Fully subsidised**

**Sole Subsidised Supply**

Unapproved medicine supplied under Section 29
continued...

2.2 The patient has tried but failed to comply with treatment using oral atypical antipsychotic agents; and
2.3 The patient has been admitted to hospital or treated in respite care, or intensive outpatient or home-based treatment for 30 days or more in the last 12 months.

Renewal from any relevant practitioner. Approvals valid for 12 months where the initiation of olanzapine depot injection has been associated with fewer days of intensive intervention than was the case during a corresponding period of time prior to the initiation of an atypical antipsychotic depot injection.

Note: The patient should be monitored for post-injection syndrome for at least two hours after each injection.

➽ SA1429 Special Authority for Subsidy

Initial application from any relevant practitioner. Approvals valid for 12 months for applications meeting the following criteria:

Either:

1. The patient has had an initial Special Authority approval for risperidone depot injection or olanzapine depot injection; or
2. All of the following:
   2.1 The patient has schizophrenia or other psychotic disorder; and
   2.2 Has tried but failed to comply with treatment using oral atypical antipsychotic agents; and
   2.3 Has been admitted to hospital or treated in respite care, or intensive outpatient or home-based treatment for 30 days or more in last 12 months.

Renewal from any relevant practitioner. Approvals valid for 12 months where the initiation of paliperidone depot injection has been associated with fewer days of intensive intervention than was the case during a corresponding period of time prior to the initiation of an atypical antipsychotic depot injection.

Note: Paliperidone depot injection should ideally be used as monotherapy (i.e. without concurrent use of any other antipsychotic medication). In some cases, it may be clinically appropriate to attempt to treat a patient with typical antipsychotic agents in depot injectable form before trialling paliperidone depot injection.

PIPOTHIAZINE PALMITATE – Subsidy by endorsement
a) Safety medicine; prescriber may determine dispensing frequency
b) Subsidised for patients who were taking pipothiazine palmitate prior to 1 August 2014 and the prescription or PSO is endorsed accordingly. Pharmacists may annotate the prescription as endorsed where there exists a record of prior dispensing of pipothiazine palmitate.

Multiple Sclerosis Treatment Assessment Committee Facsimile: 04 916 7571
PHARMAC PO Box 10 254 Email: mstaccoordinator@pharmac.govt.nz
Wellington

Completed application forms must be sent to the coordinator for MSTAC and will be considered by MSTAC at the next practicable opportunity.

Notification of MSTAC's decision will be sent to the patient, the applying clinician and the patient's GP (if specified).

**Entry Criteria**

a) Diagnosis of multiple sclerosis (MS) must be confirmed by a neurologist. Diagnosis must include MRI confirmation; and

b) patients must have Clinically Definite Relapsing Remitting MS with or without underlying progression; and

c) patients must have:

   a) EDSS score 0 - 4.0 and:
      i. Experienced at least 1 significant relapse of MS in the previous 12 months or 2 significant relapses in the past 24 months; and
      ii. Evidence of new inflammatory activity on an MR scan within the past 24 months, any of the following:
         i) a gadolinium enhancing lesion; or
         ii) a Diffusion Weighted Imaging positive lesion; or
         iii) a T2 lesion with associated local swelling; or
         iv) a prominent T2 lesion that clearly is responsible for the clinical features of a recent relapse; or
         v) new T2 lesions compared with a previous MR scan; and

d) A significant relapse must:

   a) be confirmed by the applying neurologist or general physician (the patient may not necessarily have been seen by them during the relapse but the neurologist/physician must be satisfied that the clinical features were characteristic and met the specified criteria);
   b) be associated with characteristic new symptom(s)/sign(s) or substantial worsening of previously experienced symptom(s)/sign(s);
   c) last at least one week;
   d) start at least one month after the onset of a previous relapse;
   e) be severe enough to change either the EDSS or at least one of the Kurtzke Functional System scores by at least 1 point;
   f) be distinguishable from the effects of general fatigue; and
   g) not be associated with a fever (T> 37.5°C); and

   e) applications must be made by the patient's neurologist or general physician; and
   f) patients must have no previous history of lack of response to dimethyl fumarate; and
   g) patients must have not previously had intolerance to dimethyl fumarate; and
   h) patient must not be co-prescribed beta interferon or glatiramer acetate.

**Stopping Criteria**

Any of the following:

1) Confirmed progression of disability that is sustained for six months. Progression of disability is defined as progress by any of the following EDDSS points:

   a) from starting at EDSS 0 increasing to (i.e. stopping on reaching) EDSS 3.0; or
   b) 1.0 to 3.0; or
   c) 1.5 to 3.5; or
   d) 2.0 to 4.0; or
   e) 2.5 to 4.5; or
   f) 3.0 to 4.5; or

continued…

▲Three months supply may be dispensed at one time if endorsed “certified exemption” by the prescriber or pharmacist.

★Three months or six months, as applicable, dispensed all-at-once
NERVOUS SYSTEM

continued...

g) 3.5 to 4.5; or
h) 4.0 to 4.5.

2) increasing relapse rate over 12 months of treatment (compared with the relapse rate on starting treatment)(see note); or
3) intolerance to dimethyl fumarate; or
4) non-compliance with treatment, including refusal to undergo annual assessment.

Note: Switching between natalizumab, fingolimod, dimethyl fumarate and teriflunomide is permitted provided the EDSS stopping criteria are not met. Switching to interferon or glatiramer acetate is only permitted provided the EDSS stopping criteria are not met and both fingolimod and natalizumab are either not tolerated or treatment with both agents would be clinically inappropriate. Continued relapses on treatment would be expected to lead to a switch of treatment provided the stopping criteria are not met. If a relapse has resulted in an increased EDSS score that potentially may lead to discontinuation of treatment according to stopping criteria, a period of 6 months is allowed from the start of the relapse for recovery to occur.

Completed application forms must be sent to the coordinator for MSTAC and will be considered by MSTAC at the next practicable opportunity.

Notification of MSTAC’s decision will be sent to the patient, the applying clinician and the patient’s GP (if specified).

Entry Criteria

1) Diagnosis of multiple sclerosis (MS) must be confirmed by a neurologist. Diagnosis must include MRI confirmation; and
2) patients must have Clinically Definite Relapsing Remitting MS with or without underlying progression; and
3) patients must have:
   a) EDSS score 0 - 4.0 and:
      • Experienced at least 1 significant relapse of MS in the previous 12 months or 2 significant relapses in the past 24 months; and
      • Evidence of new inflammatory activity on an MR scan within the past 24 months, any of the following:
        i) a gadolinium enhancing lesion; or
        ii) a Diffusion Weighted Imaging positive lesion; or
        iii) a T2 lesion with associated local swelling; or
        iv) a prominent T2 lesion that clearly is responsible for the clinical features of a recent relapse; or
        v) new T2 lesions compared with a previous MR scan; and
4) A significant relapse must:
   a) be confirmed by the applying neurologist or general physician (the patient may not necessarily have been seen by them during the relapse but the neurologist/physician must be satisfied that the clinical features were characteristic and met the specified criteria);
   b) be associated with characteristic new symptom(s)/sign(s) or substantial worsening of previously experienced symptom(s)/sign(s);
   c) last at least one week;

continued…
NERVOUS SYSTEM

Subsidy
(Manufacturer’s Price)$ Per

Fully Subsidised ✔

Brand or Generic Manufacturer

continues...

d) start at least one month after the onset of a previous relapse;
e) be severe enough to change either the EDSS or at least one of the Kurtzke Functional System scores by at least 1 point;
f) be distinguishable from the effects of general fatigue; and
g) not be associated with a fever (T> 37.5°C); and

5) applications must be made by the patient’s neurologist or general physician; and
6) patients must have no previous history of lack of response to teriflunomide; and
7) patients must have not previously had intolerance to teriflunomide; and
8) patient must not be co-prescribed beta interferon or glatiramer acetate.

Stopping Criteria

Any of the following:
1) Confirmed progression of disability that is sustained for six months. Progression of disability is defined as progress by any of the following EDDSS points:
   a) from starting at EDSS 0 increasing to (i.e. stopping on reaching) EDSS 3.0; or
   b) 1.0 to 3.0; or
   c) 1.5 to 3.5; or
   d) 2.0 to 4.0; or
   e) 2.5 to 4.5; or
   f) 3.0 to 4.5; or
   g) 3.5 to 4.5; or
   h) 4.0 to 4.5.
2) increasing relapse rate over 12 months of treatment (compared with the relapse rate on starting treatment)(see note); or
3) intolerance to teriflunomide; or
4) non-compliance with treatment, including refusal to undergo annual assessment.

Note: Switching between natalizumab, fingolimod, dimethyl fumarate and teriflunomide is permitted provided the EDSS stopping criteria are not met. Switching to interferon or glatiramer acetate is only permitted provided the EDSS stopping criteria are not met and both fingolimod and natalizumab are either not tolerated or treatment with both agents would be clinically inappropriate. Continued relapses on treatment would be expected to lead to a switch of treatment provided the stopping criteria are not met. If a relapse has resulted in an increased EDSS score that potentially may lead to discontinuation of treatment according to stopping criteria, a period of 6 months is allowed from the start of the relapse for recovery to occur.

Other Multiple Sclerosis Treatments

SA1564 Special Authority for Subsidy
Special Authority approved by the Multiple Sclerosis Treatment Committee
Notes: Special Authority approved by the Multiple Sclerosis Treatment Assessment Committee (MSTAC). Applications will be considered by MSTAC at its regular meetings and approved subject to eligibility according to the Entry and Stopping criteria (below).

Application details may be obtained from PHARMAC’s website http://www.pharmac.govt.nz or:

Notification of MSTAC’s decision will be sent to the patient, the applying clinician and the patient’s GP (if specified). Only glatiramer acetate inj 40 mg prefilled syringe will be subsidised if dispensed in a community pharmacy. The other agents will NOT be subsidised if dispensed from a community or hospital pharmacy. Regular supplies will be distributed to all approved patients or their clinicians by courier. Prescribers must send quarterly prescriptions for approved patients to the MSTAC coordinator.

Only prescriptions for 6 million iu of interferon beta-1-alpha per week, or 8 million iu of interferon beta-1-beta every other day, 20 mg glatiramer acetate daily or 40 mg glatiramer acetate 3 times weekly will be subsidised. Switching between treatments is permitted within the 12 month approval period without reapproval by MSTAC. The MSTAC coordinator should be notified of the change and a new prescription provided.

Entry Criteria

1) Diagnosis of multiple sclerosis (MS) must be confirmed by a neurologist. Diagnosis must include MRI confirmation; and
2) patients must have Clinically Definite Relapsing Remitting MS with or without underlying progression; and
3) patients must have:
   a) EDSS score 0 - 4.0 and:
      • Experienced at least 1 significant relapse of MS in the previous 12 months or 2 significant relapses in the past 24 months; and
      • Evidence of new inflammatory activity on an MR scan within the past 24 months, any of the following:
         i) a gadolinium enhancing lesion; or
         ii) a Diffusion Weighted Imaging positive lesion; or
         iii) a T2 lesion with associated local swelling; or
         iv) a prominent T2 lesion that clearly is responsible for the clinical features of a recent relapse; or
         v) new T2 lesions compared with a previous MR scan; and
4) A significant relapse must:
   a) be confirmed by the applying neurologist or general physician (the patient may not necessarily have been seen by them during the relapse but the neurologist/physician must be satisfied that the clinical features were characteristic and met the specified criteria);
   b) be associated with characteristic new symptom(s)/sign(s) or substantial worsening of previously experienced symptom(s)/sign(s);
   c) last at least one week;
   d) start at least one month after the onset of a previous relapse;
   e) be severe enough to change either the EDSS or at least one of the Kurtzke Functional System scores by at least 1 point;
   f) be distinguishable from the effects of general fatigue; and
   g) not be associated with a fever (T> 37.5°C); and
5) applications must be made by the patient's neurologist; and
6) patients must have no previous history of lack of response to beta-interferon or glatiramer acetate; and
7) patients must have either:
   a) intolerance to both natalizumab and fingolimod; or
   b) treatment with both natalizumab and fingolimod is considered clinically inappropriate; and
8) patient will not be co-prescribed natalizumab or fingolimod.

Stopping Criteria

Any of the following:

1) Confirmed progression of disability that is sustained for six months during a minimum of one year of treatment. Progression of disability is defined as progress by any of the following EDDSS Points:
   a) from starting at EDSS 0 increasing to (i.e. stopping on reaching) EDSS 3.0; or
   b) 1.0 to 3.0; or
   c) 1.5 to 3.5; or

continued…

▲ Three months supply may be dispensed at one time if endorsed "certified exemption" by the prescriber or pharmacist.
✱ Three months or six months, as applicable, dispensed all-at-once

141
continued...

d) 2.0 to 4.0; or 
e) 2.5 to 4.5; or 
f) 3.0 to 4.5; or 
g) 3.5 to 4.5; or 
h) 4.0 to 4.5.

2) increasing relapse rate over 12 months of treatment (compared with the relapse rate on starting treatment)(see note); or
3) intolerance to interferon beta-1-alpha, and/or interferon beta-1-beta and/or glatiramer acetate; or
4) non-compliance with treatment, including refusal to undergo annual assessment.

Note: Treatment with interferon beta-1-beta, interferon beta-1-alpha and glatiramer acetate is permitted only if treatment with both natalizumab and fingolimod is not tolerated or treatment with both would be clinically inappropriate. Beta-interferon or glatiramer acetate will not be funded as second line treatments if EDSS progression has occurred on treatment with natalizumab or fingolimod. Patients who have an increasing relapse rate over 12 months of treatment (compared with the relapse rate on starting treatment) and who do not meet the EDSS Stopping Criteria at annual review may switch from either of the beta-interferon's [interferon beta-1-beta or interferon beta-1-alpha] to glatiramer acetate or vice versa. Patients may switch from either of the beta-interferon's [interferon beta-1-beta or interferon beta-1-alpha] to glatiramer acetate or vice versa for increased relapses only once, after which they will be required to stop funded treatment if they meet any of the Stopping Criteria at annual review (including the criterion relating to increasing relapse rate over 12 months of treatment). If a relapse has resulted in an increased EDSS score that potentially may lead to discontinuation of treatment according to stopping criteria, a period of 6 months is allowed from the start of the relapse for recovery to occur. In this setting anti-JCV antibody positive status may be accepted as a clinically inappropriate reason for treatment with natalizumab.

Initial application only from a psychiatrist, paediatrician, neurologist, respiratory specialist or medical practitioner on the recommendation of a psychiatrist, paediatrician, neurologist or respiratory specialist. Approvals valid for 12 months for applications meeting the following criteria:

All of the following:

1. Patient has been diagnosed with persistent and distressing insomnia secondary to a neurodevelopmental disorder (including, but not limited to, autism spectrum disorder or attention deficit hyperactivity disorder)*; and
2. Behavioural and environmental approaches have been tried and were unsuccessful, or are inappropriate; and
3. Funded modified-release melatonin is to be given at doses no greater than 10 mg per day; and
4. Patient is aged 18 years or under*.

Renewal only from a psychiatrist, paediatrician, neurologist, respiratory specialist or medical practitioner on the recommendation of a psychiatrist, paediatrician, neurologist or respiratory specialist. Approvals valid for 12 months for applications meeting the following criteria:

continued…
continued...

All of the following:

1. Patient is aged 18 years or under; and
2. Patient has demonstrated clinically meaningful benefit from funded modified-release melatonin (clinician determined); and
3. Patient has had a trial of funded modified-release melatonin discontinuation within the past 12 months and has had a recurrence of persistent and distressing insomnia; and
4. Funded modified-release melatonin is to be given at doses no greater than 10 mg per day.

Note: Indications marked with * are unapproved indications.

➽ SA1416 Special Authority for Subsidy
Initial application from any relevant practitioner. Approvals valid for 6 months for applications meeting the following criteria:
All of the following:
1. Patient has ADHD (Attention Deficit and Hyperactivity Disorder) diagnosed according to DSM-IV or ICD 10 criteria; and
2. Once-daily dosing; and
3. Any of the following:
   3.1 Treatment with a subsidised formulation of a stimulant has resulted in the development or worsening of serious adverse reactions or where the combination of subsidised stimulant treatment with another agent would pose an unacceptable medical risk; or
   3.2 Treatment with a subsidised formulation of a stimulant has resulted in worsening of co-morbid substance abuse or there is a significant risk of diversion with subsidised stimulant therapy; or
   3.3 An effective dose of a subsidised formulation of a stimulant has been trialled and has been discontinued because of inadequate clinical response; or
   3.4 Treatment with a subsidised formulation of a stimulant is considered inappropriate because the patient has a history of psychoses or has a first-degree relative with schizophrenia; and
4. The patient will not be receiving treatment with atomoxetine in combination with a subsidised formulation of a stimulant, except for the purposes of transitioning from subsidised stimulant therapy to atomoxetine.

Renewal from any relevant practitioner. Approvals valid for 2 years where the treatment remains appropriate and the patient is benefiting from treatment.

Note: A "subsidised formulation of a stimulant" refers to currently subsidised methylphenidate hydrochloride tablet formulations (immediate-release, sustained-release and extended-release) or dexamfetamine sulphate tablets.

criteria:

All of the following:

1. Patient is opioid dependent; and
2. Patient has previously trialled but failed detoxification with buprenorphine with naloxone with relapse back to opioid use and another attempt is planned; and
3. Patient is currently engaged with an opioid treatment service approved by the Ministry of Health; and
4. Applicant works in an opioid treatment service approved by the Ministry of Health.

Renewal — (Maintenance treatment) from any medical practitioner. Approvals valid for 12 months for applications meeting the following criteria:

All of the following:

1. Patient is or has been receiving maintenance therapy with buprenorphine with naloxone (and is not receiving methadone); and
2. Patient is currently enrolled in an opioid substitution program in a service approved by the Ministry of Health; and
3. Applicant works in an opioid treatment service approved by the Ministry of Health or is a medical practitioner authorised by the service to manage treatment in this patient.

Renewal — (Maintenance treatment where the patient has previously had an initial application for detoxification) from any medical practitioner. Approvals valid for 12 months for applications meeting the following criteria:

All of the following:

1. Patient received but failed detoxification with buprenorphine with naloxone; and
2. Maintenance therapy with buprenorphine with naloxone is planned (and patient will not be receiving methadone); and
3. Patient is currently enrolled in an opioid substitution program in a service approved by the Ministry of Health; and
4. Applicant works in an opioid treatment service approved by the Ministry of Health.

SA1408: Special Authority for Subsidy

Initial application from any relevant practitioner. Approvals valid for 6 months for applications meeting the following criteria:

Both:

1. Patient is currently enrolled in a recognised comprehensive treatment programme for alcohol dependence; and
2. Applicant works in or with a community Alcohol and Drug Service contracted to one of the District Health Boards or accredited against the New Zealand Alcohol and Other Drug Sector Standard or the National Mental Health Sector Standard.

Renewal from any relevant practitioner. Approvals valid for 6 months for applications meeting the following criteria:

Both:

1. Compliance with the medication (prescriber determined); and
2. Any of the following:
   2.1 Patient is still unstable and requires further treatment; or
   2.2 Patient achieved significant improvement but requires further treatment; or
   2.3 Patient is well controlled but requires maintenance therapy.
NICOTINE

a) Nicotine will not be funded in amounts less than 4 weeks of treatment.
b) Note: Direct Provision by a pharmacist permitted under the provisions in Part I of Section A.

3.2 The patient has tried but failed to quit smoking using bupropion or nortriptyline; and
4 The patient has not used funded varenicline in the last 12 months; and
5 Varenicline is not to be used in combination with other pharmacological smoking cessation treatments and the patient has agreed to this; and
6 The patient is not pregnant; and
7 The patient will not be prescribed more than 12 weeks' funded varenicline (see note).

**Renewal** from any relevant practitioner. Approvals valid for 5 months for applications meeting the following criteria:

All of the following:
1 Short-term therapy as an aid to achieving abstinence in a patient who has indicated that they are ready to cease smoking; and
2 The patient is part of, or is about to enrol in, a comprehensive support and counselling smoking cessation programme, which includes prescriber or nurse monitoring; and
3 The patient has not used funded varenicline in the last 12 months; and
4 Varenicline is not to be used in combination with other pharmacological smoking cessation treatments and the patient has agreed to this; and
5 The patient is not pregnant; and
6 The patient will not be prescribed more than 12 weeks' funded varenicline (see note).

The patient must not have had an approval in the past 12 months.

Notes: a maximum of 12 weeks' varenicline will be subsidised on each Special Authority approval.
This includes the 4-week 'starter' pack.

Special Authority for Subsidy

Initial application — (treatment naive CLL) only from a relevant specialist or medical practitioner on the recommendation of a relevant specialist. Approvals valid for 12 months for applications meeting the following criteria:

All of the following:

1. The patient has Binet stage B or C, or progressive stage A chronic lymphocytic leukaemia requiring treatment; and
2. The patient is chemotherapy treatment naive; and
3. The patient is unable to tolerate toxicity of full-dose FCR; and
4. Patient has ECOG performance status 0-2; and
5. Patient has a Cumulative Illness Rating Scale (CIRS) score of < 6; and
6. Bendamustine is to be administered at a maximum dose of 100 mg/m² on days 1 and 2 every 4 weeks for a maximum of 6 cycles.

Note: 'Chronic lymphocytic leukaemia (CLL)' includes small lymphocytic lymphoma (SLL). Chemotherapy treatment is considered to comprise a known standard therapeutic chemotherapy regimen and supportive treatments.

Initial application — (Indolent, Low-grade lymphomas) only from a relevant specialist or medical practitioner on the recommendation of a relevant specialist. Approvals valid for 9 months for applications meeting the following criteria:

All of the following:

1. The patient has indolent low grade NHL requiring treatment; and
2. Patient has a WHO performance status of 0-2; and
3. Either:
   3.1 Both:
       3.1.1 Patient is treatment naive; and
       3.1.2 Bendamustine is to be administered for a maximum of 6 cycles (in combination with rituximab when CD20+); or
   3.2 All of the following:
      3.2.1 Patient has relapsed refractory disease following prior chemotherapy; and
      3.2.2 The patient has not received prior bendamustine therapy; and
      3.2.3 Either:
         3.2.3.1 Both:
            3.2.3.1.1 Bendamustine is to be administered for a maximum of 6 cycles in relapsed patients (in combination with rituximab when CD20+); and
            3.2.3.1.2 Patient has had a rituximab treatment-free interval of 12 months or more; or
         3.2.3.2 Bendamustine is to be administered as a monotherapy for a maximum of 6 cycles in rituximab refractory patients.

Renewal — (Indolent, Low-grade lymphomas) only from a relevant specialist or medical practitioner on the recommendation of a relevant specialist. Approvals valid for 9 months for applications meeting the following criteria:

Both:

1. Patients have not received a bendamustine regimen within the last 12 months; and
2. Either:
   2.1 Both:

### SA1467 Special Authority for Subsidy

**Initial application** only from a haematologist or medical practitioner on the recommendation of a haematologist. Approvals valid for 12 months for applications meeting the following criteria:

All of the following:

1. Any of the following:
   1.1 The patient has International Prognostic Scoring System (IPSS) intermediate-2 or high risk myelodysplastic syndrome; or
   1.2 The patient has chronic myelomonocytic leukaemia (10%-29% marrow blasts without myeloproliferative disorder); or
   1.3 The patient has acute myeloid leukaemia with 20-30% blasts and multi-lineage dysplasia, according to World Health Organisation Classification (WHO); and
2. The patient has performance status (WHO/ECOG) grade 0-2; and
3. The patient does not have secondary myelodysplastic syndrome resulting from chemical injury or prior treatment with chemotherapy and/or radiation for other diseases; and
4. The patient has an estimated life expectancy of at least 3 months.

**Renewal** only from a haematologist or medical practitioner on the recommendation of a haematologist. Approvals valid for 12 months for applications meeting the following criteria:

Both:

1. No evidence of disease progression; and
2. The treatment remains appropriate and patient is benefitting from treatment.

**SA1679 Special Authority for Subsidy**

**Initial application** — (mesothelioma) only from a relevant specialist or medical practitioner on the recommendation of a relevant specialist. Approvals valid for 8 months for applications meeting the following criteria:

continued…
continued…

Both:

1. Patient has been diagnosed with mesothelioma; and
2. Pemetrexed to be administered at a dose of 500 mg/m² every 21 days in combination with cisplatin or carboplatin for a maximum of 6 cycles.

**Renewal — (mesothelioma)** only from a relevant specialist or medical practitioner on the recommendation of a relevant specialist. Approvals valid for 8 months for applications meeting the following criteria:

All of the following:

1. No evidence of disease progression; and
2. The treatment remains appropriate and the patient is benefitting from treatment; and
3. Pemetrexed to be administered at a dose of 500mg/m² every 21 days for a maximum of 6 cycles.

**Initial application — (non-small cell lung carcinoma)** only from a relevant specialist or medical practitioner on the recommendation of a relevant specialist. Approvals valid for 8 months for applications meeting the following criteria:

Both:

1. Patient has locally advanced or metastatic non-squamous non-small cell lung carcinoma; and
2. Either:
   2.1 Both:
      2.1.1 Patient has chemotherapy-naïve disease; and
      2.1.2 Pemetrexed is to be administered at a dose of 500 mg/m² every 21 days in combination with cisplatin or carboplatin for a maximum of 6 cycles; or
   2.2 All of the following:
      2.2.1 Patient has had first-line treatment with platinum based chemotherapy; and
      2.2.2 Patient has not received prior funded treatment with pemetrexed; and
      2.2.3 Pemetrexed is to be administered at a dose of 500 mg/m² every 21 days for a maximum of 6 cycles.

