

Naltrexone | Supply issue

Your usual Naltraccord tablets are no longer available.

Temporary alternative

Pharmac has funded a different brand of your usual medicine, called Naltrexone-GH.

Same active ingredient

The tablets contain the same active ingredient, in the same amount.

You should not notice any difference in how it works.

You will notice the tablets are a different colour and shape.

Your informed consent needed

This medicine is approved for use in Australia, but Medsafe hasn't approved this product for New Zealand.

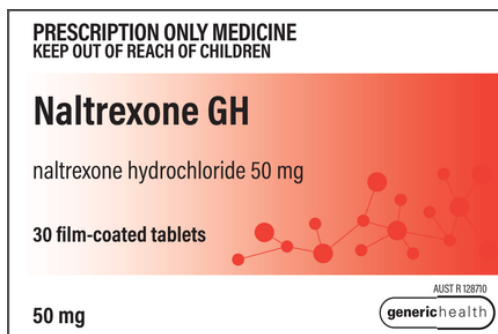

Because of this your prescriber and pharmacist have extra steps they have to follow.

These include talking to you about what this means and getting your informed consent.

More information

There's more information about this on our website. Use the web address or scan the QR code with your phone.
