

New look omeprazole capsules

New look, same amount of active ingredient

Teva, the supplier, has changed the look of your omeprazole capsules.

This is the same medicine

Your medicine has a new capsule size and colour. The new capsules will work in your body the same way.

While the capsule might be **smaller**, the amount of active ingredient **remains the same**.

There have been some minor changes to the inactive ingredients included in the capsules.

Medsafe has approved the new capsules. They are assured that they are safe and effective.

The bottles that the capsules come in are also changing size and have a new label.
