## Changed approach to 'free stock' in the HML Rules

Following sector feedback, we have modified our notified approach regarding free stock for the transition phase, by creating a specific exception to allow for the use of such stock for new patients without requiring a PHARMAC approval process.

Instead, we'll require DHBs or suppliers of the medicine to notify us of free stock programmes in advance of commencing any patient on the programme. We'll look at developing a formal process to allow that notification, but in the meantime we are seeking information on the nature and full intended scope of the programme.

We've published the amended rule on our website earlier in July, and this Update reflects the change. Please see page 15 for the amended wording. While the Schedule Rules establish PHARMAC's requirements, prescribers also need to comply with any other legal or DHB level requirements.

The new approach is a transitional arrangement while we consider in more detail how best to approach the issue of free stock so as to meet the national consistency goals of the HML. This is in line with the overall HML transition approach to monitor issues as they arise and maintain a flexible approach.

Existing patients (being treated before 1 July 2013) may continue receiving any 'free stock' they are being treated with under Rule 13 (Pre-Existing Use).

## DHB section of the NPPA Rapid Assessment application form

At the same time as we've introduced the NPPA process for HML exceptions requests, we've taken the opportunity to improve all our NPPA forms. There is a new form for making a routine NPPA application and we have introduced the Rapid Assessment form for DHB hospital prescribers to use. Some DHBs may choose to use the PHARMAC Rapid Assessment form in their own rapid assessment processes.

These are all in a downloadable, electronic format that applicants can complete on their computer desktops using Word. The forms can be partially completed, sent over DHB intranets to other staff for their input, and copies can be saved in the patient file. The forms can also be submitted over the web along with attachments.

## Q&A page

Just a reminder that anyone from a DHB can contact our advice line for information or specific questions we haven't already answered - 0800 66 00 50, then press 2.

Some common questions are published on our website in the Factsheets and Advice section and we aim to add to these regularly. If your question isn't answered there, do get in touch using the details on the back page of this HML Update.

The August Update includes all changes made since the published 1st edition of the HML. The Update is to be used in conjunction with the HML.

## Changes to Section H - effective 5 July 2013 (continued)

### VACCINES

- 181 DIPHTHERIA AND TETANUS VACCINE (amendment to restriction)  
 → Inj 2 IU diphtheria toxoid with 20 IU tetanus toxoid in 0.5 ml syringe
- Restricted  
 Any of the following:
- 1 For vaccination of patients aged 45 and 65 years old; or
  - 2 For vaccination of previously unimmunised patients; or
  - 3 For revaccination **of children** following immunosuppression; or
  - 4 For revaccination for patients with tetanus-prone wounds.
- 181 HAEMOPHILUS INFLUENZAE TYPE B VACCINE (amendment to restriction)  
 → Inj 10 mcg vial with diluent syringe
- Restricted  
 Any of the following:
- 1 For primary vaccination in children; or
  - 2 For revaccination **of children** following immunosuppression; or
  - 3 For children aged 0-18 years with functional asplenia; or
  - 4 For patients pre- and post-splenectomy.
- 182 PNEUMOCOCCAL CONJUGATE (PCV13) VACCINE (amendment to restriction)  
 → Inj 30.8 mcg in 0.5 ml syringe
- Restricted  
 Any of the following:
- 1 For high risk children under the age of 5; or
  - 2 For patients aged less than 18 years pre- or post-splenectomy or with functional asplenia; or
  - 3 For revaccination **of children** following immunosuppression.
- 182 PNEUMOCOCCAL (PPV23) POLYSACCHARIDE VACCINE (amendment to restriction)  
 → Inj 575 mcg in 0.5 ml vial
- Restricted  
 Any of the following:
- 1 For patients pre- and post-splenectomy or
  - 2 children aged 0-18 years with functional asplenia
  - 3 For revaccination **of children** following immunosuppression.
- 183 DIPHTHERIA, TETANUS, PERTUSSIS, POLIO, HEPATITIS B AND HAEMOPHILUS INFLUENZAE TYPE B VACCINE (amendment to restriction)  
 → Inj 30 IU diphtheria toxoid with 40 IU tetanus toxoid, 25 mcg pertussis toxoid, 25 mcg pertussis filamentous haemagglutinin, 8 mcg pertactin, 80 D antigen units poliomyelitis virus, 10 mcg hepatitis B surface antigen in 0.5 ml syringe (1) and inj 10 mcg haemophilus influenzae type B vaccine vial
- Restricted  
 Either:
- 1 For primary vaccination in children; or
  - 2 For revaccination **of children** following immunosuppression.

## Changes to Section H - effective 1 July 2013

- 11 14 Clinical Trials **and Free Stock**
- 14.1 DHB Hospitals may Give any Pharmaceutical that is funded by a third party and is being used:
- 14.1.1 as part of a clinical trial which has Ethics Committee approval; or
- 14.1.2 for on-going treatment of patients following the end of such a clinical trial.
- 14.2 **DHB Hospitals may Give any Pharmaceutical that is provided free of charge by a supplier, provided that the Pharmaceutical is provided as part of a programme of which the DHB, or supplier, has notified PHARMAC.**

### ALIMENTARY TRACT AND METABOLISM

15	MESALAZINE (correcting formulation) Tab EC 400 mg .....	49.50	100	Asacol
18	INSULIN LISPRO WITH INSULIN LISPRO PROTAMINE (↓ price) Inj insulin lispro 25% with insulin lispro protamine 75%, 100 u per ml, 3 ml cartridge.....	42.66	5	Humalog Mix 25
	Inj insulin lispro 50% with insulin lispro protamine 50%, 100 u per ml, 3 ml cartridge.....	42.66	5	Humalog Mix 50
19	URSODEOXYCHOLIC ACID (amendment to restriction) ➔ Cap 250 mg – 1% DV May-12 to 2014.....	71.50	100	Ursosan

#### Restricted

#### Alagille syndrome or progressive familial intrahepatic cholestasis

#### Either:

1. Patient has been diagnosed with Alagille syndrome; or
2. Patient has progressive familial intrahepatic cholestasis

#### Chronic severe drug induced cholestatic liver injury

#### All of the following:

1. Patient has chronic severe drug induced cholestatic liver injury; and
2. Cholestatic liver injury not due to Total Parenteral Nutrition (TPN) use in adults; and
3. Treatment with ursodeoxycholic acid may prevent hospital admission or reduce duration of stay

#### Cirrhosis

#### Both:

1. Primary biliary cirrhosis confirmed by antimitochondrial antibody titre (AMA) > 1:80, and raised cholestatic liver enzymes with or without raised serum IgM or, if AMA is negative by liver biopsy; and
2. Patient not requiring a liver transplant (bilirubin > 100umol/l; decompensated cirrhosis)

#### Pregnancy/Cirrhosis

#### Either:

1. Patient diagnosed with cholestasis of pregnancy

#### 2. Both:

- 2.1. Primary biliary cirrhosis confirmed by antimitochondrial antibody titre (AMA) > 1:80, and raised cholestatic liver enzymes with or without raised serum IgM or, if AMA is negative, by liver biopsy; and
- 2.2. Patient not requiring a liver transplant (bilirubin > 170umol/l; decompensated cirrhosis).

Note: Liver biopsy is not usually required for diagnosis but is helpful to stage the disease.

#### Haematological transplant

#### Both:

1. Patient at risk of veno-occlusive disease or has hepatic impairment and is undergoing conditioning treatment prior to allogenic stem cell or bone marrow transplantation; and
2. Treatment for up to 13 weeks.

#### Total parenteral nutrition induced cholestasis
