

Teriparatide: Supply issue

There is a supply issue affecting your usual teriparatide injection.

Temporary Forteo brand

To ensure you can continue to access treatment, you are getting Forteo brand injections. These injections are labelled for sale in the US.

It has the same active ingredient in the same quantities as your Teriparatide-Teva injection. It also has the same injector style.

You should not notice any difference when using this product.

Your informed consent needed

Because Medsafe hasn't approved this product, your prescriber and pharmacist have extra steps they have to follow.

These include talking to you about what this means and getting your informed consent.

More information

There's more information about this on our website. Use the web address or scan the QR code with your phone.