**Renewal — (non-small cell lung carcinoma)** only from a relevant specialist or medical practitioner on the recommendation of a relevant specialist. Approvals valid for 8 months for applications meeting the following criteria:

All of the following:

1. No evidence of disease progression; and
2. The treatment remains appropriate and the patient is benefitting from treatment; and
3. Pemetrexed is to be administered at a dose of 500mg/m² every 21 days.

SA1576 Special Authority for Subsidy

Initial application — (Treatment naive multiple myeloma/amyloidosis) only from a relevant specialist or medical practitioner on the recommendation of a relevant specialist. Approvals valid for 2 years for applications meeting the following criteria:

Both:

1 Either:
   1.1 The patient has treatment-naive symptomatic multiple myeloma; or
   1.2 The patient has treatment-naive symptomatic systemic AL amyloidosis *
2 Maximum of 9 treatment cycles.

Note: Indications marked with * are unapproved indications.

Initial application — (Relapsed/refractory multiple myeloma/amyloidosis) only from a relevant specialist or medical practitioner on the recommendation of a relevant specialist. Approvals valid for 8 months for applications meeting the following criteria:

All of the following:

1 Either:
   1.1 The patient has relapsed or refractory multiple myeloma; or
   1.2 The patient has relapsed or refractory systemic AL amyloidosis *
2 The patient has received only one prior front line chemotherapy for multiple myeloma or amyloidosis; and
3 The patient has not had prior publicly funded treatment with bortezomib; and
4 Maximum of 4 treatment cycles.

Note: Indications marked with * are unapproved indications.

Renewal — (Relapsed/refractory multiple myeloma/amyloidosis) only from a relevant specialist or medical practitioner on the recommendation of a relevant specialist. Approvals valid for 8 months for applications meeting the following criteria:

Both:

1 The patient's disease obtained at least a partial response from treatment with bortezomib at the completion of cycle 4; and
2 Maximum of 4 further treatment cycles (making a total maximum of 8 consecutive treatment cycles).

Notes: Responding relapsed/refractory multiple myeloma patients should receive no more than 2 additional cycles of treatment beyond the cycle at which a confirmed complete response was first achieved. A line of therapy is considered to comprise either:

a) a known therapeutic chemotherapy regimen and supportive treatments; or
b) a transplant induction chemotherapy regimen, stem cell transplantation and supportive treatments.

Refer to datasheet for recommended dosage and number of doses of bortezomib per treatment cycle.

Initial application — (high grade gliomas) only from a relevant specialist. Approvals valid for 12 months for applications meeting the following criteria:
All of the following:
1 Either:
   1.1 Patient has newly diagnosed glioblastoma multiforme; or
   1.2 Patient has newly diagnosed anaplastic astrocytoma*; and
2 Temozolomide is to be (or has been) given concomitantly with radiotherapy; and
3 Following concomitant treatment temozolomide is to be used for a maximum of 5 days treatment per cycle, at a maximum dose of 200 mg/m² per day.

Initial application — (neuroendocrine tumours) only from a relevant specialist. Approvals valid for 9 months for applications meeting the following criteria:
All of the following:
1 Patient has been diagnosed with metastatic or unresectable well-differentiated neuroendocrine tumour*; and
2 Temozolomide is to be given in combination with capecitabine; and
3 Temozolomide is to be used in 28 day treatment cycles for a maximum of 5 days treatment per cycle at a maximum dose of 200 mg/m² per day; and
4 Temozolomide to be discontinued at disease progression.

Initial application — (ewing’s sarcoma) only from a relevant specialist. Approvals valid for 9 months where the patient has relapsed/refractory Ewing’s sarcoma.
Renewal — (high grade gliomas) only from a relevant specialist. Approvals valid for 12 months for applications meeting the following criteria:
Either:

continued…
continued...

1 Both:
   1.1 Patient has glioblastoma multiforme; and
   1.2 The treatment remains appropriate and the patient is benefitting from treatment; or

2 All of the following:
   2.1 Patient has anaplastic astrocytoma*; and
   2.2 The treatment remains appropriate and the patient is benefitting from treatment; and
   2.3 Adjuvant temozolomide is to be used for a maximum of 24 months.

Renewal — (neuroendocrine tumours) only from a relevant specialist. Approvals valid for 6 months for applications meeting the following criteria:

Both:
   1 No evidence of disease progression; and
   2 The treatment remains appropriate and the patient is benefitting from treatment.

Renewal — (ewing’s sarcoma) only from a relevant specialist. Approvals valid for 6 months for applications meeting the following criteria:

Both:
   1 No evidence of disease progression; and
   2 The treatment remains appropriate and the patient is benefitting from treatment.

Note: Indication marked with a * is an unapproved indication. Temozolomide is not subsidised for the treatment of relapsed high grade glioma.

THALIDOMIDE – Retail pharmacy-Specialist – Special Authority see SA1124 below

| Cap 50 mg | $378.00 | 28 | Thalomid |
| Cap 100 mg | $756.00 | 28 | Thalomid |

**SA1124** Special Authority for Subsidy

Initial application only from a relevant specialist or medical practitioner on the recommendation of a relevant specialist. Approvals valid for 12 months for applications meeting the following criteria:

Either:
   1 The patient has multiple myeloma; or
   2 The patient has systemic AL amyloidosis*.

Renewal only from a relevant specialist or medical practitioner on the recommendation of a relevant specialist. Approvals valid without further renewal unless notified where the patient has obtained a response from treatment during the initial approval period.

Notes: Prescription must be written by a registered prescriber in the thalidomide risk management programme operated by the supplier.

Maximum dose of 400 mg daily as monotherapy or in a combination therapy regimen.

Indication marked with * is an unapproved indication.

SA0976 Special Authority for Subsidy

Special Authority approved by the CML/GIST Co-ordinator
Notes: Application details may be obtained from PHARMAC’s website http://www.pharmac.govt.nz, and prescriptions should be sent to:
The CML/GIST Co-ordinator Phone: (04) 460 4990
PHARMAC Facsimile: (04) 916 7571
PO Box 10 254 Email: cmlgistcoordinator@pharmac.govt.nz
Wellington

Special Authority criteria for CML - access by application

a) Funded for patients with diagnosis (confirmed by a haematologist) of a chronic myeloid leukaemia (CML) in blast crisis, accelerated phase, or in chronic phase.
b) Maximum dose of 140 mg/day for accelerated or blast phase, and 100 mg/day for chronic phase CML.
c) Subsidised for use as monotherapy only.
d) Initial approvals valid seven months.
e) Subsequent approval(s) are granted on application and are valid for six months. The first reapplication (after seven months) should provide details of the haematological response. The third reapplication should provide details of the cytogenetic response after 14-18 months from initiating therapy. All other reapplications should provide details of haematological response, and cytogenetic response if such data is available. Applications to be made and subsequent prescriptions can be written by a haematologist or an oncologist.

Note: Dasatinib is indicated for the treatment of adults with chronic, accelerated or blast phase CML with resistance or intolerance to prior therapy including imatinib.

Guideline on discontinuation of treatment for patients with CML

a) Prescribers should consider discontinuation of treatment if, after 6 months from initiating therapy, a patient did not obtain a haematologic response as defined by any one of the following three levels of response:
   1) complete haematologic response (as characterised by an absolute neutrophil count (ANC) > 1.5 × 10^9/L, platelets > 100 × 10^9/L, absence of peripheral blood (PB) blasts, bone marrow (BM) blasts < 5% (or FISH Ph+ 0-35% metaphases), and absence of extramedullary disease); or
   2) no evidence of leukaemia (as characterised by an absolute neutrophil count (ANC) > 1.0 × 10^9/L, platelets > 20 × 10^9/L, absence of peripheral blood (PB) blasts, bone marrow (BM) blasts < 5% (or FISH Ph+ 0-35% metaphases), and absence of extramedullary disease); or
   3) return to chronic phase (as characterised by BM and PB blasts < 15%, BM and PB blasts and promyelocytes < 30%, PB basophils < 20% and absence of extramedullary disease other than spleen and liver).

b) Prescribers should consider discontinuation of treatment if, after 18 months from initiating therapy, a patient did not obtain a major cytogenetic response defined as 0-35% Ph+ metaphases.

Tab 150 mg ................................................................. 1,146.00 30 ✔ Tarceva

➽ SA1653 Special Authority for Subsidy

Initial application only from a relevant specialist or medical practitioner on the recommendation of a relevant specialist. Approvals valid for 4 months for applications meeting the following criteria:

All of the following:

1. Patient has locally advanced or metastatic, unresectable, non-squamous Non Small Cell Lung Cancer (NSCLC); and
2. There is documentation confirming that the disease expresses activating mutations of EGFR tyrosine kinase; and
3. Either:
   3.1 Patient is treatment naive; or
   3.2 Both:
      3.2.1 The patient has discontinued gefitinib due to intolerance; and
      3.2.2 The cancer did not progress while on gefitinib; and
4. Erlotinib is to be given for a maximum of 3 months.

Renewal only from a relevant specialist or medical practitioner on the recommendation of a relevant specialist. Approvals valid for 6 months where radiological assessment (preferably including CT scan) indicates NSCLC has not progressed.

GEFITINIB – Retail pharmacy-Specialist – Special Authority see SA1654 below

Tab 250 mg ................................................................. 1,700.00 30 ✔ Iressa

➽ SA1654 Special Authority for Subsidy

Initial application only from a relevant specialist or medical practitioner on the recommendation of a relevant specialist. Approvals valid for 4 months for applications meeting the following criteria:

All of the following:

1. Patient has locally advanced, or metastatic, unresectable, non-squamous Non Small Cell Lung Cancer (NSCLC); and
2. Either:
   2.1 Patient is treatment naive; or
   2.2 Both:
      2.2.1 The patient has discontinued erlotinib due to intolerance; and
      2.2.2 The cancer did not progress whilst on erlotinib; and
3. There is documentation confirming that disease expresses activating mutations of EGFR tyrosine kinase; and
4. Gefitinib is to be given for a maximum of 3 months.

Renewal only from a relevant specialist or medical practitioner on the recommendation of a relevant specialist. Approvals valid for 6 months where radiological assessment (preferably including CT scan) indicates NSCLC has not progressed.

IMATINIB MESILATE

Note: Imatinib-AFT is not a registered for the treatment of Gastro Intestinal Stromal Tumours (GIST). The Glivec brand of imatinib mesilate (supplied by Novartis) remains fully subsidised under Special Authority for patients with unresectable and/or metastatic malignant GIST, see SA1460 in Section B of the Pharmaceutical Schedule.

Tab 100 mg – [Xpharm] – Special Authority see SA1460 below

Tab ................................................................. 2,400.00 60 ✔ Glivec
 Cap 100 mg ................................................................. 98.00 60 ✔ Imatinib-AFT
 Cap 400 mg ................................................................. 197.50 30 ✔ Imatinib-AFT

➽ SA1460 Special Authority for Subsidy

Special Authority approved by the CML/GIST Co-ordinator

Notes: Application details may be obtained from PHARMAC’s website http://www.pharmac.govt.nz, and prescriptions should be sent to:

▲ Three months supply may be dispensed at one time if endorsed “certified exemption” by the prescriber or pharmacist.
★ Three months or six months, as applicable, dispensed all-at-once.
Special Authority criteria for GIST – access by application

Funded for patients:

a) With a diagnosis (confirmed by an oncologist) of unresectable and/or metastatic malignant gastrointestinal stromal tumour (GIST).

b) Maximum dose of 400 mg/day.

c) Applications to be made and subsequent prescriptions can be written by an oncologist.

d) Initial and subsequent applications are valid for one year. The re-application criterion is an adequate clinical response to the treatment with imatinib (prescriber determined).

SA1191 Special Authority for Subsidy

Initial application — (metastatic breast cancer) only from a relevant specialist or medical practitioner on the recommendation of a relevant specialist. Approvals valid for 12 months for applications meeting the following criteria:

Either:

1 All of the following:
   1.1 The patient has metastatic breast cancer expressing HER-2 IHC 3+ or ISH+ (including FISH or other current technology); and
   1.2 The patient has not previously received trastuzumab treatment for HER 2 positive metastatic breast cancer; and
   1.3 Lapatinib not to be given in combination with trastuzumab; and
   1.4 Lapatinib to be discontinued at disease progression; or

2 All of the following:
   2.1 The patient has metastatic breast cancer expressing HER-2 IHC 3+ or ISH+ (including FISH or other current technology); and
   2.2 The patient started trastuzumab for metastatic breast cancer but discontinued trastuzumab within 3 months of starting treatment due to intolerance; and
   2.3 The cancer did not progress whilst on trastuzumab; and
   2.4 Lapatinib not to be given in combination with trastuzumab; and
   2.5 Lapatinib to be discontinued at disease progression.

Renewal — (metastatic breast cancer) only from a relevant specialist or medical practitioner on the recommendation of a relevant specialist. Approvals valid for 12 months for applications meeting the following criteria:

All of the following:

1 The patient has metastatic breast cancer expressing HER-2 IHC 3+ or ISH+ (including FISH or other current technology); and
2 The cancer has not progressed at any time point during the previous 12 months whilst on lapatinib; and
3 Lapatinib not to be given in combination with trastuzumab; and
4 Lapatinib to be discontinued at disease progression.

ONCOLOGY AGENTS AND IMMUNOSUPPRESSANTS

SA1489 Special Authority for Subsidy

Initial application only from a haematologist. Approvals valid for 6 months for applications meeting the following criteria:

All of the following:
1. Patient has a diagnosis of chronic myeloid leukaemia (CML) in blast crisis, accelerated phase, or in chronic phase; and
2. Either:
   2.1 Patient has documented CML treatment failure* with imatinib; or
   2.2 Patient has experienced treatment limiting toxicity with imatinib precluding further treatment with imatinib; and
3. Maximum nilotinib dose of 800 mg/day; and
4. Subsidised for use as monotherapy only.

Note: *treatment failure as defined by Leukaemia Net Guidelines.

Renewal only from a haematologist. Approvals valid for 6 months for applications meeting the following criteria:

All of the following:
1. Lack of treatment failure while on nilotinib as defined by Leukaemia Net Guidelines; and
2. Nilotinib treatment remains appropriate and the patient is benefiting from treatment; and
3. Maximum nilotinib dose of 800 mg/day; and
4. Subsidised for use as monotherapy only.

Pazopanib – Special Authority see SA1190 below – Retail pharmacy

Initial application only from a relevant specialist or medical practitioner on the recommendation of a relevant specialist. Approvals valid for 3 months for applications meeting the following criteria:

All of the following:
1. The patient has metastatic renal cell carcinoma; and
2. Any of the following:
   2.1 The patient is treatment naive; or
   2.2 The patient has only received prior cytokine treatment; or
   2.3 Both:
      2.3.1 The patient has discontinued sunitinib within 3 months of starting treatment due to intolerance; and
      2.3.2 The cancer did not progress whilst on sunitinib; and
3. The patient has good performance status (WHO/ECOG grade 0-2); and
4. The disease is of predominant clear cell histology; and
   The patient has intermediate or poor prognosis defined as:
5. Any of the following:
   5.1 Lactate dehydrogenase level > 1.5 times upper limit of normal; or
   5.2 Haemoglobin level < lower limit of normal; or
   5.3 Corrected serum calcium level > 10 mg/dL (2.5 mmol/L); or
   5.4 Interval of < 1 year from original diagnosis to the start of systemic therapy; or
   5.5 Karnofsky performance score of less than or equal to 70; or
   5.6 2 or more sites of organ metastasis; and
6. Pazopanib to be used for a maximum of 3 months.

Renewal only from a relevant specialist or medical practitioner on the recommendation of a relevant specialist. Approvals valid for 3 months for applications meeting the following criteria:

Both:
1. No evidence of disease progression; and
2. The treatment remains appropriate and the patient is benefiting from treatment.

Notes: Pazopanib treatment should be stopped if disease progresses.

Poor prognosis patients are defined as having at least 3 of criteria 5.1-5.6. Intermediate prognosis patients are defined as having 1 or 2 of criteria 5.1-5.6.

**Initial application** — (RCC) only from a relevant specialist or medical practitioner on the recommendation of a relevant specialist. Approvals valid for 3 months for applications meeting the following criteria:

1. The patient has metastatic renal cell carcinoma; and
2. Any of the following:
   2.1. The patient is treatment naive; or
   2.2. The patient has only received prior cytokine treatment; or
   2.3. The patient has only received prior treatment with an investigational agent within the confines of a bona fide clinical trial which has Ethics Committee approval; or
   2.4. Both:
      2.4.1. The patient has discontinued pazopanib within 3 months of starting treatment due to intolerance; and
      2.4.2. The cancer did not progress whilst on pazopanib; and
3. The patient has good performance status (WHO/ECOG grade 0-2); and
4. The disease is of predominant clear cell histology; and
5. The patient has intermediate or poor prognosis defined as:
   5.1. Lactate dehydrogenase level > 1.5 times upper limit of normal; or
   5.2. Haemoglobin level < lower limit of normal; or
   5.3. Corrected serum calcium level > 10 mg/dL (2.5 mmol/L); or
   5.4. Interval of < 1 year from original diagnosis to the start of systemic therapy; or
   5.5. Karnofsky performance score of less than or equal to 70; or
   5.6. 2 or more sites of organ metastasis; and
6. Sunitinib to be used for a maximum of 2 cycles.

**Initial application** — (GIST) only from a relevant specialist or medical practitioner on the recommendation of a relevant specialist.

continued…
continued...
specialist. Approvals valid for 3 months for applications meeting the following criteria:
Both:
1. The patient has unresectable or metastatic malignant gastrointestinal stromal tumour (GIST); and
2. Either:
   2.1 The patient's disease has progressed following treatment with imatinib; or
   2.2 The patient has documented treatment-limiting intolerance, or toxicity to, imatinib.

Renewal — RCC only from a relevant specialist or medical practitioner on the recommendation of a relevant specialist.
Approvals valid for 3 months for applications meeting the following criteria:
Both:
1. No evidence of disease progression; and
2. The treatment remains appropriate and the patient is benefiting from treatment.

Notes: Sunitinib treatment should be stopped if disease progresses.
Poor prognosis patients are defined as having at least 3 of criteria 5.1-5.6. Intermediate prognosis patients are defined as having 1 or 2 of criteria 5.1-5.6

Renewal — GIST only from a relevant specialist or medical practitioner on the recommendation of a relevant specialist.
Approvals valid for 6 months for applications meeting the following criteria:
Both:
The patient has responded to treatment or has stable disease as determined by Choi’s modified CT response evaluation criteria as follows:
1. Any of the following:
   1.1 The patient has had a complete response (disappearance of all lesions and no new lesions); or
   1.2 The patient has had a partial response (a decrease in size of 10% or more or decrease in tumour density in Hounsfield Units (HU) of 15% or more on CT and no new lesions and no obvious progression of non measurable disease); or
   1.3 The patient has stable disease (does not meet criteria the two above) and does not have progressive disease and no symptomatic deterioration attributed to tumour progression; and
2. The treatment remains appropriate and the patient is benefiting from treatment.

Note: It is recommended that response to treatment be assessed using Choi’s modified CT response evaluation criteria (J Clin Oncol, 2007, 25:1753-1759). Progressive disease is defined as either: an increase in tumour size of 10% or more and not meeting criteria of partial response (PR) by tumour density (HU) on CT; or: new lesions, or new intratumoral nodules, or increase in the size of the existing intratumoral nodules.

Initial application only from a medical oncologist, radiation oncologist, urologist or medical practitioner on the recommendation of a medical oncologist, radiation oncologist or urologist. Approvals valid for 6 months for applications meeting the following criteria:
All of the following:

1. Patient has prostate cancer; and
2. Patient has metastases; and
3. Patient's disease is castration resistant; and
4. Either:

continued…
continued...

4.1 All of the following:
   4.1.1 Patient is symptomatic; and
   4.1.2 Patient has disease progression (rising serum PSA) after second line anti-androgen therapy; and
   4.1.3 Patient has ECOG performance score of 0-1; and
   4.1.4 Patient has not had prior treatment with taxane chemotherapy; or

4.2 All of the following:
   4.2.1 Patient's disease has progressed following prior chemotherapy containing a taxane; and
   4.2.2 Patient has ECOG performance score of 0-2; and
   4.2.3 Patient has not had prior treatment with abiraterone.

Renewal — (abiraterone acetate) only from a medical oncologist, radiation oncologist, urologist or medical practitioner on the recommendation of a medical oncologist, radiation oncologist or urologist. Approvals valid for 6 months for applications meeting the following criteria:

All of the following:
   1 Significant decrease in serum PSA from baseline; and
   2 No evidence of clinical disease progression; and
   3 No initiation of taxane chemotherapy with abiraterone; and
   4 The treatment remains appropriate and the patient is benefiting from treatment.

SA1016 Special Authority for Subsidy

Initial application — (Malignant Bowel Obstruction) from any relevant practitioner. Approvals valid for 2 months for applications meeting the following criteria:

All of the following:
   1 The patient has nausea* and vomiting* due to malignant bowel obstruction*; and
   2 Treatment with antiemetics, rehydration, antimuscarinic agents, corticosteroids and analgesics for at least 48 hours has failed; and
   3 Octreotide to be given at a maximum dose 1500 mcg daily for up to 4 weeks.

Note: Indications marked with * are unapproved indications.

Renewal — (Malignant Bowel Obstruction) from any relevant practitioner. Approvals valid for 3 months where the treatment continued...
remains appropriate and the patient is benefiting from treatment.

**Initial application — (Acromegaly)** only from a relevant specialist or medical practitioner on the recommendation of a relevant specialist. Approvals valid for 3 months for applications meeting the following criteria:

Both:
1. The patient has acromegaly; and
2. Any of the following:
   2.1 Treatment with surgery, radiotherapy and a dopamine agonist has failed; or
   2.2 Treatment with octreotide is for an interim period while awaiting the effects of radiotherapy and a dopamine agonist has failed; or
   2.3 The patient is unwilling, or unable, to undergo surgery and/or radiotherapy.

**Renewal — (Acromegaly)** only from a relevant specialist or medical practitioner on the recommendation of a relevant specialist. Approvals valid for 2 years for applications meeting the following criteria:

Both:
1. IGF1 levels have decreased since starting octreotide; and
2. The treatment remains appropriate and the patient is benefiting from treatment.

Note: In patients with Acromegaly octreotide treatment should be discontinued if IGF1 levels have not decreased after 3 months treatment. In patients treated with radiotherapy octreotide treatment should be withdrawn every 2 years, for 1 month, for assessment of remission. Octreotide treatment should be stopped where there is biochemical evidence of remission (normal IGF1 levels) following octreotide treatment withdrawal for at least 4 weeks

**Initial application — (Other Indications)** only from a relevant specialist or medical practitioner on the recommendation of a relevant specialist. Approvals valid for 2 years for applications meeting the following criteria:

Any of the following:
1. VIPomas and Glucagonomas - for patients who are seriously ill in order to improve their clinical state prior to definitive surgery; or
2. Both:
   2.1 Gastrinoma; and
   2.2 Either:
      2.2.1 Patient has failed surgery; or
      2.2.2 Patient in metastatic disease after H2 antagonists (or proton pump inhibitors) have failed; or
3. Both:
   3.1 Insulinomas; and
   3.2 Surgery is contraindicated or has failed; or
4. For pre-operative control of hypoglycaemia and for maintenance therapy; or
5. Both:
   5.1 Carcinoid syndrome (diagnosed by tissue pathology and/or urinary 5HIAA analysis); and
   5.2 Disabling symptoms not controlled by maximal medical therapy.

Note: The use of octreotide in patients with fistulae, oesophageal varices, miscellaneous diarrhoea and hypotension will not be funded as a Special Authority item

**Renewal — (Other Indications)** only from a relevant specialist or medical practitioner on the recommendation of a relevant specialist. Approvals valid for 2 years where the treatment remains appropriate and the patient is benefiting from treatment.

Initial application — (juvenile idiopathic arthritis) only from a named specialist or rheumatologist. Approvals valid for 6 months for applications meeting the following criteria:

Either:

1. Both:
   1.1 The patient has had an initial Special Authority approval for adalimumab for juvenile idiopathic arthritis (JIA); and
   1.2 Either:
      1.2.1 The patient has experienced intolerable side effects from adalimumab; or
      1.2.2 The patient has received insufficient benefit from adalimumab to meet the renewal criteria for adalimumab for JIA; or

2. All of the following:
   2.1 To be used as an adjunct to methotrexate therapy or monotherapy where use of methotrexate is limited by toxicity or intolerance; and
   2.2 Patient diagnosed with Juvenile Idiopathic Arthritis (JIA); and
   2.3 Patient has had severe active polyarticular course JIA for 6 months duration or longer; and
   2.4 Patient has tried and not responded to at least three months of oral or parenteral methotrexate (at a dose of 10-20 mg/m$^2$ weekly or at the maximum tolerated dose) in combination with either oral corticosteroids (prednisone 0.25 mg/kg or at the maximum tolerated dose) or a full trial of serial intra-articular corticosteroid injections; and
   2.5 Both:
      2.5.1 Either:
         2.5.1.1 Patient has persistent symptoms of poorly-controlled and active disease in at least 20 swollen, tender joints; or
         2.5.1.2 Patient has persistent symptoms of poorly-controlled and active disease in at least four joints from the following: wrist, elbow, knee, ankle, shoulder, cervical spine, hip; and

continued…
continued...

