

Solax is your new brand

Your brand is changing from Laxsol to Solax

Different name, but it will work the same

Solax is made by a different company, but it contains the same active ingredients in the same amount. It should work in your body the same way as Laxsol.

The tablets look similar. They are the same size and a similar maroon colour.

Solax comes in a bottle with 100 tablets (Laxsol comes in bottle with 200 tablets).

Why is this happening?

This is a tender brand change. Every year, Pharmac runs a tender process to create competition among suppliers to supply many medicines used by New Zealanders.

The tender helps Pharmac manage the costs of medicines. Any savings we make are returned to the medicines budget to help pay for new medicines.

Your brand change is helping fund more medicines for more New Zealanders.
