

Fucithalmic eye drops

There is a supply issue affecting your eye drops

What's happening

The supplier has run out of your usual eye drops because of changes at the manufacturing plant.

It has brought in a different brand of fusidic acid eye drops to make sure you can continue to access your treatment.

Your usual eye drops will be available again by mid-2025.

Same medicine, different label

The eye drops contain the same active ingredient, in the same amount. They are made by the same people who make your usual brand in the same factory.

The label is in Spanish and English.

Box label not shown to scale.

Not Medsafe-approved

Medsafe has not approved this medicine for sale in New Zealand. This means your prescriber and pharmacist have extra steps to follow, including talking to you about what this means and getting your informed consent.

You can find more information about unapproved medicines at:

www.healthify.nz/unapproved-medicines

You may need a new prescription

Because the new brand is not Medsafe-approved, you might need a new prescription rather than collecting your repeat.

More information

You can find more information about this issue on our website.