2.5.2 Physician's global assessment indicating severe disease.

**Initial application — (rheumatoid arthritis)** only from a rheumatologist. Approvals valid for 6 months for applications meeting the following criteria:
Either:

1. **Both:**
   1.1 The patient has had an initial Special Authority approval for adalimumab for rheumatoid arthritis; and
   1.2 Either:
      1.2.1 The patient has experienced intolerable side effects from adalimumab; or
      1.2.2 The patient has received insufficient benefit from adalimumab to meet the renewal criteria for adalimumab for rheumatoid arthritis; or

2. **All of the following:**
   2.1 Patient has had severe and active erosive rheumatoid arthritis (either confirmed by radiology imaging, or the patient is cyclic citrullinated peptide (CCP) antibody positive) for six months duration or longer; and
   2.2 Treatment is to be used as an adjunct to methotrexate therapy or monotherapy where use of methotrexate is limited by toxicity or intolerance; and
   2.3 Patient has tried and not responded to at least three months of oral or parenteral methotrexate at a dose of at least 20 mg weekly or a maximum tolerated dose; and
   2.4 Patient has tried and not responded to at least three months of oral or parenteral methotrexate in combination with sulfasalazine and hydroxychloroquine sulphate (at maximum tolerated doses); and
   2.5 Any of the following:
      2.5.1 Patient has tried and not responded to at least three months of oral or parenteral methotrexate in combination with the maximum tolerated dose of ciclosporin; or
      2.5.2 Patient has tried and not responded to at least three months of oral or parenteral methotrexate in combination with intramuscular gold; or
      2.5.3 Patient has tried and not responded to at least three months of therapy at the maximum tolerated dose of leflunomide alone or in combination with oral or parenteral methotrexate; and
   2.6 Either:
      2.6.1 Patient has persistent symptoms of poorly controlled and active disease in at least 20 swollen, tender joints; or
      2.6.2 Patient has persistent symptoms of poorly controlled and active disease in at least four joints from the following: wrist, elbow, knee, ankle, and either shoulder or hip; and

2.7 Either:
   2.7.1 Patient has a C-reactive protein level greater than 15 mg/L measured no more than one month prior to the date of this application; or
   2.7.2 C-reactive protein levels not measured as patient is currently receiving prednisone therapy at a dose of greater than 5 mg per day and has done so for more than three months.

**Initial application — (severe chronic plaque psoriasis)** only from a dermatologist. Approvals valid for 4 months for applications meeting the following criteria:
Either:

1. **Both:**
   1.1 The patient has had an initial Special Authority approval for adalimumab for severe chronic plaque psoriasis; and
   1.2 Either:
      1.2.1 The patient has experienced intolerable side effects from adalimumab; or
      1.2.2 The patient has received insufficient benefit from adalimumab to meet the renewal criteria for adalimumab for severe chronic plaque psoriasis; or

2. **All of the following:**
   2.1 Either:

continued…
continued...

2.1.1 Patient has "whole body" severe chronic plaque psoriasis with a Psoriasis Area and Severity Index (PASI) score of greater than 15, where lesions have been present for at least 6 months from the time of initial diagnosis; or

2.1.2 Patient has severe chronic plaque psoriasis of the face, or palm of a hand or sole of a foot, where the plaques or plaques have been present for at least 6 months from the time of initial diagnosis; and

2.2 Patient has tried, but had an inadequate response (see Note) to, or has experienced intolerable side effects from, at least three of the following (at maximum tolerated doses unless contraindicated): phototherapy, methotrexate, ciclosporin, or acitretin; and

2.3 A PASI assessment has been completed for at least the most recent prior treatment course (but preferably all prior treatment courses), preferably while still on treatment but no longer than 1 month following cessation of each prior treatment course; and

2.4 The most recent PASI assessment is no more than 1 month old at the time of application.

Note: "Inadequate response" is defined as: for whole body severe chronic plaque psoriasis, a PASI score of greater than 15, as assessed preferably while still on treatment but no longer than 1 month following cessation of the most recent prior treatment; for severe chronic plaque psoriasis of the face, hand or foot, at least 2 of the 3 PASI symptom subscores for erythema, thickness and scaling are rated as severe or very severe, and the skin area affected is 30% or more of the face, palm of a hand or sole of a foot, as assessed preferably while still on treatment but no longer than 1 month following cessation of the most recent prior treatment.

Initial application — (ankylosing spondylitis) only from a rheumatologist. Approvals valid for 6 months for applications meeting the following criteria:

Either:

1 Both:
   1.1 The patient has had an initial Special Authority approval for adalimumab for ankylosing spondylitis; and
   1.2 Either:
      1.2.1 The patient has experienced intolerable side effects from adalimumab; or
      1.2.2 The patient has received insufficient benefit from adalimumab to meet the renewal criteria for adalimumab for ankylosing spondylitis; or

2 All of the following:
   2.1 Patient has a confirmed diagnosis of ankylosing spondylitis present for more than six months; and
   2.2 Patient has low back pain and stiffness that is relieved by exercise but not by rest; and
   2.3 Patient has bilateral sacroiliitis demonstrated by plain radiographs, CT or MRI scan; and
   2.4 Patient's ankylosing spondylitis has not responded adequately to treatment with two or more non-steroidal anti-inflammatory drugs (NSAIDs), in combination with anti-ulcer therapy if indicated, while patient was undergoing at least 3 months of a regular exercise regimen for ankylosing spondylitis; and

2.5 Either:
   2.5.1 Patient has limitation of motion of the lumbar spine in the sagittal and the frontal planes as determined by the following Bath Ankylosing Spondylitis Metrology Index (BASMI) measures: a modified Schober's test of less than or equal to 4 cm and lumbar side flexion measurement of less than or equal to 10 cm (mean of left and right); or
   2.5.2 Patient has limitation of chest expansion by at least 2.5 cm below the average normal values corrected for age and gender (see Notes); and

2.6 A Bath Ankylosing Spondylitis Disease Activity Index (BASDAI) of at least 6 on a 0-10 scale.

Notes: The BASDAI must have been determined at the completion of the 3 month exercise trial, but prior to ceasing NSAID treatment. The BASDAI measure must be no more than 1 month old at the time of initial application.

Average normal chest expansion corrected for age and gender:
18-24 years - Male: 7.0 cm; Female: 5.5 cm
25-34 years - Male: 7.5 cm; Female: 5.5 cm
35-44 years - Male: 6.5 cm; Female: 4.5 cm

Initial application — (psoriatic arthritis) only from a rheumatologist. Approvals valid for 6 months for applications meeting the following criteria:

Either:

1. Both:
   1.1 The patient has had an initial Special Authority approval for adalimumab for psoriatic arthritis; and
   1.2 Either:
      1.2.1 The patient has experienced intolerable side effects from adalimumab; or
      1.2.2 The patient has received insufficient benefit from adalimumab to meet the renewal criteria for adalimumab for psoriatic arthritis; or

2. All of the following:
   2.1 Patient has had severe active psoriatic arthritis for six months duration or longer; and
   2.2 Patient has tried and not responded to at least three months of oral or parenteral methotrexate at a dose of at least 20 mg weekly or a maximum tolerated dose; and
   2.3 Patient has tried and not responded to at least three months of sulfasalazine at a dose of at least 2 g per day or leflunomide at a dose of up to 20 mg daily (or maximum tolerated doses); and
   2.4 Either:
      2.4.1 Patient has persistent symptoms of poorly controlled and active disease in at least 15 swollen, tender joints; or
      2.4.2 Patient has persistent symptoms of poorly controlled and active disease in at least four joints from the following: wrist, elbow, knee, ankle, and either shoulder or hip; and
   2.5 Any of the following:
      2.5.1 Patient has a C-reactive protein level greater than 15 mg/L measured no more than one month prior to the date of this application; or
      2.5.2 Patient has an elevated erythrocyte sedimentation rate (ESR) greater than 25 mm per hour; or
      2.5.3 ESR and CRP not measured as patient is currently receiving prednisone therapy at a dose of greater than 5 mg per day and has done so for more than three months.

Initial application — (pyoderma gangrenosum) only from a dermatologist. Approvals valid for 4 months for applications meeting the following criteria:

All of the following:

1. Patient has pyoderma gangrenosum*; and
2. Patient has received three months of conventional therapy including a minimum of three pharmaceuticals (e.g. prednisone, ciclosporine, azathioprine, or methotrexate) and not received an adequate response; and
3. A maximum of 4 doses.

Note: Indications marked with * are unapproved indications.

Initial application — (adult-onset Still's disease) only from a rheumatologist. Approvals valid for 6 months for applications meeting the following criteria:

Either:

1. Both:
   1.1 Either:
      1.1.1 The patient has had an initial Special Authority approval for adalimumab for adult-onset Still's disease (AOSD); or
      1.1.2 The patient has been started on tocilizumab for AOSD in a DHB hospital in accordance with the HML rules; and

Three months supply may be dispensed at one time if endorsed "certified exemption" by the prescriber or pharmacist.

*Three months or six months, as applicable, dispensed all-at-once
continued…

1.2 Either:
   1.2.1 The patient has experienced intolerable side effects from adalimumab and/or tocilizumab; or
   1.2.2 The patient has received insufficient benefit from at least a three-month trial of adalimumab and/or
tocilizumab such that they do not meet the renewal criteria for AOSD; or

2 All of the following:
   2.1 Patient diagnosed with AOSD according to the Yamaguchi criteria (J Rheumatol 1992;19:424-430); and
   2.2 Patient has tried and not responded to at least 6 months of glucocorticosteroids at a dose of at least 0.5 mg/kg,
non-steroidal anti-inflammatory drugs (NSAIDs) and methotrexate; and
   2.3 Patient has persistent symptoms of disabling poorly controlled and active disease.

Renewal — (juvenile idiopathic arthritis) only from a named specialist, rheumatologist or Practitioner on the recommendation
of a named specialist or rheumatologist. Approvals valid for 6 months for applications meeting the following criteria:
All of the following:
   1 Either:
      1.1 Applicant is a named specialist or rheumatologist; or
      1.2 Applicant is a Practitioner and confirms that a named specialist or rheumatologist has provided a letter, email or fax
      recommending that the patient continues with etanercept treatment; and
   2 Subsidised as an adjunct to methotrexate therapy or monotherapy where use of methotrexate is limited by toxicity or
      intolerance; and
   3 Either:
      3.1 Following 3 to 4 months' initial treatment, the patient has at least a 50% decrease in active joint count and an
      improvement in physician's global assessment from baseline; or
      3.2 On subsequent reapplications, the patient demonstrates at least a continuing 30% improvement in active joint
      count and continued improvement in physician's global assessment from baseline.

Renewal — (rheumatoid arthritis) only from a rheumatologist or Practitioner on the recommendation of a rheumatologist.
Approvals valid for 6 months for applications meeting the following criteria:
All of the following:
   1 Either:
      1.1 Applicant is a rheumatologist; or
      1.2 Applicant is a Practitioner and confirms that a rheumatologist has provided a letter, email or fax recommending that
      the patient continues with etanercept treatment; and
   2 Treatment is to be used as an adjunct to methotrexate therapy or monotherapy where use of methotrexate is limited by
toxicity or intolerance; and
   3 Either:
      3.1 Following 3 to 4 months' initial treatment, the patient has at least a 50% decrease in active joint count from baseline
      and a clinically significant response to treatment in the opinion of the physician; or
      3.2 On subsequent reapplications, the patient demonstrates at least a continuing 30% improvement in active joint
      count from baseline and a clinically significant response to treatment in the opinion of the physician; and
   4 Etanercept to be administered at doses no greater than 50 mg every 7 days.

Renewal — (severe chronic plaque psoriasis) only from a dermatologist or Practitioner on the recommendation of a
dermatologist. Approvals valid for 6 months for applications meeting the following criteria:
All of the following:
   1 Either:
      1.1 Applicant is a dermatologist; or
      1.2 Applicant is a Practitioner and confirms that a dermatologist has provided a letter, email or fax recommending that
      the patient continues with etanercept treatment; and
   2 Either:
      2.1 Both:
continued...

2.1.1 Patient had "whole body" severe chronic plaque psoriasis at the start of treatment; and
2.1.2 Following each prior etanercept treatment course the patient has a PASI score which is reduced by 75% or more, or is sustained at this level, when compared with the pre-treatment baseline value; or

2.2 Both:
2.2.1 Patient had severe chronic plaque psoriasis of the face, or palm of a hand or sole of a foot at the start of treatment; and
2.2.2 Either:
   2.2.2.1 Following each prior etanercept treatment course the patient has a reduction in the PASI symptom subscores for all 3 of erythema, thickness and scaling, to slight or better, or sustained at this level, as compared to the treatment course baseline values; or
   2.2.2.2 Following each prior etanercept treatment course the patient has a reduction of 75% or more in the skin area affected, or sustained at this level, as compared to the pre-treatment baseline value; and

3 Etanercept to be administered at doses no greater than 50 mg every 7 days.

Note: A treatment course is defined as a minimum of 12 weeks of etanercept treatment

Renewal — (ankylosing spondylitis) only from a rheumatologist or Practitioner on the recommendation of a rheumatologist.
Approvals valid for 6 months for applications meeting the following criteria:
All of the following:
1 Either:
   1.1 Applicant is a rheumatologist; or
   1.2 Applicant is a Practitioner and confirms that a rheumatologist has provided a letter, email or fax recommending that the patient continues with etanercept treatment; and
2 Following 12 weeks' initial treatment and for subsequent renewals, treatment has resulted in an improvement in BASDAI of 4 or more points from pre-treatment baseline on a 10 point scale, or an improvement in BASDAI of 50%, whichever is less; and
3 Physician considers that the patient has benefited from treatment and that continued treatment is appropriate; and
4 Etanercept to be administered at doses no greater than 50 mg every 7 days.

Renewal — (psoriatic arthritis) only from a rheumatologist or Practitioner on the recommendation of a rheumatologist.
Approvals valid for 6 months for applications meeting the following criteria:
All of the following:
1 Either:
   1.1 Applicant is a rheumatologist; or
   1.2 Applicant is a Practitioner and confirms that a rheumatologist has provided a letter, email or fax recommending that the patient continues with etanercept treatment; and
2 Either:
   2.1 Following 3 to 4 months' initial treatment, the patient has at least a 50% decrease in active joint count from baseline and a clinically significant response to treatment in the opinion of the physician; or
   2.2 The patient demonstrates at least a continuing 30% improvement in active joint count from baseline and a clinically significant response to prior etanercept treatment in the opinion of the treating physician; and
3 Etanercept to be administered at doses no greater than 50 mg every 7 days.

Renewal — (pyoderma gangrenosum) only from a dermatologist or Practitioner on the recommendation of a dermatologist.
Approvals valid for 4 months for applications meeting the following criteria:
All of the following:
1 Patient has shown clinical improvement; and
2 Patient continues to require treatment; and
3 A maximum of 4 doses.

Renewal — (adult-onset Still’s disease) only from a rheumatologist or Practitioner on the recommendation of a rheumatologist.
Approvals valid for 6 months for applications meeting the following criteria:

Special Authority for Subsidy

Initial application — (rheumatoid arthritis) only from a rheumatologist. Approvals valid for 6 months for applications meeting the following criteria:

Either:

1 Both:
   1.1 The patient has had an initial Special Authority approval for etanercept for rheumatoid arthritis; and
   1.2 Either:
      1.2.1 The patient has experienced intolerable side effects from etanercept; or
      1.2.2 The patient has received insufficient benefit from etanercept to meet the renewal criteria for etanercept for rheumatoid arthritis; or

2 All of the following:
   2.1 Patient has had severe and active erosive rheumatoid arthritis (either confirmed by radiology imaging, or the patient is cyclic citrullinated peptide (CCP) antibody positive) for six months duration or longer; and
   2.2 Treatment is to be used as an adjunct to methotrexate therapy or monotherapy where use of methotrexate is limited by toxicity or intolerance; and
   2.3 Patient has tried and not responded to at least three months of oral or parenteral methotrexate at a dose of at least 20 mg weekly or a maximum tolerated dose; and
   2.4 Patient has tried and not responded to at least three months of oral or parenteral methotrexate in combination with sulfasalazine and hydroxychloroquine sulphate (at maximum tolerated doses); and
   2.5 Any of the following:
      2.5.1 Patient has tried and not responded to at least three months of oral or parenteral methotrexate in combination with the maximum tolerated dose of ciclosporin; or
      2.5.2 Patient has tried and not responded to at least three months of oral or parenteral methotrexate in combination with intramuscular gold; or

continued…
2.5.3 Patient has tried and not responded to at least three months of therapy at the maximum tolerated dose of leflunomide alone or in combination with oral or parenteral methotrexate; and

2.6 Either:

2.6.1 Patient has persistent symptoms of poorly controlled and active disease in at least 20 swollen, tender joints; or

2.6.2 Patient has persistent symptoms of poorly controlled and active disease in at least four joints from the following: wrist, elbow, knee, ankle, and either shoulder or hip; and

2.7 Either:

2.7.1 Patient has a C-reactive protein level greater than 15 mg/L measured no more than one month prior to the date of this application; or

2.7.2 C-reactive protein levels not measured as patient is currently receiving prednisone therapy at a dose of greater than 5 mg per day and has done so for more than three months.

Initial application — (Crohn's disease - adults) only from a gastroenterologist. Approvals valid for 3 months for applications meeting the following criteria:

All of the following:

1 Patient has severe active Crohn's disease; and

2 Any of the following:

2.1 Patient has a Crohn's Disease Activity Index (CDAI) score of greater than or equal to 300; or

2.2 Patient has extensive small intestine disease affecting more than 50 cm of the small intestine; or

2.3 Patient has evidence of short gut syndrome or would be at risk of short gut syndrome with further bowel resection; or

2.4 Patient has an ileostomy or colostomy, and has intestinal inflammation; and

3 Patient has tried but had an inadequate response to, or has experienced intolerable side effects from, prior systemic therapy with immunomodulators at maximum tolerated doses (unless contraindicated) and corticosteroids; and

4 Surgery (or further surgery) is considered to be clinically inappropriate.

Initial application — (Crohn's disease - children) only from a gastroenterologist. Approvals valid for 3 months for applications meeting the following criteria:

All of the following:

1 Paediatric patient has severe active Crohn's disease; and

2 Either:

2.1 Patient has a Paediatric Crohn's Disease Activity Index (PCDAI) score of greater than or equal to 30; or

2.2 Patient has extensive small intestine disease; and

3 Patient has tried but had an inadequate response to, or has experienced intolerable side effects from, prior systemic therapy with immunomodulators at maximum tolerated doses (unless contraindicated) and corticosteroids; and

4 Surgery (or further surgery) is considered to be clinically inappropriate.

Initial application — (severe chronic plaque psoriasis) only from a dermatologist. Approvals valid for 4 months for applications meeting the following criteria:

Either:

1 Both:

1.1 The patient has had an initial Special Authority approval for etanercept for severe chronic plaque psoriasis; and

1.2 Either:

1.2.1 The patient has experienced intolerable side effects from etanercept; or

1.2.2 The patient has received insufficient benefit from etanercept to meet the renewal criteria for etanercept for severe chronic plaque psoriasis; or

2 All of the following:

2.1 Either:

continued…
2.1.1 Patient has "whole body" severe chronic plaque psoriasis with a Psoriasis Area and Severity Index (PASI) score of greater than 15, where lesions have been present for at least 6 months from the time of initial diagnosis; or

2.1.2 Patient has severe chronic plaque psoriasis of the face, or palm of a hand or sole of a foot, where the plaque or plaques have been present for at least 6 months from the time of initial diagnosis; and

2.2 Patient has tried, but had an inadequate response (see Note) to, or has experienced intolerable side effects from, at least three of the following (at maximum tolerated doses unless contraindicated): phototherapy, methotrexate, ciclosporin, or acitretin; and

2.3 A PASI assessment has been completed for at least the most recent prior treatment course (but preferably all prior treatment courses), preferably while still on treatment but no longer than 1 month following cessation of each prior treatment course; and

2.4 The most recent PASI assessment is no more than 1 month old at the time of application.

Note: "Inadequate response" is defined as: for whole body severe chronic plaque psoriasis, a PASI score of greater than 15, as assessed preferably while still on treatment but no longer than 1 month following cessation of the most recent prior treatment; for severe chronic plaque psoriasis of the face, hand or foot, at least 2 of the 3 PASI symptom subscores for erythema, thickness and scaling are rated as severe or very severe, and the skin area affected is 30% or more of the face, palm of a hand or sole of a foot, as assessed preferably while still on treatment but no longer than 1 month following cessation of the most recent prior treatment.

Initial application — (ankylosing spondylitis) only from a rheumatologist. Approvals valid for 6 months for applications meeting the following criteria:

Either:

1 Both:
   1.1 The patient has had an initial Special Authority approval for etanercept for ankylosing spondylitis; and
   1.2 Either:
      1.2.1 The patient has experienced intolerable side effects from etanercept; or
      1.2.2 The patient has received insufficient benefit from etanercept to meet the renewal criteria for etanercept for ankylosing spondylitis; or

2 All of the following:
   2.1 Patient has a confirmed diagnosis of ankylosing spondylitis for more than six months; and
   2.2 Patient has low back pain and stiffness that is relieved by exercise but not by rest; and
   2.3 Patient has bilateral sacroiliitis demonstrated by plain radiographs, CT or MRI scan; and
   2.4 Patient's ankylosing spondylitis has not responded adequately to treatment with two or more non-steroidal anti-inflammatory drugs (NSAIDs), in combination with anti-ulcer therapy if indicated, while patient was undergoing at least 3 months of a regular exercise regimen for ankylosing spondylitis; and
   2.5 Either:
      2.5.1 Patient has limitation of motion of the lumbar spine in the sagittal and the frontal planes as determined by the following Bath Ankylosing Spondylitis Metrology Index (BASMI) measures: a modified Schober's test of less than or equal to 4 cm and lumbar side flexion measurement of less than or equal to 10 cm (mean of left and right); or
      2.5.2 Patient has limited chest expansion by at least 2.5 cm below the following average normal values corrected for age and gender (see Notes); and
   2.6 A Bath Ankylosing Spondylitis Disease Activity Index (BASDAI) of at least 6 on a 0-10 scale.

Notes: The BASDAI must have been determined at the completion of the 3 month exercise trial, but prior to ceasing NSAID treatment. The BASDAI measure must be no more than 1 month old at the time of initial application.

Average normal chest expansion corrected for age and gender:
18-24 years - Male: 7.0 cm; Female: 5.5 cm
25-34 years - Male: 7.5 cm; Female: 5.5 cm
35-44 years - Male: 6.5 cm; Female: 4.5 cm

Initial application — (psoriatic arthritis) only from a rheumatologist. Approvals valid for 6 months for applications meeting the following criteria:

Either:

1. Both:
   1.1 The patient has had an initial Special Authority approval for etanercept for psoriatic arthritis; and
   1.2 Either:
      1.2.1 The patient has experienced intolerable side effects from etanercept; or
      1.2.2 The patient has received insufficient benefit from etanercept to meet the renewal criteria for etanercept for psoriatic arthritis; or

2. All of the following:
   2.1 Patient has had severe active psoriatic arthritis for six months duration or longer; and
   2.2 Patient has tried and not responded to at least three months of oral or parenteral methotrexate at a dose of at least 20 mg weekly or a maximum tolerated dose; and
   2.3 Patient has tried and not responded to at least three months of sulfasalazine at a dose of at least 2 g per day or leflunomide at a dose of up to 20 mg daily (or maximum tolerated doses); and
   2.4 Either:
      2.4.1 Patient has persistent symptoms of poorly controlled and active disease in at least 15 swollen, tender joints; or
      2.4.2 Patient has persistent symptoms of poorly controlled and active disease in at least four joints from the following: wrist, elbow, knee, ankle, and either shoulder or hip; and

2.5 Any of the following:
   2.5.1 Patient has a C-reactive protein level greater than 15 mg/L measured no more than one month prior to the date of this application; or
   2.5.2 Patient has an elevated erythrocyte sedimentation rate (ESR) greater than 25 mm per hour; or
   2.5.3 ESR and CRP not measured as patient is currently receiving prednisone therapy at a dose of greater than 5 mg per day and has done so for more than three months.

Initial application — (juvenile idiopathic arthritis) only from a named specialist or rheumatologist. Approvals valid for 6 months for applications meeting the following criteria:

Either:

1. Both:
   1.1 The patient has had an initial Special Authority approval for etanercept for juvenile idiopathic arthritis (JIA); and
   1.2 Either:
      1.2.1 The patient has experienced intolerable side effects from etanercept; or
      1.2.2 The patient has received insufficient benefit from etanercept to meet the renewal criteria for etanercept for juvenile idiopathic arthritis; or

2. All of the following:
   2.1 To be used as an adjunct to methotrexate therapy or monotherapy where use of methotrexate is limited by toxicity or intolerance; and
   2.2 Patient diagnosed with JIA; and
   2.3 Patient has had severe active polyarticular course JIA for 6 months duration or longer; and
   2.4 Patient has tried and not responded to at least three months of oral or parenteral methotrexate (at a dose of 10-20 mg/m^2 weekly or at the maximum tolerated dose) in combination with either oral corticosteroids (prednisone 0.25 mg/kg or at the maximum tolerated dose) or a full trial of serial intra-articular corticosteroid injections; and

continued...

