Colds and flu can’t be fixed with antibiotics, because they’re a viral infection. Antibiotics only work on infections caused by bacteria. We need to use antibiotics carefully, or they’ll stop working.

Always take your doctor, nurse or pharmacist’s advice on using antibiotics.

Antibiotics don’t help most ear infections get better any faster. Pain relief medicines (like paracetamol and ibuprofen) will help your child feel more comfortable.

Always take your doctor, nurse or pharmacist’s advice on using antibiotics.
