

Dermatological ECPs

For an ECP to be Subsidised, it must contain 2 or more Subsidised component Pharmaceuticals listed in the Schedule

1. **Dermatological Base:** All pharmaceuticals listed under "[barrier creams and emollients](#)" in the Schedule. [Proprietary topical corticosteroids - plain](#) are subsidised dermatological bases that may be diluted with another dermatological base. [Collodion flexible](#) is dermatological base.

2. **Dermatological Galenical:** Identified in the Schedule with the restriction:

- 1) Only in combination with a dermatological base or proprietary topical corticosteroid-plain
- 2) with or without other dermatological galenicals

* Hydrocortisone powder is subsidised only in combination with a barrier cream/emollient, not with a proprietary topical corticosteroid-plain