2.5 Both:

2.5.1 Either:

2.5.1.1 Patient has persistent symptoms of poorly-controlled and active disease in at least 20 swollen, tender joints; or

2.5.1.2 Patient has persistent symptoms of poorly-controlled and active disease in at least four joints from the following: wrist, elbow, knee, ankle, shoulder, cervical spine, hip; and

2.5.2 Physician’s global assessment indicating severe disease.

Initial application — (fistulising Crohn’s disease) only from a gastroenterologist. Approvals valid for 6 months for applications meeting the following criteria:

All of the following:

1 Patient has confirmed Crohn’s disease; and

2 Either:

2.1 Patient has one or more complex externally draining enterocutaneous fistula(e); or

2.2 Patient has one or more rectovaginal fistula(e); and

3 A Baseline Fistula Assessment has been completed and is no more than 1 month old at the time of application; and

4 The patient will be assessed for response to treatment after 4 months’ adalimumab treatment (see Note).

Note: A maximum of 4 months’ adalimumab will be subsidised on an initial Special Authority approval for fistulising Crohn’s disease.

Initial application — (pyoderma gangrenosum) only from a dermatologist. Approvals valid for 4 months for applications meeting the following criteria:

All of the following:

1 Patient has pyoderma gangrenosum*; and

2 Patient has received three months of conventional therapy including a minimum of three pharmaceuticals (e.g. prednisone, ciclosporin, azathioprine, or methotrexate) and not received an adequate response; and

3 A maximum of 4 doses.

Note: Indications marked with * are unapproved indications.

Initial application — (adult-onset Still’s disease) only from a rheumatologist. Approvals valid for 6 months for applications meeting the following criteria:

Either:

1 Both:

1.1 Either:

1.1.1 The patient has had an initial Special Authority approval for etanercept for adult-onset Still’s disease (AOSD); or

1.1.2 The patient has been started on tocilizumab for AOSD in a DHB hospital in accordance with the HML rules; and

1.2 Either:

1.2.1 The patient has experienced intolerable side effects from etanercept and/or tocilizumab; or

1.2.2 The patient has received insufficient benefit from at least a three-month trial of etanercept and/or tocilizumab such that they do not meet the renewal criteria for AOSD; or

2 All of the following:

2.1 Patient diagnosed with AOSD according to the Yamaguchi criteria (J Rheumatol 1992;19:424-430); and

2.2 Patient has tried and not responded to at least 6 months of glucocorticosteroids at a dose of at least 0.5 mg/kg, non-steroidal anti-inflammatory drugs (NSAIDs) and methotrexate; and

2.3 Patient has persistent symptoms of disabling poorly controlled and active disease.

Renewal — (rheumatoid arthritis) only from a rheumatologist or Practitioner on the recommendation of a rheumatologist. Approvals valid for 6 months for applications meeting the following criteria:

All of the following:

continued...
continued...

1 Either:
   1.1 Applicant is a rheumatologist; or
   1.2 Applicant is a Practitioner and confirms that a rheumatologist has provided a letter, email or fax recommending that the patient continues with adalimumab treatment; and

2 Treatment is to be used as an adjunct to methotrexate therapy or monotherapy where use of methotrexate is limited by toxicity or intolerance; and

3 Either:
   3.1 Following 3 to 4 months' initial treatment, the patient has at least a 50% decrease in active joint count from baseline and a clinically significant response to treatment in the opinion of the physician; or
   3.2 On subsequent reapplications, the patient demonstrates at least a continuing 30% improvement in active joint count from baseline and a clinically significant response to treatment in the opinion of the physician; and

4 Either:
   4.1 Adalimumab to be administered at doses no greater than 40 mg every 14 days; or
   4.2 Patient cannot take concomitant methotrexate and requires doses of adalimumab higher than 40 mg every 14 days to maintain an adequate response.

Renewal — (Crohn's disease - adults) only from a gastroenterologist or Practitioner on the recommendation of a gastroenterologist. Approvals valid for 6 months for applications meeting the following criteria:
All of the following:

1 Either:
   1.1 Applicant is a gastroenterologist; or
   1.2 Applicant is a Practitioner and confirms that a gastroenterologist has provided a letter, email or fax recommending that the patient continues with adalimumab treatment; and

2 Either:
   2.1 Either:
      2.1.1 CDAI score has reduced by 100 points from the CDAI score when the patient was initiated on adalimumab; or
      2.1.2 CDAI score is 150 or less; or
   2.2 Both:
      2.2.1 The patient has demonstrated an adequate response to treatment but CDAI score cannot be assessed; and
      2.2.2 Applicant to indicate the reason that CDAI score cannot be assessed; and

3 Adalimumab to be administered at doses no greater than 40 mg every 14 days.

Renewal — (Crohn's disease - children) only from a gastroenterologist or Practitioner on the recommendation of a gastroenterologist. Approvals valid for 6 months for applications meeting the following criteria:
All of the following:

1 Either:
   1.1 Applicant is a gastroenterologist; or
   1.2 Applicant is a Practitioner and confirms that a gastroenterologist has provided a letter, email or fax recommending that the patient continues with adalimumab treatment; and

2 Either:
   2.1 Either:
      2.1.1 PCDAI score has reduced by 10 points from the PCDAI score when the patient was initiated on adalimumab; or
      2.1.2 PCDAI score is 15 or less; or
   2.2 Both:
      2.2.1 The patient has demonstrated an adequate response to treatment but PCDAI score cannot be assessed; and

continued…
continued...

2.2.2 Applicant to indicate the reason that PCDAI score cannot be assessed; and

3 Adalimumab to be administered at doses no greater than 40 mg every 14 days.

Renewal — (severe chronic plaque psoriasis) only from a dermatologist or Practitioner on the recommendation of a dermatologist. Approvals valid for 6 months for applications meeting the following criteria:

All of the following:

1 Either:
   1.1 Applicant is a dermatologist; or
   1.2 Applicant is a Practitioner and confirms that a dermatologist has provided a letter, email or fax recommending that the patient continues with adalimumab treatment; and

2 Either:
   2.1 Both:
      2.1.1 Patient had "whole body" severe chronic plaque psoriasis at the start of treatment; and
      2.1.2 Following each prior adalimumab treatment course the patient has a PASI score which is reduced by 75% or more, or is sustained at this level, when compared with the pre-adalimumab treatment baseline value; or

2.2 Both:
   2.2.1 Patient had severe chronic plaque psoriasis of the face, or palm of a hand or sole of a foot at the start of treatment; and
   2.2.2 Either:
      2.2.2.1 Following each prior adalimumab treatment course the patient has a reduction in the PASI symptom subscores for all 3 of erythema, thickness and scaling, to slight or better, or sustained at this level, as compared to the treatment course baseline values; or
      2.2.2.2 Following each prior adalimumab treatment course the patient has a reduction of 75% or more in the skin area affected, or sustained at this level, as compared to the pre-adalimumab treatment baseline value; and

3 Adalimumab to be administered at doses no greater than 40 mg every 14 days.

Note: A treatment course is defined as a minimum of 12 weeks adalimumab treatment

Renewal — (ankylosing spondylitis) only from a rheumatologist or Practitioner on the recommendation of a rheumatologist. Approvals valid for 6 months for applications meeting the following criteria:

All of the following:

1 Either:
   1.1 Applicant is a rheumatologist; or
   1.2 Applicant is a Practitioner and confirms that a rheumatologist has provided a letter, email or fax recommending that the patient continues with adalimumab treatment; and

2 Following 12 weeks’ initial treatment and for subsequent renewals, treatment has resulted in an improvement in BASDAI of 4 or more points from pre-treatment baseline on a 10 point scale, or an improvement in BASDAI of 50%, whichever is less; and

3 Physician considers that the patient has benefited from treatment and that continued treatment is appropriate; and

4 Adalimumab to be administered at doses no greater than 40 mg every 14 days.

Renewal — (psoriatic arthritis) only from a rheumatologist or Practitioner on the recommendation of a rheumatologist. Approvals valid for 6 months for applications meeting the following criteria:

All of the following:

1 Either:
   1.1 Applicant is a rheumatologist; or
   1.2 Applicant is a Practitioner and confirms that a rheumatologist has provided a letter, email or fax recommending that the patient continues with adalimumab treatment; and

2 Either:
   continued…
continued...

2.1 Following 3 to 4 months’ initial treatment, the patient has at least a 50% decrease in active joint count from baseline and a clinically significant response to treatment in the opinion of the physician; or

2.2 The patient demonstrates at least a continuing 30% improvement in active joint count from baseline and a clinically significant response to prior adalimumab treatment in the opinion of the treating physician; and

3 Adalimumab to be administered at doses no greater than 40 mg every 14 days.

Renewal — (juvenile idiopathic arthritis) only from a named specialist, rheumatologist or Practitioner on the recommendation of a named specialist or rheumatologist. Approvals valid for 6 months for applications meeting the following criteria:
All of the following:

1 Either:
   1.1 Applicant is a named specialist or rheumatologist; or
   1.2 Applicant is a Practitioner and confirms that a named specialist or rheumatologist has provided a letter, email or fax recommending that the patient continues with adalimumab treatment; and

2 Subsidised as an adjunct to methotrexate therapy or monotherapy where use of methotrexate is limited by toxicity or intolerance; and

3 Either:
   3.1 Following 3 to 4 months’ initial treatment, the patient has at least a 50% decrease in active joint count and an improvement in physician’s global assessment from baseline; or
   3.2 On subsequent reapplications, the patient demonstrates at least a continuing 30% improvement in active joint count and continued improvement in physician’s global assessment from baseline.

Renewal — (fistulising Crohn’s disease) only from a gastroenterologist or Practitioner on the recommendation of a gastroenterologist. Approvals valid for 6 months for applications meeting the following criteria:
Both:

1 Either:
   1.1 Applicant is a gastroenterologist; or
   1.2 Applicant is a Practitioner and confirms that a gastroenterologist has provided a letter, email or fax recommending that the patient continues with adalimumab treatment; and

2 Either:
   2.1 The number of open draining fistulae have decreased from baseline by at least 50%; or
   2.2 There has been a marked reduction in drainage of all fistula(e) from baseline as demonstrated by a reduction in the Fistula Assessment score, together with less induration and patient-reported pain.

Renewal — (pyoderma gangrenosum) only from a dermatologist or Practitioner on the recommendation of a dermatologist. Approvals valid for 4 months for applications meeting the following criteria:
All of the following:

1 Patient has shown clinical improvement; and
2 Patient continues to require treatment; and
3 A maximum of 4 doses.

Renewal — (adult-onset Still’s disease) only from a rheumatologist or Practitioner on the recommendation of a rheumatologist. Approvals valid for 6 months for applications meeting the following criteria:
Both:

1 Either:
   1.1 Applicant is a rheumatologist; or
   1.2 Applicant is a Practitioner and confirms that a rheumatologist has provided a letter, email or fax recommending that the patient continues with adalimumab treatment; and

2 The patient has a sustained improvement in inflammatory markers and functional status.

### Special Authority for Subsidy

**Initial application — (wet age related macular degeneration)** only from an ophthalmologist. Approvals valid for 3 months for applications meeting the following criteria:

Either:

1. **All of the following:**
   1.1 **Any of the following:**
      1.1.1 Wet age-related macular degeneration (wet AMD); or
      1.1.2 Polypoidal choroidal vasculopathy; or
      1.1.3 Choroidal neovascular membrane from causes other than wet AMD; and
   1.2 **Either:**
      1.2.1 The patient has developed severe endophthalmitis or severe posterior uveitis following treatment with bevacizumab; or
      1.2.2 There is worsening of vision or failure of retina to dry despite three intraocular injections of bevacizumab four weeks apart; and
   1.3 There is no structural damage to the central fovea of the treated eye; and
   1.4 Patient has not previously been treated with ranibizumab for longer than 3 months; or

2. **Either:**
   2.1 Patient has current approval to use ranibizumab for treatment of wAMD and was found to be intolerant to ranibizumab within 3 months; or
   2.2 Patient has previously* (*before June 2018) received treatment with ranibizumab for wAMD and disease was stable while on treatment.

**Initial application — (diabetic macular oedema)** only from an ophthalmologist. Approvals valid for 4 months for applications meeting the following criteria:

All of the following:

1. Patient has centre involving diabetic macular oedema (DMO); and
2. Patient's disease is non-responsive to 4 doses of intravitreal bevacizumab when administered 4-6 weekly; and
3. Patient has reduced visual acuity between 6/9 – 6/36 with functional awareness of reduction in vision; and
4. Patient has DMO within central OCT (ocular coherence tomography) subfield > 350 micrometers; and
5. There is no centre-involving sub-retinal fibrosis or foveal atrophy.

**Renewal — (wet age related macular degeneration)** only from an ophthalmologist. Approvals valid for 12 months for applications meeting the following criteria:

All of the following:

1. Documented benefit must be demonstrated to continue; and
2. Patient's vision is 6/36 or better on the Snellen visual acuity score; and
3. There is no structural damage to the central fovea of the treated eye.

**Renewal — (diabetic macular oedema)** only from an ophthalmologist. Approvals valid for 12 months for applications meeting the following criteria:

All of the following:

1. There is stability or two lines of Snellen visual acuity gain; and
2. There is structural improvement on OCT scan (with reduction in intra-retinal cysts, central retinal thickness, and sub-retinal fluid); and
3. Patient's vision is 6/36 or better on the Snellen visual acuity score; and
4. There is no centre-involving sub-retinal fibrosis or foveal atrophy; and
5. After each consecutive 12 months treatment with (2nd line anti-VEGF agent), patient has retrialled with at least one injection of bevacizumab and had no response.

[SA1697] Special Authority for Subsidy

Initial application only from a medical oncologist or medical practitioner on the recommendation of a medical oncologist. Approvals valid for 6 months for applications meeting the following criteria:
All of the following:
1. Patient has locally advanced, non-metastatic, squamous cell cancer of the head and neck; and
2. Patient is contraindicated to, or is intolerant of, cisplatin; and
3. Patient has good performance status; and
4. To be administered in combination with radiation therapy.

[SA1778] Special Authority for Subsidy

Initial application – (Graft vs host disease) from any relevant practitioner. Approvals valid without further renewal unless notified where patient has steroid-refractory acute graft vs. host disease of the gut.

Initial application – (Pulmonary sarcoidosis) from any relevant practitioner. Approvals valid without further renewal unless notified where patient has life-threatening pulmonary sarcoidosis diagnosed by a multidisciplinary team that is refractory to other treatments.

Initial application – (previous use) from any relevant practitioner. Approvals valid for 6 months for applications meeting the following criteria:
Both:
1. Patient was being treated with infliximab prior to 1 February 2019; and
2. Any of the following:
   2.1 Rheumatoid arthritis; or
   2.2 Ankylosing spondylitis; or
   2.3 Psoriatic arthritis; or
   2.4 Severe ocular inflammation; or
   2.5 Chronic ocular inflammation; or
   2.6 Crohn’s disease (adults); or
   2.7 Crohn’s disease (children); or
   2.8 Fistulising Crohn’s disease; or
   2.9 Severe fulminant ulcerative colitis; or
   2.10 Severe ulcerative colitis; or
   2.11 Plaque psoriasis; or
   2.12 Neurosarcoidosis; or
   2.13 Severe Behcet’s disease.

Initial application – (rheumatoid arthritis) only from a rheumatologist or Practitioner on the recommendation of a rheumatologist. Approvals valid for 4 months for applications meeting the following criteria:
All of the following:
1. The patient has had an initial Special Authority approval for adalimumab and/or etanercept for rheumatoid arthritis; and
2. Either:
   2.1 The patient has experienced intolerable side effects from a reasonable trial of adalimumab and/or etanercept; or
   2.2 Following at least a four month trial of adalimumab and/or etanercept, the patient did not meet the renewal criteria for adalimumab and/or etanercept; and
3. Treatment is to be used as an adjunct to methotrexate therapy or monotherapy where use of methotrexate is limited by toxicity or intolerance.

Initial application – (ankylosing spondylitis) only from a rheumatologist or Practitioner on the recommendation of a rheumatologist. Approvals valid for 3 months for applications meeting the following criteria:
Both:

1. The patient has had an initial Special Authority approval for adalimumab and/or etanercept for ankylosing spondylitis; and
2. Either:
   2.1. The patient has experienced intolerable side effects from a reasonable trial of adalimumab and/or etanercept; or
   2.2. Following 12 weeks of adalimumab and/or etanercept treatment, the patient did not meet the renewal criteria for adalimumab and/or etanercept for ankylosing spondylitis.

Initial application — (psoriatic arthritis) only from a rheumatologist or Practitioner on the recommendation of a rheumatologist. Approvals valid for 4 months for applications meeting the following criteria:

Both:

1. The patient has had an initial Special Authority approval for adalimumab and/or etanercept for psoriatic arthritis; and
2. Either:
   2.1. The patient has experienced intolerable side effects from a reasonable trial of adalimumab and/or etanercept; or
   2.2. Following 3-4 months' initial treatment with adalimumab and/or etanercept, the patient did not meet the renewal criteria for adalimumab and/or etanercept for psoriatic arthritis.

Initial application — (severe ocular inflammation) from any relevant practitioner. Approvals valid for 4 months for applications meeting the following criteria:

Both:

1. Patient has severe, vision-threatening ocular inflammation requiring rapid control; and
2. Any of the following:
   2.1. Treatment with high-dose steroids (intravenous methylprednisolone) followed by high dose oral steroids has proven ineffective at controlling symptoms; or
   2.2. Patient developed new inflammatory symptoms while receiving high dose steroids; or
   2.3. Patient is aged under 8 years and treatment with high dose oral steroids and other immunosuppressants has proven ineffective at controlling symptoms.

Initial application — (chronic ocular inflammation) from any relevant practitioner. Approvals valid for 4 months for applications meeting the following criteria:

Both:

1. Patient has severe uveitis uncontrolled with treatment of steroids and other immunosuppressants with a severe risk of vision loss; and
2. Any of the following:
   2.1. Patient is 18 years or older and treatment with at least two other immunomodulatory agents has proven ineffective; or
   2.2. Patient is under 18 years and treatment with methotrexate has proven ineffective or is not tolerated at a therapeutic dose; or
   2.3. Patient is under 8 years and treatment with steroids or methotrexate has proven ineffective or is not tolerated at a therapeutic dose of methotrexate; or disease requires control to prevent irreversible vision loss prior to achieving a therapeutic dose of methotrexate.

Initial application — (Crohn's disease (adults)) only from a gastroenterologist or Practitioner on the recommendation of a gastroenterologist. Approvals valid for 3 months for applications meeting the following criteria:

All of the following:

1. Patient has severe active Crohn's disease; and
2. Any of the following:
   2.1. Patient has a Crohn's Disease Activity Index (CDAI) score of greater than or equal to 300; or
   2.2. Patient has extensive small intestine disease affecting more than 50 cm of the small intestine; or
   2.3. Patient has evidence of short gut syndrome or would be at risk of short gut syndrome with further bowel resection; or
   2.4. Patient has an ileostomy or colostomy, and has intestinal inflammation; and

continued…
continued...

3 Patient has tried but had an inadequate response to, or has experienced intolerable side effects from, prior systemic
therapy with immunomodulators at maximum tolerated doses (unless contraindicated) and corticosteroids; and
4 Surgery (or further surgery) is considered to be clinically inappropriate; and
5 Patient must be reassessed for continuation after 3 months of therapy.

Initial application — (Crohn's disease (children)) only from a gastroenterologist or Practitioner on the recommendation of a
gastroenterologist. Approvals valid for 3 months for applications meeting the following criteria:

All of the following:
1 Paediatric patient has severe active Crohn's disease; and
2 Either:
   2.1 Patient has a Paediatric Crohn's Disease Activity Index (PCDAI) score of greater than or equal to 30; or
   2.2 Patient has extensive small intestine disease; and
3 Patient has tried but had an inadequate response to, or has experienced intolerable side effects from, prior systemic
therapy with immunomodulators at maximum tolerated doses (unless contraindicated) and corticosteroids; and
4 Surgery (or further surgery) is considered to be clinically inappropriate; and
5 Patient must be reassessed for continuation after 3 months of therapy.

Initial application — (fistulising Crohn's disease) only from a gastroenterologist or Practitioner on the recommendation of a
gastroenterologist. Approvals valid for 4 months for applications meeting the following criteria:

Both:
1 Patient has confirmed Crohn's disease; and
2 Either:
   2.1 Patient has one or more complex externally draining enterocutaneous fistula(e); or
   2.2 Patient has one or more rectovaginal fistula(e).

Initial application — (acute severe fulminant ulcerative colitis) only from a gastroenterologist or Practitioner on the
recommendation of a gastroenterologist. Approvals valid for 6 weeks for applications meeting the following criteria:

Both:
1 Patient has acute, severe fulminant ulcerative colitis; and
2 Treatment with intravenous or high dose oral corticosteroids has not been successful.

Initial application — (severe ulcerative colitis) only from a gastroenterologist or Practitioner on the recommendation of a
gastroenterologist. Approvals valid for 3 months for applications meeting the following criteria:

All of the following:
1 Patient has histologically confirmed ulcerative colitis; and
2 Either:
   2.1 Patient is 18 years or older and the Simple Clinical Colitis Activity Index (SCCAI) is greater than or equal to 4; or
   2.2 Patient is under 18 years and the Paediatric Ulcerative Colitis Activity Index (PUCAI) score is greater than or equal
to 65; and
3 Patient has tried but had an inadequate response to, or has experienced intolerable side effects from, prior systemic
therapy with immunomodulators at maximum tolerated doses for an adequate duration (unless contraindicated) and
corticosteroids; and
4 Surgery (or further surgery) is considered to be clinically inappropriate.

Initial application — (plaque psoriasis) only from a dermatologist or Practitioner on the recommendation of a dermatologist.
Approvals valid for 3 months for applications meeting the following criteria:

Either:
1 Both:
   1.1 The patient has had an initial Special Authority approval for adalimumab or etanercept for severe chronic plaque
psoriasis; and
   1.2 Either:
      1.2.1 The patient has experienced intolerable side effects from adalimumab or etanercept; or

continued
1.2.2 The patient has received insufficient benefit from adalimumab or etanercept to meet the renewal criteria for adalimumab or etanercept for severe chronic plaque psoriasis; or

2 All of the following:

2.1 Either:

2.1.1 Patient has "whole body" severe chronic plaque psoriasis with a Psoriasis Area and Severity Index (PASI) score of greater than 15, where lesions have been present for at least 6 months from the time of initial diagnosis; or

2.1.2 Patient has severe chronic plaque psoriasis of the face, or palm of a hand or sole of a foot, where the plaque or plaques have been present for at least 6 months from the time of initial diagnosis; and

2.2 Patient has tried, but had an inadequate response (see Note) to, or has experienced intolerable side effects from, at least three of the following (at maximum tolerated doses unless contraindicated): phototherapy, methotrexate, ciclosporin, or acitretin; and

2.3 A PASI assessment has been completed for at least the most recent prior treatment course (but preferably all prior treatment courses), preferably while still on treatment but no longer than 1 month following cessation of each prior treatment course; and

2.4 The most recent PASI assessment is no more than 1 month old at the time of initiation.

Note: "Inadequate response" is defined as: for whole body severe chronic plaque psoriasis, a PASI score of greater than 15, as assessed preferably while still on treatment but no longer than 1 month following cessation of the most recent prior treatment; for severe chronic plaque psoriasis of the face, hand or foot, at least 2 of the 3 PASI symptom subscores for erythema, thickness and scaling are rated as severe or very severe, and the skin area affected is 30% or more of the face, palm of a hand or sole of a foot, as assessed preferably while still on treatment but no longer than 1 month following cessation of the most recent prior treatment.

Initial application — (neurosarcoidosis) only from a neurologist or Practitioner on the recommendation of a neurologist.

Approvals valid for 18 months for applications meeting the following criteria:

All of the following:

1 Patient has been diagnosed with neurosarcoidosis by a multidisciplinary team; and
2 Patient has CNS involvement; and
3 Patient has steroid-refractory disease; and
4 Either:

4.1 IV cyclophosphamide has been tried; or
4.2 Treatment with IV cyclophosphamide is clinically inappropriate.

Initial application — (severe Behcet's disease) from any relevant practitioner. Approvals valid for 4 months for applications meeting the following criteria:

All of the following:

1 The patient has severe Behcet's disease which is significantly impacting the patient’s quality of life (see Notes); and
2 Either:

2.1 The patient has severe ocular, neurological and/or vasculitic symptoms and has not responded adequately to one or more treatment(s) appropriate for the particular symptom(s) (see Notes); or

2.2 The patient has severe gastrointestinal, rheumatologic and/or mucocutaneous symptoms and has not responded adequately to two or more treatment appropriate for the particular symptom(s) (see Notes); and

3 The patient is experiencing significant loss of quality of life.

Treatments appropriate for the particular symptoms are those that are considered standard conventional treatments for these symptoms, for example intravenous/oral steroids and other immunosuppressants for ocular symptoms; azathioprine, steroids, thalidomide, interferon alpha and ciclosporin for mucocutaneous symptoms; and colchicine, steroids and methotrexate for rheumatological symptoms.

continued…
Renewal — (rheumatoid arthritis) only from a rheumatologist or Practitioner on the recommendation of a rheumatologist. Approvals valid for 6 months for applications meeting the following criteria:
All of the following:

1. Treatment is to be used as an adjunct to methotrexate therapy or monotherapy where use of methotrexate is limited by toxicity or intolerance; and
2. Either:
   2.1 Following 3 to 4 months' initial treatment, the patient has at least a 50% decrease in active joint count from baseline and a clinically significant response to treatment in the opinion of the physician; or
   2.2 The patient demonstrates at least a continuing 30% improvement in active joint count from baseline and a clinically significant response to treatment in the opinion of the physician; and
3. Infliximab to be administered at doses no greater than 3 mg/kg every 8 weeks.

