

# Calcitonin (Miacalcic) injections

## Supply issue

### Your Miacalcic injection looks different

The supplier has run out of your usual injections.

To make sure you can continue to access your treatment, we have funded this alternative.

### Made in the same factory

This product is made in the same factory as your usual injections.

However, it's labelling is for a different country.

### Same active ingredient

They call the active ingredient, "Salmo-calcitonin. synth". It is still the same active ingredient in the same quantity.

### Your informed consent needed

Even though it's made by the same people, this medicine has not been approved by Medsafe. This means your prescriber and pharmacist have extra steps they have to follow.

These include talking to you about what this means and getting your informed consent.
