

Duolin nebulers supply issue

Salbutamol and ipratropium nebulers

The Duolin brand of nebulers is no longer available.

Combiprasal is your temporary new brand

To make sure you can continue to access this treatment, we have funded Combiprasal nebulisers.

While this medicine has not been approved by Medsafe, it has been approved for use in the United Kingdom.

Your informed consent needed

Because Medsafe hasn't approved this, your prescriber and pharmacist have extra steps they have to follow.

These include talking to you about what this means and getting your informed consent.

Same active ingredients, in the same amounts

Combiprasal nebulers have the same active ingredients in the same quantity as Duolin. They should work in the body the same way.

Combiprasal comes in vials.

More information

There's more information about this on our website. Use the web address or scan the QR code with your phone.