Renewal — (ankylosing spondylitis) only from a rheumatologist or Practitioner on the recommendation of a rheumatologist. Approvals valid for 6 months for applications meeting the following criteria:
All of the following:

1. Following 12 weeks of infliximab treatment, BASDAI has improved by 4 or more points from pre-infliximab baseline on a 10 point scale, or by 50%, whichever is less; and
2. Physician considers that the patient has benefited from treatment and that continued treatment is appropriate; and
3. Infliximab to be administered at doses no greater than 5 mg/kg every 6-8 weeks.

Renewal — (psoriatic arthritis) only from a rheumatologist or Practitioner on the recommendation of a rheumatologist. Approvals valid for 6 months for applications meeting the following criteria:
Both:

1. Either:
   1.1 Following 3 to 4 months' initial treatment, the patient has at least a 50% decrease in active joint count from baseline and a clinically significant response to treatment in the opinion of the physician; or
   1.2 The patient demonstrates at least a continuing 30% improvement in active joint count from baseline and a clinically significant response to prior infliximab treatment in the opinion of the treating physician; and
2. Infliximab to be administered at doses no greater than 5 mg/kg every 8 weeks.

Renewal — (severe ocular inflammation) from any relevant practitioner. Approvals valid for 12 months for applications meeting the following criteria:
Any of the following:

1. The patient has had a good clinical response following 3 initial doses; or
2. The patient has had a sustained reduction in inflammation (Standardisation of Uveitis Nomenclature (SUN) criteria < ½+ anterior chamber or vitreous cells, absence of active vitreous or retinal lesions, or resolution of uveitic cystoid macular oedema), following 12 months' treatment; or
3. The patient has a sustained steroid sparing effect, allowing reduction in prednisone to < 10mg daily, or steroid drops less than twice daily if under 18 years old, following 12 months' treatment.

Note: A trial withdrawal should be considered after every 24 months of stability, unless the patient is deemed to have extremely high risk of irreversible vision loss if infliximab is withdrawn.

Renewal — (chronic ocular inflammation) from any relevant practitioner. Approvals valid for 12 months for applications meeting the following criteria:
Any of the following:

1. The patient has had a good clinical response following 3 initial doses; or
2. The patient has had a sustained reduction in inflammation (Standardisation of Uveitis Nomenclature (SUN) criteria < ½+ anterior chamber or vitreous cells, absence of active vitreous or retinal lesions, or resolution of uveitic cystoid macular oedema), following 12 months' treatment; or
3. The patient has a sustained steroid sparing effect, allowing reduction in prednisone to < 10mg daily, or steroid drops less than twice daily if under 18 years old, following 12 months' treatment.

continued…
Renewal — (Crohn’s disease (adults)) only from a gastroenterologist or Practitioner on the recommendation of a gastroenterologist. Approvals valid for 6 months for applications meeting the following criteria:

Both:

1. Any of the following:
   1.1 CDAI score has reduced by 100 points from the CDAI score when the patient was initiated on infliximab; or
   1.2 CDAI score is 150 or less; or
   1.3 The patient has demonstrated an adequate response to treatment but CDAI score cannot be assessed; and

2. Infliximab to be administered at doses up to 5 mg/kg every 8 weeks. Up to 10 mg/kg every 8 weeks (or equivalent) can be used for up to 3 doses if required for secondary non-response to treatment for re-induction. Another re-induction may be considered sixteen weeks after completing the last re-induction cycle. Up to 10 mg/kg every 8 weeks (or equivalent) may be used for patients treated with this dose prior to 1 February 2019.

Renewal — (Crohn’s disease (children)) only from a gastroenterologist or Practitioner on the recommendation of a gastroenterologist. Approvals valid for 6 months for applications meeting the following criteria:

Both:

1. Any of the following:
   1.1 PCDAI score has reduced by 10 points from the PCDAI score when the patient was initiated on infliximab; or
   1.2 PCDAI score is 15 or less; or
   1.3 The patient has demonstrated an adequate response to treatment but PCDAI score cannot be assessed; and

2. Infliximab to be administered at doses up to 5 mg/kg every 8 weeks. Up to 10 mg/kg every 8 weeks (or equivalent) can be used for up to 3 doses if required for secondary non-response to treatment for re-induction. Another re-induction may be considered sixteen weeks after completing the last re-induction cycle. Up to 10 mg/kg every 8 weeks (or equivalent) may be used for patients treated with this dose prior to 1 February 2019.

Renewal — (fistulising Crohn’s disease) only from a gastroenterologist or Practitioner on the recommendation of a gastroenterologist. Approvals valid for 6 months for applications meeting the following criteria:

Both:

1. Either:
   1.1 The number of open draining fistulae have decreased from baseline by at least 50%; or
   1.2 There has been a marked reduction in drainage of all fistula(e) from baseline (in the case of adult patients, as demonstrated by a reduction in the Fistula Assessment score), together with less induration and patient reported pain; and

2. Infliximab to be administered at doses up to 5 mg/kg every 8 weeks. Up to 10 mg/kg every 8 weeks (or equivalent) can be used for up to 3 doses if required for secondary non-response to treatment for re-induction. Another re-induction may be considered sixteen weeks after completing the last re-induction cycle. Up to 10 mg/kg every 8 weeks (or equivalent) may be used for patients treated with this dose prior to 1 February 2019.

Renewal — (severe fulminant ulcerative colitis) only from a gastroenterologist or Practitioner on the recommendation of a gastroenterologist. Approvals valid for 6 months for applications meeting the following criteria:

Both:

1. Where maintenance treatment is considered appropriate, infliximab should be used in combination with immunomodulators and reassessed every 6 months; and

2. Infliximab to be administered at doses up to 5 mg/kg every 8 weeks. Up to 10 mg/kg every 8 weeks (or equivalent) can be used for up to 3 doses if required for secondary non-response to treatment for re-induction. Another re-induction may be considered sixteen weeks after completing the last re-induction cycle. Up to 10 mg/kg every 8 weeks (or equivalent) may be used for patients treated with this dose prior to 1 February 2019.

Renewal — (severe ulcerative colitis) only from a gastroenterologist or Practitioner on the recommendation of a gastroenterologist. Approvals valid for 6 months for applications meeting the following criteria:

Both:

1. Infliximab to be administered at doses up to 5 mg/kg every 8 weeks. Up to 10 mg/kg every 8 weeks (or equivalent) can be used for up to 3 doses if required for secondary non-response to treatment for re-induction. Another re-induction may be considered sixteen weeks after completing the last re-induction cycle. Up to 10 mg/kg every 8 weeks (or equivalent) may be used for patients treated with this dose prior to 1 February 2019.

continued...
continued...

All of the following:

1. Patient is continuing to maintain remission and the benefit of continuing infliximab outweighs the risks; and
2. Either:
   2.1 Patient is 18 years or older and the SCCAI score has reduced by 2 points or more from the SCCAI score when the patient was initiated on infliximab; or
   2.2 Patient is under 18 years and the PUCAI score has reduced by 30 points or more from the PUCAI score when the patient was initiated on infliximab; and
3. Infliximab to be administered at doses up to 5 mg/kg every 8 weeks. Up to 10 mg/kg every 8 weeks (or equivalent) can be used for up to 3 doses if required for secondary non-response to treatment for re-induction. Another re-induction may be considered sixteen weeks after completing the last re-induction cycle. Up to 10 mg/kg every 8 weeks (or equivalent) may be used for patients treated with this dose prior to 1 February 2019.

**Renewal — (plaque psoriasis)** only from a dermatologist or Practitioner on the recommendation of a dermatologist. Approvals valid for 6 months for applications meeting the following criteria:

Both:

1. Either:
   1.1 Both:
      1.1.1 Patient had "whole body" severe chronic plaque psoriasis at the start of treatment; and
      1.1.2 Following each prior infliximab treatment course the patient has a PASI score which is reduced by 75% or more, or is sustained at this level, when compared with the pre-infliximab treatment baseline value; or
   1.2 Both:
      1.2.1 Patient had severe chronic plaque psoriasis of the face, or palm of a hand or sole of a foot at the start of treatment; and
      1.2.2 Either:
         1.2.2.1 Following each prior infliximab treatment course the patient has a reduction in the PASI symptom subscores for all 3 of erythema, thickness and scaling, to slight or better, or sustained at this level, as compared to the treatment course baseline values; or
         1.2.2.2 Following each prior infliximab treatment course the patient has a reduction of 75% or more in the skin area affected, or sustained at this level, as compared to the pre-infliximab treatment baseline value; and
2. Infliximab to be administered at doses no greater than 5 mg/kg every 8 weeks.

**Renewal — (neurosarcoidosis)** only from a neurologist or Practitioner on the recommendation of a neurologist. Approvals valid for 18 months for applications meeting the following criteria:

Either:

1. A withdrawal period has been tried and the patient has relapsed; or
2. All of the following:
   2.1 A withdrawal period has been considered but would not be clinically appropriate; and
   2.2 There has been a marked reduction in prednisone dose; and
   2.3 Either:
      2.3.1 There has been an improvement in MRI appearances; or
      2.3.2 Marked improvement in other symptomology.

**Renewal — (severe Behcet's disease)** from any relevant practitioner. Approvals valid for 6 months for applications meeting the following criteria:

Both:

1. Patient has had a good clinical response to initial treatment with measurably improved quality of life; and
2. Infliximab to be administered at doses no greater than 5 mg/kg every 8 weeks.

**Initial application — (chronic lymphocytic leukaemia)** only from a haematologist. Approvals valid for 12 months for applications meeting the following criteria:

All of the following:

1. The patient has progressive Binet stage A, B or C CD20+ chronic lymphocytic leukaemia requiring treatment; and
2. The patient is obinutuzumab treatment naive; and
3. The patient is not eligible for full dose FCR due to comorbidities with a score > 6 on the Cumulative Illness Rating Scale (CIRS) or reduced renal function (creatinine clearance < 70mL/min); and
4. Patient has adequate neutrophil and platelet counts* unless the cytopenias are a consequence of marrow infiltration by CLL; and
5. Patient has good performance status; and
6. Obinutuzumab to be administered at a maximum cumulative dose of 8,000 mg and in combination with chlorambucil for a maximum of 6 cycles.

Notes: Chronic lymphocytic leukaemia includes small lymphocytic lymphoma. Comorbidity refers only to illness/impairment other than CLL induced illness/impairment in the patient. ‘Good performance status' means ECOG score of 0-1, however, in patients temporarily debilitating by their CLL disease symptoms a higher ECOG (2 or 3) is acceptable where treatment with obinutuzumab is expected to improve symptoms and improve ECOG score to < 2.

* Neutrophil greater than or equal to $1.5 \times 10^9$/L and platelets greater than or equal to $75 \times 10^9$/L.

**Initial application — (severe asthma)** only from a respiratory specialist or clinical immunologist. Approvals valid for 6 months for applications meeting the following criteria:

All of the following:

1. Patient must be aged 6 years or older; and
2. Patient has a diagnosis of severe asthma; and
3. Past or current evidence of atopy, documented by skin prick testing or RAST; and
4. Total serum human immunoglobulin E (IgE) between 76 IU/mL and 1300 IU/ml at baseline; and
5. Proven adherence with optimal inhaled therapy including high dose inhaled corticosteroid (budesonide 1,600 mcg per day or fluticasone propionate 1,000 mcg per day or equivalent), plus long-acting beta-2 agonist therapy (at least salmeterol 50 mcg bd or eformoterol 12 mcg bd) for at least 12 months, unless contraindicated or not tolerated; and
6. Either:
   6.1 Patient has received courses of systemic corticosteroids equivalent to at least 28 days treatment in the past 12 months, unless contraindicated or not tolerated; or
   6.2 Patient has had at least 4 exacerbations needing systemic corticosteroids in the previous 12 months, where an exacerbation is defined as either documented use of oral corticosteroids for at least 3 days or parenteral steroids; and
7. Patient has an Asthma Control Test (ACT) score of 10 or less; and
8. Baseline measurements of the patient's asthma control using the ACT and oral corticosteroid dose must be made at the time of application, and again at around 26 weeks after the first dose to assess response to treatment.

**Initial application — (severe chronic spontaneous urticaria)** only from a clinical immunologist or dermatologist. Approvals valid for 6 months for applications meeting the following criteria:

All of the following:

1. Patient must be aged 12 years or older; and
2. Either:
   2.1 Both:

continued…
continued…

2.1.1 Patient is symptomatic with Urticaria Activity Score 7 (UAS7) of 20 or above; and
2.1.2 Patient has a Dermatology life quality index (DLQI) of 10 or greater; or

2.2 Patient has a Urticaria Control Test (UCT) of 8 or less; and

3 Any of the following:
   3.1 Patient has been taking high dose antihistamines (e.g. 4 times standard dose) and ciclosporin (> 3 mg/kg day) for at least 6 weeks; or
   3.2 Patient has been taking high dose antihistamines (e.g. 4 times standard dose) and at least 3 courses of systemic corticosteroids (> 20 mg prednisone per day for at least 5 days) in the previous 6 months; or
   3.3 Patient has developed significant adverse effects whilst on corticosteroids or ciclosporin; and

4 Either:
   4.1 Treatment to be stopped if inadequate response* following 4 doses; or
   4.2 Complete response* to 6 doses of omalizumab.

Renewal — (severe asthma) only from a clinical immunologist or respiratory specialist. Approvals valid for 2 years for applications meeting the following criteria:

Both:
   1 An increase in the Asthma Control Test (ACT) score of at least 5 from baseline; and
   2 A reduction in the maintenance oral corticosteroid dose or number of exacerbations of at least 50% from baseline.

Renewal — (severe chronic spontaneous urticaria) only from a clinical immunologist or dermatologist. Approvals valid for 6 months for applications meeting the following criteria:

Either:
   1 Patient has previously adequately responded* to 6 doses of omalizumab; or

   2 Both:
      2.1 Patient has previously had a complete response* to 6 doses of omalizumab; and
      2.2 Patient has relapsed after cessation of omalizumab therapy.

Note: *Inadequate response defined as less than 50% reduction in baseline UAS7 and DLQI score, or an increase in Urticaria Control Test (UCT) score of less than 4 from baseline. Patient is to be reassessed for response after 4 doses of omalizumab. Complete response is defined as UAS7 less than or equal to 6 and DLQI less than or equal to 5; or UCT of 16. Relapse of chronic urticaria on stopping prednisone/ciclosporin does not justify the funding of omalizumab.

Initial application — (metastatic breast cancer) only from a relevant specialist or medical practitioner on the recommendation of a relevant specialist. Approvals valid for 12 months for applications meeting the following criteria:

All of the following:
   1 The patient has metastatic breast cancer expressing HER-2 IHC 3+ or ISH+ (including FISH or other current technology); and
   2 Either:
      2.1 Patient is chemotherapy treatment naïve; or
      2.2 Patient has not received prior treatment for their metastatic disease and has had a treatment free interval of at least 12 months between prior (neo)adjuvant chemotherapy treatment and diagnosis of metastatic breast cancer; and
   3 The patient has good performance status (ECOG grade 0-1); and
   4 Pertuzumab to be administered in combination with trastuzumab; and
   5 Pertuzumab maximum first dose of 840 mg, followed by maximum of 420 mg every 3 weeks; and
   6 Pertuzumab to be discontinued at disease progression.

Renewal — (metastatic breast cancer) only from a relevant specialist or medical practitioner on the recommendation of a

SA1783 Special Authority for Subsidy

Initial application — (Antibody-mediated renal transplant rejection) only from a nephrologist or Practitioner on the recommendation of a nephrologist. Approvals valid without further renewal unless notified where patient has been diagnosed with antibody-mediated renal transplant rejection*.

Note: Indications marked with * are unapproved indications.

Initial application — (ABO-incompatible renal transplant) only from a nephrologist or Practitioner on the recommendation of a nephrologist. Approvals valid without further renewal unless notified where patient is to undergo an ABO-incompatible renal transplant*.

Note: Indications marked with * are unapproved indications.

Initial application — (previous use) from any relevant practitioner. Approvals valid for 6 months for applications meeting the following criteria:
Both:
1. Patient was being treated with rituximab prior to 1 February 2019; and
2. Any of the following:
   2.1 haemophilia with inhibitors; or
   2.2 rheumatoid arthritis; or
   2.3 severe cold haemagglutinin disease (CHAD); or
   2.4 warm autoimmune haemolytic anaemia (warm AIHA); or
   2.5 immune thrombocytopenic purpura (ITP); or
   2.6 thrombotic thrombocytopenic purpura (TTP); or
   2.7 pure red cell aplasia (PRCA); or
   2.8 ANCA associated vasculitis; or
   2.9 treatment refractory systemic lupus erythematosus (SLE); or
   2.10 steroid dependent nephrotic syndrome (SDNS) or frequently relapsing nephrotic syndrome (FRNS).

Initial application — (haemophilia with inhibitors) only from a haematologist or Practitioner on the recommendation of a haematologist. Approvals valid for 4 months for applications meeting the following criteria:
Any of the following:
1. Patient has mild congenital haemophilia complicated by inhibitors; or
2. Patient has severe congenital haemophilia complicated by inhibitors and has failed immune tolerance therapy; or
3. Patient has acquired haemophilia.

Initial application — (Post-transplant) from any relevant practitioner. Approvals valid for 12 months for applications meeting the following criteria:
Both:
1. The patient has B-cell post-transplant lymphoproliferative disorder*; and
2. To be used for a maximum of 8 treatment cycles.

Note: Indications marked with * are unapproved indications.

Initial application — (indolent, low-grade lymphomas or hairy cell leukaemia*) from any relevant practitioner. Approvals valid for 9 months for applications meeting the following criteria:
continued…

Either:

1. Both:
   1.1 The patient has indolent low grade NHL or hairy cell leukaemia* with relapsed disease following prior chemotherapy; and
   1.2 To be used for a maximum of 6 treatment cycles; or

2. Both:
   2.1 The patient has indolent, low grade lymphoma or hairy cell leukaemia* requiring first-line systemic chemotherapy; and
   2.2 To be used for a maximum of 6 treatment cycles.

Note: 'Indolent, low-grade lymphomas' includes follicular, mantle, marginal zone and lymphoplasmacytic/Waldenström macroglobulinaemia. *Unapproved indication. 'Hairy cell leukaemia' also includes hairy cell leukaemia variant.

Initial application — (aggressive CD20 positive NHL) from any relevant practitioner. Approvals valid for 12 months for applications meeting the following criteria:

Either:

1. All of the following:
   1.1 The patient has treatment naive aggressive CD20 positive NHL; and
   1.2 To be used with a multi-agent chemotherapy regimen given with curative intent; and
   1.3 To be used for a maximum of 8 treatment cycles; or

2. Both:
   2.1 The patient has aggressive CD20 positive NHL with relapsed disease following prior chemotherapy; and
   2.2 To be used for a maximum of 6 treatment cycles.

Note: 'Aggressive CD20 positive NHL' includes large B-cell lymphoma and Burkitt's lymphoma/leukaemia

Initial application — (Chronic lymphocytic leukaemia) from any relevant practitioner. Approvals valid for 12 months for applications meeting the following criteria:

All of the following:

1. The patient has progressive Binet stage A, B or C chronic lymphocytic leukaemia (CLL) requiring treatment; and
2. The patient is rituximab treatment naive; and
3. Either:
   3.1 The patient is chemotherapy treatment naive; or
   3.2 Both:
      3.2.1 The patient’s disease has relapsed following no more than three prior lines of chemotherapy treatment; and
      3.2.2 The patient has had a treatment-free interval of 12 months or more if previously treated with fludarabine and cyclophosphamide chemotherapy; and

4. The patient has good performance status; and
5. The patient does not have chromosome 17p deletion CLL; and
6. Rituximab to be administered in combination with fludarabine and cyclophosphamide or bendamustine for a maximum of 6 treatment cycles; and
7. It is planned that the patient receives full dose fludarabine and cyclophosphamide (orally or dose equivalent intravenous administration) or bendamustine.

Note: 'Chronic lymphocytic leukaemia (CLL)' includes small lymphocytic lymphoma. A line of chemotherapy treatment is considered to comprise a known standard therapeutic chemotherapy regimen and supportive treatments. ‘Good performance status’ means ECOG score of 0-1, however, in patients temporarily debilitated by their CLL disease symptoms a higher ECOG (2 or 3) is acceptable where treatment with rituximab is expected to improve symptoms and improve ECOG score to < 2.

Initial application — (rheumatoid arthritis - prior TNF inhibitor use) only from a rheumatologist or Practitioner on the recommendation of a rheumatologist. Approvals valid for 4 months for applications meeting the following criteria:

All of the following:

1. Both:
1.1 The patient has had an initial community Special Authority approval for at least one of etanercept and/or adalimumab for rheumatoid arthritis; and

1.2 Either:
   1.2.1 The patient has experienced intolerable side effects from a reasonable trial of adalimumab and/or etanercept; or
   1.2.2 Following at least a four month trial of adalimumab and/or etanercept, the patient did not meet the renewal criteria for adalimumab and/or etanercept for rheumatoid arthritis; and

2 Either:
   2.1 Rituximab to be used as an adjunct to methotrexate or leflunomide therapy; or
   2.2 Patient is contraindicated to both methotrexate and leflunomide, requiring rituximab monotherapy to be used; and

3 Maximum of two 1,000 mg infusions of rituximab given two weeks apart.

Initial application — (rheumatoid arthritis - TNF inhibitors contraindicated) only from a rheumatologist or Practitioner on the recommendation of a rheumatologist. Approvals valid for 4 months for applications meeting the following criteria:

All of the following:

1 Treatment with a Tumour Necrosis Factor alpha inhibitor is contraindicated; and

2 Patient has had severe and active erosive rheumatoid arthritis (either confirmed by radiology imaging, or the patient is cyclic citrullinated peptide (CCP) antibody positive) for six months duration or longer; and

3 Patient has tried and not responded to at least three months of oral or parenteral methotrexate at a dose of at least 20 mg weekly or a maximum tolerated dose; and

4 Patient has tried and not responded to at least three months of oral or parenteral methotrexate in combination with sulfasalazine and hydroxychloroquine sulphate (at maximum tolerated doses); and

5 Any of the following:
   5.1 Patient has tried and not responded to at least three months of oral or parenteral methotrexate in combination with the maximum tolerated dose of ciclosporin; or
   5.2 Patient has tried and not responded to at least three months of oral or parenteral methotrexate in combination with intramuscular gold; or
   5.3 Patient has tried and not responded to at least three months of therapy at the maximum tolerated dose of leflunomide alone or in combination with oral or parenteral methotrexate; and

6 Either:
   6.1 Patient has persistent symptoms of poorly controlled and active disease in at least 20 swollen, tender joints; or
   6.2 Patient has persistent symptoms of poorly controlled and active disease in at least four joints from the following: wrist, elbow, knee, ankle, and either shoulder or hip; and

7 Either:
   7.1 Patient has a C-reactive protein level greater than 15 mg/L measured no more than one month prior to the date of this application; or
   7.2 C-reactive protein levels not measured as patient is currently receiving prednisone therapy at a dose of greater than 5 mg per day and has done so for more than three months; and

8 Either:
   8.1 Rituximab to be used as an adjunct to methotrexate or leflunomide therapy; or
   8.2 Patient is contraindicated to both methotrexate and leflunomide, requiring rituximab monotherapy to be used; and

9 Maximum of two 1,000 mg infusions of rituximab given two weeks apart.

Initial application — (severe cold haemagglutinin disease (CHAD)) only from a haematologist or Practitioner on the recommendation of a haematologist. Approvals valid for 4 weeks for applications meeting the following criteria:

Both:

1 Patient has cold haemagglutinin disease*; and

2 Patient has severe disease which is characterized by symptomatic anaemia, transfusion dependence or disabling circulatory symptoms.

continued…
Note: Indications marked with * are unapproved indications.

**Initial application — (warm autoimmune haemolytic anaemia (warm AIHA))** only from a haematologist or Practitioner on the recommendation of a haematologist. Approvals valid for 4 weeks for applications meeting the following criteria:

**Both:**

1. Patient has warm autoimmune haemolytic anaemia*; and
2. One of the following treatments has been ineffective: steroids (including if patient requires ongoing steroids at doses equivalent to > 5 mg prednisone daily), cytotoxic agents (e.g. cyclophosphamide monotherapy or in combination), intravenous immunoglobulin.

Note: Indications marked with * are unapproved indications.

**Initial application — (immune thrombocytopenic purpura (ITP))** only from a haematologist or Practitioner on the recommendation of a haematologist. Approvals valid for 4 weeks for applications meeting the following criteria:

**Both:**

1. Either:
   1.1 Patient has immune thrombocytopenic purpura* with a platelet count of less than or equal to 20,000 platelets per microlitre; or
   1.2 Patient has immune thrombocytopenic purpura* with a platelet count of 20,000 to 30,000 platelets per microlitre and significant mucocutaneous bleeding; and
2. Any of the following:
   2.1 Treatment with steroids and splenectomy have been ineffective; or
   2.2 Treatment with steroids has been ineffective and splenectomy is an absolute contraindication; or
   2.3 Other treatments including steroids have been ineffective and patient is being prepared for elective surgery (e.g. splenectomy).

Note: Indications marked with * are unapproved indications.

**Initial application — (thrombotic thrombocytopenic purpura (TTP))** only from a haematologist or Practitioner on the recommendation of a haematologist. Approvals valid for 4 weeks for applications meeting the following criteria:

Either:

1. Patient has thrombotic thrombocytopenic purpura* and has experienced progression of clinical symptoms or persistent thrombocytopenia despite plasma exchange; or
2. Patient has acute idiopathic thrombotic thrombocytopenic purpura* with neurological or cardiovascular pathology.

Note: Indications marked with * are unapproved indications.

**Initial application — (pure red cell aplasia (PRCA))** only from a haematologist or Practitioner on the recommendation of a haematologist. Approvals valid for 6 weeks where patient has autoimmune pure red cell aplasia* associated with a demonstrable B-cell lymphoproliferative disorder.

Note: Indications marked with * are unapproved indications.

**Initial application — (ANCA associated vasculitis)** from any relevant practitioner. Approvals valid for 4 weeks for applications meeting the following criteria:

All of the following:

1. Patient has been diagnosed with ANCA associated vasculitis*; and
2. The total rituximab dose would not exceed the equivalent of 375 mg/m² of body-surface area per week for a total of 4 weeks; and
3. Any of the following:
   3.1 Induction therapy with daily oral or pulse intravenous cyclophosphamide has failed to achieve significant improvement of disease after at least 3 months; or
   3.2 Patient has previously had a cumulative dose of cyclophosphamide > 15 g or a further repeat 3 month induction course of cyclophosphamide would result in a cumulative dose > 15 g; or
   3.3 Cyclophosphamide and methotrexate are contraindicated; or
   3.4 Patient is a female of child-bearing potential; or

3.5 Patient has a previous history of haemorrhagic cystitis, urological malignancy or haematological malignancy.

Note: Indications marked with * are unapproved indications.

**Initial application — (treatment refractory systemic lupus erythematosus (SLE))** only from a rheumatologist, nephrologist or Practitioner on the recommendation of a rheumatologist or nephrologist. Approvals valid for 7 months for applications meeting the following criteria:

All of the following:

1. The patient has severe, immediately life- or organ-threatening SLE*; and
2. The disease has proved refractory to treatment with steroids at a dose of at least 1 mg/kg; and
3. The disease has relapsed following prior treatment for at least 6 months with maximal tolerated doses of azathioprine, mycophenolate mofetil and high dose cyclophosphamide, or cyclophosphamide is contraindicated; and
4. Maximum of four 1000 mg infusions of rituximab.

Note: Indications marked with * are unapproved indications.

**Initial application — (Steroid dependent nephrotic syndrome (SDNS) or frequently relapsing nephrotic syndrome (FRNS))** only from a nephrologist or Practitioner on the recommendation of a nephrologist. Approvals valid for 4 weeks for applications meeting the following criteria:

All of the following:

1. Patient is a child with SDNS* or FRNS*; and
2. Treatment with steroids for at least a period of 3 months has been ineffective or associated with evidence of steroid toxicity; and
3. Treatment with ciclosporin for at least a period of 3 months has been ineffective and/or discontinued due to unacceptable side effects; and
4. Treatment with mycophenolate for at least a period of 3 months with no reduction in disease relapses; and
5. The total rituximab dose used would not exceed the equivalent of 375 mg/m$^2$ of body surface area per week for a total of 4 weeks.

Note: Indications marked with * are unapproved indications.

**Initial application — (Steroid resistant nephrotic syndrome (SRNS))** only from a nephrologist or Practitioner on the recommendation of a nephrologist. Approvals valid for 4 weeks for applications meeting the following criteria:

All of the following:

1. Patient is a child with SRNS* where treatment with steroids and ciclosporin for at least 3 months have been ineffective; and
2. Treatment with tacrolimus for at least 3 months has been ineffective; and
3. Genetic causes of nephrotic syndrome have been excluded; and
4. The total rituximab dose used would not exceed the equivalent of 375 mg/m$^2$ of body surface area per week for a total of 4 weeks.

Note: Indications marked with * are unapproved indications.

**Renewal — (haemophilia with inhibitors)** only from a haematologist or Practitioner on the recommendation of a haematologist. Approvals valid for 4 months for applications meeting the following criteria:

All of the following:

1. Patient was previously treated with rituximab for haemophilia with inhibitors; and
2. An initial response lasting at least 12 months was demonstrated; and

**Renewal — (Post-transplant)** from any relevant practitioner. Approvals valid for 9 months for applications meeting the following criteria:

All of the following:

1. The patient has had a rituximab treatment-free interval of 12 months or more; and
2. The patient has B-cell post-transplant lymphoproliferative disorder*; and
3. To be used for no more than 6 treatment cycles.

Note: Indications marked with * are unapproved indications.

Renewal — (indolent, low-grade lymphomas or hairy cell leukaemia*) from any relevant practitioner. Approvals valid for 9 months for applications meeting the following criteria:

All of the following:
1. The patient has had a rituximab treatment-free interval of 12 months or more; and
2. The patient has indolent, low-grade NHL or hairy cell leukaemia* with relapsed disease following prior chemotherapy; and
3. To be used for no more than 6 treatment cycles.

Note: ‘Indolent, low-grade lymphomas’ includes follicular, mantle, marginal zone and lymphoplasmacytic/Waldenstrom macroglobulinaemia. *Unapproved indication. ‘Hairy cell leukaemia’ also includes hairy cell leukaemia variant.

Renewal — (aggressive CD20 positive NHL) from any relevant practitioner. Approvals valid for 12 months for applications meeting the following criteria:

All of the following:
1. The patient has had a rituximab treatment-free interval of 12 months or more; and
2. The patient has relapsed refractory/aggressive CD20 positive NHL; and
3. To be used with a multi-agent chemotherapy regimen given with curative intent; and
4. To be used for a maximum of 4 treatment cycles.

Note: ‘Aggressive CD20 positive NHL’ includes large B-cell lymphoma and Burkitt’s lymphoma/leukaemia

Renewal — (Chronic lymphocytic leukaemia) from any relevant practitioner. Approvals valid for 12 months for applications meeting the following criteria:

All of the following:
1. The patient’s disease has relapsed following no more than one prior line of treatment with rituximab for CLL; and
2. The patient has had an interval of 36 months or more since commencement of initial rituximab treatment; and
3. The patient does not have chromosome 17p deletion CLL; and
4. It is planned that the patient receives full dose fludarabine and cyclophosphamide (orally or dose equivalent intravenous administration) or bendamustine; and
5. Rituximab to be administered in combination with fludarabine and cyclophosphamide or bendamustine for a maximum of 6 treatment cycles.

Note: ‘Chronic lymphocytic leukaemia (CLL)’ includes small lymphocytic lymphoma. A line of chemotherapy treatment is considered to comprise a known standard therapeutic chemotherapy regimen and supportive treatments.

Renewal — (rheumatoid arthritis - re-treatment in ‘partial responders’ to rituximab) only from a rheumatologist or Practitioner on the recommendation of a rheumatologist. Approvals valid for 4 months for applications meeting the following criteria:

All of the following:
1. Any of the following:
   1.1 At 4 months following the initial course of rituximab infusions the patient had between a 30% and 50% decrease in active joint count from baseline and a clinically significant response to treatment in the opinion of the physician; or
   1.2 At 4 months following the second course of rituximab infusions the patient had at least a 50% decrease in active joint count from baseline and a clinically significant response to treatment in the opinion of the physician; or
   1.3 At 4 months following the third and subsequent courses of rituximab infusions, the patient demonstrates at least a continuing 30% improvement in active joint count from baseline and a clinically significant response to treatment in the opinion of the physician; and
2. Rituximab re-treatment not to be given within 6 months of the previous course of treatment; and
3. Either:
   3.1 Rituximab to be used as an adjunct to methotrexate or leflunomide therapy; or
   3.2 Patient is contraindicated to both methotrexate and leflunomide, requiring rituximab monotherapy to be used; and
4. Maximum of two 1,000 mg infusions of rituximab given two weeks apart.

Renewal — (rheumatoid arthritis - re-treatment in ‘responders’ to rituximab) only from a rheumatologist or Practitioner on...
the recommendation of a rheumatologist. Approvals valid for 4 months for applications meeting the following criteria:

All of the following:

1. Either:
   1.1 At 4 months following the initial course of rituximab infusions the patient had at least a 50% decrease in active joint count from baseline and a clinically significant response to treatment in the opinion of the physician; or
   1.2 At 4 months following the second and subsequent courses of rituximab infusions, the patient demonstrates at least a continuing 30% improvement in active joint count from baseline and a clinically significant response to treatment in the opinion of the physician; and

2. Rituximab re-treatment not to be given within 6 months of the previous course of treatment; and

3. Either:
   3.1 Rituximab to be used as an adjunct to methotrexate or leflunomide therapy; or
   3.2 Patient is contraindicated to both methotrexate and leflunomide, requiring rituximab monotherapy to be used; and

4. Maximum of two 1,000 mg infusions of rituximab given two weeks apart.

Renewal — (severe cold haemagglutinin disease (CHAD)) only from a haematologist or Practitioner on the recommendation of a haematologist. Approvals valid for 4 weeks for applications meeting the following criteria:

Either:

1. Previous treatment with lower doses of rituximab (100 mg weekly for 4 weeks) have proven ineffective and treatment with higher doses (375 mg/m² weekly for 4 weeks) is now planned; or

2. All of the following:
   2.1 Patient was previously treated with rituximab for severe cold haemagglutinin disease*; and
   2.2 An initial response lasting at least 12 months was demonstrated; and
   2.3 Patient now requires repeat treatment.

Note: Indications marked with * are unapproved indications.

Renewal — (warm autoimmune haemolytic anaemia (warm AIHA)) only from a haematologist or Practitioner on the recommendation of a haematologist. Approvals valid for 4 weeks for applications meeting the following criteria:

Either:

1. Previous treatment with lower doses of rituximab (100 mg weekly for 4 weeks) have proven ineffective and treatment with higher doses (375 mg/m² weekly for 4 weeks) is now planned; or

2. All of the following:
   2.1 Patient was previously treated with rituximab for warm autoimmune haemolytic anaemia*; and
   2.2 An initial response lasting at least 12 months was demonstrated; and
   2.3 Patient now requires repeat treatment.

Note: Indications marked with * are unapproved indications.

Renewal — (immune thrombocytopenic purpura (ITP)) only from a haematologist or Practitioner on the recommendation of a haematologist. Approvals valid for 4 weeks for applications meeting the following criteria:

Either:

1. Previous treatment with lower doses of rituximab (100 mg weekly for 4 weeks) have proven ineffective and treatment with higher doses (375 mg/m² weekly for 4 weeks) is now planned; or

2. All of the following:
   2.1 Patient was previously treated with rituximab for immune thrombocytopenic purpura*; and
   2.2 An initial response lasting at least 12 months was demonstrated; and
   2.3 Patient now requires repeat treatment.

Note: Indications marked with * are unapproved indications.

Renewal — (thrombotic thrombocytopenic purpura (TTP)) only from a haematologist or Practitioner on the recommendation of a haematologist. Approvals valid for 4 weeks for applications meeting the following criteria:

All of the following:

1. Patient was previously treated with rituximab for thrombotic thrombocytopenic purpura*; and

Note: * unapproved indications.
2 An initial response lasting at least 12 months was demonstrated; and
3 Patient now requires repeat treatment.

Note: Indications marked with * are unapproved indications.

Renewal — (pure red cell aplasia (PRCA)) only from a haematologist or Practitioner on the recommendation of a haematologist. Approvals valid for 6 weeks where patient was previously treated with rituximab for pure red cell aplasia* associated with a demonstrable B-cell lymphoproliferative disorder and demonstrated an initial response lasting at least 12 months.

Note: Indications marked with * are unapproved indications.

Renewal — (ANCA associated vasculitis) from any relevant practitioner. Approvals valid for 4 weeks for applications meeting the following criteria:

All of the following:
1 Patient has been diagnosed with ANCA associated vasculitis*; and
2 Patient has previously responded to treatment with rituximab but is now experiencing an acute flare of vasculitis; and
3 The total rituximab dose would not exceed the equivalent of 375 mg/m^2 of body-surface area per week for a total of 4 weeks.

Note: Indications marked with * are unapproved indications.

Renewal — (treatment refractory systemic lupus erythematosus (SLE)) only from a rheumatologist, nephrologist or Practitioner on the recommendation of a rheumatologist or nephrologist. Approvals valid for 6 months for applications meeting the following criteria:

All of the following:
1 Patient’s SLE* achieved at least a partial response to the previous round of prior rituximab treatment; and
2 The disease has subsequently relapsed; and
3 Maximum of two 1000 mg infusions of rituximab.

Note: Indications marked with * are unapproved indications.

Renewal — (Steroid dependent nephrotic syndrome (SDNS) or frequently relapsing nephrotic syndrome (FRNS)) only from a nephrologist or Practitioner on the recommendation of a nephrologist. Approvals valid for 4 weeks for applications meeting the following criteria:

All of the following:
1 Patient who was previously treated with rituximab for nephrotic syndrome*; and
2 Treatment with rituximab was previously successful and has demonstrated sustained response for greater than 6 months, but the condition has relapsed and the patient now requires repeat treatment; and
3 The total rituximab dose used would not exceed the equivalent of 375 mg/m^2 of body surface area per week for a total of 4 weeks.

Note: Indications marked with * are unapproved indications.

Renewal — (Steroid resistant nephrotic syndrome (SRNS)) only from a nephrologist or Practitioner on the recommendation of a nephrologist. Approvals valid for 4 weeks for applications meeting the following criteria:

All of the following:
1 Patient who was previously treated with rituximab for nephrotic syndrome*; and
2 Treatment with rituximab was previously successful and has demonstrated sustained response for greater than 6 months, but the condition has relapsed and the patient now requires repeat treatment; and
3 The total rituximab dose used would not exceed the equivalent of 375 mg/m^2 of body surface area per week for a total of 4 weeks.

Note: Indications marked with * are unapproved indications.

Inj 150 mg per ml, 1 ml prefilled syringe..........................1,599.00 2 ✔ Cosentyx
SA1754 | Special Authority for Subsidy

Initial application — (severe chronic plaque psoriasis – second-line biologic) only from a dermatologist. Approvals valid for 4 months for applications meeting the following criteria:

All of the following:
1. The patient has had an initial Special Authority approval for adalimumab or etanercept, or has trialled infliximab in a DHB hospital in accordance with the General Rules of the Pharmaceutical Schedule, for severe chronic plaque psoriasis; and
2. Either:
   2.1 The patient has experienced intolerable side effects from adalimumab, etanercept or infliximab; or
   2.2 The patient has received insufficient benefit from adalimumab, etanercept or infliximab; and
3. A Psoriasis Area and Severity Index (PASI) assessment or Dermatology Quality of Life Index (DLQI) assessment has been completed for at least the most recent prior treatment course, preferably while still on treatment but no longer than 1 month following cessation of each prior treatment course; and
4. The most recent PASI or DLQI assessment is no more than 1 month old at the time of application.

Initial application — (severe chronic plaque psoriasis – first-line biologic) only from a dermatologist. Approvals valid for 4 months for applications meeting the following criteria:

All of the following:
1. Either:
   1.1 Patient has "whole body" severe chronic plaque psoriasis with a Psoriasis Area and Severity Index (PASI) score of greater than 10, where lesions have been present for at least 6 months from the time of initial diagnosis; or
   1.2 Patient has severe chronic plaque psoriasis of the face, or palm of a hand or sole of a foot, where the plaque or plaques have been present for at least 6 months from the time of initial diagnosis; and
2. Patient has tried, but had an inadequate response (see Note) to, or has experienced intolerable side effects from, at least three of the following (at maximum tolerated doses unless contraindicated): phototherapy, methotrexate, ciclosporin, or acitretin; and
3. A PASI assessment or Dermatology Quality of Life Index (DLQI) assessment has been completed for at least the most recent prior treatment course, preferably while still on treatment but no longer than 1 month following cessation of each prior treatment course; and
4. The most recent PASI or DLQI assessment is no more than 1 month old at the time of application.

Note: A treatment course is defined as a minimum of 12 weeks of treatment. "Inadequate response" is defined as: for whole body severe chronic plaque psoriasis, a PASI score of greater than 10, as assessed preferably while still on treatment but no longer than 1 month following cessation of the most recent prior treatment; for severe chronic plaque psoriasis of the face, hand or foot, at least 2 of the 3 PASI symptom sub scores for erythema, thickness and scaling are rated as severe or very severe, and the skin area affected is 30% or more of the face, palm of a hand or sole of a foot, as assessed preferably while still on treatment but no longer than 1 month following cessation of the most recent prior treatment.

Renewal — (severe chronic plaque psoriasis – first and second-line biologic) only from a dermatologist or medical practitioner on the recommendation of a dermatologist. Approvals valid for 6 months for applications meeting the following criteria:

Both:
1. Either:
   1.1 Patient's PASI score has reduced by 75% or more (PASI 75) as compared to baseline PASI prior to commencing secukinumab; or
   1.2 Patient has a Dermatology Quality of Life Index (DLQI) improvement of 5 or more, as compared to baseline DLQI prior to commencing secukinumab; and
2. Secukinumab to be administered at a maximum dose of 300 mg monthly.

SILTUXIMAB – Special Authority see SA1596 on the next page – Retail pharmacy

**SA1596** Special Authority for Subsidy

**Initial application** only from a haematologist or rheumatologist. Approvals valid for 6 months for applications meeting the following criteria:

All of the following:
1. Patient has severe HHV-8 negative idiopathic multicentric Castleman's Disease; and
2. Treatment with an adequate trial of corticosteroids has proven ineffective; and
3. Siltuximab is to be administered at doses no greater than 11 mg/kg every 3 weeks.

**Renewal** only from a haematologist or rheumatologist. Approvals valid for 12 months where the treatment remains appropriate and the patient has sustained improvement in inflammatory markers and functional status.

**SA1781** Special Authority for Subsidy

**Initial application** — (cytokine release syndrome) from any relevant practitioner. Approvals valid without further renewal unless notified for applications meeting the following criteria:

Either:
1. All of the following:
   1.1 The patient is enrolled in the Children's Oncology Group AALL1331 trial; and
   1.2 The patient has developed grade 3 or 4 cytokine release syndrome associated with the administration of blinatumomab for the treatment of acute lymphoblastic leukaemia; and
   1.3 Tocilizumab is to be administered at doses no greater than 8 mg/kg IV for a maximum of 3 doses; or
2. All of the following:
   2.1 The patient is enrolled in the Malaghan Institute of Medical Research Phase I ENABLE trial; and
   2.2 The patient has developed CRS or CAR T-Cell Related Encephalopathy Syndrome (CRES) associated with the administration of CAR T-cell therapy for the treatment of relapsed or refractory B-cell non-Hodgkin lymphoma; and
   2.3 Tocilizumab is to be administered according to the consensus guidelines for CRS and CRES for CAR T-cell therapy (Neelapu et al. Nat Rev Clin Oncol 2018;15:47-62) at doses no greater than 8 mg/kg IV for a maximum of 3 doses.

**Initial application** — (previous use) from any relevant practitioner. Approvals valid for 6 months for applications meeting the following criteria:

Both:
1. Patient was being treated with tocilizumab prior to 1 February 2019; and
2. Any of the following:
   2.1 rheumatoid arthritis; or
   2.2 systemic juvenile idiopathic arthritis; or
   2.3 adult-onset Still's disease; or
   2.4 polyarticular juvenile idiopathic arthritis; or
   2.5 idiopathic multicentric Castleman's disease.

**Initial application** — (Rheumatoid Arthritis (patients previously treated with adalimumab or etanercept)) only from a rheumatologist or Practitioner on the recommendation of a rheumatologist. Approvals valid for 6 months for applications meeting the following criteria:

All of the following:
1. The patient has had an initial Special Authority approval for adalimumab and/or etanercept for rheumatoid arthritis; and
2. Either:
   2.1 The patient has experienced intolerable side effects from adalimumab and/or etanercept; or

★Three months supply may be dispensed at one time if endorsed “certified exemption” by the prescriber or pharmacist.

*Three months or six months, as applicable, dispensed all-at-once
2.2 The patient has received insufficient benefit from at least a three-month trial of adalimumab and/or etanercept such that they do not meet the renewal criteria for rheumatoid arthritis; and

3 Either:

3.1 The patient is seronegative for both anti-cyclic citrullinated peptide (CCP) antibodies and rheumatoid factor; or

3.2 Both:

3.2.1 The patient has been started on rituximab for rheumatoid arthritis in a DHB hospital in accordance with the Section H rules; and

3.2.2 Either:

3.2.2.1 The patient has experienced intolerable side effects from rituximab; or

3.2.2.2 At four months following the initial course of rituximab the patient has received insufficient benefit such that they do not meet the renewal criteria for rheumatoid arthritis.

Initial application — (Rheumatoid Arthritis) only from a rheumatologist or Practitioner on the recommendation of a rheumatologist. Approvals valid for 6 months for applications meeting the following criteria:

All of the following:

1 Patient has had severe and active erosive rheumatoid arthritis (either confirmed by radiology imaging, or the patient is cyclic citrullinated peptide (CCP) antibody positive) for six months duration or longer; and

2 Tocilizumab is to be used as monotherapy; and

3 Either:

3.1 Treatment with methotrexate is contraindicated; or

3.2 Patient has tried and did not tolerate oral and/or parenteral methotrexate; and

4 Either:

4.1 Patient has tried and not responded to at least three months therapy at the maximum tolerated dose of ciclosporin alone or in combination with another agent; or

4.2 Patient has tried and not responded to at least three months therapy at the maximum tolerated dose of leflunomide alone or in combination with another agent; and

5 Either:

5.1 Patient has persistent symptoms of poorly controlled and active disease in at least 20 active, swollen, tender joints; and

5.2 Patient has persistent symptoms of poorly controlled and active disease in at least four active joints from the following: wrist, elbow, knee, ankle, and either shoulder or hip; and

6 Either:

6.1 Patient has a C-reactive protein level greater than 15 mg/L measured no more than one month prior to the date of this application; or

6.2 C-reactive protein levels not measured as patient is currently receiving prednisone therapy at a dose of greater than 5 mg per day and has done so for more than three months.

Initial application — (systemic juvenile idiopathic arthritis) only from a rheumatologist or Practitioner on the recommendation of a rheumatologist. Approvals valid for 6 months for applications meeting the following criteria:

Both:

1 Patient diagnosed with systemic juvenile idiopathic arthritis; and

2 Patient has tried and not responded to a reasonable trial of all of the following, either alone or in combination: oral or parenteral methotrexate; non-steroidal anti-inflammatory drugs (NSAIDs); and systemic corticosteroids.

Initial application — (adult-onset Still’s disease) only from a rheumatologist or Practitioner on the recommendation of a rheumatologist. Approvals valid for 6 months for applications meeting the following criteria:

1.1.1 The patient has had an initial Special Authority approval for adalimumab and/or etanercept for adult-onset Still's disease (AOSD); or

1.1.2 The patient has been started on tocilizumab for AOSD in a DHB hospital in accordance with the General Rules of the Pharmaceutical Schedule; and

1.2 Either:

1.2.1 The patient has experienced intolerable side effects from adalimumab and/or etanercept; or

1.2.2 The patient has received insufficient benefit from at least a three-month trial of adalimumab and/or etanercept such that they do not meet the renewal criteria for AOSD; or

2 All of the following:

2.1 Patient diagnosed with AOSD according to the Yamaguchi criteria (J Rheumatol 1992;19:424-430); and

2.2 Patient has tried and not responded to at least 6 months of glucocorticosteroids at a dose of at least 0.5 mg/kg, non-steroidal antiinflammatory drugs (NSAIDs) and methotrexate; and

2.3 Patient has persistent symptoms of disabling poorly controlled and active disease.

Initial application — (polyarticular juvenile idiopathic arthritis) only from a rheumatologist or Practitioner on the recommendation of a rheumatologist. Approvals valid for 4 months for applications meeting the following criteria:

Either:

1 Both:

1.1 The patient has had an initial Special Authority approval for both etanercept and adalimumab for juvenile idiopathic arthritis (JIA); and

1.2 The patient has experienced intolerable side effects, or has received insufficient benefit from, both etanercept and adalimumab; or

2 All of the following:

2.1 Treatment with a tumour necrosis factor alpha inhibitor is contraindicated; and

2.2 Patient has had severe active polyarticular course JIA for 6 months duration or longer; and

2.3 Patient has tried and not responded to at least three months of oral or parenteral methotrexate (at a dose of 10-20 mg/m² weekly or at the maximum tolerated dose) in combination with either oral corticosteroids (prednisone 0.25 mg/kg or at the maximum tolerated dose) or a full trial of serial intra-articular corticosteroid injections; and

2.4 To be used as an adjunct to methotrexate therapy or monotherapy where use of methotrexate is limited by toxicity or intolerance; and

2.5 Both:

2.5.1 Either:

2.5.1.1 Patient has persistent symptoms of poorly-controlled and active disease in at least 20 swollen, tender joints; or

2.5.1.2 Patient has persistent symptoms of poorly-controlled and active disease in at least four joints from the following: wrist, elbow, knee, ankle, shoulder, cervical spine, hip; and

2.5.2 Physician’s global assessment indicating severe disease.

Initial application — (idiopathic multicentric Castleman’s disease) only from a haematologist, rheumatologist or Practitioner on the recommendation of a haematologist or rheumatologist. Approvals valid for 6 months for applications meeting the following criteria:

All of the following:

1 Patient has severe HHV-8 negative idiopathic multicentric Castleman’s disease; and

2 Treatment with an adequate trial of corticosteroids has proven ineffective; and

3 Tocilizumab to be administered at doses no greater than 8 mg/kg IV every 3-4 weeks.

Renewal — (Rheumatoid Arthritis) only from a rheumatologist or Practitioner on the recommendation of a rheumatologist. Approvals valid for 6 months for applications meeting the following criteria:

1 Following 6 months' initial treatment, the patient has at least a 50% decrease in active joint count from baseline and a clinically significant response to treatment in the opinion of the physician; or

2 On subsequent reapplications, the patient demonstrates at least a continuing 30% improvement in active joint count from baseline and a clinically significant response to treatment in the opinion of the physician.

Renewal — (systemic juvenile idiopathic arthritis) only from a rheumatologist or Practitioner on the recommendation of a rheumatologist. Approvals valid for 6 months for applications meeting the following criteria:

Either:

1 Following up to 6 months' initial treatment, the patient has achieved at least an American College of Rheumatology paediatric 30% improvement criteria (ACR Pedi 30) response from baseline; or

2 On subsequent reapplications, the patient demonstrates at least a continuing ACR Pedi 30 response from baseline.

Renewal — (adult-onset Still's disease) only from a rheumatologist or Practitioner on the recommendation of a rheumatologist. Approvals valid for 6 months where the patient has a sustained improvement in inflammatory markers and functional status.

Renewal — (polyarticular juvenile idiopathic arthritis) only from a rheumatologist or Practitioner on the recommendation of a rheumatologist. Approvals valid for 6 months for applications meeting the following criteria:

Both:

1 Treatment is to be used as an adjunct to methotrexate therapy or monotherapy where use of methotrexate is limited by toxicity or intolerance; and

2 Either:

   2.1 Following 3 to 4 months' initial treatment, the patient has at least a 50% decrease in active joint count and an improvement in physician's global assessment from baseline; or

   2.2 On subsequent reapplications, the patient demonstrates at least a continuing 30% improvement in active joint count and continued improvement in physician's global assessment from baseline.

Renewal — (idiopathic multicentric Castleman's disease) only from a haematologist, rheumatologist or Practitioner on the recommendation of a haematologist or rheumatologist. Approvals valid for 12 months where the treatment remains appropriate and the patient has a sustained improvement in inflammatory markers and functional status.

Initial application — (metastatic breast cancer) only from a relevant specialist or medical practitioner on the recommendation of a relevant specialist. Approvals valid for 12 months for applications meeting the following criteria:

All of the following:

1 The patient has metastatic breast cancer expressing HER-2 IHC 3+ or ISH+ (including FISH or other current technology); and

2 Either:

   2.1 The patient has not previously received lapatinib treatment for HER-2 positive metastatic breast cancer; or

   2.2 Both:

      2.2.1 The patient started lapatinib treatment for metastatic breast cancer but discontinued lapatinib within 3 months of starting treatment due to intolerance; and

      2.2.2 The cancer did not progress whilst on lapatinib; and

3 Either:

   3.1 Trastuzumab will not be given in combination with pertuzumab; or

   3.2 All of the following:

      3.2.1 Trastuzumab to be administered in combination with pertuzumab; and

      3.2.2 Patient has not received prior treatment for their metastatic disease and has had a treatment-free interval of...
continued… at least 12 months between prior (neo)adjuvant chemotherapy treatment and diagnosis of metastatic breast cancer; and

3.2.3 The patient has good performance status (ECOG grade 0-1); and

4 Trastuzumab not to be given in combination with lapatinib; and

5 Trastuzumab to be discontinued at disease progression.

Renewal — (metastatic breast cancer) only from a relevant specialist or medical practitioner on the recommendation of a relevant specialist. Approvals valid for 12 months for applications meeting the following criteria:

All of the following:

1. The patient has metastatic breast cancer expressing HER-2 IHC 3+ or ISH+ (including FISH or other current technology); and

2. The cancer has not progressed at any time point during the previous 12 months whilst on trastuzumab; and

3. Trastuzumab not to be given in combination with lapatinib; and

4. Trastuzumab to be discontinued at disease progression.

Initial application — (early breast cancer) only from a relevant specialist or medical practitioner on the recommendation of a relevant specialist. Approvals valid for 15 months for applications meeting the following criteria:

All of the following:

1. The patient has early breast cancer expressing HER 2 IHC 3+ or ISH + (including FISH or other current technology); and

2. Maximum cumulative dose of 106 mg/kg (12 months' treatment); and

3. Any of the following:

   3.1 9 weeks' concurrent treatment with adjuvant chemotherapy is planned; or

   3.2 12 months' concurrent treatment with adjuvant chemotherapy is planned; or

   3.3 12 months' sequential treatment following adjuvant chemotherapy is planned; or

   3.4 12 months' treatment with neoadjuvant and adjuvant chemotherapy is planned; or

   3.5 Other treatment regimen, in association with adjuvant chemotherapy, is planned.

Renewal — (early breast cancer*) only from a relevant specialist or medical practitioner on the recommendation of a relevant specialist. Approvals valid for 12 months for applications meeting the following criteria:

All of the following:

1. The patient has metastatic breast cancer expressing HER-2 IHC 3+ or ISH+ (including FISH or other current technology); and

2. The patient received prior adjuvant trastuzumab treatment for early breast cancer; and

3. Any of the following:

   3.1 The patient has not previously received lapatinib treatment for HER-2 positive metastatic breast cancer; or

   3.2 Both:

      3.2.1 The patient started lapatinib treatment for metastatic breast cancer but discontinued lapatinib within 3 months of starting treatment due to intolerance; and

      3.2.2 The cancer did not progress whilst on lapatinib; or

   3.3 The cancer has not progressed at any time point during the previous 12 months whilst on trastuzumab; and

4. Either:

   4.1 Trastuzumab will not be given in combination with pertuzumab; or

   4.2 All of the following:

      4.2.1 Trastuzumab to be administered in combination with pertuzumab; and

      4.2.2 Patient has not received prior treatment for their metastatic disease and has had a treatment-free interval of at least 12 months between prior (neo)adjuvant chemotherapy treatment and diagnosis of metastatic breast cancer; and

      4.2.3 The patient has good performance status (ECOG grade 0-1); and

   5. Trastuzumab not to be given in combination with lapatinib; and

   6. Trastuzumab to be discontinued at disease progression.

continued…
continued…

Note: * For patients with relapsed HER-2 positive disease who have previously received adjuvant trastuzumab for early breast cancer.

➽ SA1656 [Special Authority for Subsidy]

Initial application — (unresectable or metastatic melanoma) only from a medical oncologist. Approvals valid for 4 months for applications meeting the following criteria:

All of the following:

1. Patient has metastatic or unresectable melanoma stage III or IV; and
2. Patient has measurable disease as defined by the presence of at least one CT or MRI measurable lesion; and
3. The patient has ECOG performance score of 0-2; and
4. Either:
   4.1 Patient has not received funded pembrolizumab; or
   4.2 Both:
      4.2.1 Patient has received an initial Special Authority approval for pembrolizumab and has discontinued pembrolizumab within 12 weeks of starting treatment due to intolerance; and
      4.2.2 The cancer did not progress while the patient was on pembrolizumab; and
5. Nivolumab is to be used at a maximum dose of 3 mg/kg every 2 weeks for a maximum of 12 weeks (6 cycles); and
6. Baseline measurement of overall tumour burden is documented (see Note); and
7. Documentation confirming that the patient has been informed and acknowledges that the initial funded treatment period of nivolumab will not be continued beyond 12 weeks (6 cycles) if their disease progresses during this time.

Renewal — (unresectable or metastatic melanoma) only from a medical oncologist. Approvals valid for 4 months for applications meeting the following criteria:

All of the following:

1. Any of the following:
   1.1 Patient’s disease has had a complete response to treatment according to RECIST criteria (see Note; or
   1.2 Patient’s disease has had a partial response to treatment according to RECIST criteria (see Note); or
   1.3 Patient has stable disease according to RECIST criteria (see Note); and
2. Response to treatment in target lesions has been determined by radiologic assessment (CT or MRI scan) following the most recent treatment period; and
3. No evidence of progressive disease according to RECIST criteria (see Note); and
4. The treatment remains clinically appropriate and the patient is benefitting from the treatment; and
5. Nivolumab will be used at a maximum dose of 3 mg/kg every 2 weeks for a maximum of 12 weeks (6 cycles).

Notes: Disease responses to be assessed according to the Response Evaluation Criteria in Solid Tumours (RECIST) version 1.1 (Eisenhauer EA, et al. Eur J Cancer 2009;45:228-47). Assessments of overall tumour burden and measurable disease to be undertaken on a minimum of one lesion and maximum of 5 target lesions (maximum two lesions per organ). Target lesions should be selected on the basis of their size (lesions with the longest diameter), be representative of all involved organs, and suitable for reproducible repeated measurements. Target lesion measurements should be assessed using CT or MRI imaging with the same method of assessment and the same technique used to characterise each identified and reported lesion at baseline and every 12 weeks. Response definitions as follows:

- Complete Response: Disappearance of all target lesions. Any pathological lymph nodes (whether target or non-target) must have reduction in short axis to < 10 mm.

continued…
Partial Response: At least a 30% decrease in the sum of diameters of target lesions, taking as reference the baseline sum diameters.

Progressive Disease: At least a 20% increase in the sum of diameters of target lesions, taking as reference the smallest sum on study (this includes the baseline sum if that is the smallest on study). In addition to the relative increase of 20%, the sum must also demonstrate an absolute increase of at least 5 mm. (Note: the appearance of one or more new lesions is also considered progression).

Stable Disease: Neither sufficient shrinkage to qualify for partial response nor sufficient increase to qualify for progressive disease.

Tab 5 mg ................................................................... $4,555.76 30 ✔ Afinitor

➽ SA1491 Special Authority for Subsidy

Initial application only from a neurologist or oncologist. Approvals valid for 3 months for applications meeting the following criteria:
Both:
1. Patient has tuberous sclerosis; and
2. Patient has progressively enlarging sub-ependymal giant cell astrocytomas (SEGAs) that require treatment.

Renewal only from a neurologist or oncologist. Approvals valid for 12 months for applications meeting the following criteria:
All of the following:
1. Documented evidence of SEGA reduction or stabilisation by MRI within the last 3 months; and
2. The treatment remains appropriate and the patient is benefiting from treatment; and
3. Everolimus to be discontinued at progression of SEGAs.

Note: MRI should be performed at minimum once every 12 months, more frequent scanning should be performed with new onset of symptoms such as headaches, visual complaints, nausea or vomiting, or increase in seizure activity.

SIROLIMUS – Special Authority see SA0866 below – Retail pharmacy

Tab 1 mg .................................................................... $749.99 100 ✔ Rapamune

Oral liq 1 mg per ml ................................................ $449.99 60 ml OP ✔ Rapamune

➽ SA0866 Special Authority for Subsidy

Initial application from any medical practitioner. Approvals valid without further renewal unless notified where the drug is to be used for rescue therapy for an organ transplant recipient.
Notes: Rescue therapy defined as unresponsive to calcineurin inhibitor treatment as defined by refractory rejection; or intolerant to calcineurin inhibitor treatment due to any of the following:
- GFR< 30 ml/min; or
- Rapidly progressive transplant vasculopathy; or
- Rapidly progressive obstructive bronchiolitis; or
- HUS or TTP; or
- Leukoencephalopathy; or
- Significant malignant disease

SA1745 Special Authority for Subsidy

Initial application — (organ transplant) only from a relevant specialist. Approvals valid without further renewal unless notified where the patient is an organ transplant recipient.

Note: Subsidy applies for either primary or rescue therapy.

Initial application — (non-transplant indications*) only from a relevant specialist. Approvals valid without further renewal unless notified for applications meeting the following criteria:

Both:
1. Patient requires long-term systemic immunosuppression; and
2. Ciclosporin has been trialled and discontinued treatment because of unacceptable side effects or inadequate clinical response.

Note: Indications marked with * are unapproved indications

▲Three months supply may be dispensed at one time if endorsed “certified exemption” by the prescriber or pharmacist.

❋Three months or six months, as applicable, dispensed all-at-once

Inj 10 mg per ml, 3 ml prefilled syringe ................................................. 2,668.00 1

[SA1558] Special Authority for Subsidy

Initial application only from a clinical immunologist or relevant specialist. Approvals valid for 12 months for applications meeting the following criteria:

Both:
1. Supply for anticipated emergency treatment of laryngeal/oro-pharyngeal or severe abdominal attacks of acute hereditary angioedema (HAE) for patients with confirmed diagnosis of C1-esterase inhibitor deficiency; and
2. The patient has undergone product training and has agreed upon an action plan for self-administration.

Renewal from any relevant practitioner. Approvals valid for 12 months where the treatment remains appropriate and the patient is benefiting from treatment.

Allergy Desensitisation

[SA1367] Special Authority for Subsidy

Initial application only from a relevant specialist. Approvals valid for 2 years for applications meeting the following criteria:

Both:
1. RAST or skin test positive; and
2. Patient has had severe generalised reaction to the sensitising agent.

Renewal only from a relevant specialist. Approvals valid for 2 years where the treatment remains appropriate and the patient is benefiting from treatment.

▲ Three months supply may be dispensed at one time if endorsed “certified exemption” by the prescriber or pharmacist.

★ Three months or six months, as applicable, dispensed all-at-once
TIOTROPIUM BROMIDE – Subsidy by endorsement

a) Tiotropium treatment will not be subsidised if patient is also receiving treatment with subsidised inhaled glycopyrronium or umeclidinium.

b) Tiotropium bromide is subsidised only for patients who have been diagnosed as having COPD using spirometry, and the prescription is endorsed accordingly. Patients who had tiotropium dispensed before 1 October 2018 with a valid Special Authority are deemed endorsed.

| Powder for inhalation, 18 mcg per dose | 50.37 | 30 dose | ✔ Spiriva |
| Soln for inhalation 2.5 mcg per dose | 50.37 | 60 dose OP | ✔ Spiriva Respimat |

UMECLIDINIUM – Subsidy by endorsement

a) Umeclidinium will not be subsidised if patient is also receiving treatment with subsidised inhaled glycopyrronium or tiotropium bromide.

b) Umeclidinium powder for inhalation 62.5 mcg per dose is subsidised only for patients who have been diagnosed as having COPD using spirometry, and the prescription is endorsed accordingly.

| Powder for inhalation 62.5 mcg per dose | 61.50 | 30 dose OP | ✔ Incruse Ellipta |

Long-Acting Muscarinic Antagonists with Long-Acting Beta-Adrenoceptor Agonists

Combination long acting muscarinic antagonist and long acting beta-2 agonist will not be subsidised if patient is also receiving treatment with a combination inhaled corticosteroid and long acting beta-2 agonist.

**SA1584** Special Authority for Subsidy

*Initial application* from any relevant practitioner. Approvals valid for 2 years for applications meeting the following criteria:

Both:

1. Patient has been stabilised on a long acting muscarinic antagonist; and
2. The prescriber considers that the patient would receive additional benefit from switching to a combination product.

*Renewal* from any relevant practitioner. Approvals valid for 2 years for applications meeting the following criteria:

Both:

1. Patient is compliant with the medication; and
2. Patient has experienced improved COPD symptom control (prescriber determined).

GLYCOPPYRRONIUM WITH INDACATEROL – Special Authority see SA1584 above – Retail pharmacy

| Powder for Inhalation 50 mcg with indacaterol 110 mcg | 81.00 | 30 dose OP | ✔ Ultibro Breezhaler |

TIOTROPIUM BROMIDE WITH OLODATELOR – Special Authority see SA1584 above – Retail pharmacy

| Soln for inhalation 2.5 mcg with olodaterol 2.5 mcg | 81.00 | 60 dose OP | ✔ Spiolto Respimat |

UMECLIDINIUM WITH VILANTEROL – Special Authority see SA1584 above – Retail pharmacy

| Powder for inhalation 62.5 mcg with vilanterol 25 mcg | 77.00 | 30 dose OP | ✔ Anoro Ellipta |

Antifibrotics

NINTEDANIB – Special Authority see SA1755 below – Retail pharmacy

Note: Nintedanib not subsidised in combination with subsidised pirfenidone.

| Cap 100 mg | 2,554.00 | 60 OP | ✔ Ofev |
| Cap 150 mg | 3,870.00 | 60 OP | ✔ Ofev |

**SA1755** Special Authority for Subsidy

*Initial application* — *(idiopathic pulmonary fibrosis)* only from a respiratory specialist. Approvals valid for 12 months for applications meeting the following criteria:

All of the following:

1. Patient has been diagnosed with idiopathic pulmonary fibrosis by a multidisciplinary team including a radiologist; and

continued…
continued...

2 Forced vital capacity is between 50% and 90% predicted; and
3 Nintedanib is to be discontinued at disease progression (See Note); and
4 Nintedanib is not to be used in combination with subsidised pirfenidone; and
5 Any of the following:
   5.1 The patient has not previously received treatment with pirfenidone; or
   5.2 Patient has previously received pirfenidone, but discontinued pirfenidone within 12 weeks due to intolerance; or
   5.3 Patient has previously received pirfenidone, but the patient's disease has not progressed (disease progression
defined as 10% or more decline in predicted FVC within any 12 month period since starting treatment with
pirfenidone).

Renewal — *(idiopathic pulmonary fibrosis)* only from a respiratory specialist. Approvals valid for 12 months for applications
meeting the following criteria:
All of the following:
1 Treatment remains clinically appropriate and patient is benefitting from and tolerating treatment; and
2 Nintedanib is not to be used in combination with subsidised pirfenidone; and
3 Nintedanib is to be discontinued at disease progression (See Note).

Note: disease progression is defined as a decline in percent predicted FVC of 10% or more within any 12 month period.

PIRFENIDONE — Retail pharmacy-Specialist – Special Authority see SA1748 below
Note: Pirfenidone is not subsidised in combination with subsidised nintedanib.

Cap 267 mg – Wastage claimable...............................................3,645.00 270 ✔ Esbriet

**SA1748** Special Authority for Subsidy

Initial application — *(idiopathic pulmonary fibrosis)* only from a respiratory specialist. Approvals valid for 12 months for
applications meeting the following criteria:
All of the following:
1 Patient has been diagnosed with idiopathic pulmonary fibrosis by a multidisciplinary team including a radiologist; and
2 Forced vital capacity is between 50% and 80% predicted; and
3 Pirfenidone is to be discontinued at disease progression (See Note); and

#### SA1680 Special Authority for Subsidy

**Initial application — (Diabetic macular oedema)** only from an ophthalmologist. Approvals valid for 12 months for applications meeting the following criteria:

- All of the following:
  1. Patient has diabetic macular oedema with pseudophakic lens; and
  2. Patient has reduced visual acuity of between 6/9 - 6/48 with functional awareness of reduction in vision; and
  3. Either:
     1. Patient's disease has progressed despite 3 injections with bevacizumab; or
     2. Patient is unsuitable or contraindicated to treatment with anti-VEGF agents; and
  4. Dexamethasone implants are to be administered not more frequently than once every 4 months into each eye, and up to a maximum of 3 implants per eye per year.

**Renewal — (Diabetic macular oedema)** only from an ophthalmologist. Approvals valid for 12 months for applications meeting the following criteria:

- Both:
  1. Patient's vision is stable or has improved (prescriber determined); and
  2. Dexamethasone implants are to be administered not more frequently than once every 4 months into each eye, and up to a maximum of 3 implants per eye per year.

**Initial application — (Women of child bearing age with diabetic macular oedema)** only from an ophthalmologist. Approvals valid for 12 months for applications meeting the following criteria:

- All of the following:
  1. Patient has diabetic macular oedema; and
  2. Patient has reduced visual acuity of between 6/9 - 6/48 with functional awareness of reduction in vision; and
  3. Patient is of child bearing potential and has not yet completed a family; and
  4. Dexamethasone implants are to be administered not more frequently than once every 4 months into each eye, and up to a maximum of 3 implants per eye per year.

**Renewal — (Women of child bearing age with diabetic macular oedema)** only from an ophthalmologist. Approvals valid for 12 months for applications meeting the following criteria:

### Preservative Free Ocular Lubricants

**SA1388** Special Authority for Subsidy

**Initial application** from any relevant practitioner. Approvals valid for 12 months for applications meeting the following criteria:
- Both:
  - 1. Confirmed diagnosis by slit lamp of severe secretory dry eye; and
  - 2. Either:
    - 2.1 Patient is using eye drops more than four times daily on a regular basis; or
    - 2.2 Patient has had a confirmed allergic reaction to preservative in eye drop.

**Renewal** from any relevant practitioner. Approvals valid for 24 months where the patient continues to require lubricating eye drops and has benefited from treatment.

➽ SA1492 Special Authority for Subsidy

Initial application only from a haematologist. Approvals valid for 2 years for applications meeting the following criteria:
All of the following:
1. The patient has been diagnosed with chronic iron overload due to congenital inherited anaemia; and
2. Deferasirox is to be given at a daily dose not exceeding 40 mg/kg/day; and
3. Any of the following:
   3.1 Treatment with maximum tolerated doses of deferiprone monotherapy or deferiprone and desferrioxamine combination therapy have proven ineffective as measured by serum ferritin levels, liver or cardiac MRI T2*; or
   3.2 Treatment with deferiprone has resulted in severe persistent vomiting or diarrhoea; or
   3.3 Treatment with deferiprone has resulted in arthritis; or
   3.4 Treatment with deferiprone is contraindicated due to a history of agranulocytosis (defined as an absolute neutrophil count (ANC) of < 0.5 cells per µL) or recurrent episodes (greater than 2 episodes) of moderate neutropenia (ANC 0.5 - 1.0 cells per µL).

Renewal only from a haematologist. Approvals valid for 2 years for applications meeting the following criteria:
Either:
1. For the first renewal following 2 years of therapy, the treatment has been tolerated and has resulted in clinical improvement in all three parameters namely serum ferritin, cardiac MRI T2* and liver MRI T2* levels; or
2. For subsequent renewals, the treatment has been tolerated and has resulted in clinical stability or continued improvement in all three parameters namely serum ferritin, cardiac MRI T2* and liver MRI T2* levels.

## Standard Formulae

### ACETYLCESTEINE EYE DROPS
- Acetylcysteine inj 200 mg per ml, 10 ml
- Suitable eye drop base

**ASPIRIN AND CHLOROFORM APPLICATION**
- Aspirin Soluble tabs 300 mg
- Chloroform

**CODEINE LINCTUS PAEDIATRIC (3 mg per 5 ml)**
- Codeine phosphate 60 mg
- Glycerol 40 ml
- Preservative
- Water to 100 ml

**CODEINE LINCTUS DIABETIC (15 mg per 5 ml)**
- Codeine phosphate 300 mg
- Glycerol 40 ml
- Preservative
- Water to 100 ml

**FOLINIC MOUTHWASH**
- Calcium folinate 15 mg tab
- Preservative
- Water
- (Preservative should be used if quantity supplied is for more than 5 days. Maximum 500 ml per prescription.)

**MAGNESIUM HYDROXIDE 8% MIXTURE**
- Magnesium hydroxide paste 29%
- Methyl hydroxybenzoate 1.5 g
- Water to 1,000 ml

**METHADONE MIXTURE**
- Methadone powder
- Glycerol
- Water
- (Use 1 ml of the 10% solution per 100 ml of oral liquid mixture)

**METHYL HYDROXYBENOZATE 10% SOLUTION**
- Methyl hydroxybenzoate 10 g
- Propylene glycol
- Water

**OMEPRAZOLE SUSPENSION**
- Omeprazole capules or powder
- Sodium bicarbonate powder BP 8.4 g
- Water

**PHENOBARBITONE ORAL LIQUID**
- Phenobarbitone Sodium 1 g
- Glycerol BP 70 ml
- Water to 100 ml

**PHENOBARBITONE SODIUM PAEDIATRIC ORAL LIQUID (10 mg per ml)**
- Phenobarbitone Sodium 400 mg
- Glycerol BP 4 ml
- Water to 40 ml

**PILOCARPINE ORAL LIQUID**
- Pilocarpine 4% eye drops
- Preservative
- Water to 500 ml

**SALIVA SUBSTITUTE FORMULA**
- Methylcellulose 5 g
- Preservative
- Water
- (Preservative should be used if quantity supplied is for more than 5 days. Maximum 500 ml per prescription.)

**SODIUM CHLORIDE ORAL LIQUID**
- Sodium chloride inj 23.4%, 20 ml
- Water

**VANCOMYCIN ORAL SOLUTION (50 mg per ml)**
- Vancomycin 500 mg injection 10 vials
- Glycerol BP 40 ml
- Water

**VOSOL EAR DROPS**
- Hydrocortisone powder 1%
- Vosol Ear Drops
- (Use 1 ml of the 10% solution per 100 ml of oral liquid mixture)

Specialised And Elemental Products

**SA1377** Special Authority for Subsidy

Initial application only from a dietitian, relevant specialist or vocationally registered general practitioner. Approvals valid for 1 year for applications meeting the following criteria:

Any of the following:

1. malabsorption; or
2. short bowel syndrome; or
3. enterocutaneous fistulas; or
4. eosinophilic oesophagitis; or
5. inflammatory bowel disease; or
6. patients with multiple food allergies requiring enteral feeding.

Notes: Each of these products is highly specialised and would be prescribed only by an expert for a specific disorder. The alternative is hospitalisation.

Elemental 028 Extra is more expensive than other products listed in this section and should only be used where the alternatives have been tried first and/or are unsuitable.

Renewal only from a dietitian, relevant specialist, vocationally registered general practitioner or general practitioner on the recommendation of a dietitian, relevant specialist or vocationally registered general practitioner. Approvals valid for 1 year for applications meeting the following criteria:

Both:

1. The treatment remains appropriate and the patient is benefiting from treatment; and
2. General Practitioners must include the name of the dietitian, relevant specialist or vocationally registered general practitioner and date contacted.
### Paediatric Products For Children With Low Energy Requirements

**SA1196** Special Authority for Subsidy

**Initial application** only from a dietitian, relevant specialist or vocationally registered general practitioner. Approvals valid for 1 year for applications meeting the following criteria:

Both:

1. Child aged one to eight years; and
2. The child has a low energy requirement but normal protein and micronutrient requirements.

**Renewal** only from a dietitian, relevant specialist, vocationally registered general practitioner or general practitioner on the recommendation of a dietitian, relevant specialist or vocationally registered general practitioner. Approvals valid for 1 year for applications meeting the following criteria:

Both:

1. The treatment remains appropriate and the patient is benefiting from treatment; and
2. General Practitioners must include the name of the dietitian, relevant specialist or vocationally registered general practitioner and date contacted.

High Calorie Products

**SA1195** Special Authority for Subsidy

**Initial application — (Cystic fibrosis)** only from a dietitian, relevant specialist or vocationally registered general practitioner. Approvals valid for 3 years for applications meeting the following criteria:

All of the following:
1. Cystic fibrosis; and
2. other lower calorie products have been tried; and
3. patient has substantially increased metabolic requirements.

**Initial application — (Indications other than cystic fibrosis)** only from a dietitian, relevant specialist or vocationally registered general practitioner. Approvals valid for 1 year for applications meeting the following criteria:

All of the following:
1. Any of the following:
   1.1 any condition causing malabsorption; or
   1.2 faltering growth in an infant/child; or
   1.3 increased nutritional requirements; or
   1.4 fluid restricted; and
2. other lower calorie products have been tried; and
3. patient has substantially increased metabolic requirements or is fluid restricted.

**Renewal — (Cystic fibrosis)** only from a dietitian, relevant specialist, vocationally registered general practitioner or general practitioner on the recommendation of a dietitian, relevant specialist or vocationally registered general practitioner. Approvals valid for 3 years for applications meeting the following criteria:

Both:
1. The treatment remains appropriate and the patient is benefiting from treatment; and
2. General Practitioners must include the name of the dietitian, relevant specialist or vocationally registered general practitioner and date contacted.

**Renewal — (Indications other than cystic fibrosis)** only from a dietitian, relevant specialist, vocationally registered general practitioner or general practitioner on the recommendation of a dietitian, relevant specialist or vocationally registered general practitioner. Approvals valid for 1 year for applications meeting the following criteria:

Both:
1. The treatment remains appropriate and the patient is benefiting from treatment; and
2. General Practitioners must include the name of the dietitian, relevant specialist or vocationally registered general practitioner and date contacted.

### Gluten Free Foods

The funding of gluten free foods is no longer being actively managed by PHARMAC from 1 April 2011. This means that we are no longer considering the listing of new products, or making subsidy, or other changes to the existing listings. As a result we anticipate that the range of funded items will reduce over time. Management of Coeliac disease with a gluten free diet is necessary for good outcomes. A range of gluten free options are available through retail outlets.

**SA1729 Special Authority for Subsidy**

**Initial application** only from a dietitian, relevant specialist or vocationally registered general practitioner. Approvals valid without further renewal unless notified for applications meeting the following criteria:

Either:

1. Gluten enteropathy has been diagnosed by biopsy; or
2. Patient suffers from dermatitis herpetiformis.

**Initial application** (paediatric patients diagnosed by ESPGHAN criteria) only from a paediatric gastroenterologist. Approvals valid without further renewal unless notified where the paediatric patient fulfils ESPGHAN criteria for biopsy free diagnosis of coeliac disease.

Infant Formulae

For Williams Syndrome

**SA1110** Special Authority for Subsidy

**Initial application** only from a dietitian, relevant specialist or vocationally registered general practitioner. Approvals valid for 1 year where the patient is an infant suffering from Williams Syndrome and associated hypercalcaemia.

**Renewal** only from a dietitian, relevant specialist, vocationally registered general practitioner or general practitioner on the recommendation of a dietitian, relevant specialist or vocationally registered general practitioner. Approvals valid for 1 year for applications meeting the following criteria:

Both:

1. The treatment remains appropriate and the patient is benefiting from treatment; and
2. General Practitioners must include the name of the dietitian, relevant specialist or vocationally registered general practitioner and date contacted.

**LOW CALCIUM INFANT FORMULA** – Special Authority see **SA1110** above – Hospital pharmacy [HP3]

| Powder | 44.40 | 400 g OP | ✔ Locasol |

Gastrointestinal and Other Malabsorptive Problems

**AMINO ACID FORMULA** – Special Authority see **SA1219** below – Hospital pharmacy [HP3]

| Powder | 43.60 | 400 g OP |
| Powder (unflavoured) | 53.00 | 400 g OP |

| Powder (vanilla) | 53.00 | 400 g OP |

*(Neocate LCP Powder to be delisted 1 May 2019)*

**SA1219** Special Authority for Subsidy

**Initial application** only from a dietitian, relevant specialist or vocationally registered general practitioner. Approvals valid for 6 months for applications meeting the following criteria:

Any of the following:

1. Extensively hydrolysed formula has been reasonably trialled and is inappropriate due to documented severe intolerance or allergy or malabsorption; or
2. History of anaphylaxis to cows milk protein formula or dairy products; or
3. Eosinophilic oesophagitis.

Note: A reasonable trial is defined as a 2-4 week trial.

**Renewal** only from a dietitian, relevant specialist, vocationally registered general practitioner or general practitioner on the recommendation of a dietitian, relevant specialist or vocationally registered general practitioner. Approvals valid for 6 months for applications meeting the following criteria:

All of the following:

1. An assessment as to whether the infant can be transitioned to a cows milk protein, soy, or extensively hydrolysed infant formula has been undertaken; and
2. The outcome of the assessment is that the infant continues to require an amino acid infant formula; and
3. General Practitioners must include the name of the dietitian, relevant specialist or vocationally registered general practitioner and date contacted.

**SA1557** Special Authority for Subsidy

**Initial application** only from a dietitian, relevant specialist or vocationally registered general practitioner. Approvals valid for 6 months for applications meeting the following criteria:

Any of the following:

1. Both:
   1.1 Cows milk formula is inappropriate due to severe intolerance or allergy to its protein content; and
   1.2 Either:
      1.2.1 Soy milk formula has been reasonably trialled without resolution of symptoms; or
      1.2.2 Soy milk formula is considered clinically inappropriate or contraindicated; or
2. Severe malabsorption; or
3. Short bowel syndrome; or
4. Intractable diarrhoea; or
5. Biliary atresia; or
6. Cholestatic liver diseases causing malsoroption; or
7. Cystic fibrosis; or
8. Proven fat malabsorption; or
9. Severe intestinal motility disorders causing significant malabsorption; or
10. Intestinal failure; or
11. All of the following:
    11.1 For step down from Amino Acid Formula; and
    11.2 The infant is currently receiving funded amino acid formula; and
    11.3 The infant is to be trialled on, or transitioned to, an extensively hydrolysed formula; and
    11.4 General Practitioners must include the name of the dietitian, relevant specialist or vocationally registered general practitioner and the date contacted.

Note: A reasonable trial is defined as a 2-4 week trial, or signs of an immediate IgE mediated allergic reaction.

**Renewal** only from a dietitian, relevant specialist, vocationally registered general practitioner or general practitioner on the recommendation of a dietitian, relevant specialist or vocationally registered general practitioner. Approvals valid for 6 months for applications meeting the following criteria:

All of the following:

1. An assessment as to whether the infant can be transitioned to a cows milk protein or soy infant formula has been undertaken; and
2. The outcome of the assessment is that the infant continues to require an extensively hydrolysed infant formula; and
3. General Practitioners must include the name of the dietitian, relevant specialist or vocationally registered general practitioner and the date contacted.

</tbody>
</table>

**SA1698** Special Authority for Subsidy

**Initial application** only from a paediatrician, dietitian or general practitioner on the recommendation of a paediatrician or dietitian. Approvals valid for 12 months for applications meeting the following criteria:

All of the following:

1. Patient is fluid restricted or volume intolerant and has been diagnosed with faltering growth; and
2. Patient is under the care of a paediatrician or dietitian who has recommended treatment with a high energy infant formula;
continued…

and

3 Patient is under 18 months of age or weighs less than 8 kg.

Note: 'Volume intolerant' patients are those who are unable to tolerate an adequate volume of infant formula to achieve expected growth rate. These patients should have first trialled appropriate clinical alternative treatments, such as concentrating, fortifying and adjusting the frequency of feeding.

Renewal only from a paediatrician, dietitian or general practitioner on the recommendation of a paediatrician or dietitian. Approvals valid for 6 months for applications meeting the following criteria:

All of the following:

1 Patient continues to be fluid restricted or volume intolerant and has faltering growth; and

2 Patient is under the care of a hospital paediatrician or dietitian who has recommended treatment with a high energy infant formula; and

3 Patient is under 18 months of age or weighs less than 8 kg.

Note: 'Volume intolerant' patients are those who are unable to tolerate an adequate volume of infant formula to achieve expected growth rate. These patients should have first trialled appropriate clinical alternative treatments, such as concentrating, fortifying and adjusting the frequency of feeding.

Ketogenic Diet

Special Authority for Subsidy

_initial application_ only from a metabolic physician or paediatric neurologist. Approvals valid for 3 months where the patient has intractable epilepsy, pyruvate dehydrogenase deficiency or glucose transported type-1 deficiency and other conditions requiring a ketogenic diet.

Renewal only from a metabolic physician or paediatric neurologist. Approvals valid for 2 years where the patient is on a ketogenic diet and the patient is benefiting from the diet.

Any of the following:
1) For vaccination of patients aged 45 and 65 years old; or
2) For vaccination of previously unimmunised or partially immunised patients; or
3) For revaccination following immunosuppression; or
4) For boosting of patients with tetanus-prone wounds; or
5) For use in testing for primary immunodeficiency diseases, on the recommendation of an internal medicine physician or paediatrician.

Note: Please refer to the Immunisation Handbook for appropriate schedule for catch up programmes.

BACILLUS CALMETTE-GUERIN VACCINE – [Xpharm]

For infants at increased risk of tuberculosis. Increased risk is defined as:
1) living in a house or family with a person with current or past history of TB; or
2) having one or more household members or carers who within the last 5 years lived in a country with a rate of TB > or equal to 40 per 100,000 for 6 months or longer; or
3) during their first 5 years will be living 3 months or longer in a country with a rate of TB > or equal to 40 per 100,000

Note a list of countries with high rates of TB are available at www.health.govt.nz/tuberculosis (search for downloads) or www.bcgatlas.org/index.php.

Inj Mycobacterium bovis BCG (Bacillus Calmette-Guerin),
Danish strain 1331, live attenuated, vial with diluent…………………..0.00

BCG Vaccine

DIPHTHERIA, TETANUS AND PERTUSSIS VACCINE – [Xpharm]

Funded for any of the following criteria:
1) A single vaccine for pregnant woman between gestational weeks 28 and 38; or
2) A course of up to four vaccines is funded for children from age 7 up to the age of 18 years inclusive to complete full primary immunisation; or
3) An additional four doses (as appropriate) are funded for (re-)immunisation for patients post haematopoietic stem cell transplantation or chemotherapy; pre or post splenectomy; pre- or post solid organ transplant, renal dialysis and other severely immunosuppressive regimens.

Notes: Tdap is not registered for patients aged less than 10 years. Please refer to the Immunisation Handbook for appropriate schedule for catch up programmes.

Inj 2 IU diphtheria toxoid with 20 IU tetanus toxoid, 8 mcg
pertussis toxoid, 8 mcg pertussis filamentous
haemaglutinin and 2.5 mcg pertactin in 0.5 ml syringe…………………..0.00

Boostrix

DIPHTHERIA, TETANUS, PERTUSSIS AND POLIO VACCINE – [Xpharm]

Funded for any of the following:
1) A single dose for children up to the age of 7 who have completed primary immunisation; or
2) A course of four vaccines is funded for catch up programmes for children (to the age of 10 years) to complete full primary immunisation; or
3) An additional four doses (as appropriate) are funded for (re-)immunisation for patients post HSCT, or chemotherapy; pre- or post splenectomy; pre- or post solid organ transplant, renal dialysis and other severely immunosuppressive regimens; or
4) Five doses will be funded for children requiring solid organ transplantation.

Note: Please refer to the Immunisation Handbook for appropriate schedule for catch up programmes.

Inj 30 IU diphtheria toxoid with 40 IU tetanus toxoid, 25 mcg
pertussis toxoid, 25 mcg pertussis filamentous
haemaglutinin and 80 D-antigen units
poliomyelitis virus in 0.5ml syringe…………………………………0.00

INFLUENZA VACCINE

Inj 60 mcg in 0.5 ml syringe (paediatric quadrivalent vaccine) –

[Xpharm]............................................................................................................ 9.00 1 ✔ Fluarix Tetra

A) INFLUENZA VACCINE – child aged 6 months to 35 months

is available each year for patients aged 6 months to 35 months who meet the following criteria, as set by PHARMAC:

i) have any of the following cardiovascular diseases
   a) ischaemic heart disease, or
   b) congestive heart failure, or
   c) rheumatic heart disease, or
   d) congenital heart disease, or
   e) cerebro-vascular disease; or

ii) have either of the following chronic respiratory diseases:
   a) asthma, if on a regular preventative therapy, or
   b) other chronic respiratory disease with impaired lung function; or

iii) have diabetes; or

iv) have chronic renal disease; or

v) have any cancer, excluding basal and squamous skin cancers if not invasive; or

vi) have any of the following other conditions:
   a) autoimmune disease, or
   b) immune suppression or immune deficiency, or
   c) HIV, or
   d) transplant recipients, or
   e) neuromuscular and CNS diseases/disorders, or
   f) haemoglobinopathies, or
   g) on long term aspirin, or
   h) have a cochlear implant, or
   i) errors of metabolism at risk of major metabolic decompensation, or
   j) pre and post splenectomy, or
   k) down syndrome, or

vii) have been hospitalised for respiratory illness or have a history of significant respiratory illness;

Unless meeting the criteria set out above, the following conditions are excluded from funding:

a) asthma not requiring regular preventative therapy,

b) hypertension and/or dyslipidaemia without evidence of end-organ disease.

B) Doctors are the only Contractors entitled to claim payment from the Funder for the supply of influenza vaccine inj 60 mcg in 0.5 ml syringe (paediatric quadrivalent vaccine) to patients eligible under the above criteria for subsidised immunisation and they may only do so in respect of the influenza vaccine listed in the Pharmaceutical Schedule.

Inj 60 mcg in 0.5 ml syringe (quadrivalent vaccine).................................90.00 10 ✔ Influvac Tetra

▲Three months supply may be dispensed at one time if endorsed "certified exemption" by the prescriber or pharmacist.

❋Three months or six months, as applicable, dispensed all-at-once
a) Only on a prescription
b) No patient co-payment payable
c) A) **INFLUENZA VACCINE – people 3 years and over**

is available each year for patients aged 3 years and over who meet the following criteria, as set by PHARMAC:

a) all people 65 years of age and over; or
b) people under 65 years of age who:
   i) have any of the following cardiovascular diseases:
      a) ischaemic heart disease, or
      b) congestive heart failure, or
      c) rheumatic heart disease, or
      d) congenital heart disease, or
      e) cerebro-vascular disease; or
   ii) have either of the following chronic respiratory diseases:
      a) asthma, if on a regular preventative therapy, or
      b) other chronic respiratory disease with impaired lung function; or
   iii) have diabetes; or
iv) have chronic renal disease; or
v) have any cancer, excluding basal and squamous skin cancers if not invasive; or
vi) have any of the following other conditions:
   a) autoimmune disease, or
   b) immune suppression or immune deficiency, or
   c) HIV, or
   d) transplant recipients, or
   e) neuromuscular and CNS diseases/disorders, or
   f) haemoglobinopathies, or
   g) are children on long term aspirin, or
   h) have a cochlear implant, or
   i) errors of metabolism at risk of major metabolic decompensation, or
   j) pre and post splenectomy, or
   k) down syndrome, or
vii) are pregnant; or

   c) children aged four years or less (but over three years) who have been hospitalised for respiratory illness or have a history of significant respiratory illness;

Unless meeting the criteria set out above, the following conditions are excluded from funding:

a) asthma not requiring regular preventative therapy,
b) hypertension and/or dyslipidaemia without evidence of end-organ disease.

B) Contractors will be entitled to claim payment from the Funder for the supply of influenza vaccine to patients eligible under the above criteria pursuant to their contract with their DHB for subsidised immunisation, and they may only do so in respect of the influenza vaccine listed in the Pharmaceutical Schedule.

C) Contractors may only claim for patient populations within the criteria that are covered by their contract, which may be a sub-set of the population described in paragraph A above.

**MEASLES, MUMPS AND RUBELLA VACCINE – [Xpharm]**

A maximum of two doses for any patient meeting the following criteria:

1) For primary vaccination in children; or
2) For revaccination following immunosuppression; or
3) For any individual susceptible to measles, mumps or rubella; or
4) A maximum of three doses for children who have had their first dose prior to 12 months.

Note: Please refer to the Immunisation Handbook for appropriate schedule for catch up programmes.

Inj, measles virus 1,000 CCID50, mumps virus 5,012 CCID50, Rubella virus 1,000 CCID50; prefilled syringe/ampoule of diluent 0.5 ml ................................................................. 0.00 10 ✔ Priorix
### Meningococcal (Groups A, C, Y and W-135) Conjugate Vaccine – [Xpharm]

Any of the following:

1. Up to three doses and a booster every five years for patients pre- and post splenectomy and for patients with functional or anatomic asplenia, HIV, complement deficiency (acquired or inherited), or pre or post solid organ transplant; or
2. One dose for close contacts of meningococcal cases; or
3. A maximum of two doses for bone marrow transplant patients; or
4. A maximum of two doses for patients following immunosuppression*.

Note: children under seven years of age require two doses 8 weeks apart, a booster dose three years after the primary series and then five yearly.

*Immunosuppression due to steroid or other immunosuppressive therapy must be for a period of greater than 28 days.

Inj 4 mcg of each meningococcal polysaccharide conjugated to a total of approximately 48 mcg of diphtheria toxoid carrier per 0.5 ml vial ......................................................... 0.00 1 ✔ **Menactra**

### Meningococcal C Conjugate Vaccine – [Xpharm]

Any of the following:

1. Up to three doses and a booster every five years for patients pre- and post splenectomy and for patients with functional or anatomic asplenia, HIV, complement deficiency (acquired or inherited), or pre or post solid organ transplant; or
2. One dose for close contacts of meningococcal cases; or
3. A maximum of two doses for bone marrow transplant patients; or
4. A maximum of two doses for patients following immunosuppression*.

Note: children under seven years of age require two doses 8 weeks apart, a booster dose three years after the primary series and then five yearly.

*Immunosuppression due to steroid or other immunosuppressive therapy must be for a period of greater than 28 days.

Inj 10 mcg in 0.5 ml syringe .......................................................... 0.00 1 ✔ **Neisvac-C**

### Pneumococcal (PCV10) Conjugate Vaccine – [Xpharm]

Either:

1. A primary course of four doses for previously unvaccinated individuals up to the age of 59 months inclusive; or
2. Up to three doses as appropriate to complete the primary course of immunisation for individuals under the age of 59 months who have received one to three doses of PCV13.

Note: please refer to the Immunisation Handbook for the appropriate schedule for catch up programmes.

Inj 1 mcg of pneumococcal polysaccharide serotypes 1, 5, 6B, 7F, 9V, 14 and 23F; 3 mcg of pneumococcal polysaccharide serotypes 4, 18C and 19F in 0.5 ml prefilled syringe ................................................................. 0.00 10 ✔ **Synflorix**
PNEUMOCOCCAL (PCV13) CONJUGATE VACCINE – [Xpharm]

Any of the following:

1) One dose is funded for high risk children (over the age of 17 months and under 18 years) who have previously received four doses of PCV10; or

2) Up to an additional four doses (as appropriate) are funded for high risk children aged under 5 years for (re-)immunisation of patients with any of the following:
   a) on immunosuppressive therapy or radiation therapy, vaccinate when there is expected to be a sufficient immune response; or
   b) with primary immune deficiencies; or
   c) with HIV infection; or
   d) with renal failure, or nephrotic syndrome; or
   e) who are immune-suppressed following organ transplantation (including haematopoietic stem cell transplant); or
   f) with cochlear implants or intracranial shunts; or
   g) with cerebrospinal fluid leaks; or
   h) receiving corticosteroid therapy for more than two weeks, and who are on an equivalent daily dosage of prednisone of 2 mg/kg per day or greater, or children who weigh more than 10 kg on a total daily dosage of 20 mg or greater; or
   i) with chronic pulmonary disease (including asthma treated with high-dose corticosteroid therapy); or
   j) pre term infants, born before 28 weeks gestation; or
   k) with cardiac disease, with cyanosis or failure; or
   l) with diabetes; or
   m) with Down syndrome; or
   n) who are pre-or post-splenectomy, or with functional asplenia; or

3) Up to an additional four doses (as appropriate) are funded for (re-)immunisation of patients 5 years and over with HIV, for patients pre or post haematopoietic stem cell transplantation, or chemotherapy; pre- or post splenectomy; functional asplenia, pre- or post- solid organ transplant, renal dialysis, complement deficiency (acquired or inherited), cochlear implants, or primary immunodeficiency; or

4) For use in testing for primary immunodeficiency diseases, on the recommendation of an internal medicine physician or paediatrician.

Note: please refer to the Immunisation Handbook for the appropriate schedule for catch up programmes

Inj 30.8 mcg of pneumococcal polysaccharide serotypes 1, 3, 4, 5, 6A, 6B, 7F, 9V, 14, 18C, 19A, 19F and 23F in 0.5ml syringe..........................................................................................0.00

10 ✔ Prevenar 13

1 ✔ Prevenar 13
PNEUMOCOCCAL (PPV23) POLYSACCHARIDE VACCINE – [Xpharm]

Either:

1) Up to three doses (as appropriate) for patients with HIV, for patients post haematopoietic stem cell transplant, or chemotherapy; pre- or post-splenectomy or with functional asplenia, pre- or post-solid organ transplant, renal dialysis, complement deficiency (acquired or inherited), cochlear implants, or primary immunodeficiency; or

2) All of the following:
   a) Patient is a child under 18 years for (re-)immunisation; and
   b) Treatment is for a maximum of two doses; and
   c) Any of the following:
      i) on immunosuppressive therapy or radiation therapy, vaccinate when there is expected to be a sufficient immune response; or
      ii) with primary immune deficiencies; or
      iii) with HIV infection; or
      iv) with renal failure, or nephrotic syndrome; or
      v) who are immune-suppressed following organ transplantation (including haematopoietic stem cell transplant); or
      vi) with cochlear implants or intracranial shunts; or
      vii) with cerebrospinal fluid leaks; or
      viii) receiving corticosteroid therapy for more than two weeks, and who are on an equivalent daily dosage of prednisone of 2 mg/kg per day or greater, or children who weigh more than 10 kg on a total daily dosage of 20 mg or greater; or
      ix) with chronic pulmonary disease (including asthma treated with high-dose corticosteroid therapy); or
      x) pre term infants, born before 28 weeks gestation; or
      xi) with cardiac disease, with cyanosis or failure; or
      xii) with diabetes; or
      xiii) with Down syndrome; or
      xiv) who are pre-or post-splenectomy, or with functional asplenia.

Inj 575 mcg in 0.5 ml prefilled syringe (25 mcg of each 23 pneumococcal serotype) .........................................................0.00 1 ✔ Pneumovax 23

POLIOMYELITIS VACCINE – [Xpharm]

Up to three doses for patients meeting either of the following:

1) For partially vaccinated or previously unvaccinated individuals; or
2) For revaccination following immunosuppression.

Note: Please refer to the Immunisation Handbook for appropriate schedule for catch-up programmes.

Inj 80D antigen units in 0.5 ml syringe.................................................0.00 1 ✔ IPOL

ROTA VIRUS ORAL VACCINE – [Xpharm]

Maximum of two doses for patients meeting the following:

1) first dose to be administered in infants aged under 14 weeks of age; and
2) no vaccination being administered to children aged 24 weeks or over.

Oral susp live attenuated human rotavirus
1,000,000 CCID50 per dose, prefilled oral applicator........................0.00 10 ✔ Rotarix

Three months supply may be dispensed at one time if endorsed “certified exemption” by the prescriber or pharmacist.

### VARICELLA VACCINE [CHICKENPOX VACCINE] – [Xpharm]

Eeither:

1. Maximum of one dose for primary vaccination for either:
   a) Any infant born on or after 1 April 2016; or
   b) For previously unvaccinated children turning 11 years old on or after 1 July 2017, who have not previously had a varicella infection (chickenpox), or

2. Maximum of two doses for any of the following:
   a) Any of the following for non-immune patients:
      i) with chronic liver disease who may in future be candidates for transplantation; or
      ii) with deteriorating renal function before transplantation; or
      iii) prior to solid organ transplant; or
      iv) prior to any elective immunosuppression*, or
      v) for post exposure prophylaxis who are immune competent inpatients; or
   b) For patients at least 2 years after bone marrow transplantation, on advice of their specialist, or
   c) For patients at least 6 months after completion of chemotherapy, on advice of their specialist, or
   d) For HIV positive non immune to varicella with mild or moderate immunosuppression on advice of HIV specialist, or
   e) For patients with inborn errors of metabolism at risk of major metabolic decompensation, with no clinical history of varicella, or
   f) For household contacts of paediatric patients who are immunocompromised, or undergoing a procedure leading to immune compromise where the household contact has no clinical history of varicella, or
   g) For household contacts of adult patients who have no clinical history of varicella and who are severely immunocompromised, or undergoing a procedure leading to immune compromise where the household contact has no clinical history of varicella.

* immunosuppression due to steroid or other immunosuppressive therapy must be for a treatment period of greater than 28 days
